A GOOD ADVERTISEMENT.—One of our prominent business men said to us the other day: "In the spring my wife got all run down and could not eat anything; passing your store I saw a pile of Hood's Sarsaprilla in the window and I got a bottle. After she had taken it a week she had a rousing appetite, and did everything. She took three bottles, and it was the best three dollars I ever invested. C. I. Hood & Co., Lowell, Mass.

TORNADOES.

Scientifically Accounted for, and Some Remote Causes that Produce Painful Results Explained.

The following synopsis of a lecture delivered by Dr. Horace R. Hamilton before the New York society for the promotion of science, contains so much that is timely and important that it can be read with both interest and profit:

There is probably no subject of modern times that has caused and is causing greater attention than the origin of tornadoes. Scientists have studied it for the benefit of humanity; men have investigated it for the welfare of their families. It has been a vexed subject; long considered, and through all this investigation the cyclone has swept across the land carrying destruction to affluent as well as to the humblest dwellers in its track. One thing, however, is certain, the cause of the cyclone must be sought far away from the whirling body of wind itself. Its results are powerful; we therefore consider it new to us. First, the appearance of a cyclone is invariably preceded by dark spots on the face of the sun. These spots indicating a disturbed condition of the solar regions, necessarily affect the atmosphere of our earth. An unusual generation of heat in one part of the atmosphere is certain to cause a partial vacuum in another portion. Air must rush in to fill this vacuum. Hence the disturbances—hence the cyclone. This theory finds additional confirmation in the fact that tornadoes come during the day and not at night. The dark spots upon the surface of the sun, whatever they may be, seem to cause great commotion in the atmosphere of the world, and it is almost certain that the extremely wet weather of the present season can be accounted for on precisely this basis. Is it reasonable to suppose that the marvelous effect of the sun upon vegetation and life in general shall be less than upon the atmosphere itself, through which its rays come? The cause is remote, but the effect is here.

After describing some of the terrible effects of the cyclone, the speaker went on to say:

This rule finds its application in nearly every department of life. An operator is in San Francisco—the click of the instrument manipulated by his fingers, in New York. The president makes a slight stroke of the pen in his study at the White House, and the whole nation is aroused by the act. An uneasiness and disgust with everything in life, commonly called home sickness, is felt by many people, when the cause is to be found in the distant home thousands of miles away. An uncertain pain may be felt in the head. It is repeated in other parts of the body. The appetite departs and all energy is gone. Is the cause necessarily to be found in the head? The next day the feeling increases. There are added symptoms. They continue and become more aggravated. The slight pains in the head increase to agonies. The nausea becomes chronic. The heart grows irregular and the breathing uncertain. All these defects have a definite cause, and, after years of deep experience upon this subject, I do not hesitate to say that the cause is to be found in some derangement of the kidneys or liver far away from that portion of the body in which these effects appear. But one may say, I have no pain whatever in my kidneys or liver. Very true. Neither have we any evidence that there is a tornado on the surface of the sun; but is none the less certain that the tornado is here; and it is none the less certain that these great organs of the body are the cause of the trouble although there may be no pain in their vicinity.

I know whereof I speak, for I have passed through this very experience myself. Nearly ten years ago I was the picture of health, weighing more than 200 pounds, and as strong and healthy as any man I ever knew. When I felt the symptoms I have above described, they caused me annoyance, not only by reason of their aggravating nature, but because I had never felt any pain before. Other doctors told me I was troubled with malaria, and I treated myself accordingly. I did not believe, however, that malaria could show such aggravated symptoms. It never occured to me that another disease would help solve the trouble, as I did not presume my difficulty was located in that portion of the body. But I continued to grow worse. I had a faint sensation at the pit of my stomach nearly every day. I felt a great desire to eat, and yet I loathed food. I was constantly tired and still I could not sleep. My brain was unusual active but I could not think connectedly. My existence was a living misery. I continued in this condition for nearly a year, never free from pain, never for a moment happy. Such an existence is far worse than death, for which I confess I earnestly longed.

It was while suffering thus that a friend advised me to make a final attempt to recover my health. I sneered inwardly at his suggestion but I was too weak to make any resistance. He furnished me with a remedy, simple, yet palatable and within two days I observed a slight change for the better. This awakened my courage. I felt that I would not die at that time. I continued the use of the remedy, taking it in accordance with directions, until I became not only restored to my former health and strength, but of greater vigor than I have before known. This condition has continued up to the present time, and I believe I should have died as miserably as thousands of other men have died, and are dying every day, had it not been for the simple, yet wonderful power of Warner's Safe Cure, the remedy I employed.

The lecturer then described his means of restoration more in detail, and concluded as follows:

My complete recovery has caused me to investigate the subject more carefully, and I believe I have discovered the key to most ill health of our modern civilization. I am fully confident that four-fifths of the diseases which afflict humanity might be avoided were the kidneys and liver kept in perfect condition. Were it possible to control the action of the sun cyclones could undoubtedly be averted. That, however, is one of the things that cannot be. But I rejoice to say that it is possible to control the kidneys and liver; to render their action wholly normal, and their effect upon the system that of purifiers, rather than poisoners. That this end has been accomplished largely by means of the remedy I have named I do not have a doubt, and I feel it my duty to make this open declaration for the enlightenment of the profession and for the benefit of suffering humanity in all parts of the world.

Our Daughters.

The foe of American social life is the tendency of luxury and effeminacy among the well-to-do young women of our American cities and large towns. They do not realize how this dreadful mania for expensive pleasures and a life of idleness and amusement, is destroying their health, abolishing true marriage, feeding the flames of gross sensuality and intemperance among young men and undermining the hopes of the best parents of the land. Some of them will never know it in this world. But most of them have no real purpose to waste their lives in the world's ways. Each is a lightning [illegible] mothers, teachers, ministers of religion [illegible] Christianity, humanity, [illegible] Thousands of good-hearted young girls are sacrificed every year, when a little wise and prudent guidance would save them. But we feel that they should be told that unless they change this life they will pass away like the flowers of June, and a more hardy and resolute class occupy their places.

A Case Not Beyond Help.

Dr. M. H. Hinsdale, of Kenawee, Ill. advises us of a remarkable cure of consumption. He says: "A neighbor's wife was attacked with violent lung disease, and pronounced beyond help from Quick Consumption. As a last resort the family were persuaded to try Dr. Wm. Hall's Balsam for the Lungs. To the astonishment of all, by the time she had used up one half dozen bottles she was about the house doing her own work. I saw her at her worst and had no idea she would recover."

Watson's Neuralgia King.

This is one of the best remedies for Neuralgia ever invented. It is not a liniment, but is a medicine to be taken internally, and cures by going right to the root of the disease. A lady who had tried many other things, without relief, tried Neuralgia King, and was immediately cured. We guarantee it in all cases, when used according to directions.

EARACHE.—This painful and troublesome disease in pathological terms means acute inflammation of the membrana tympani. The inflammation may be quickly subdued, the patient relieved from excruciating pain, and saved, perhaps, from subsequent confirmed deafness, by the following treatment, which is similar to that so beneficial in analogous cases of disease of the eye, viz.: leeches behind the ear, hydrargyri oxeta and belladonna powders, with warm fomentation.

Rev. Father Wilds' EXPERIENCE.

The Rev. Z. P. Wilds, well-known city missionary in New York, and brother of the late eminent Judge Wilds, of the Massachusetts Supreme Court, writes as follows:

"N. Y. 5th St., New York, May 16, 1882.

Messrs. J. C. AYER & Co., Gentlemen:—Last winter I was troubled with a [illegible] intermittent fever, being bitter after [illegible] more especially my bowels, which [illegible] to [illegible] at night, and burned so intensely, that I could scarcely bear my clothing over them. I was also a sufferer from severe catarrh and extended cough, my appetite was poor, and my system a good [illegible] that state. Knowing the value of AYER'S SARSAPARILLA, by observation in many other cases, and from personal use in former years, I began taking it for the above complaint of bowels. My age has [illegible] I found the first dose [illegible] the fever and relieving the bowels, which also ceased. My catarrh and cough [illegible] by the same means, and my general health greatly improved and is now excellent. I feel a [illegible] for Sarsaparilla, and I attribute these results to the use of the SARSAPARILLA which I recommend with all confidence as the best blood medicine ever devised. I took it in small doses three times a day, and used, in all, less than two bottles. I place these facts at your service, hoping that information may do good.

Yours respectfully, Z. P. WILDS."

The above instance is but one of the many constantly coming to our notice, which prove the perfect adaptability of AYER'S SARSAPARILLA to the cure of all diseases arising from impure or impoverished blood, and a weakened vitality.

A Common-sense Remedy.

SALICYLICA.

No More Rheumatism, Gout or Neuralgia.

Immediate Relief Warranted.
Permanent Cure Guaranteed.

FIFTEEN years established and never known to fail in a single case, acute or chronic. Refer to all prominent physicians and druggists for the standing of Salicylica.

SECRET.

THE ONLY DISSOLVER OF THE POISONOUS URIC ACID WHICH EXISTS IN THE BLOOD OF RHEUMATIC AND GOUTY PATIENTS.

SALICYLICA is known as a common-sense remedy, because it strikes directly at the cause of Rheumatism, Gout and Neuralgia, while so many so-called specifics and supposed panaceas only [illegible] the effects.

It has been conceded by eminent [illegible] that outward applications, such as rubbing with oils, ointments, liniments and soothing lotions will not eradicate these diseases which are the result of the poisoning of the blood with Uric Acid.

SALICYLICA works with marvelous effect on this acid and so removes the disorder. It is now exclusively used by all celebrated physicians of America and Europe. Highest Medical Academy of Paris reports 95 per cent. cures in three days.

REMEMBER

that SALICYLICA is a certain cure for Rheumatism, Gout and Neuralgia. The most intense pains are subdued almost instantly.

Give it a trial. Relief guaranted or money refunded.

Thousands of testimonials sent on application.

$1 a Box, 6 Boxes for $5.

Sent free by mail on receipt of money. Ask your druggist for it.

But do not be deluded into taking imitations or substitutes, or something recommended as "just as good." Insist on the genuine with the name of Washburne & Co., on each box, which is guaranteed chemically pure under our signature, an indispensible requisite to insure success in the treatment. Take no other, or send to us.

Too Much of a Good Thing.

We have read at least one laughable story of a green cook undertaking to boil "swamp-seed" without knowing how. Prentice Mulford (in the San Francisco *Chronicle*) tells another, of himself, while doing culinary duty in a California sandbar camp, among the "Forty-niners:"

My experience taught me of some things not thought of before. Once, while housekeeping, I bought a sack of rice. I had no idea then of the elastic and durable properties of rice.

A sack looked small, but rice swells amazingly. When I put the rice on to boil the first swelled up, forced off the lid and oozed over.

Then I shoveled rice by the big spoonful into every empty thing which I could find in the cabin.

Still it swelled and oozed. Even the wash-basin was full of half-boiled rice. Still it kept on. I saw then that I had put in too much—far too much.

The next time I tried half the quantity. That swelled, boiled up, oozed over and also oozed. I never saw such a remarkable grain.

The third time I put far less to cook. Even then it arose and filled the pot. The seeds looked minute and harmless enough before being soaked.

At last I became disgusted with rice. I looked at the sack. There was the merest excavation made in it by the quantity taken out. This alarmed me. With my gradually decreasing appetite for rice, I reflected and calculated that it would take seven years on that bar ere I could eat all the rice in that sack. I saw it in imagination all boiled at once and filling the entire cabin. This determined me. I shouldered the sack, carried it back to the store and said:

"See here! I want you to exchange this cereal for something that won't swell so in the cooking. I want to exchange it for something which I can eat up in a reasonable length of time."

The storekeeper was an obliging man. He took it back. But the reputation, the sting of buying an entire sack of rice remained. The "boys" had "spotted" the transaction. The merchant had told them of it. I was reminded of the sack of rice years after.

St. Petersburg in Summer.

A traveler should always make it a point, when he finds it possible, says a correspondent of the London *Times*, to visit a country when it is in what is called its own element. Russia is the land of snow and ice, and may probably be seen to advantage in skating and sledge-driving weather. All provisions are here made against the discomforts of a hard winter. But against the scourge of the summer dust which sweeps day and night over St. Petersburg, all the pumps drawing water from all the four branches of the Neva are inefficient. There is nothing for it but to turn one's back upon it, and that is what every man does who can manage it. The city is left to a few priests, the police, officers of her Britannic Majesty's squadron, who are on a week's holiday, and to myself; and the Hotel de l'Europe, the best in the town, is being swept, scraped and painted like a London club in mid-summer, for this is the dead season in St. Petersburg, and this place is really too much of a thing for a man to have it all to himself.

What a town it is! How large, how dismally empty! How it squats like an immense alligator half in and half out of a swamp, modeled on Amsterdam, and reminding one of Venice! What miles and miles of "prospects," or, as the French would say, "boulevards;" what endless succession of wide, open spaces and magnificent distances, of long straight lines of walls and rows of trees, and interminable avenues contrived, as it were, to allow the town ample room to run out of town! A city of churches, convents and palaces, of steeples and monuments, of gold, bronze, granite and marble, of buildings in all styles, European and Asiatic, quaint originals or indifferent copies, many of them grand and massive, yet strewn over space at haphazard, on a perfectly flat surface, grouping nowhere; nowhere laid out for effect or with an eye to the picturesque. It is a town of princes, to all appearance, or of wealthy bankers or traders, with nothing mean, no back slums, no Rag-fair, the homes of the poor, if at all existing carefully hidden out of sight; the whole covering scores of miles of ground, a maze of isles and islets, of bridges and embankments, of river and branches of river, and canal.

Perfect Success.

[illegible]

The Value of Scraps.

Few people appreciate the value of little and apparently insignificant things. In some foreign countries the litter of domestic animals is carefully collected and sold to farmers. Not a few people make a living gathering fertilizers in this way.

In the shops of jewelers and others where articles are manufactured of gold and silver great care is taken to prevent the waste of the precious metal. Every particle of filing, scraping or grinding is preserved for the assayer. The wheels upon which gold and silver have been polished when worn out, are burned, and the fire developes particles of the precious metals which could not be seen by the naked eye. Even the sweepings, after great care has been taken to pick up every bit of metal that may have fallen on the floor, are preserved, and in New York City sell for $70 a barrel. It is calculated that when a jeweler's shop floor is to be renewed the crevices will more than pay the cost of the new floor.

It is said that the receipts from the sale of the refuse of starch mills, which is used by farmers as feed for hogs and other stock constitute a large part of the profits, and that if this refuse could not be sold some mills would be compelled to stop or be run at a loss.

The paper "trimmings" of a large printing office like the Harpers or Appletons are worth thousands of dollars a year.

Lumbermen have found uses for nearly every part of a tree, and scraps that a few years ago accumulated so rapidly as to be a source of inconvenience, and consequently expense, are now sold for a good price and are in great demand.

No scrofulous infection can resist the purifying power of Ayer's Sarsaparilla. Sold by all druggists.

Miscellaneous Recipes.

Baked Egg Plant.—Trim off the stem end and boil the egg-plant for twenty minutes in salt-water, and then lay in the colander to drain until perfectly cold; peel open and take out the seed; mash the egg-plant smooth, pouring off any water that comes, and add to it half a grated nutmeg, a saltspoonful of white pepper, half a teaspoonful of salt, teacupful of milk, a tablespoonful of butter, two eggs, and bread-crumbs enough to make a thick batter of it; bake for twenty minutes in the dish you will serve it in; two tablespoonfuls of minced ham is an improvement.

To Cook a White fish.—Choose one that weighs about seven or eight pounds, boil it until it is done, then take out all the bones; take a quart of sweet milk, two onions, and a little squaller savory; boil until the milk is thoroughly seasoned, thicken it with flour, using enough to make a thin paste, add butter, pepper and salt to suit your taste. Then put in a pudding dish a layer of fish and a layer of dressing; cover the top with rolled crackers, as you do escalloped oysters, bake for three quarters of an hour, or until the top is a golden brown. Serve with mashed potatoes, spiced currants and the vegetables of the season.

Cream to Use with Layer Cake.—Take one pound of blanched almonds, pound to a paste, one coffee cup of thick sour cream, two tablespoonfuls of corn starch scalded in a little sweet milk, beat all together and spread between the layers of cake; flavor with a little almond extract. This is very rich, and is suitable for the nicest kinds of cake. For more common use an inviting cream may be made in this way: Take a pint of sweet milk, thicken it with half a cup of corn starch, add half a cup of sugar, and boil until the cream or custard is of the consistency of starch. When almost cool add one tablespoonful of lemon and vanilla and spread between the layers of cake.

Pancakes for Luncheon.—These are made of eggs, flour and milk. The just proportions are one tablespoonful of flour to each egg. To make small pancakes, beat two eggs thoroughly and add sweet milk. Then take two tablespoonfuls of flour, work into a thin paste and double batter by adding the milk and eggs and a little salt. Grease the pan with a piece of sweet lard or butter and stir briskly to prevent adhering to the bottom. When the under side is sufficiently browned, turn it. Leave the cakes folded, with sugar or honey and butter between the folds, or sugar alone. If this be too solid, add more eggs and use less flour. A slight sprinkle of grated nutmeg will be an addition.

Plain Duffs.—You may call it steam pudding. You can make it in a jiffy, and the only time it takes is the boiling of it. You are caught sometimes, and if pudding is the word this is the way to get out of it. One quart of flour sifted, a teacupful of currants and a tablespoonful of baking powder, and a pint of suet; mix them well first, and then add enough cold water to make a stiff batter; put her in a pudding tin cover her with a cloth, and let her go it in a steam boiler for one hour and a half. If you want a richer duff, just go through the same thing, adding the yolks of five eggs and a tablespoonful of butter. The Sauce—You see you ain't got no sugar in them. This here sauce is quick, too. You want two tablespoonfuls of butter, and just a trifle less of sifted flour, and you grate a quarter of a nutmeg into it, and you add a teaspoonful of vanilla extract, or half a teaspoonful of lemon essence, and a whole teacupful of granulated sugar. Now smooth it all together, adding teaspoonfuls of warm water from time to time as you boil it until you get it to the thickness you want; but after all, I've seen many a nice lady take that sauce and then dash molasses on the whole thing, and say molasses was the best.

Wolcott, N. Y.,

Rheumatic Syrup Co.:

Gents—I have been troubled for the past year with rheumatism, or cramp in my limbs so at times I could scarcely get around. I consulted several physicians and was treated by them but received no relief or benefit. I commenced taking Rheumatic Syrup, and three bottles cured me entirely. I can most heartily recommend your Syrup, for it has cured quite a number that I am personally acquainted with. Harlow Merrill,

Of the firm of Merrill & Booth.

An excess of calcareous or limy matter in the blood and an inefficient supply of acid in the urine to hold these particles in solution is the direct cause of gravel, and the best known remedy to dissolve and expel these corrupt and poisonous particles from the system is Rheumatic Syrup.

The woman caught in a shower with her best bonnet on and with no umbrella, can never be persuaded that the rain was needed.

"I'd sooner be cursed than kissed," said Tennyson in his latest volume, which leads us to think that there are a great many homely women in his neighborhood.

Hay Fever.

From Col. J. Maidhof, of New York: "I have suffered severely for the last ten years from Hay Fever in early and mid-summer, and in the fall. I desire in the interest of my fellow sufferers to testify in favor of Ely's Cream Balm. My short use of it demonstrates its efficacy. J. Maidhof, 401 Broadway.

I can recommend Ely's Cream Balm to relieve all persons suffering from Rose Cold and Hay Fever. I have been a great sufferer from these complaints and have used it. I have recommended it to many of my friends for Catarrh, and in all cases where they have used the Balm freely they have been cured." T. Kenney, Dry Goods Merchant, Ithaca, N. Y.

We speak of the snow as an image of death. It may be this, but it hides the everlasting life under its robes,—the life to be revealed in due time, when all cold shadows shall melt away before the ascending sun, and shall be not unclothed, but clothed upon, and mortality shall be swallowed up of life.—[Robert Collyer.

KAHOKA, Mo., Feb. 9, 1880.

I purchased five bottles of your Hop Bitters of Bishop & Co., last fall, for my daughter, and am well pleased with the Bitters. They did her more good than all the medicine she has taken for six years.

WM. T. McClure.

The above is from a very reliable farmer, whose daughter was in poor health for seven or eight years, and could obtain no relief until she used Hop Bitters. She is now in as good health as any person in the country. We have a large sale, and they are making remarkable cures.

W. H. Bishop & Co.

Labor.

"Ho! all who labor—all who strive
Ye yield a lofty power:
Do with your might, do with your strength
Fill every golden hour."

Assuredly labor is our birthright—and what a great and glorious privilege is that "most noble dower!"

How dark and drear the prospect that lies before that unhappy being who is physically or mentally debarred from thus fulfilling one of our Creator's great commands! If not to work why were we sent upon this beautiful and ever teeming earth? Surely it was not to lie with idly folded hands upon a rose-leaved couch, watching the busy toilers perform their tasks.

Think of the healthful, invigorating effect of a morning passed in real hard work. My life on it, the night that follows such a morning will be far more sweet and refreshing than that accorded to the day-dreamer who, idly lounging through those sun-lighted hours, has wasted the precious moments that seem lent, not given.

But you—oh, world-renowned and with laurel crowned brow, have won the meed of thousands—whether philosopher, or poet, or artist, whether your hand has wielded the all-powerful pen, reproduced on canvas nature's grand and lovely scenes; or by harder toil hewn from the marble block forms of life—to you I pay my homage, oh, heaven-gifted one who by ennobled labor, have kindled a ray of enthusiasm in many a life that else might have been dark and drear. Your work has not been wrought in vain!

But in our admiration of high intellect, let us not omit our tribute to the mechanical laborers, for without them our every comfort and civilization would be lost. The toilers of the land and sea, of the loom, of the forge and the mine, are our fellow-workers, and numberless others whom it would be impossible to name, for

"The workshop must be crowded
That the palace may be bright;
If the plowman did not plow,
Then the poet could not write."

About Style.

Perhaps even more women might rise to positions of distinction in many occupations suitable for them were it not for the tax on their time and strength consequent on the demands of dress and fashion. With many women dress in all its details and necessities of shopping, fitting, etc., is a business requiring an average of three or four hours daily. Subtract this from the hours of a working-day and it involves a great loss of valuable time and strength. A woman, thoroughly devoted to any art cannot dress after the regulation style and pattern. If the man desires to step out on the street for any purpose he puts on his coat and goes. If the woman so goes out it involves an outlay of at least fifteen or twenty minutes time to "fix up." There are exceptions, but this is the rule. Dress and the requirements and encumbrances of fashion prove a constant draught, impediment and encumbrance on the woman's time and strength—the young and pretty woman being here referred to. In this age of competition success in any occupation must be gained at the cost of constant, unintermitting attention and perseverance. The working editor, merchant, lawyer or artist cannot go with gloved hands, and he often gains time at the expense of a well-worn coat in the public thoroughfare. Almost without being aware of the motive, man's garb has, during the last hundred years, more and more adapted itself to the practical needs of business. Even the dandy of to-day copies the general style of the worker. How much business of any description would a man now accomplish if clad in the ribbons, frills and ruffles of the court popinjays of Charles the Second's time? Yet, relative to her own peculiar fashion, the woman retains all the encumbrances of that era.

Books.

It is chiefly through books that we enjoy intercourse with superior minds, and these invaluable means of communication are within the reach of all. In the best books men talk to us, give us their most precious thoughts and pour their soul into ours.

God be thanked for books! They are voices of the distant and the dead, and make us heirs of the spiritual life of past ages.

Books are the true levelers. They give to all who will faithfully use them, the society, the spiritual presence of the best and the greatest of our race. No matter how poor I am—no matter though the prosperous of my own time will not enter my obscure dwelling, if the sacred writers will enter and take up their abode under my roof, if Milton will cross my threshold and sing to me of Paradise, and Shakspere will open to me the world of imagination and the workings of the human heart, and Franklin enrich me with his practical wisdom, I shall not pine for want of intellectual companionship, and I may become a cultivated man though excluded from what is called the best society in the place where I live.—[Channing.

Curious Habits.

Great men often fall into curious habits, which they find it impossible to conquer. Augustus Hare, one of the ripest scholars in the English pulpit, and a refined gentleman, when he had ended a train of hard thinking, would spin around on his heel a few seconds and then resume work again. Neander, the famous church historian, could not lecture to his students unless he had a goose-quill to pull to pieces as he talked, and it was necessary to supply a second goose-quill when the first was completely stripped. William Wilberforce became so absorbed in conversation in evening companies as to forget himself. He would lift himself from his chair in his earnestness, move forward a little, and gradually approach perilously near to the edge. It was a tradition in fashionable English circles that he had fallen several times to the floor. But in families where he was loved it was the custom to station one of the older children behind his chair to move it forward as he moved, and guard him against peril. Some who afterward became leaders in English society retained among the pleasant memories of childhood recollection of the services rendered to the brilliant and eloquent converser.

The following poemlet is excellent of its kind:

"From off the running rivulet the icy chain is thawed,
And the flutter of the winglet of the dovelet is abroad;
The quacklet of the ducklet in the brooklet we can hear,
And the rootlet of the piglet will presently appear."—*Texas Siftings.*

Mrs. Cole, of Windham, N. H., declares that her life was saved by Hood's Sarsaparilla. She had 37 terrible Scrofulous sores.

A PAPER FOR THE TIMES.

The CHICAGO DAILY NEWS is the pioneer of cheap journalism in the West.

It was founded Dec. 20, 1875, as an evening paper with editions at noon, 3 and 5 o'clock. A complete newspaper,—complete in the one essential feature of American journalism, i. e., presenting *all the news*,—sold on the street at any price less than the conventional nickel, was an innovation in western journalism, and, like all new enterprises, the "cheap paper" had to contend with long-established custom and even prejudice before securing the recognition it sought and deserved. At the end of the first year, 1876, it had achieved a daily sale ranging from 8,000 to 10,000 copies. From this time forward its progress was beyond all precedent in American journalism. In 1877 its average daily circulation was 22,037 copies; in 1878, 33,314 copies; in 1879, 45,194 copies; in 1880, 64,601 copies. On the morning of March 21, 1881, the CHICAGO MORNING NEWS made its first appearance. In September following, the sixth month of its publication, its circulation amounted to 490,019 copies, or a daily average of 18,846 copies,—a circulation never before attained by any daily paper in the United States, within a corresponding time.

The success of the DAILY NEWS, therefore, as now established, consists of its MORNING, NOON, and EVENING ISSUES, known respectively as the MORNING NEWS, NOON NEWS, and EVENING NEWS. The average combined circulation of the three issues of the DAILY NEWS now exceeds 90,000 copies each day. To appreciate the exceptional extent of this vast circulation it is only necessary to state that it is over three times the circulation of *any other daily paper in Chicago or the West*, while its circulation *in the city of Chicago* is GREATER than ALL other Chicago daily papers COMBINED. Being an independent paper, the organ of no party, sect, or class, it is the one universally read Chicago paper. The subscription price of the DAILY NEWS, either MORNING or EVENING issue, is $6.00 per year, or $2.00 for four months, postage included.

On July 2, 1878, the DAILY NEWS purchased the CHICAGO EVENING POST, consolidated its daily issue with the DAILY NEWS, and continued its weekly issue under the name of the CHICAGO WEEKLY NEWS. The WEEKLY NEWS under its present name and management is therefore less than five years old, though as a consecutive weekly publication it is now in its twentieth year. The CHICAGO WEEKLY NEWS takes a corresponding field among weekly newspapers so that occupied by the DAILY NEWS among dailies. It gives the news of the world in condensed yet complete form. Its Chicago market quotations are especially complete and trustworthy. That the CHICAGO WEEKLY NEWS has been correct in its judgment of the requirements of a large class of readers of the weekly press is best evidenced by the extent of its circulation, which aggregated in the month immediately preceding the date of this writing, 202,053 copies, or a weekly average of 50,513 copies. The subscription price of the WEEKLY NEWS is but SEVENTY-FIVE CENTS per year, postage included.

The phenomenal success of the CHICAGO NEWS in both its DAILY and WEEKLY ISSUES has been achieved by observing that fundamental principle of offering the best article of its kind in the market at the lowest cost to the purchaser. The CHICAGO NEWS is cheap only in price. The character of its news service is unsurpassed. It is a member of the Western Associated Press, and in addition to the unrivalled news service furnished by this Association, it enjoys the exceptional advantage of its own special telegraphic wire from Chicago to Washington and New York on the East, and to Milwaukee and St. Paul on the North. Giving all the news through reportorial and telegraphic facilities unsurpassed by those of any other Chicago paper, it commends itself to all classes in the community, to rich and poor alike, in that it offers an absolutely complete record of the news of the day in concise form, without the needless verbiage and amplification which render so many metropolitan journals "a weariness to the flesh," while its price brings it within the reach of all classes. It is a paper for the times.

Rheumatic SYRUP.

The Greatest Blood Purifier Known!

RHEUMATISM CURED.

ROCHESTER, N.Y., Apr. 6, '82.
Rheumatic Syrup Co.:
Gents—I have been a great sufferer from Rheumatism for four years with different kinds of pains, and have not been able to do a day's work during that time. I commenced taking your Syrup, and I cheerfully say Syrup. After taking it a short time I have been greatly benefited by its use. I can work better now. Continuing its use a fourth bottle, I think it the best medicine for the blood and for general ill health I ever heard of for rheumatism. It is a specific, for I think it has no equal. [illegible] M. D.
CHESTER PARK, Ills.

SCROFULA CURED.

PORT BYRON, N.Y., Feb. 23, '82.
Rheumatic Syrup Co.:
I had been doctoring for three years with the physicians, for scrofula, as some from neuralgia, and have not seen a sign of the disease since November, 1880, when I first commenced using your Syrup. Not knowing what it was to be free from pain until I commenced using your Syrup, to my surprise I began to have pain since using the fifth bottle. I shall use it no more. Yours truly, MRS. WM. STRANG, Ills.

NEURALGIA CURED.

FAIRPORT, N.Y., March 12, '82.
Rheumatic Syrup Co.:
Gents—Since November, 1880, I have been a constant sufferer from Neuralgia, and have not been free from pain until I commenced using your Syrup. After taking the first bottle I was free from pain for a few weeks, but now I find myself as much troubled as before taking your Syrup. I think it the best remedy I have ever heard of for rheumatism and neuralgia. W. B. CHASE.

Manufactured by RHEUMATIC SYRUP CO., 1 Plymouth Ave., Rochester, N. Y.

CASTORIA

for Infants and Children.

Castoria promotes Digestion and overcomes Flatulency, Constipation, Sour Stomach, Diarrhœa, and Feverishness. It insures health and natural sleep, without morphine.

"Castoria is so well adapted to Children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D., 82 Portland Ave., Brooklyn, N. Y.

What gives our Children rosy cheeks,
What cures their fevers, makes them sleep:
'Tis Castoria.

When babies fret and cry by turns,
What cures their colic, kills their worms:
But Castoria.

What quickly cures a cough or pain,
Sour Stomach, Colds, Indigestion:
But Castoria.

Farewell then to Morphine Syrups,
Castor oil and Paregoric, and
Hail Castoria!

CENTAUR LINIMENT—an absolute cure for Rheumatism, Sprains, Burns, Galls, &c. The most Powerful and Penetrating Pain-relieving and Healing Remedy known to man.

Dr. CLARK JOHNSON'S

ENTERED AT THE POSTOFFICE AT TECUMSEH, MICHIGAN, AS SECOND CLASS MATTER.

RAISIN VALLEY SEMINARY

The Twentieth Annual Meeting of the Reunion Association Held last Friday.

The regular meeting of the Reunion Association connected with the Raisin Valley Seminary, which occurs on the second Friday in August, was held last Friday afternoon. People began to assemble about two o'clock, and by three, the hour for the exercises to begin, a goodly company had gathered, and the main hall of the Seminary was well filled. The music consisted of a vocal trio by Messrs. Lester, Green and Bartlett, with Oscar Heck, of Tecumseh, at the organ.

THE PROGRAM.

Music—Awake, for the trumpet is sounding.

Oration—John Bright, by Fred R. Hathaway.

Music—Star of a Summer Night.

Selection from Longfellow—By Miss Sara Stanley.

Music—Blame Yourself if you are Sold.

THE BUSINESS MEETING

then followed, and the following officers were chosen for the coming year:

President—Wm. S. Comfort
Vice Pres.—Robert Glenn
Recording Sec.—Alice Green
Cor. Sec.—Arthur Green
Treasurer—T. I. Sutton
Marshall—Thos. Boyd
Orator—Aaron C. Taylor
Poetess—Minnie Westgate
Music Com.—Sara Stanley, Susie Brown, Wm. Bartlett

The audience room was then transformed into a dining hall and refreshments were served *à la carte*. The representative of the HERALD was especially well provided for during this portion of the entertainment, and acknowledges his obligations. In fact the entire exercises were very enjoyable, and the twentieth reunion may be set down as a success. We are permitted to give our readers the oration in full, which was of more than ordinary merit.

JOHN BRIGHT

BY FRED R. HATHAWAY.

History measures a man by the ideas he has held and promulgated. If those ideas have tended strongly to perpetuate present institutions or to establish new ones and if they have been effectively set forth, their originator gains a correspondingly great place in history. By means of this principle let us weigh John Bright. When this man came upon the political stage the olde Tory and Whig parties were changing their names to the more modern appellations, Conservative and Liberal. The Conservative party was founded upon the doctrine of protection, upon an opposition to all changes in the laws of representation and primogeniture, upon a firm union of church and state, and upon an active foreign policy, which advocated the accession of new territory, armed interference in European politics whenever the balance of the power was in danger. The Liberal party on the contrary early accepted the doctrine of free trade; it advocated a strict neutrality in continental politics and the careful governing of present territory without further annexation; it proposed reforms in the mode of representation in the administration of laws, and in time even attacked the ancient theories of primogeniture, church and state.

Bright was of Quaker parentage. He came from a race of martyrs. He was a non-conformist. There was no blue blood in his veins; he was one of the people; for them he labored; to them he looked for support; from the outset he advocated reforms intended to better their condition. Hence from necessity he took his position in the Liberal party. Though Bright's schooling was very limited, his habit of reading and observation, together with the active part he took in a debating society in his native town of Rochdale, stored his mind with valuable information and developed his powers as a speaker. Two trips to the continent after having gained considerable reputation as a business man, broadened his views upon political and commercial topics and enabled him to come more prominently before his fellow citizens in discussing questions of local interest.

When in 1843 he entered parliament, few new members were better qualified than he to intelligently transact the business of the house. In his first campaign he declared his platform to be "freedom of trade, justice to all classes of people, impartiality in the administration of laws, a government to protect and not to oppress, and to support those principles that are conservative of all that is worthy of conservation beneath the dominion of the British Empire." These are strange words for a young politician who declared himself to be the exponent of no party, who pulled no wires in order to gain office, but simply said to the people, those are my sentiments, if you wish to elect me on the strength of them all right, if not I will remain at home. Nevertheless that was the course he chose to follow, and from that time to this he has never been out of office, a year, except for sickness, until he recently retired to private life.

A hearty support of such principles for forty years speaks well for his constituents, well for the English people, and gloriously for John Bright. As we are often able to trace a river to its fountain head, so we may sometimes trace an idea, however general, it may be at present backward, until we find those from whom it originated. This in part is true with the doctrine of free trade in England. The passage of the "corn laws" in 1816 was thought for a long time to have been a wise measure. Little, if any fault was found with the doctrine of protection until 1839 when the question began to be discussed. Four years of agitation and the idea had grown sufficiently for its advocates to attempt a system of organization and introduce a bill into parliament. Another year and that famous institution the "Anti-Corn Law League" was formed with Cobden and Bright as members. From this time until the laws were repealed those men gave all the powers of both mind and body to the promulgation of the principles of free trade. Such was the power of their influence, logic and oratory that in eight years they completely changed public opinion upon the subject, consequently the party in power, and forced a bill through both houses of parliament abolishing the corn laws and making England a free trade country.

To these men more than anyone else England owes the repeal of these laws. Cobden the organizer and Bright the orator were the names always associated together in this work. The one, while possessing certain gifts as an orator was still better adapted to formulate. He could go hither and thither, marshaling his forces at the right point, oversee the battle, and after it was won, garrison the place and dispose of his prisoners. The other went into the thickest of the battle and by his own valor gained the foremost place in the ranks of the free traders.

It was during this agitation that Bright achieved his renown as an orator. His was the logic that the giving aside shams come out in plain forcible words, backed by earnestness and sincerity.

It is useless to separate Bright and Cobden in this work; neither could have achieved success without the other; each relied on his fellow, knowing that together they could win the battle. Whether the effects of this move have been good or bad is a side issue; certain it is that to these two men more than any one else belong the blame or praise arising from changing the English policy from protection to free trade. Upon the vexed Irish question Bright has always advocated a policy, which to say the least has been consistent with itself. In one of his early speeches he said "the great cause of Ireland's calamities is that Ireland is idle. I believe that it would be found, on inquiring, that the population of Ireland do not work more than two days in the week. Wherever a people are not industrious and are not employed, there is the greatest danger of crime and outrage. Ireland is idle, therefore she starves; she starves, therefore she rebels. We must choose between industry and anarchy; we must have one or the other in Ireland." This condition required both moral and political reforms, and Bright in arguing the question has always presented the principal remedies. Land reform, including prohibition of entail, and security of tenantry, religious equality and extension of suffrage. As long as the landed proprietors in Ireland are less than 12,000 persons, and one-third of the 20,000,000 acres in the island is owned by 292 individuals, it is worse than useless to attempt a settlement of the question. While four-fifths of the population are Catholics it is folly to force the Church of England upon them as the established church. Not until they are lifted from a position worse than serfdom by the extension of suffrage will they become peaceful citizens.

Stop keeping 50,000 soldiers in Ireland to keep the people down, and voting annually vast sums to keep them up, but rather give Irishmen justice in these three particulars, and the Emerald Isle will be as peaceful a province as Scotland or Wales. No course in Bright's politics has been the cause of so much censure as that which he pursued in the Crimean war. His action lost him his seat in parliament as a representative from Manchester, but he was immediately returned from Birmingham, the manufacturing metropolis of England. Bright declared his foreign policy to be "amity with all nations, justice and courtesy to all, but intimate, political alliance with none." In opposition to the governmental policy, to the parliament, to his constituents, to the majority of the English people he dared stand up and declare that it was wrong in the extreme to drag a nation of 30,000,000 people into a long and bloody struggle for a decrepit and tottering empire which all the nations of Europe could not long sustain.

This question called forth some of Bright's finest speeches, and one in particular gained for him a place in the foremost ranks of impromptu orators. After the contest was over and Englishmen began to reflect and to balance in an unimpassioned manner the debit and credit side of this war, they found that the Quaker statesman had not been as fanatical as they had thought, and Gladstone, in summing up Bright's policy twenty years after said, "men ought, like Bright in the Crimean war, to be willing to lay their popularity as a sacrifice upon the altar of duty."

Acting upon this same foreign policy Bright has kept free from those tangling alliances other European statesmen have woven into their political life. His French neighbors across the channel have never caused him half the trouble they have his associates. By leaving them alone except when business or politeness required that he should pay them some attention, he has not only lived peacably with these people, but convinced them that there is at least one Englishman who is not their mortal enemy. From the very first he has counselled to keep out of the Egyptian trouble, and as early as 1879 he declared that "the bondholders in connection with the Khedive might be put into two classes: The fools who lent the money, and the gamblers who have been speculating since." To waste English blood and English treasure in such a squabble was, in his judgement, poor diplomacy and worse morality. The great province of India with its vast population degraded to such a low state of civilization, has always been a question of great interest to Bright. He has made it the subject of much careful study and has perhaps, mastered the problem as well as any of his contemporaries. In the light of all his investigation he counsels to, withdraw part of the troops, curtail expenses, stop despotic rule and treat the inhabitants as human beings, not as mere animals to be taxed to their utmost to gain a revenue for the crown. He has always maintained that India is too large for one person to govern properly and that it should be divided and ruled over by five presidents.

Mr. Bright has left no less an impress on domestic legislation than upon foreign and colonial affairs. As a nonconformist he has always been a firm opponent to the union of church and state. As a man arising from the people he has opposed the laws of primogeniture and entail. As a Quaker he has opposed to the capital punishment. As a good liberal he has sought the extension of suffrage. As a free trader he has fought protection. As a lover of humanity he has elevated the down-trodden. As a statesman he has said disband your armies and navies, destroy your munitions of war, break down your battlements, expend your annual war tax in supporting schools and churches, beat your spears into pruning hooks, your swords into plowshares.

But as loyal Americans we most love to contemplate that period of Bright's life from 1861 to '65. When our own nation was convulsed in the throes of civil war, when state rights and slavery fought to dismember our union, when treason boldly stalked the land, when it seemed as if brutality would take the place of humanity, and anarchy would superceed law and order; in that dark hour when one by one, sister nations either took open stand with the south or under the guise of a haughty neutrality secretly favored our enemies; when our own mother England turned upon her children whom she had left on bleak Plymouth Rock, and for pecuniary reasons sought the death of her offspring; it was then when friends were most needed that this noble man dared stand up in the British parliament, and in the face of a hostile nation eloquently plead our cause. Mark this grand man as he comes forth to cope almost single handed with the opposition. Catch the spirit of some of his impassioned eloquence as after pleading in vain with parliament, with his constituents, with the English people, he turns at last to the God of Nations, assured that there he shall find infinite mercy blended with infinite justice. See him as he goes forth like David of old, knowing that the great Jehovah is on his side, and that he shall be more than a match for all them that do come against him. Listen as in the face of all opposition he comes forth and dares say, "I blame men who are eager to admit into the family of nations a state which offers itself to us, based upon a principle I will undertake to say more odious and more blasphemous than was ever dreamed of in Christian or in Pagan, in savage or civilized time. The leader of this revolt proposes this monstrous thing—that over a territory forty times as large as England the blight and curse of slavery shall be forever perpetrated. I cannot believe, for my part, that such a fate will befall this fair land, stricken, though it now is, in the ravages of war. I cannot believe that civilization in its journey with the sun will sink into endless night in order to gratify the blind ambition of the leaders of this revolt, who seek to wade through slaughter to a throne, and shut the gates of mercy on mankind. I have another and a far brighter vision. It may be but a vision, but I will cherish it. I see one vast confederation stretching from the frozen north in an unbroken line to the glowing south, from the wild billows of the Atlantic to the calmer waters of the Pacific main. And I see one people and one language, and one law and one faith, and over all that wide confinent, the home of freedom and a refuge for the oppressed of every race and of every clime."

Let us not be too chary of the praise which we bestow on such a friend. But upon the pages of our history let there be inscribed the words "John Bright" The Slave's Friend, America's Friend, Humanity's Friend, and as incense arose from the altars of old so may prayers and benedictions ascend to the Great God of all for him who plead so eloquently in our behalf.

We have hastily sketched the main features in Mr. Bright's life; it only remains for us to notice one or two more points and then leave you to judge his historical worth. Few men have been permitted to see their star of success travel its whole course in so uninterupted a manner, and at last sink toward the west in such an unclouded sky. Why has this been the case with John Bright? Born of Quaker parentage, the simple habits of his ancestors, their morality, their piety became a part of his nature. Through his whole life he has adhered to the principles of his forefathers. Possessing a character that is firmly founded he has not hesitated to shun the wrong and follow the right.

Wire pulling and office seeking have not been a part of his politics. He has always dealt with his constituents honestly and in turn has been rewarded with their utmost confidence. To be sure his adherence to conscience lost him his seat as a representative from Manchester, but it was not long before that town would have gladly returned him had he not already been elected from Birmingham. To do what was right whether it was popular or not has been the standpoint from which he has acted in public affairs. Though Mr. Bright's morality is of a high type in most particulars we cannot commend it in all. His position on the temperance question, while perhaps being in accordance with English customs and English etiquette, cannot meet the approbation of his American brethren. Several features of his life have been the objects of vigorous attacks. Some points have been well taken but in the main he stands a grand old man, combining in his nature those elements that tend to make men truly great. As an orator he is only surpassed in Great Britain by Gladstone. Nature richly endowed him with the requisite gifts, and long, patient study and experience has wonderfully improved those endowments. Many years ago he was able to hold an audience spellbound by his eloquence, and now, though his powers are enfeebled, there still remain enough of the former splendor not only to recall the past but to entrance his hearers and bring discomfiture upon his opponents. His wonderful power lies in his deep, rich, melodious voice; his short Anglo Saxon words; his ready command of a vast store of facts and the great earnestness with which he speaks. Humor and sarcasm are not strange weapons to him, and in the heat of debate he often wields them with marked effect. Though as a statesman his views are not popular they are nevertheless listened to with respect. Englishmen are not prepared to disband their armies and navies, reduce their tax, curtail expenses, stop annexation, prohibit primogeniture and entail, abolish capital punishment, sever church and state, grant universal suffrage and keep free from European politics simply because Quaker John Bright says it is the best policy. And yet the fact remains that his opinions are steadily growing in numbers and importance. Their position is more and more recognized in English politics. If this is not the case why that immense celebration at Birmingham a few weeks ago to pay homage to this gray-haired statesman. Few men were ever honored with such an ovation; and be not deceived, the signs of the times portend that in the future it shall require something more than a knowledge of war, to make men great. When that time shall come will not they who behold the sun that ushers in that glorious day look back into the 19th century and point to John Bright as a man who foretold by his life and teachings a time when the principles of truth and of justice, of morality and religion should be the general rock for individual action, the corner stone of social and governmental relations?

DIPHTHERIA!

THE PROSTRATION which follows Diphtheria, and the persistency with which it clings to the patient, are well known to all who have had any experience with this terrible disease.

The following letter shows how the restoring and invigorating properties of **Hood's Sarsaparilla** overcome it, and how by vitalizing and enriching the blood it neutralizes and eradicates the poisoned matter from it, bringing to the convalescent the color, life and vigor of robust health.

LOWELL, MASS.

MESSRS. C. I. HOOD & CO.: Gentlemen—My little girl had the diphtheria last April. The disease left her very weak, blood poor, with no appetite, and she could not seem to rally from its effects. HOOD'S SARSAPARILLA was recommended by a neighbor. After she had been taking it a few days we noticed a change for the better—she began to eat with a relish. It seemed to take out the poison the disease had left in her blood, the change being very noticeable in her face. She took it two months and fully regained her health, much to our delight. We now recommend HOOD'S SARSAPARILLA with a great deal of pleasure. Very truly yours,

J. R. SMITH,
19 Butterfield Street.

"That Extreme Tired Feeling."

"The first bottle has done my daughter a great deal of good; her food does not distress her now, nor does she suffer from *that extreme tired feeling* which she did before taking HOOD'S SARSAPARILLA."

Sold by all druggists. Price $1 a bottle or six bottles for $5. Prepared by C. I. HOOD & CO., Apothecaries, Lowell, Mass.

Hood's Tooth-Powder, Only 25 Cents.

(Continued from last week.)

How Watch Cases are Made.

This process of manufacture was invented by James Boss, who started in business in 1854, and the methods and tools used in making these watch cases are covered by patents. *This is the only watch case made under this process.* For many years the introduction of these goods was slow, owing to popular prejudice against "plated" goods, but gradually the public learned that the *James Boss' Gold Watch Case* was *not* a *cheap gold-washed* or *electro-plated* article, but was made of *genuine gold plates of standard quality* and *thickness*. Conscientious adherence to the determination to make the *best* watch case ever put on the market, and the adoption of every improvement suggested, has made the *James Boss Gold Watch Case* the STANDARD. TRADE MARK. In this watch case the parts most subject to wear—the *bow, crown, hinges, thumb-catches*, etc., are made of SOLID GOLD.

Send 3 cent stamp to Keystone Watch Case Factories, Philadelphia, Pa., for handsome Illustrated Pamphlet showing how James Boss' and Keystone Watch Cases are made.

(To be continued.)

Tickets for sale at the Depots.

SPECIAL NOTICES.

FOR SALE. One solid iron gray mare coming three, sire, "Banker;" dam, a "C. M. Clay" mare. Price $100. One thorough-bred Jersey bull, 11 months old, solid fawn black points, sure, and from No. 1 butter stock. Price $75. One thoroughbred Jersey-red boar, eleven months old, bred by Benson, Maule & Co., Philadelphia, Pa. Price $25. One roller grain drill, price $35. JOHN T. CLARK, Clinton, Mich.

SEED WHEAT for sale, of the Lothrop or Morgan variety. Yielded nearly 33 bushels per acre on stubble ground this season. Been grown on my farm only two seasons. Cut and threshed at exactly the right time. Leave your orders early. S. C. STACY.

THE VALLEY WHEAT, after two years' trial, has proved to be the hardiest, largest yielding and best wheat I ever raised. Did not rust, blight or shrink. Choice clean seed for sale. A. P. CODDINGTON, Tecumseh.

STRAWBERRY PLANTS FOR SALE. Choice plants of the Bidwell, Kentucky, Green Prolific and Wilson's Albany varieties. These plants were bought of professional growers and are warranted true to name. S. C. STACY.

LOST. A small gold chain. Finder will confer a favor by leaving it at the HERALD OFFICE.

FOR SALE CHEAP. A good property on Railroad st., opposite Slayton's warehouse. Has a dwelling house thereon and a vacant lot for building purposes. Will be sold at a bargain. Enquire at the HERALD OFFICE.

FOR SALE. A good house and four acres of land, situated within ten minutes walk of the P. O. in the village of Ridgeway. Terms to suit purchaser, and for sale cheap. For particulars enquire at the HERALD OFFICE.

The Dakota fever has struck Battle Creek again.

Try the Buckeye fine cut chewing tobacco sold by A. E. Kennedy. You will like it.

There was a big turn out on the Wabash excursion to Camp Griffith last Sunday.

Work will begin on the telephone line between Hudson and Hillsdale next Saturday.

Sink's Hotel has changed its name and will be known hereafter as the "Lilley House."

Another new color has made its appearance: crushed raspberry on which the cream has soured.

Chicago was fifty years old last Friday, Aug. 10th. The city claims a population of 600,000 to-day.

We have received a copy of the premium list of the County Fair to be held Sept. 25, 26, 27 and 28.

Manager Bowen of the C. T. line informs us that his line is in first-class shape as regards the "strike". Hooks all clear.

Eva Clement is confined to the house with an attack of typhoid fever. She is seriously ill but is not considered dangerous.

Track laying on the M. & O. has proceeded west of Tecumseh as far as the grading is completed, to the Franklin town line.

The M. & O. have bought three acres of land of N. M. Sutton, adjoining their track on his farm, for a gravel pit. The gravel will be used for ballasting.

We are indebted to Lynn S. Brown, of Raisin, for our report of the Teachers' Institute this week. Mr. Brown takes to the work very kindly and successfully.

Last night's Evening News had a dispatch from Charlotte stating that Banker Rothchilds was seriously injured yesterday morning in a collision with Raymond of Bay City. The latter horse was killed.

The Baptist Sunday School will give a picnic in P. R. Adams' grove one week from to-day, Aug. 23. A program has been arranged and would cordially invite all who desire to come and have a good time with us.

Headquarters Co. C, 1st Reg. M.S. T.
Tecumseh, Aug. 15, 1883.

Gen. Order No. 6.

Every member of this company is requested to be at the armory Aug. 22, 1883. All the uniforms and state property will be returned.

By order of A. D. LAWRENCE,
Capt. Com'd'g Co. C, 1st Reg.
A. E. KENNEDY, 1st Sergt.

There will be an excursion to Manchester on Wednesday, Aug. 22, under the auspices of the Methodist Sunday School. The train will leave on the time of the morning freight and return with the 4 P. M. train. A grove has been secured near the depot at Manchester for a basket picnic. Fare for the round trip, 25 cents. All who wish a good time will do well to improve this opportunity.

THE TECUMSEH HERALD.

TECUMSEH, MICH., AUG. 16, 1883.

LOCAL AND PERSONAL.

Go to Detroit next Saturday.

The boys had a splendid time in camp.

There is to be a new ward school building erected in Elk Rapids.

W. B. Mumford, of Adrian, drove over to-day and gave the HERALD a call.

D. W. Aylsworth, general agent of the Dayton Hedge Co., expects to move to Tecumseh.

John F. Murray, of Detroit, was in town one day last week, and honored the HERALD with a brief call.

John B. Whelan has been spending a few days at home, taking a respite from his legal studies in Detroit.

Frank Osborn, one of our Tecumseh boys at the University, is spending his vacation at home this summer.

Last Saturday was an old fashioned Saturday at Tecumseh. The streets were crowded and business was booming.

Finlay Deuel, of this village, is now at work in the office of the Sparta Sentinel, published at Sparta, Kent Co., Mich.

Mrs. C. M. Burlingame left Tecumseh last Monday morning for a few weeks visit in western New York and Pennsylvania.

Misses Mary Booker and Helen Queal of Springville leave Tecumseh to-day for Chatauqua to attend the assembly for one week.

Mr. S. D. Nesmith, a merchant of Addison, has been in Tecumseh to-day on business, and we are happy to make his acquaintance.

In the absence of the pastor the Baptist pulpit in this village will next Sunday morning, Aug. 19, be supplied by Mr. Clement S. Lester, of Raisin.

A. W. Haight has purchased the agency of the insurance companies heretofore represented by A. A. Kennedy. His office will be at Lilley's bank.

S. C. Stacy has some very fine Lothrop or Morgan wheat which he will sell for seed. It yielded nearly 33 bushels per acre this season. Send in your orders early.

Will McCowen has executed some fine portraits lately, which speak well for his artistic ability. A fine picture of Henry Jones is on exhibition in Cotton's show window.

Co. C returned from Camp Griffith on a special train last Tuesday afternoon. The boys looked like old soldiers and all unite in saying it was the best camp they ever attended.

Capt. C. D. Stevens, of Detroit, came here last Monday to attend the funeral of his mother,—and while here he remained a couple of days to see his numerous Tecumseh friends.

Wm. Bass and wife, of Lawrence, VanBuren Co., were the guests of C. C. Tefft last week. They left Monday morning for Lake Chautauqua, where they will remain a few days and then proceed to Hamilton, N. Y.

See the new ad. of the "Fishing Line" in another column of this paper. This is the popular name of the Grand Rapids & Indiana R. R., the route which every one takes to visit the Traverse Bay region and Lake Superior.

It may not be generally understood that Prof. Hammond positively declined a re-election as county school examiner. Notwithstanding his refusal he received three votes. Prof. Wilson, his successor, will fill the bill in every respect.

Woolcott Marsh will open a meat market next Saturday in the Joe Wooden building on Railroad street, north of P. J. Welling. "Wolc" has handled the cleaver in the employ of Wooden and Jim Cole and understands his business. Success to him.

Mr. and Mrs. Abner Wilson started Tuesday on an overland trip to Orland, Ind., to visit Walter S. Merritt. They will drive to Jonesville and Coldwater over the old Chicago turnpike; and thence south to Orland.—They expect to be gone about ten days.

In the mention we made last week of the job of threshing done by Smith Bros., on our farm, we omitted to state that all the fuel used during the three hours was one armful of wood and one barrel of soft coal. We had provided three barrels of coal and a corresponding amount of wood.

Dr. Lyster, of Detroit, has erected a fine cottage on Sand Lake, upon the site where his father, Rev. Mr. Lyster, had his home years ago. John J. Adam was at Sand Lake last Monday and made Dr. Lyster a short visit, sailing across the lake in Mr. Hurlburt's new sail boat. He had a most enjoyable visit with Dr. Lyster's family.

The committee who visited Dayton, O., to inspect the work of the Dayton Hedge Co., report that their standing financially is beyond question, and their hedges all that could be desired in a line fence. C. G. Luce, of Branch County, master of the State Grange, Pa J. VanVleet, Z. Cook, A. P. Halladay, E. A. Baker, E. B. Horton, of Lenawee county, were among the number.

Miss Garlie, of London, Ont., is visiting Mrs. Tiffany.

Mrs. W. A. Satterlee and Miss Satterlee are at Dr. E. Hause's making friends a visit.

Miss Freeman, of Detroit, and Miss Way, of New York, are visiting Miss Vesta Freeman.

Miss Maggie Packer, of Toledo, O., is visiting her sister, Mrs. C. A. Kiel, for a few days.

Rev. J. H. Burlison, pastor of the Presbyterian church in North Platte, Neb., is now visiting his brother-in-law, Rev. Mr. Hudson, of our village. He will occupy the pulpit of the Methodist church next Sunday at 7:30 P. M.

Mr. W. F. Bragg is in the village making negotiations about B. S. Hites' cook stove heat fender, an attachment [illegible] and for rendering cooking and kitchen work in general much easier and pleasant. If proper arrangements can be made an establishment for their manufacture will be established here.

Last Tuesday evening Mr. and Mrs. L. P. Tribou gave an evening party to a few of the young people of Tecumseh. About eighty persons were present, and every one enjoyed a pleasant evening. As we were out of town and could not be present it is impossible to go into descriptive particulars, but understand that the music was good, entertainment without a fault, and last but not least the coffee was A. No. 1. Following is a list of "out of town" people present:—Mrs. W. A. Satterlee, Kansas City, Mo.; Miss Satterlee, Birmingham, M.; Miss Way, N. Y.; Miss Freeman, Detroit; Mrs. Walter Cheever, Ypsilanti; Mrs. S. Bullock, Deadwood, Dakota; Mrs. Forsyth, Ft. Bennett, Dak.; Miss Maggie Packer, Robt. Evans, T. E. LeBaron, Toledo, O.; Miss Garlic, London, Ont.; Mrs. F.C. Stoepel, Detroit.

COMFORT'S ROLLER MILLS

The past thirty days have been undergoing a thorough overhauling. A new flume has taken the place of the old one; a sixty horse power Leffel water wheel takes the place of three common ones, and many other important improvements have been made, so it is now in complete running order, and has commenced running again. Comfort would be glad to see all his old customers, and exchange his good flour for their good wheat. Comfort pays the highest price for good sound wheat.

CO. C. IN CAMP.

The military boys left home last week Wednesday morning for their annual encampment and returned on a special train last Tuesday afternoon, having passed five full days in camp. Upon conversing with the officers and men on their return, we learned something of the detail of their camp life. Co. C. were destitute of the fancy extras, which many of the troops indulged in such as table cloths, crockery, tent-floors, &c. They used the tin and iron ware furnished by the State and eat from the rough tables furnished by the quarter-master. Most of the other companies had good floors in every tent while our boys had none, except in one case where two of the older soldiers foraged a few loose boards. This plainness of living was desired by the company officers, who did not look upon the annual encampment as a picnic but as a school for the instruction of soldiers. They also gave special attention to the cleanliness of C's quarters. Their commissary supplies were of the best, and particular credit is due to the gentlemen in charge of the culinary department for excellent meals provided. Their plainness of living had its reward too. At the close of inspection, Inspector Gen. Hutchinson and Capt. Lincoln—one of the officers sent from the regular army to inspect the camp were so much pleased with the appearance of our boys that they transmitted officially through the Col. of the 1st. Reg. their compliments to the officers of Co. C. and stating that they regarded their company quarters to be in the best military order of all the companies of the brigade.

Co. C. was small in numbers but her drilling was excellent. The officers express themselves as more than proud of their little command, and the company to a man, broke up camp with regret. Capt. Lawrence was taken sick the first morning and continued ill throughout the week. This not only deprived the company of his abilities as a commanding officer, but deprived him of the enjoyment he anticipated from camp life. The sick list as a whole was remarkable for its brevity. The command of the company was thus thrown upon 1st Lieut. Fred B. Wood, and the boys all unite in saying that he acquitted himself creditably. A special feature of the sham battle was a scheme contrived by Surgeon Major Woodward. Certain men of the 1st. fell during the different charges and were carried to the rear on stretchers. At the close of the battle the Surgeon brought his wounded m[illegible] is quarters all bandaged and bree[illegible] beet juice) and some o[illegible] drew to the First the c[illegible] ien. Withington and [illegible] of the spectators. [illegible] nained at home re[illegible] they did not go.

STATE TEACHERS' INSTITUTE.

The Exercises Continued this Week with an Enlarged Attendance and Increasing Interest.

Our report last week closed with Thursday noon. In the afternoon State Supt. Gass arrived and gave a very interesting lecture upon the subject of school law. He said that teachers should familiarize themselves with school law, that they may be better posted upon their relation with school officers and their rights and duties as teacher. He concluded his lecture by answering several questions which were propounded. Prof. Payne of Ann Arbor was also present and gave a lecture upon the Word Method.

Thursday evening Supt. Gass delivered a public lecture at the Opera House to a good audience upon the "Lost Races of America."

The following is the programme presented on

FRIDAY.

9:00 a. m.—Opening exercises.
1:15 a. m.—Lecture by Prof. Demman; subject, "Word Method."
10:05 a. m.—First Section—Grammar. Second Section—Civil Government. Third Section—Arithmetic.
10:55 a. m. Recess.
11:55 a. m.—First Section—Civil Government. Second Section—Arithmetic.

Noon.

1:00 p. m.—Lecture by Prof. Demmon, "Morals and Manners."
1:50 p. m.—First Section—Arithmetic. Sec'd. Section—Grammar. Third Section—Civil Government.
2:45 p. m.—Query Box.

On account of the threatening aspect of the weather the scribe, as he wended his way to the High School building, had the idea, that the institute would open up small, but was considerably disappointed to find the room comfortably filled. On entering the room we found Prof. Demmon talking on Rhetoric, giving the teachers an idea of the Figures of Speech. He thought it very essential that teachers should know something about this subject. Gave the teachers the name of D. J. Hill as an excellent author on the same for teachers to use in self-preparation. The State Supt. of Instruction had advised an Institute work, giving the teachers instruction on self preparation, therefore he should try and give them here a talk on that subject ere finishing the work.

Under this subject came Tantology, or repeating. Young children are often wrongly led in to this by being praised by parents, who think by so doing, to make the child bright and smart.

At 10:00 the three sections repaired to their respective rooms for recitation, as follows: Prof. Curtis, Arithmetic. Prof. Demmon, Grammar. Prof. Hammond, Civil Government.

PROGRAMME.

9:00—Opening exercises.
9:15—Lecture—Demmon.
9:05—Sec 1—Grammar, Demmon. Sec 2—Civil Gov., Hammond. Sec 3—Arithmetic, Curtis.
11:00—Recess.
11:15—Sec. 1—Civil Gov., Hammond. Sec. 2—Arithmetic, Curtis.
2:00—Lecture School Gov. Demmon
2:50—Sec. 1—Arithmetic, Curtis. Sec. 2—Grammar, Demmon. Sec. 3—Civil Gov., Hammond.
2:00—Recess.
3:45—Lecture, Political Machinery.

After devotional exercises at 2 p. m. and roll call, Prof. Demmon took up the subject of School Government. He said: It is natural for some people to govern and others it is not. A person may listen to lectures on the same and make it a study for an age, may be well educated and still be wholly incompetent to govern a school. In order to teach a school we must govern it. Cannot give instruction in chaos. The word pedogogue instead of being used as a quack term, really means as used in the olden time, controller of boys, from two Greek words. Children accustomed to being governed, will obey. The habit of obedience is one of the best of all habits, and is required in the same manner as all habits, by repetition. The school government, not only if carried out faithfully, keeps the school in a state to receive instruction, but inculcates obedience to authority, thus, making better citizens.

Only a just person is fit to govern. Although some teachers may perhaps use ridicule successfully, as a general thing it will not do, as it tends to anger a child. Here a last resort, after the driving force, comes corporal punishment: which in a few cases is essential.

At 3:45 Prof. Hammond gave a talk on Political Machinery. It is very essential for every citizen, ladies even, to know something of political machinery. On the subject of committees, commencing with the party national, committees consisting of a delegate from each state, their duties in campaigns, etc. The state central committee of Michigan, composed of 32 members, working for the political success of its respective party, each county, township, city and ward has its committee. National congressional and representative: State congressional and representative, judicial committees, in all constituting ten. The national convention nominates the president and vice president of the U. S., and drafts a set of party resolutions, embodying the principles of the party, and which the nominees are supposed to carry out. All the different conventions, their duties, the officers they nominate, were then followed out, classified, and workings fully explained.

TUESDAY.

9:00—Opening Exercises.
9:15—Lecture—Composition. Prof. Demmon.
9:05—Sec. 1—Grammar, Demmon. Sec. 2—Elementary Sounds, Hammond. Sec. 3—Arithmetic, Curtis.
11:00—Recess.
11:15—Sec. 1—Arithmetic, Curtis. Sec. 2—Elementary Sounds, Hammond.
2:00—Lecture, School Gov., Demmon
2:50—Sec. 1—Elementary Sounds, Hammond. Sec. 2—Arithmetic, Curtis. Sec. 3—Grammar.
3:30—Recess.
3:40—Lecture, Organization of Dist Schools, Hammond.

The school being a business institution, should be founded on sound business principles, some schools being much more difficult than others to manage. A young person on going out to engage a school should be careful what school they attempt. A written contract must be held by the school board, and a duplicate held by the teacher, signed by him and two of the board, as a verbal contract can be set aside. The speaker then gave young teachers some excellent advice, before going into a school, gain all possible information from school boards, parents, school record, etc.—The impression formed by the teachers on the first day is very important that it should be a good one, by going to your school house on the first day early, you get collected, cool and are prepared to meet any emergency, thereby giving your scholars a better idea of your abilities. Open school with reading scriptures, and, if not too strong a sentiment against it in the district, with prayer. The teacher should wholly control the seating of pupils, not promise seats to any scholar. Give for the first lesson the next succeeding the last one of preceeding term, not turn them back as is often the practice. Lessons should have distinct boundaries, not to be assigned twice, nor be too long. The talk termed with sound advice, one the management of our district schools, which Teachers will do well to follow.

LECTURE TUESDAY EVE., PROF. CURTIS.

The French have the advantage of having introduced in 1795 a system of weights and measures, whose unit is fixed, whereas other systems are not based upon a strictly fixed basis.

The karet originated from a little bean whose kernels were uniform, and of same size. English go in Troy measure, where so many wheat grains go to make an English penny or one pennyweight. French meter, unit of length, one ten-millionth part of earth's quadrant at level of the sea, on meridian passing through Paris. Liter, pronounced Leeter) unit of capacity and grain, unit of weight; *deci, centi,* and *mili,* meaning tenths, hundredths, and thousandths, and *deca, hecto, kilo, myria,* or tens, hundreds, thousands, millions, can be prefixed to the three units respectively. Denominations on the scale of tens thus greatly simplifies it. There is also what is known as the Anti-Metric system, pertaining to come from God. The basis of this system was stored in the Great Pyramid, held for about 4000 years, but now revealed to man. The speaker gave the theories of this system, of which there are several, making the date the Pyramid was built 2170 B.C. Prof. Proctor says the Pyramid was built for two purposes to serve us an instrument in taking astronomical observations, and as a burial place for kings. According to his reasoning the Pyramid was built about 3300 B.C.

WEDNESDAY.

On entering the school ma'ams' sanctum this morning we found Prof. Demmon giving a talk, "How to Prepare an Essay."

In giving scholars subjects on which to prepare an essay, you must guard against assigning subjects which your pupils know nothing about. You must depend on the scholar's advancement. Gather your materials by your own reflection, and, then by reading it up. Think yourself empty, then read yourself full." Arrangement of your material, introduction, body and conclusion. Writing up rapidly, copying with care, after which it is ready for the printer. The speaker then illustrated the method, by taking as a subject, "State Education," by going through the above steps systematically.

PROGRAM.

9:00—Opening Exercises.
9:15—Lecture, How to prepare an essay, Prof. Demmon.
10:05—Sec. 1, Geography, mathematics, Prof. Curtis. Sec. 2, Grammar. Sec. 3, U. S. History, Hammond.
11:00—Recess.
11:15—Sec. 2, U. S. History, Hammond. Sec. 3, Geography, Mathematical, Prof. Curtis.
2:00 P.M.—Lecture, The Recitation, Prof. Demmon.
2:50—Sec. 1, U. S. History, Hammond. Sec. 2, Geography, Mathematical, Prof. Curtis. Sec. 3, Grammar, Prof. Demmon.
3:30 Recess.
3:45—Lecture, Organization of District Schools, Prof. Hammond.

On the subject of Recitation, Prof. Demmon gave instructions on the best way of conducting the same. Ask scholars to recite irregularly, guard against talking too much; require pupils to recite, not recite for them. Assign lessons by topics, as a general thing. Require the pupil to get his own lesson as far as possible; give systematic reviews, in order to keep the study connected. By having enthusiasm the teacher very greatly raises interest in his pupils.

After recitation of the sections and recess, Prof. Hammond expounded the best methods of District School Organization:

Grading consists in placing pupils in grades and classes according to the scholar's standing. Grades are put into departments, and is accompanied by examinations. A permanent program of recitations, containing time and order of each, time of recess, and time for general exercises should be placed in a conspicuous place and kept there. Here followed a definite explanation of programs, courses of study, etc., furnished to the teachers by the state for the purpose of assisting teachers in grading country schools.

The Query Box came next, closing the day's work with about 125 in attendance.

—Something to think about and act upon. For cash I will sell the Victor, Crown, Singer, American No. 1 & 2, New Home, Wilson oscillating, and Leslie revolving shuttle Sewing Machines lower than ever before offered in Tecumseh. My object is to make room for organs and pianos, and handle no machines in the future but the Domestic and White. Be sure to call before buying. You'll save it if you do so. H. F. SPARKS.

—If you want a Drill, see the Hoosier Champion and Rooler Grain Drill at Snedicor's.

—No more poor bread made from Heck's all roll flour. Try it. Heck Bros.

—The Improved Domestic with the new set of attachments beats them all. Call at Sparks' and see it.

—Natural looking and serviceable artificial teeth can be procured at Dr. B. F. Snyder's Dental Rooms.

—The Wilder Plow Sulky and Ellwood Sulky Plow, for sale by Snedicor.

—You can have your decayed and aching teeth extracted at Dr. B. F. Snyder's dental rooms, without pain, by taking vitalized air.

—Call at Sparks' and see the Improved Domestic. It is just too lovely for anything.

—Don't forget that Snedicor sells the best plows in Tecumseh. Call and see for yourself and try one.

—Spring Tooth Harrows at Snedicor's.

—Call at the yard and mill of the Tecumseh Lumber Co., and examine their stock.

—Leave your orders for Sash, Doors, blinds, mouldings, window frames, tanks, troughs, etc., with the Tecumseh Lumber Co. They will receive prompt attention.

—One of the best blood purifiers ever made is "King of the Blood."—Sold by Druggists generally. Manufactured by D. Ransom Son & Co., Buffalo, N. Y.

OBITUARY.

Mrs. Theodocia Stevens, widow of Charles Stevens, deceased, died at her home on Sunday morning, Aug. 12th, after a brief illness of twenty-four hours. She was born in New Jersey in 1765, but moved with her father's family to the State of New York when she was one year old. She was married in 1825 to Charles Stevens, with whom she removed to this village in 1830. This was six years before Michigan was admitted into the Union, and of course at that time the county was a vast wilderness. They lived for a time in the village (then Brownville, and then removed to a farm 3 miles west of here, where they experienced many of the hardships peculiar to pioneer life. Indians and wolves were plenty. Many a time did Mrs. Stevens have to defend herself and children from drunken savages who came to her house clamoring for rum. Many a night she was compelled to cast fire brands into the midst of the hungry packs of wolves which howled around the door of her cabin. During the Black Hawk war, while her husband was away on the field of conflict, she hid herself and her children for two days and nights in a wortleberry swamp in order that she might save them from the tomahawk and the scalping knife. She was the mother of six children, one of whom died in infancy, another, Mrs. Fleming, died eleven years ago, another, Warren Stevens, died ten years ago. The only living son, Mr. Chas. D. Stevens, lives in Detroit, one daughter, Mrs. Holloway, lives in Adrian, the other, Miss Hattie Stevens, was living with her mother at the time of her death. Her husband died 10 years ago, about a month after the death of her son Warren. Sixteen years ago she fell and received injuries which rendered her an invalid for the rest of her life. Her father, Levi Camburn, was a local preacher in the Methodist church, and removed from New York to Michigan about 1832, where he continued to exercise the function of his office to the time of his death. Her brothers settled in this and Hillsdale co. of whom three are still living, the oldest being 88 years of age. She joined the Methodist church at the age of 14, and ever after lived a consistent christian life. She used to walk from the farm to Brownville to church Sunday after Sunday, a distance of about four miles. Her father's family have been noted for their devotion to the church of her choice; two of her nephews were Methodist ministers, one of whom Rev. Myron H. Camburn, became prominent in the history of Michigan Methodism. At least four of her nieces married Methodist clergymen.—Her life, as may be seen from this sketch, was often clouded with sorrow. During the last 16 years she had to remain shut up at home a cripple. During this time death robbed her of her husband, a son and a daughter, but she bore all with christian fortitude. Thus has passed away another of the pioneers of this great and growing state. One by one they are laid away to moulder in the dust of the state of their adoption. But they leave as our lasting heritage the memory of their self sacrifices, their heroism, and their virtue. May their memory ever be a benediction to their children and their children's children for many generations.

Put a Brand on Him.

"Women are a necessary evil," he said, bringing down his fist hard on the counter to emphasize the heartless remark. It was in the village store at West Milton, Saratoga County, and the speaker was the central figure of a group of bucholic philosophers. He was homely, slovenly and sixty. "There's where I differ from you altogether," said Mr. George T. Graham, of the same place. "Women are mostly what men make 'em. When husbands are brutes, wives will fall in submission or make home hot for the men; and they're unnatural in either character. Love them, and especially be good to them when they're sick, and you'll have no trouble. There's my own wife, now. She's suffered a good deal with dyspepsia, nervous prostration and other ailments that took the bloom off her cheeks and the Spring out of her steps. Well, she saw an advertisement of PARKER'S TONIC, and thought it would be just the thing for her case. Gentlemen, I sent five miles after a bottle. She took it. I sent again after more. So several times. Trouble? Why, if you could see how much good it has done her, you would say that women are the greatest of God's blessings and Parker's Tonic is the next."

This preparation which has been known as Parker's Ginger Tonic, will hereafter be called simply Parker's Tonic. This change has been rendered necessary by substitutes imposed upon their customers by unprincipled dealers under the name of ginger; and as ginger is really an unimportant flavoring ingredient, we drop the misleading word.

There is no change however in the preparation itself, and all bottles remaining in the hands of dealers, wrapped under the name of Parker's Ginger Tonic contain the genuine medicine if the fac simile signature of Hiscox & Co., is at the bottom of the outside wrapper.

Ayer's Cherry Pectoral.

Orrville, Ohio, Sept. 10, 1882.
COLDS. "Having been subject to a bronchial affection, with frequent colds, for a number of years, I hereby certify that AYER'S CHERRY PECTORAL gives me prompt relief, and is the most effective remedy I have ever tried.
JAMES A. HAMILTON, Editor of *The Crescent*."

Mt. Gilead, Ohio, June 26, 1882.
COUGHS. "I have used AYER'S CHERRY PECTORAL this spring for a severe cough and lung trouble with good effect, and I am pleased to recommend it to any one similarly affected.
HARVEY BAUGHMAN, Proprietor Globe Hotel."

Nebraska as it Was and Is.

It is believed that over all this vast region once rested an immense lake, compared to which Lake Superior is a mere pond. Over the bottom of this lake were spread through the ages lacustrine deposits of soil from five to two hundred feet deep. A small area on the north side of the state seems to have emerged first, for the soil is entirely gone from it. But it must have been at one time a tropic isle of marvelous luxuriance of vegetable and animal life.

In the hardened clay of its low hills are to be found vast numbers of fossil animals that have no existence outside the tropics. Here were immense numbers of rhinoceri, horned and hornless, some with two horns, some with one, and others with none. Here ranged the hippopotami and vast herds of carnivorous animals; here are found petrified turtles, one specimen, perfectly preserved, being seven feet across. There are several species of fossil monkeys.

"It requires but little imagination," says Bishop Warren, "to cover the region of the mouth of the Niobrara with abundant forests, through which meandered and rivers, full of the largest animals, while above them chattered the monkey, and flew the gorgeous bird of paradise."

After awhile the great lake, [illegible] with the richest soil, arose above the waters; the climate grew more severe, and the tropical animals and birds gave place to those of a colder clime.

One race of men lived here and disappeared; another took their place, but have passed away, leaving but little trace; a third, now known as Indians, luxuriated in the abundant meat of the buffalo, but they are nearly as extinct as the two races that have sunk beneath those waves of land, "unwept, unhonored and unsung."

It seems to be a hard matter for men to conquer this continent. Whether the fourth race has gathered strength enough from allying all kindreds and bloods under the whole heavens for its conquest, is yet to be seen in the coming centuries.

The part now called Nebraska is two hundred by four hundred miles in extent, and contains forty-eight million acres. On the east flows the Missouri River; irregularly, through its whole length, flows the Platte, receiving all its tributaries on the north side.

The state has a slightly undulating surface, and has so rich a soil that after-crops have been removed for thirty years from some places. It shows no sign of needing fertilization, nor will it show such need till the one hundred and fifty feet of soil has been turned into wheat or other crops. The soil most nearly resembles that of the Nile Valley, in Egypt. It is perfectly prodigal in the production of fruit. The state has twice been awarded the highest premium of the United States Pomological Society, and thereby been debarred from competing again. One apple has been grown that weighed twenty-nine and a half ounces, and one man raised in a year 14,000 bushels of peaches.

The state was admitted into the Union in 1867. All the early inhabitants came into Nebraska in the so-called prairie-schooners—a covered wagon containing all the family and their earthly effects. Finding land to suit, they first erected a house of sods, with places cut for a door and window, which made them a comfortable abode. Many happy homes were hung with tapestry of figured muslin, and whitewashed on the outside for a very trifling cost.—*Phila. Sat. Night.*

Action of Coffee and Sugar on the Stomach.

In a paper presented to the Societies de Biologie, M. Leven states that coffee so far, as is often supposed, from accelerating the digestive process of the stomach, rather tends to impede this. When thirty grammes of coffee, diluted in one hundred and fifty of water, is given to a dog, which is killed five hours and a half afterward, the stomach is found pale, its mucous surface being anæmic, and the vessels of its external membrane contracted. The whole organ exhibits a marked appearance of anæmia. Coffee thus determining anæmia of the mucous membrane, thus preventing rather than favoring vascular congestion, and opposing rather than facilitating the secretion of gastric juice, how comes it that the sense of comfort is procured for so many people who are accustomed to take coffee after a meal? A repast, in fact, produces in those whose digestion is torpid, a heaviness of the intellectual faculties and embarrassment of the power of thinking; and these effects, and the disturbance of the head, are promptly dissipated by the stimulant effect which the coffee produces on the nervous centers, as shown by experiments with casein. Coffee and tea, when taken in excess, are a frequent cause of dyspepsia, for the anæmic condition of the mucous membrane being periodically renewed, a permanent state of congestion is produced, which constitutes dyspepsia. Sugar, which with many doctors has a bad reputation, is an excellent aliment which assists digestion, and should be prescribed in dyspepsia. By experiment, digestion of meat is found to take place much more completely when sugar is added. Coffee exerts both a local and general action, operating locally by means of its tannin, by diminishing the caliber of the vessels, but acting on the general economy by exciting the nervous centers and the muscular system. It renders digestion slower, and is only of good effect by relieving the feeling of torpor after meals. Its injurious action on digestion may be corrected by adding sugar so as to counterbalance its effects on the mucous membrane. This adding sugar to coffee is not only a pleasant practice, but one contributing to digestion.—*Scientific American*

Well Rewarded.

A liberal reward will be paid to any party who will produce a case of liver, kidney or stomach complaint that Electric Bitters will not speedily cure. Bring them along. It will cost you nothing for the medicine if it fails to cure you, and you will be well rewarded for your trouble besides. All blood diseases, biliousness, jaundice, constipation, and general debility are quickly cured. Satisfaction guaranteed or money refunded. Price only 50 cts per bottle.
Sold by C. A. Wright & Co.

It is a remarkable fact that the center of population of the United States has advanced in a straight line since 1790, due west from Baltimore.

Positive Cure for Piles.

To the people of this county we would say we have been given the agency of Dr. Marchisi's Italian Pile Ointment—emphatically guaranteed to cure or money refunded—Internal, external, blind, bleeding or itching piles. Price 50 cents a box. No cure, no pay. For sale by Waldo & Doty, druggists.

"Out of the Current."

"He fasts enough that has a bad meal."

"Time marks his lines of travel in wrinkles."

"Contempt should be the best concealed of our sentiments."

What loneliness is more lonely than distrust?—[George Eliot.

Every body drags its shadow, and every mind its doubt.—[Victor Hugo.

Languages begin by being a music, and end by being an algebra.—[Ampere.

He who thinks himself good for everything is often good for nothing.—Picard.

The more honesty a man has, the less he affects the air of a saint.—[Lavater.

Doubt springs from the mind; faith is the daughter of the soul.—[J. Petit Senn.

The gods have a curse for him who willingly tells another the wrong.—[George Eliot.

The world is a book, the language of which is unintelligible to many people.—[Mery.

Travel improves superior wine and spoils the poor; it is the same with the brain.

Men could not live long in society if they were not the dupes of each other.—[La Bruyere.

Manners are the hypocrisies of nations; the hypocrisies are more or less peefected.—[Balzac.

It is with happiness as with watches—the less complicated, the less easily deranged.—[Chamfort.

"Rivals who blow out each other's brains for the eyes of a coquette, prove that they have none."

In condemning the vanity of women, men complain of the fire they themselves have kindled.—[Lingree.

"The pious man and the athiest always talk of religion: the one of what he loves and the other of what he fears."

"The world is apt to coo in your ear like dove when you are rich, but if you happen to be poor it kicks like a mule."

It is easy to make sacrifices for those we love, but it is a noble victory to overcome for the sake of our enemies.

No matter how purely and grandly we live to-day, there is no denying that we may live more purely, more grandly, to-morrow.

The doubts of an honest man contain more moral truth than the profession of faith of people under a worldly yoke.—[X. Doudan.

"A moment's work on clay tells more than an hours's labor on brick. So work should be done on the children's hearts before they harden."

In this great society world, lying around us, a critical analysis would find very few spontaneous actions. It is almost all custom and good sense.—[Emerson.

In those countries where the morals are the most dissolute, the language is the most polished; as if they would replace on the lips what has deserted the heart.—[Voltaire.

Great minds comprehend more in a word, a look, a pressure of the hand, than ordinary men in long conversations, or the most elaborate correspondence.—[Lavater.

The art of putting the right men in the right places is first in the science of government; but that of finding places for the discontented is the most difficult.—[Talleyrand.

"Youth is like those verdant forests tormented by winds; it agitates on every side the abundant gifts of Nature, and some profound murmur always reigns in its foliage."

There are many deadly serpents that nestle in the foliage of our most fascinating literature; they coil around the flowers whose perfume most intoxicates the senses.

There never has been a nation that has not looked upon woman as the companion or the consolation of man, or as the sacred instrument of his life, and that has not honored her in those characters.—[A. De Musset.

Daughters, Wives and Mothers.

We emphatically guarantee Dr. Marchisi's Catholicon a Female Remedy, to cure Female Diseases, such as Ovarian troubles, inflamation and ulceration, falling and displacement or bearing down feeling, irregularities, barrenness, change of life, leucorrhœa, besides many weaknesses springing from the above, like headache, bloating, spinal weakness, sleeplessness, nervous debility, palpitation of the heart, &c. No cure, no pay. For sale by druggists. Prices $1 and $1.50 per bottle. Send to Dr. J. B. Marchisi, Utica, N. Y., pamphlet free. For sale by Waldo & Doty.

A Talent for Conversation.

A talent for conversation has an extraordinary value for common, everday life. any one who has this gift enters in a social circle anywhere. How every one's face brightens at his entrance. How soon he sets all the little wheels in motion, encouraging the timid, calling out unostentatiously the resources of the reserved and shy, subsidizing the facile, and making everybody glad and happy.

To converse well is not to engross the conversation. It is not to do all the talking. It is not necessary to talk with very great brilliancy. A man may talk with such surpassing power and splendor as to awe the rest of the company into silence; or excite their envy and so produce a chill where his aim should be to produce heat and sunshine. He should seek the art of making others feel quite at home with him, so that no matter how great may be his attainments or reputation, or how small may he theirs, they find it insensibly just as natural and pleasant talking to him as hearing him talk. The talent for conversation, indeed, more than anything else in life, requires tact and discretion. It requires one to have more varied knowledge, and to have it at instant and absolute disposal, so that he can use just as much or just as little as the occasion demands. It requires the ability to pass instantly and with ease from the playful to the serious, from books to men, from the mere phrase of courtesy to the expression of sentiment and passion.—*Prof. Hart.*

Polishing the Wrong End.

Many men daily polish their boots who never give a thought to the condition of their hair, except to harrow it casually with brush and comb, or submit it to the paralozing attentions of the average barber. What hapens? Why, this: From neglect, mental anxiety, or any of a score of causes, the hair turns prematurely gray and begins to fall out, Paker's Hair Balsam will at once stop the latter process and restore the original color. An elegant dressing, free from grease.

Griggs' Glycerine Salve.

The best on earth can truly be said of Griggs' Glycerine Salve, which is a sure cure for cuts, bruises, scalds, burns, wounds and all other sores. Will positively cure piles, tetter and all skin eruptions. Satisfaction guaranteed or money refunded. Only 25 cents. For sale by Baker & Hall.

GUARDIAN SALE.

BY virtue of an order of the Probate Court for Lenawee County, Michigan, made on the second day of July, A.D. 1883 authorizing the same, I, as guardian of Alvinzio E. Arner, Louisa M. Arner and Ambrose C. Arner, minors, will, on the 20th day of August, 1883, at ten o'clock in the forenoon, on the premises hereafter described, offer for sale and sell at public vendue to the highest bidder the undivided one-half of all those tracts or parcels of land situate in the township of Ridgeway, County of Lenawee and State of Michigan, known and described as follows to wit: All that portion of the Southwest quarter of section eighteen, town six south of Range five East, lying West of the center line of the plank road (so called) leading across said quarter section through the town of Ridgeway, and described as follows to wit: Beginning at the South quarter post of said section eighteen, town six south of Range five East, lying East of the center line of said Ridge road, bounded on the South by the Southeast corner of said West half of said quarter section, running thence North on the dividing line of East and West halves of said fourth section about forty [illegible] to a stake and stones, thence West on the South line of said parcel about twenty-two rods to the center line of said Ridge road, thence South-easterly along the center line of said road to the South line of said quarter section, thence East along the said line to the place of beginning, containing of the entire amount of land, forty acres more or less, subject to the dower right of Elizabeth Arner, widow of said John Arner deceased therein. Further terms of sale published at and before sale.
Dated July 2, 1883.
J. DE WITT ARNER, Guardian of said Minors.

CHANCERY SALE.

STATE OF MICHIGAN, The Circuit Court for the County of Lenawee in Chancery.
William Hagler, Complainant,
vs.
Daniel O'Connor, Defendant.

In pursuance, and by virtue of a decree rendered by said court in the above entitled cause on the 18th day of June, 1883, I the subscriber, a Circuit Court Commissioner in and for said county, will sell at public auction to the highest bidder on the 24th day of September 1883, at 10 o'clock in the forenoon at the front door of Dean's opera house, in the city of Adrian in said county, (that being the place of holding said court) the premises described in said decree to wit: All those certain pieces or parcels of land situate in the city of Adrian in the county of Lenawee and state of Michigan, and described as follows, viz: Lots one hundred and thirty-eight (138) one hundred and thirty-nine, (139) and two hundred and ninety-five (295) and two hundred and ninety six (296) of the eastern addition of the city of Adrian, according to the recorded plat thereof.
Dated July 31, 1883.
FRANK R. PAYNE, Circuit Court Commissioner.
E. B. WOOD, Solicitor for Complainant. 4w9

THE "FISHING LINE."
TAKE THE
GRAND RAPIDS & INDIANA RAILROAD.
The only route to the Trout, Grayling and Black Bass Fisheries and the famous Summer, Health and Game Resorts and Lakes of
Northern Michigan.

The waters of Grand Traverse Region and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

Brook Trout abound in the streams, and the famous American Grayling is found only in these waters.

The Trout Season begins May 1st, and ends September 1st. The Grayling Season opens June 1st and ends November 1st.

Black Bass, Pike, Pickerel, and Muskalonge also abound in large numbers in the many lakes and lakelets of this territory. The sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at nearly all points.

Take Your Family with You. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing.

The climate is peculiarly beneficial to those suffering with Hay Fever and Asthmatic affections.

New Hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw City forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit, Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the Season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns, and Fishing Tackle carried free at owner's risk. It is our aim to make Sportsmen feel "At Home" on this route. For Tourist Guide, a handsomely illustrated book of 160 pages free, Time Cards, Folders and further information address

KING OF THE BLOOD.
The Most Thorough Purifier of the Blood Yet Discovered.
Cures all Humors, from a Common Eruption to the worst Scrofula.
It purifies the Blood.
It invigorates the Liver.
It regulates the Bowels.
It strengthens the stomach.
It gives vivacity in place of lassitude; cheerfulness in place of gloom, and robust vigor in place of debility.
Dyspepsia, Biliousness, Disordered Liver, Constipation, Nervous Affections, General Debility, in short all the numerous diseases and discomforts caused by impure Blood are speedily conquered by this powerful corrector, the chief and sovereign of all ancient or modern medical discoveries—KING OF THE BLOOD.
Its name is its best description as it is a royal dispenser of the blessings of health and vanquishes the foes that lurk in the blood.
It banishes PIMPLES, SALT RHEUM, SCALY ERUPTIONS, ULCERS, SCALD HEAD, FEVER SORES, and all SCROFULOUS DISORDERS.
It checks CONSUMPTION in its early stages. It has frequently cured it when advanced.
It disposes TUMORS and CANCERS without the surgeon's knife.
It cures DROPSY, general or partial.
It cures FEMALE WEAKNESS and DISEASE.
It reduces in a safe and effectual manner all swellings, external or internal.
It eradicates the effects of Venereal Disease and Mineral Poisons, and establishes a sound constitution.
Many certificates, much further information and full directions for using, will be found in the pamphlet, "Treatise on Diseases of the Blood," in which each bottle is enclosed.
Price $1 per bottle containing 12 ounces, or six doses. Sold by dealers in medicine.
If your druggist does not happen to have it on hand, request him to order a supply of it for you as it will be cheaper than for you to order direct of us, and less trouble.

COUNCIL PROCEEDINGS.

VILLAGE OF TECUMSEH,
Council Room, Aug. 6, 1883.

Regular session.

Present the entire Council.

Minutes of adjourned session held July 12, 1883, and of last regular session read and approved.

REPORTS OF COMMITTEES.

On Finance:

Report in writing and recommend the payment of the following claims out of the contingent fund.

Stevens & Son, sundries as per bill	$[illegible]
H. W. Stevens, services as Marshal	[illegible]
W. J. Wilson, [illegible] oil and freight	[illegible]
Geo. A. Glaze, Detroit Safe No. 7	[illegible]
A. W. Mills, freight and moving of safe	[illegible]
John Hastings, [illegible] in public square	[illegible]
W. C. Jordan, services as St. Comm	[illegible]

The following claims are recommended to be paid out of the cemetery fund.

Mrs. Marsh, [illegible] in cemetery	[illegible]
Dan Wyman, 1[illegible]-10	[illegible]
Wm. Brown, [illegible]	[illegible]
Geo. Cooper, [illegible]	[illegible]
A. J. Cropsey, [illegible]	[illegible]
John Sampson, [illegible]	[illegible]
[illegible]	[illegible]
Milan Wheeler, [illegible]	[illegible]

On motion the report was accepted and adopted, and orders directed to be drawn for the respective bills.

On Cemetery.

Report in writing and recommend that the rates heretofore established by council for the use of the vault in the cemetery be amended as follows. That the price for the use of the vault shall be one dollar per week for the first three weeks. After that special rates to be obtained of the sexton who shall get his rates of the chairman of the cemetery committee.

On motion the report is accepted and adopted.

The committee desiring further time in which to report on other matters in their hands were granted until the next regular meeting in which to make such report.

On purchase of safe:

A. W. Mills as a special committee reports in writing that he has purchased a No. 7 safe of Detroit Safe Co. for $95, freight on same $2.22, placing same in council room $3.

On motion the report is accepted and adopted and the committee discharged.

REPORTS OF OFFICERS.

The Street Commissioner presented his monthly report, from which it appears that during the month of July there was performed on the streets of the village of team labor 11 days, and of hand labor 15½ days, and during the month there was wrought in the cemetery of team work 3½ days and of hand labor 6½ days. On motion the report is accepted and placed on file.

Mr. John Osborn came before council and made statement in regard to the filling up of Evans creek and thus changing the channel of that stream. By consent the matter is referred to the committee on streets.

PETITIONS AND APPLICATIONS.

E. C. Baird presents a petition in behalf of the Michigan & Ohio Railroad Co. asking certain privileges for laying side tracks along Chippewa St. On motion the matter is referred to committee on streets.

Application is made by Mr. Sparks on behalf of M. P. Brown for permission to cut down and remove a tree that stands in front of his place of business on Chicago street. On motion such permission is granted.

Council then adjourned.

E. S. McKINNON,
Recorder.

IMPORTANT

When you visit or leave New York city, save baggage, express and cartage bills, and stop at the **Grand Union Hotel** opposite Grand Central Depot.

Elegant rooms, fitted up at a cost of one million dollars, reduced to $1 and upwards per day. European plan. Elevator. Restaurant supplied with the best. Horse cars, stages and elevated railroad to all depots. Families can live better for less money at the Grand Union than at any other first-class hotel in the city.

All Admire a Handsome Face.

A pure, clear skin will make any face handsome. Manifestly anything which strengthens and enriches the blood will directly affect the whole person. Accordingly those of the skin disappear when Burdock Blood Bitters are employed. They are a vegetable remedy of inestimable value.

DRAIN COMMISSIONER'S NOTICE.

NOTICE is hereby given that I Edwin Howell, township drain commissioner of the township of Macon, in the county of Lenawee, will, on the 29th day of August, at the barn of Simon Gould, in said township, at ten o'clock in the forenoon, meet parties for the purpose of letting contracts for the construction of a drain in said township known as Drain No. 5, in Macon, commencing near southeast corner of northeast quarter section No. 24 of said township, running northwest across said section, thence west across the northeast quarter of section 23, onto lands owned by Hugh Sample in said township; and that I will then and there proceed to let contracts for the construction of the same by sections as I have apportioned and divided the same, and that such contracts will be let to the persons who will do the work according to the specifications thereof made by me, and now remaining in my office, for the least sum of money, and who will give adequate security for the performance of the same within such time as shall be specified in such contracts respectively, the undersigned reserving the right to reject any and all bids. Notice is also hereby given that at the time and place of said letting of contracts, the assessment of benefits made by me will be subject to review.

Dated this 16th day of August, A. D. 1883.

EDWIN HOWELL,
Township Drain Commissioner for the Township of Macon. aug16

'Tis only a fact all people should know—
Everybody high, everybody low—
All who desiring their teeth to look white,
Brush with Peaberry each morning, each night.
Each speck of Tartar will yield to its Power,
Removes instantly all substances sour;
Really, you'll find it a very great treasure;
You'd prove by its use—try it at leisure.

CUT THIS OUT.

Frank P. Warner came into our store to purchase a sample bottle of Zopesa for a friend, and stated that he, Mr. Warner, was afflicted with Kidney and Liver trouble for five years, and had paid $200 or $300 doctor's bills, and has now been completely cured by the use of two large bottles and one sample bottle of Zopesa. He was so bad at one time that he lost 37 pounds of flesh, but after using Zopesa claims he is a sound man, and now weighs 147 pounds. He was loud in its praise, and readily consented to allow us to use his name for reference.

SHE WAS SCREAMING WITH PAIN.

CRAWFORD CO., PA., CITY OF TITUSVILLE.

Personally appeared before me, Mary Murphy, who, being duly sworn, according to law, deposes and says: That she resides at the corner of Franklin and Water streets in said city. That she was suffering with excruciating pain from the Inflamatory Rheumatism for the space of seven days, that she was screaming from the pain and got no rest during all this time. That she received relief within twenty minutes after taking the first dose of Wilson's Lightning Remedy for Rheumatism, and went to sleep. And that she has had a permanent cure within ten days, and that she was up and about within five days.

MARY MURPHY.

Sworn and subscribed to before me April 15th, 1880.

Rheumatine!

An Internal Remedy and a Sure Cure for all kinds of

Rheumatic Complaints!

SUTHERLANDS TRADE MARK RHEUMATINE

If you are suffering from

Kidney Complaints

give Rheumatine a fair trial. You will never regret having done so.

Testimonial from Mr. Thomas H. Day, of No. 83, 23d street, Chicago, who has been for many years employed by the Wagner Sleeping Car Co. and is now conductor of one of their cars running between New York and Chicago.

J. N. SUTHERLAND,
Manager Rheumatine Mfg Co.,
Niagara Falls.

CHICAGO, June 25, 1882.

Dear Sir—It gives me pleasure to inform you of the benefit your rheumatic cure "Rheumatine" has been to my daughter, who for the past few years has been a great sufferer from Rheumatism at times being quite helpless. She took three (3) bottles of your preparation, and I can bear testimony to its speedy action in affording her relief from pain and soreness. Thanks to Rheumatine her health is now quite restored.

Yours very truly,
THOS. H. DAY.

See our change of Testimonials every week in Daily Papers.

MESSRS. SWIFT & DODDS,
Wholesale Agents for Detroit and Michigan.

DR. B. MINCER,
Scientific Optician!

I have devoted 25 years wholly to a study of the eye, and how to aid vision properly, and I make a specialty of fitting glasses to the eyes that have been injured by cheap, inferior glasses. I manufacture every kind of glasses, and guarantee satisfaction. Read what prominent physicians of Adrian say:

Having for some time past used glasses to improve my sight, without satisfactorily gaining my object, I called on Mr. Mincer, optician, of Detroit, who readily adapted glasses to my eyes, with which I am so well pleased, that I cheerfully speak in his favor. His method of examining and its application in selecting glasses to fit the eye can only be acquired by a knowledge of the useful organ to which must be added extensive experience. He has also adapted glasses to Mrs. Baker's eyes with which she is well pleased. I recommend him to all who need glasses adapted to their wants; poor glasses are an abomination.

V. A. BAKER, M.D.

ADRIAN, Nov. 18, 1882.

I have used spectacles bought of Mr. B. Mincer for the past three months, and find them superior to any I have ever used, and can cheerfully recommend him to any one in need of glasses, and the benefit of his experience in the science of optics to adjust proper lenses.

DANIEL TODD, M.D.

I have investigated the work of Mr. B. Mincer, optician. I have reason to believe that he understands his profession, and adjusts excellent glasses on scientific principles. C. RYND, M.D.

PARKER'S GINGER TONIC.

ONCE TESTED ALWAYS PREFERRED!

This great remedy has won its way to the highest place in the esteem of the most intelligent people. There are daily recruits to its hosts of friends. Its performance is invariably

BETTER THAN ITS PROMISE.

It gives tone and power. For complaints of the kidneys, bowels, stomach, liver and lungs, for all the subtle troubles of women and for those bodily disorders induced by anxiety, care and mental strain, its effects will surprise and charm you. It is not an essence of ginger. Delicious to the palate, an antidote to the liquor habit, and exceedingly helpful to the aged and feeble. 50c. and $1 sizes. HISCOX & CO., New York.

TIRED ALL OVER.

What Rested and Refreshed a Weary Man in Memphis.

"No, it never amounted to an acute pain, but continued to be a dull weary ache in the small of the back," writes Mr. James Thomas, of No. 59, Madison st., Memphis, Tenn. "This was an old experience, and life became dull music. I was tired all over, with pain in the lower limbs, and a habit of lying awake o' nights. Recently I tried one of Benson's Capcine Porous Plasters and was decidedly relieved within twenty-four hours. It may have been Providence that did the work, but I give the credit to Benson's porous plaster." Mr. Thomas' reverential idea does him credit, but Providence works by agents, and among them Benson's plaster ranks first as an external remedy. It acts quickly in relief and healing, and renders life better worth living. Price 25c. Look in the middle of the plaster for the word Capcine. Ask your physicians about it. Seabury & Johnson, Chemists, New York.

For Sale Cheap,

And on easy terms, A FARM OF 120 ACRES, located in the township of Norvell, Jackson Co., three miles from the village of Brooklyn and ½ mile from district school. The farm is well fenced, has good buildings and is under a high state of cultivation. A good brick house with eight rooms besides closets, and a brick bottom cellar. It has 75 acres of plowland, 10 acres of well assorted timber, 20 acres of meadow, and 15 acres of pasture. There are two wells on the place and a brook of living water that never freezes over. A good apple orchard, a young peach orchard, and lots of small fruit. The location is an excellent one and the neighborhood is first-class. For further particulars call at the HERALD OFFICE.

Tecumseh Bakery!
And Dealer in
Bread, Cakes, Pies, &c., and everything belonging to a first-class Bakery.
Special attention given to furnishing pic-nic or wedding parties.
Cheapness and cleanliness shall be our Motto.
Lee's Block, - - Tecumseh, Mich.

SPECIAL CORRESPONDENCE.

BROOKLYN BUBBLES.

I am right over in this corner friend Addison, watching the striking brotherhood.

Just now Brooklyn is entertaining representatives from several societies, who are more or less dissatisfied with the work or pay, though only a very few have dropped the keys to both, and taken a Providential furlough. If they would not be offended I should tell you where I think they have made a mistake—the striking sisterhood would do well to avoid. If every telegraph striker had secured some employment whereby he could have earned a living and went about the new work the hour he left his office, instead of trusting to amusement schemes of sympathizers, or aid from labor leagues, his victory would have been certain. Dependence on other organizations is not usually a good basis for independence as self exertion, where women are concerned. Enforced idleness weakens the nerves and produces all sorts of apprehension, and waiting for someone to change their mind is a very disagreeable state of mental probation.

Whatever the business engaged in, it is either one of choice, or if not the daily routine speedily becomes a habit almost as difficult to break friendship with. Few will deny that self-respect demands the latter course of action, when purchasers of that labor exact a slavish obedience to their request, for more than they pay for.

The rule forbidding the advancement of anyone competent to occupy a higher or more renumerative position, because already employed in a lower and less profitable one is a species of caste no one should tolerate. No monopoly could do other than pocket moral defeat and material discomfiture as such wide-spread resignation of employment would produce, if the labor they found necessary should be suddenly turned into other channels. But so long as no other means of procuring a certain income is resorted to, no monopolies can afford to be insolent. True the places vacated may be filled by others that necessity or cupidity compels to accept such servitude, but such do not bring good will to market, and dissatisfaction among all parties is the inevitable result. Hands that drop the keys of one kind of work will not forget their cunning if they are used for some other kind awhile. The change may not be agreeable at first but the ability to help ourselves is a passport to respectable consideration even with those who prize money more than brains.

MACON MUSIC.

Robert Cully has given up his trade as shoemaker and gone to farming, having rented the farm of David Hatch. He moved his family from the village last week.

Miss Franc Richart has opened school in the Service district.

Mr. and Mrs. George Howell were among the pleasure seekers who visited the Northern Peninsula last week.

At the M. E. quarterly meeting, last Sunday morning, Rev. Jesse Kilpatrick, of Ridgeway, occupied the pulpit.

Rev. W. C. Burns, of Paw Paw, preached at the Baptist church Sunday evening.

The Teachers' Institute for Washtenaw county, will be held in the village of Saline, commencing Aug. 27. It will be in session during the entire week. The teachers of Lenawee who were unsuccessful at the fishing pond in Tecumseh will have another chance to try their skill at angling.

RIDGEWAY RUMBLINGS.

Mr. Nelson and family spent a few days with friends at Legonier, Ind., last week.

Miss Ella Hall has returned from Brooklyn, N. Y. Weddie Bush came with her.

Hank Pocklington is evidently making a success with his meat market, at least he sticks longer than any one who has tried it before.

The Wilson boys resume the superintendency of the schools where they were engaged last year. Henry C. at Blissfield, Eugene A. at Vassar. Good luck to the boys.

We are still without a shoemaker but are in need of one just as much as ever.

Richard Cadmus and daughter Ella join a party of about twenty girls at Sand Lake for a weeks recreation.

During the shower Sunday morning about 3 o'clock, lightning struck Sam'l Underwood's barn, which immediately took fire and burned so quickly that nothing could be taken out. Three horses were in the barn, two of them came out after the halter-strap burned off but were badly burned about the head and neck. They will probably recover. The other horse was lost together with about twenty tons of hay. Loss nearly covered by insurance in the Farmer.

During the shower Wednesday afternoon lightning slivered a tree into kindlings at a point not far distance from the village.

CHEAP DOUBLE EXCURSION.

The regular annual double excursion from Adrian and vicinity, to Detroit and return, will take place this year on Tuesday, the 28th instant. The train will leave on the Lake Shore, at 7:50 a. m., going by way of Dundee branch, taking the passengers right to the river side, at Wyandotte, where the party will embark on the swift-going and beautiful steamers Sappho and Fortune, which have been chartered for the occasion, and which will make the trip up the river lashed together. The main train does not leave Adrian in the morning until after the arrival of the regular passenger train from the west, and connects at Lenawee Junction with the passenger trains on the Jackson and Fayette branches arriving in Detroit at 11:20 a. m. Returning, will leave Detroit at 5 p. m., giving excursionists five to six hours to visit the attractions of Detroit, and arriving in Adrian at 9 p. m., giving ample time for connections with regular passenger trains on main line, Jackson and Fayette branches. Special cars will be attached to regular morning trains on main line for Hudson and Clayton, on Jackson branch for Clinton and Tecumseh, and on the Fayette branch for all stations on that branch.

The fare for the whole trip from Adrian and all points east, will be only $1.25. Tickets for the entire excursion, good from Hudson and Clayton, and all points on the Jackson and Fayette branches, will be sold at the moderate price of $1.50. The affair is under the experienced management of Messrs. J. H. Blain and H. H. Osgood, and these gentlemen expect to make the trip one of the pleasantest ever planned from this section. Refreshments will be for sale on the train and boats, at reasonable figures. Parties desiring more particular information can address the managers at Adrian.

THE PROBATE COURT.

Following is the record of business transacted at the probate court for the week ending Aug. 18, 1883.

Estate of Jonathan Hall, deceased; bond and letters; appraisers.

Estate of Martha A. Foster, minor; release of guardian filed; discharge.

In the matter of appointment of three special commissioners; Macon drain No. 5; application; order for citation; citation issued; hearing August 20, 1883.

Estate of Orville W. DeGolyer, deceased; petition for administration; hearing September 10, 1883.

Estate of Louisa W. Hamilton, deceased; hearing on proof of will; continued to August 20, 1883.

Estate of Joseph Driggs, deceased; affidavit of publication; order of appointment of administrator.

Estate of Adam Dings, deceased; petition for allowance of executor's account and for discharge; hearing September 10, 1883.

Estate of Birdy Aten, deceased; affidavit of publication; proof of will and probate; renunciation of executor named in will; appointment of administrator with will annexed.

In the matter of Anna Hyland, an alleged indigent insane person; application for order admitting her to eastern Michigan insane asylum; hearing Aug. 17, 1883.

Estate of George A. Kishpaugh, minor; release of guardian; discharge.

Estate of John Wilson, deceased; hearing continued to Sept. 4, 1883.

Estate of Hiram N. Fellows, deceased; petition for allowance of executor's account; hearing Sept. 10, 1883.

Estate of Wendell Fuller, deceased; warrant and inventory filed.

Estate of Samantha Bateman, deceased, petition for allowance of administrator's account and for discharge; hearing September 3, 1883.

Estate of William Dorr, deceased; affidavit of publication; commissioners' warrant and report.

Estate of Louisa Gould, deceased; bond and letters; appraisers and commissioners appointed.

In the matter of application for three special commissioners town line drain Riga; application filed; citation issued; hearing Aug. 20, 1883.

Estate of Alice Mary Rood, minor; copy of foreign guardian's bond filed.

In the matter of the appointment of three special commissioners; Riga drain; order of appointment.

Estate of Joseph Driggs, deceased; bond and letters; appraisers and commissioners.

Estate of Rensalaer A. Baker, deceased; application for allowance to widow; order for allowance.

Estate of Nettie C. Hardy, minor; release of guardian filed; discharge.

Persons having farms to sell or any property to dispose of, or those who wish to purchase real estate should call at the HERALD office. We have a number of good bargains. We also have a number of calls for places to rent. We can rent or sell places at short notice and upon reasonable rates.

MICHIGAN STATE ITEMS.

Lansing and Battle Creek are to be telephonically connected.

The new presbyterian church at Milan was dedicated last week.

Tuscola county pioneer picnic at Caro, Aug. 30.

A new life saving station is to be located at South Haven.

A new $20,000 school house has been voted for at Romeo.

Examinations for admission to the Agricultural college begin Sept. 4.

There were 665 births reported in Macomb county during the past year.

The corn crop in the vicinity of Buchanan promises well.

Ex-Senator Ferry is in Switzerland, and may return home in the fall.

The soldiers of Midland county will have a reunion at Midland City, Aug. 30th.

A Tuscola county man, who is living with his second connubial partner sues for a divorce from his first wife.

Rev. E. Campbell, of the church of Christ, Ionia, removes to Minneapolis, Minn.

E. Eichmeyers' grocery store at Bay City burned last week. Loss over $4,000; insured.

Jack Whitmore, a Battle Creek moulder, has just fallen heir to property in New York valued at $20,000.

Alvin Tripp and Frank Perchell, arrested at Muskegon on a charge of counterfeiting. Dies, metal and bogus coin were found in Tripp's house.

A two year old daughter of Star Blodgett, of Coldwater, died from the effects of a pea nut shell which lodged in her throat.

The Jackson common council has declared that sparrows may be shot in that city and the warfare has begun.

A divorced woman met her ex-husband at Muskegon, last week, and after a short parley, proceeded to give him a horse-whipping.

Capt. Manley, of the Ann Arbor militia company, has resigned. He has been an officer of the company many years.

There are 1,000 volumes in the Buchanan township library, and an average of 20 volumes per day are taken out by the citizens.

A Bay City woman took her son out in the street and larrupped his naked form, in order to cure him of a chonic desire to go in swimming.

Two barns were burned at Ann Arbor last Sunday and the firemen had hard work to prevent much damage to other property.

Carrie Boothby, of Howell, had a bit of slatepencil in her ear for eleven years, but a few days ago she put glycerine in the ear and the pencil came out.

The Flint Democrat says the son of a German nobleman is working on a job of bridge building at Flint—swinging a paint brush. If he does his work well, he is just as noble as anybody else perhaps.

Rev. Geo. B. Stocking, pastor of the First universalist church of Lansing, goes to Aurora, Ill., to take charge of a church. He is a true gentleman, an eloquent speaker, and leaves hosts of well wishers in this state.

Oak Park seminary, of Paw Paw, has been removed to Three Rivers, and is hereafter to be known as the Three Rivers seminary, normal school, business institute and kindergarten, with Abbie Barker at the head of the school.

Wm. Lace, was killed at Walla station, near Flat Rock, Saturday evening, by the bursting of a circular saw. He was a brother of Col. Lace, of Monroe, and was about 55 years old, and leaves a wife and three children at Monroe.

Geo. C. Munro, one of Jonesville's oldest citizens, died last week. In early days he was an Indian trader there and later has been prominent in business and other local interests and will be greatly missed. He was once the democratic candidate for lieutenant governor. He was also for many years a prominent freemason.

Olivet college is fortunate in possessing one of the best libraries in the state of Michigan. It is annually enriched with valuable donations. Most prominent among these is its $10,000 library fund whose donor has but recently become known. It proves to be Mrs. Lucy E. Tuttle, of Guilford, Conn., who died July 29, 1883. It is a memorial fund in honor of Willie Sage Tuttle, her much lamented and gifted son, who died several years ago. The interest is annually appropriated to the purchase of books for the library.

..HAT THE GIRLS NEEDED.

The father and mother together sat
Their visages puckered with care,
Pondering what they should do with their girls,
Their girls with the auburn hair.
"They play, and they sing, and they dance," the said,
"And they sketch with a pencil and pen,
They speak the German and French, and draw
Oh, we think they don't draw well.
And here they are idle, the old, idle question,
With their gaiety of French and Polish!"
And he gave the poodle beneath his chair
A prod with the end of his crutch.
"But what can they do that is useful," the patient
With no earn that really was shocking,
"Can they sew, or mend, or make clothes,
Or even the bone a stocking?"
"Why, I think they might do something," she said,
With a flush upon her cheek,
"My grandmother was the poor girls sent!
I'm sure she made many pieces of dresses!"

A DOUBLE AMBUSH.

BY GEORGE H. COOMER.

We lived at Fort [illegible] during the Seminole war, which lasted through all the Seminole war, which lasted [illegible] Alligator, Wild Cat, and Tiger Tail making a part of my childhood.

A sense of peril was always present with us. I remember the feelings with which we heard of the slaughter of Lieutenant Dade and his command. The tragedy took place in open battle, yet it seemed dreadful that so many brave men should be shot down in the dark woods, with the painted savages yelling around them.

In the spring when I was thirteen and my brother Arthur fifteen, the war was at its worst, and my father talked strongly of removing to a greater distance from the danger.

Among our few slaves, consisting only of two black families, was a handsome young negro named Jason, who had the privilege of wandering [illegible] as he pleased. He would often remain all day in the forest, either lying asleep or hooting the gobble of the wild turkeys.

One day he returned with an appearance that startled us. His woolly head had been completely shaved, and his black face dyed to a bright scarlet. He had, however, received no real hurt, and seemed not in the least troubled by the ordeal through which he must have passed.

We gathered from his broken sentences that he had fallen in with Indians, and it was plain that they had been in some measure true to the proverbial respect of their people for idiots. An ordinary person they would have sacrificed without mercy; but when Jason stared aimlessly at the tree-tops, or gobbled like a turkey, they simply set their mark upon him, and let him go.

The incident showed that our danger was more imminent than had been supposed; but there was fortunately a squad of United States cavalry quartered within a few miles of us, and my father lost no time in notifying the officer in command of what had occurred. The soldiers, however, could find nothing of the enemy, and in the meantime we passed a couple of days in very anxious suspense. The movements of Indian warriors are erratic, and to white men unaccountable.

My parents began to regain confidence, believing that the Seminoles were gone from the neighborhood, as they doubtless were for the time. Father said they were probably scouts, and there was no telling now they might have scattered themselves, or at what point some of them might appear next. He hoped, however, that the presence of the soldiers had led them to abandon our design, they might have entertained of attacking us.

On the third day after Jason's adventure we were feeling much relieved. The negro men were at work in the fields, and father had gone to a considerable distance from the house. Mother, Arthur, and myself, with the female servants, were within doors.

Presently, not far off, we heard the gobble of a wild turkey, or what seemed such, although, as turkeys were not in the habit of approaching so near the house, we imagined Jason to be at his old silly pastime again, imitating the call which he could so well counterfeit.

The notes were continued with great regularity at intervals of a minute or two, and so natural were they that Arthur would have been all on fire to seize his rifle and hurry in quest of the game, had he not remembered how often he had been led upon a fruitless chase by the vocal powers of the poor idiot.

"We all excel in something," said my mother, "and Jason was made to call turkeys. But I do wish he would be quiet; it makes me nervous to hear him."

"Jason," said a little negro girl who just then came in from the rear of the premises; "why, missus, Jason done gone asleep in de shade at de back ob de wash-house. I done see him dis minute."

Arthur hastened out-doors, looked behind the wash-house, and having assured himself that the black boy had nothing to do with the gobbling, returned quickly for his rifle.

"It is a real turkey," he said, "and he's somewhere in the hollow."

The hollow was made by a depression of the ground about fifty rods from the house front, and running parallel with it. Upon its further side was a decayed stump, some four or five feet high, standing below the sloping bank, and with its top just visible from the house. Of this stump the portion next to the slope had so fallen away as to leave a large cavity capable of containing a man.

The gobble indicated the turkey's whereabouts pretty definitely.

"He's somewhere near that stump," said Arthur; "perhaps inside of it, sitting up on the rotten wood toward the top. I'm afraid he'll get high enough to see me. But I'll make a circuit, and creep around where the ground is lower."

He went out at the back door, so as to make sure of not being seen. The land on our right, a few rods from the house, was very low, the depression stretching off in crescent shape until it reached the gully, which crossed it at fair rifle-shot distance from the stump.

Arthur, young as he was, had already become an excellent marksman, having two years possessed a rifle of his own, which father had bought him, and which was almost always in his hands. We had no doubt that, with anything like an ordinary chance, he would put a ball through the turkey's head, and return in triumph.

But somehow, after he went out, a sudden thought seemed to strike mother. Wasn't it strange that a turkey should come so far out of the woods, and keep up such a gobbling in the hollow? No, not strange, perhaps, nor very unusual; and she wondered at her own uneasiness. But her nerves had been shaken by poor Jason's incident.

The house had a half-story in front, with two small windows above the ground rooms, and mother's feelings impelled her to run up there for a better view. She wished to see where father was, and perhaps might discover something of the wild turkey.

I was close at her side. We saw father with his rifle away off across the fields, and the negroes at a distance, from him engaged in their work. The stump, too, was visible nearly to its foot, and at intervals we caught sight of Arthur carefully working his way in a half circuit toward the gully.

[illegible] heard the turkey, and was, while approaching the spot where it seemed to be. His half-stooping posture showed that he feared the bird might get upon the stump and see him.

Suddenly mother started, and her face had a look of ghastly terror. Something which formerly she had, in my case, laughed at, was plain to me. Between the shattered stump and the grove of the bank, I saw it too, and my blood ran cold.

It was something that greatly resembled the head of an Indian. We saw that the face might be peering through the grave toward my father, while we saw the black feathers half hidden.

Without doubt it was a Seminole warrior in ambush, watching father's approach.

[illegible] shall I do? screamed mother.

Would not any entry she could make be misunderstood at such a distance, and only hasten the catastrophe, since father was still three rods beyond the Indian, and sheltered from the house? Then there was Arthur, who had now disappeared? And [illegible] of a sudden alarm [illegible] himself, might not the [illegible] and shoot him on the spot? [illegible] with her sense of the dreadful [illegible]

But in a moment I called out to her, "There's Arthur, there's Arthur!" for I saw him among the rank grass, lying flat upon the ground, within good rifle-shot of the stump, which he seemed to be watching intently.

Once again the Indian's head was shown slightly, and we got an instant's glimpse of Arthur's rifle. But the black hair disappeared, and the weapon was lowered.

Father was now so near the scene of danger that we had no alternative but to watch. Terrible as was her anxiety, mother now felt that Arthur had discovered what kind of game the old stump contained. She knew that the Indian could not fire at father without exposing his own head, and that the moment it appeared it would be covered by her brave boy's rifle.

How our hearts beat for the few moments that intervened! Another gobble came from the stump. Father was working his way stealthily toward it in anticipation of a prize, and Arthur lay still as death in the grass.

All at once we saw the sunlight glance upon a mass of long raven hair that rose slowly above the guarled wood which had hidden it. Father was within six rods of the spot. It was a dreadful moment.

Our eyes turned to Arthur. The grass in front of the slight knoll where he lay was not high enough to interfere with his aim as his elbow rested on the ground. We could see him drop his young face against the breech of his gun. The barrel gleamed for a single instant, a puff of smoke streamed from the muzzle, and he leaped to his feet.

But there was a still more sudden leap from the old stump, for an Indian with flying hair, and with his rifle still clutched in his hand, sprang up and fell dead against the slope which had concealed him from father's view.

The reunion which followed, when we all ran into each other's arms, joyful, yet thrilled with consternation, I will not dwell upon.

We found the dead enemy to be a tall young warrior, hideously painted, and having in his belt a hatchet and a knife.

He had no doubt entered the gully from the swamp, and seeing father at a distance, had attempted to decoy him within a gunshot by imitating a wild turkey.

The occasion proved to be the only one on which the Seminole war was brought home to us, as the successes of the United States troops afterward kept the Indians at a distance from our neighborhood.—*Harper's Young People.*

Preparation of Peanuts.

Peanuts to be prepared for the market are placed in a large cylinder, from which they enter the brushes, where every nut receives fifteen feet of a brushing before it becomes free. Then they are droped on an endless belt, passing along at the rate of four miles an hour. On each side of the belt stand girls, and, as the nuts fall on the belt, the girls, with a quick motion of the hand, pick out all the poor looking nuts, allowing only the best to pass the crucible. Those that do pass drop into bags on the floor below. When the bag is filled it is sewed up and branded as "cocks," with the figure of a rooster prominent on its sides. The peanuts caught by the girls are thrown to one side, picked over, and the best singled out, bagged and branded as "ships." These are as fine a nut for eating as the first, but in shape and color do not compare with the "cocks." The third grade is branded as "eagles." These are picked out of the cullings of "cocks" and "ships." The cullings that are left from the "eagles" are bagged, sent to the top story, and what little meat is in them is shaken out by a patent sheller. The nuts being shelled by this new process, the meat drops in bags below, free from dust or dirt of any kind, and is then shipped in 200-pound sacks to the North, where it is bought by confectioners for the purpose of making taffy or peanut candy. It may be here stated that a peculiar kind of oil is etxracted from the meat of the nut, and in this specialty a large trade is done among the wholesale druggists. There is nothing wasted, for even shells are made useful. They are packed in sacks and sold to stable keepers for horse-bedding, and a very healthful bed they make.

Flocks of Sheep.

We are asked how many sheep can advantageously be kept in one flock. The answer to the question would depend somewhat on the breed, which our correspondent does not designate, and it would also depend upon how much room he has. If he has room enough we no not see why a limit should be fixed, especially of Merinoes; and we do not know that it would be necessary in regard to other breeds. There is a prevalent idea that Cotswolds do not do well in large flocks, and we are not able from personal observation or experience to say whether they will or not. It is said, however, that in the old country they are kept in flocks to the number of even 800, and from all we have read upon the subject, we should think that there would be no difficulty in maintaining large flocks, if there were room enough. There are some obvious reasons why smaller flocks are better than larger ones, but it is not impossible to keep large ones, and it is practicable. The Merinoes will herd to any number if there is room enough.

A General Complaint.

CAUSES THAT LEAD TO LOSS OF APPETITE—REMEDIES.

Loss of appetite is of common occurrence at the onset of many fevers, but usually it is a far more chronic complaint. Nothing is commoner than to hear people say that they "have no appetite," they "do not care for anything," or that they "hate the sight of food." It is often enough associated with a condition of debility and general inaptitude for work. It is by no means uncommon in those who are worried and anxious and find it difficult to make both ends meet. People who devote too much attention to the weighty cattle generally find meals rather a trouble than otherwise; breakfast, especially, is a difficulty. These individuals are generally very distinct and careful, and think of home grown at everything that is set before them. They are very fond of saying the cook, for, what is in reality the sorry condition of their digestive organs. To tobacco smokers, or, at all events, those who smoke in any quantity, are seldom great [illegible] and tobacco and opium and alcohol seem all to have the power of deadening the appetite. People who take little or no out-door exercise generally complain that they do not eat well, and no wonder. If a man wants a good appetite, he must earn it some how or other. Some one may give him his dinner, but if he is to enjoy it he will have to bring his own sauce in the shape of an appetite.

Irregularity of meals is another common cause of loss of appetite. The stomach appreciates regularity, and likes to have its wants attended to at the proper time. It is curious how in a well-regulated body the desire for food is experienced day by day at exactly the same hour. We all know how dreadfully bad-tempered many people get if their dinner is only five minutes late. It is all very well to say that they are stupid and should not be put out about trifles, but it must be remembered that it is no trifle to them, and that even a slight delay may give rise to a considerable amount of bodily discomfort. The stomach has been accustomed to receive supplies at certain regular intervals, and if it fails to receive them, it objects most emphatically. Nothing is more likely to spoil the appetite than eating or drinking between meals. You hear a man complaining that he cannot eat his dinner, and you find on inquiry that about an hour before he had three or four dozen oysters and some bread and butter and a pint of stout, "just to pull him together." It may be thought that this is an exaggeration, but it is not. We have seen it, and we wish we had not, for nothing can be more contemptible than a man who makes a deity of his stomach. We should eat to live, and not live to eat. For people who dine in the middle of the day, lunch is a great mistake. Many people seem to think that it would be a great hardship to go without food from 8:30 a. m. to 1 p. m. They make a good breakfast directly they get up: ham and eggs and all the etceteras; and then at 11 a. m. they go in for bread and cheese and beer. Somebody once said that "lunch is a reflection on your breakfast, and insult to your dinner," and it is a pity that more people do not bear this in mind. You can never expect to have a good appetite unless you allow a good five hours to elapse between each of the chief meals of the day.

What is to be done for loss of appetite? In the first place it is essential to avoid, as far as possible, any of the circumstances we have mentioned as causes of this complaint. Be regular in your habits; get up early; do not stay out late at night; take plenty of outdoor exercise; have your bowels well opened every morning; do not drink much tea; be quite sure you are not smoking too much, and not taking more than you ought to in the way of stimulant. It is a great thing if you can dine in cheerful, pleasant society—the example of eating seems to be almost contagious. It is astonishing what a great deal bad cookery has to answer for in the way of exciting a distaste for food.

The practice of taking bitters before meals with the view of increasing the appetite is a common one. It is undoubtedly a bad habit, but in certain functional derangements of the stomach an occasional gin and bitters or sherry and bitters may have its advantages.

Probably the drug most frequently employed with the view of stimulating the jaded appetite is quinine. Two tablespoonfuls of the tonic quinine mixture should be taken about half an hour before meals, or two tablespoonfuls of quinine wine will do equally well. The infusion of quassia may also be used for this purpose, and its efficacy is greatly enhanced by the addition of three or four drops of tincture of nux vomica. Nux vomica is one of the pleasantest bitters we know, and will often succeed admirably, even when given in plain water. Other tinctures and infusions employed for a similar purpose are those of calumba, gentian, chirette, and cusparia. The infusions should be given in two tablespoonful doses, while the dose of tinctures is a teaspoonful in water. The tincture of nux vomica, it will be remembered, is a much more powerful drug, and the dose of this should not exceed eight drops. The different preparations of hops are useful, but are, we think, best taken in the form of bitter beer. Absinthe, or wormwood, is largely employed. With many people, especially those who are predisposed to constipation, two or three tablespoonfuls of compound decoction of aloes will succeed better than anything. For elderly people, pepsin taken in five-grain doses half an hour before meals is useful. We need hardly say that for patients who are anæmic or suffering from what is usually called "poorness of blood," iron is the remedy.—*Philadelphia Times.*

Very Well Put.

Why do we deter till to-morrow what we should do to-day? Why do we neglect a cough till it throws us into consumption, and consumption brings us to the grave? Dr. Wm. Hall's Balsam is sure to cure if taken in season. It has never been known to fail. Use it thoroughly according to directions. Persevere until the disease is conquered, as it is certain to be, even if it should require a dozen bottles. There is no better medicine for Pulmonary disorders. Sold everywhere.

Baker's Pain Panacea.

Is one of the best Liniments put up. It is a real pain killer, and destroys pain, whether internal or external, whenever used. It has been a standard remedy for the past thirty or forty years.

Townsley's Tooth Anodyne cures instantly.

It is the lot of genius to be opposed, and to be invigorated by opposition.

Our Slang.

MOST OF OUR AMERICANISMS SAID TO BELONG TO JOHN BULL.

It has for a long time been a standing accusation that American literature is but a pale reflection of the English, and that about the only thing we could boast of is originating a plentiful stock of Americanisms. [illegible] and are traced to English owners. Professor Lounsbury, of New Haven, says in the *Independent*: "Certain it is that many and perhaps most of the colloquial expressions, which both here and abroad go under the name of Americanisms, are found also in the colloquial speech of the provincial dialects of England. From there they were brought here. It is only within the last few years that a society has been organized in England for the express purpose of collecting and preserving the peculiar words, phrases, and pronunciations still existing in the provincial dialects, and not until that work has been fairly completed shall we be in a position here to compare the colloquial language of the two countries and [illegible] in which each is in original in its way is imported. At present all assertions must be based upon the scattered labors of independent observers, possessing, it is to be added, in nearly every case very imperfect qualifications for the task. Still, with even these defective sources of information, the results obtained are somewhat striking. Let us take for illustration a solitary volume—the glossary of words and phrases used in the county of Suffolk, compiled by Edwin Moor, and published in London in 1823. In this one small work confined to the colloquial speech of a single shire, and embodying that incompletely, will be found such pronunciations as 'cute for acute, chaw for chew, drownded for drowned, hoss for horse, gal for girl, natur for nature, taters for potatoes; such phrases as to flop in a chair, to trim one's jacket, to haul over the coals, to ride like blazes, gift of the gab, in a horn, in a jiffy, a tip-top fellow, before you could say Jack Robinson, that's a whopper; such oaths and exclamations as by gum, by gosh, darnation, hang it, lack-a daisy; such words as bobbery for disturbance, gawky for awkward, glum for gloomy, gumption for sense, hullabaloo for clamor, obstropolous for obstreperous, sappy for silly, scaly for shabby, and spree with its wide varieties of meaning; such contributions to culinary speech as flapjacks, apple tritters, and indeed, sauce, as applied to garden vegetables generally; the same felicitous description of states of mind conveyed in such expressions as to be in a tantrum, to be in a pucker; such terms of abuse as dunderhead, ninny-hammer, nincompoop, and a whole tribe of vigorous common words denoting personal chastisement, such as baste, larrup, lather, lick, welt, wallop and whack; and, in addition to all these, that peculiar qualifying phrase, heard so often with us, of kinder, (or kind of,) in the sense of "somewhat," as, "he is kinder cold." The list of expressions common to the colloquial speech of the two countries, which is contained in this one work, has by no means been exhausted; but enough has been quoted to make it clear that we are not as original as many of us are inclined to think. It is to be conceded, to be sure, that the dialect of the East-Anglian counties bears, on the whole, a much closer resemblance to the so-called Yankee dialect than that of any other part of Great Britian. Yet in spite of this fact, if so small a glossary furnish so many of our common terms, what will be left us when once a complete collection of the colloquialisms and provincialisms of old England shall have been made?"

Grins.

Pleasant, healthy grins are seen only on the faces of healthy persons.—The dyspeptic and debilitated can smile only in a half-hearted way. Purify the blood, tone the stomach, and strengthen the tissues with Burdock Blood Bitters, if you wish to laugh well and often.

To Cure Foot Rot in Sheep.

The preparation of the foot is just as essential as the remedy, for if every part of the disease is not laid bare the remedy will not effect a cure. A solution of blue vitriol as strong as you can bear your hand in, for a moment, having the liquid three or four inches deep, or deep enough to cover all the affected parts; then hold the diseased foot in this liquid ten minutes, or long enough to penetrate to all the diseased parts; put the sheep on a dry barn floor for twenty hours to give it a chance to take effect. In every case where I have tried it, it has effected a cure, and I have never given a sheep medicine internally for foot rot. This remedy I call a dead shot when the foot is thoroughly prepared, but a more expeditious way, and where you don't hardly hope to exterminate the disease, but keep it in subjection, is this: After preparing the feet as for vitriol cure, take butter of antimony, pour oil of vitriol into it slowly until the heating and boiling process ceases, and apply with a swab. This remedy works quicker, is stronger than the vitriol, and is just as safe, but its mode of application renders it less sure.—*Ohio Farmer.*

Causes Astonishment.

"Completely prostrated for days with indigestion and billious fever.—The effects of two bottles of Burdock Blood Bitters astonished me; visible improvement right off." Mr. Noah Bates, Elmira, N. Y.

A fact probably but little known is that the United States nickel five-cent piece furnishes a key to metric measures and weights. This coin is two centimeres in diameter and its weight is five grammes. Five of them placed in a row will give the length of the decimetre, and two of them will weigh a decagramme. As a kilolitre is a cubic metre, the key of the measure is also the key to a measure of capacity.

IMPORTANT

When you visit or leave New York City, save Baggage, Expressage and Carriage hire, and stop at the **Grand Union Hotel** opposite Grand Central Depot.

Elegant rooms, fitted up at a cost of one million dollars, reduced to $1 and upwards per day. European plan. Elevator. Restaurant supplied with the best. Horse cars, stages and elevated railroad to all depots. Families can live better for less money at the Grand Union Hotel than at any other first-class hotel in the city.

Beautiful things are suggestive of a purer and higher life, and fill us with mingled love and fear. They have a graciousness that wins us, and an excellence to which we involuntarily do reverence.

Will it really cure Rheumatism.

We answer, honor bright, it will cure rheumatism, and the severest cases too. Dr. Thomas' Eclectric Oil was specially prepared for the rheumatic and lame. Notice letters from the people relative to its merits in nearly every paper in the country.

"Send for Mother."

"Dear me! It wasn't enough for me to nurse and raise a family of my own, but now when I am old and expect to take a little comfort here, it is all the time 'send for mother.'" And the dear old soul grumbles and grumbles, but dresses herself as fast as she can, notwithstanding. After you have trotted her off, and got her safely [illegible] home, and she has taken [illegible] her remedies and remakes by turns, you feel easier. It is right now, or soon will be—mother's home.

In sickness, no matter who is there or how many doctors quarrel over your case, everything goes wrong somehow, till you send for mother.

In trouble the first thing you think of is "send for mother."

But this has its ludicrous as well as its tragic aspect. The pertinent young people, to whom baby's extraordinary [illegible] and [illegible] shows, which threaten the dislocation of its chin; its wonderful sleeps, which it accomplishes with its eyes half open and no perceptible [illegible] of breath, so alarming the young mother to imagine it's dead this time, and to shriek out, "Send for mother!" [illegible] tones of anguish—this young couple in the light of experience which three or four babies bring, find they have been ridiculous and given mothers a good many trots for nothing.

Did anyone ever send for mother and she fail to come? Never, unless sickness or the infirmities of age prevented her. As when, in your childhood, those willing feet responded to your call, so they still do, and will continue to do as long as they are able. And when the summons comes which none yet disregarded, though it will be a happy day for her, it will be a dark, sad one for you, when God, too, will send for your mother.

"Go and Try It."

"It will do you more good than anything I can prescribe," is what a prominent physician said of Rheumatic Syrup to a lady who was suffering from rheumatism and neuralgia. She did so and was cured, and to-day is entirely free from pain and cannot say enough in its praise.

Thousands of children all through the land are to-day suffering from salt rheum or scrofula, and thousands of mothers are using liniments and salves with the hope of curing the dear little ones, but how many are disappointed and discouraged when after trying these various applications they find the child worse than when they commenced their use.

Mothers do not know that salt rheum, scrofula and fever sores are all the result of impure and poisonous blood, and that to effect a cure you must first cleanse the blood of its impurities?

The safest and most effective remedy to regulate the liver and kidneys and rid the system of these loathsome diseases is Rheumatic Syrup. Being a compound of roots and herbs, makes it a safe, harmless and effective remedy for young and old, feeble or strong.

Try it, and before three bottles have been used your child's skin will be as smooth and its cheeks as rosy as that of your neighbor.

What are Pearls?

Discorides and Pliny mention the belief that pearls are formed by drops of rain falling into the oyster shells while open, and the rain drops thus received are hardened into pearls by some secretions of the animal.

According to Richardson, the Persians say when the drops of spring rain fall into the pearl oyster they produce pearls.

Mr. Darwin thinks that pearls are formed like those calcareous productions of crabs known by the name of crab's eyes, which are always near the stomach of the creatures, and adds that in both cases the substance is probably a natural provision of her for the reparation or enlargement of the shell.

A pearl which Pliny valued at about $375,000 in our present money, Cleopatra is said to have dissolved at a banquet and drank off to Antony's health. A pearl given to Philip II., of Spain was called *la peregina*, and was valued at 80,000 ducats. It was oval and of the size of a pigeon's egg, the largest which is positively known to have been found. Those of the size of a cherry are found more frequently, but still very rarely. Pearls are found ranging in color from a pure white to a perfect black. The pearl denotes purity, and gives clearness to physical and mental sight.

Hood's Sarsaparilla.

Is designed to meet the wants of those who need a medicine to build them up, give them an appetite, purify their blood, and oil up the machinery of their bodies. No other article takes hold of the system and hits exactly the spot like Hood's Sarsaparilla. It works like magic, reaching every part of the human body through the blood, giving to all renewed life and energy. $1 a bottle; six for $5.

Think twice before you believe every evil story that you hear, and think twenty times before you repeat it, especially if it is about a woman. Say to yourself, "This may not be true, or it may be exaggerated," unless you have proof of the veracity of your informant. People sometimes tell falsehoods, they often make mistakes, and they may "hear wrong." There is auricular illusion just as well as optical illusion. Take all these things into consideration before you believe. As for repeating the story, ask yourself if it is necessary. It sometimes is necessary. Then do it with the fear of God and the remembrance of the golden rule.

Ayers Pills cure headache by removing obstructions from the system, relieving the stomach, and giving healthy action to the digestive apparatus.

The happiness of life consists, like the day, not in single flashes of light, but in one continuous mild serenity. The most beautiful period of the heart's existence is in the calm equable light, even though it be only moonlight or twilight. Now the [illegible] can obtain for us this heavenly [illegible] and peace.—[Richter.

Bucklen's Arnica Salve.

The greatest medical wonder of the world. Warranted to speedily cure Burns, Bruises, Cuts, Ulcers, Salt Rheum, Fever Sores, Cancers, Piles; Chilblains, Corns, Tetter, Chapped Hands, and all skin eruptions, guaranteed to cure in every instance or money refunded. 25 cents per box.

Sold by C. A. Wright & Co.

AYER'S Hair Vigor

restores, with the gloss and freshness of youth, faded or gray hair to a natural, rich brown color, or deep black, as may be desired. [illegible] baldness, dandruff, and humors often, though not always, cured.

It checks falling of the hair, and stimulates a weak and sickly growth to vigor. It prevents scalp diseases and dandruff, and heals nearly every disease peculiar to the scalp. As a Ladies' Hair Dressing, the Vigor is unequaled. It comes from the bottle free, yields the hair silky grace, and glistens to a degree scarcely equaled by any other preparation, and imparts a delicate, agreeable, and lasting perfume.

[illegible] Bailey, proprietor of the *Mobile Register*, says: "Ayer's Hair Vigor is a most excellent preparation for the hair. I speak of it from my own experience. Its use promotes the growth of new hair, and makes it glossy and soft. The Vigor is also a white dressing for the scalp. Not without my knowledge has the preparation ever failed to give satisfaction."

Mr. Ayer: "Gentlemen, leader of the celebrated 'Eighteen Family,' of Scottish vocalists, writes from *Boston, Mass., Feb. 6, 1880*: "Ever since my hair began to give signs of the change which decking time predeceth, I have used Ayer's Hair Vigor, and I so have been able to maintain an appearance of youthfulness—a matter of considerable consequence to ministers, orators, actors and in fact everyone who lives in the eyes of the public."

Mrs. O. A. Prescott, writing from 18 Elm St., Charlestown, Mass., April 11, 1882, says: "Two years ago about two-thirds of my hair came off. It thinned very rapidly, and was fast growing bald. On using Ayer's Hair Vigor the falling stopped and a new growth commenced, and in about a month my head was completely covered with short hair. It has continued to grow, and is now as good as before it fell. I regularly used but one bottle of the Vigor, but now use it occasionally as a dressing."

We have hundreds of similar testimonials to the efficacy of Ayer's Hair Vigor. It needs but a trial to convince the most skeptical of its value.

KING OF THE BLOOD

The Most Thorough Purifier of the Blood Yet Discovered.

Cures all Humors, from a Common Eruption to the worst Scrofula.

It purifies the Blood.
It invigorates the Liver.
It regulates the Bowels.
It strengthens the stomach.
It gives vivacity in place of lassitude; cheerfulness in place of gloom, and robust vigor in place of debility.

Dyspepsia, Biliousness, Disordered Liver, Constipation, Nervous Affections, General Debility, in short all the numerous diseases and discomforts caused by impure blood are speedily conquered by this powerful corrector, the chief and sovereign of all ancient or modern medical discoveries.—KING OF THE BLOOD.

This is its best description as it is a royal dispenser of the blood.

It vanquishes the foes that lurk in the blood.

It banishes PIMPLES, SALT RHEUM, SCALY ERUPTIONS, ULCERS, SCALD HEAD, FEVER SORES, and all SCROFULOUS DISORDERS.

It checks CONSUMPTION in its early stages. It has frequently cured it when advanced.

It disperses TUMORS and CANCERS without the Surgeon's knife.

It cures DROPSY, general or partial.

It cures FEMALE WEAKNESS and DISEASE.

It reduces in a safe and effectual manner all swellings, external or internal.

It eradicates the effects of Venerial Disease and Mineral Poisons, and establishes a sound constitution.

Many certificates, much further information and full directions for using, will be found in the pamphlet, "Treatise on Diseases of the Blood," in which each bottle is enclosed.

Price $1 per bottle containing 12 ounces, or to 50 doses. Sold by dealers in medicine.

If your druggist does not happen to have it on hand, request him to order a supply of it for you, as it will be cheaper than for you to order direct of us, and less trouble.

The Executive Mansion.

The president's home at Washington, which is officially termed the Executive mansion, commonly called the White House, has a history that runs back nearly ninety years. Its corner stone was laid under the superintendence of Captain James Hobon, as architect, on the thirteenth of December, 1792. Captain Hobon was an Irish architect, direct from Dublin, via Charleston, who took the award of $500 for the design. He is buried in the Catholic cemetery at Washington, and his descendants are still living in that city. The British destroyed the building in 1814. It was afterwards rebuilt by Captain Hobon, and was first opened for the reception of visitors on January 3, 1819. The portico, of four lofty columns on the north side, was added in 1829, during the administration of President Jackson. It is a lofty building, two stories in height, having a frontage of 170 feet and a depth of 80 feet. The vestibule within the front door is 50x40 feet in dimensions. The famous east room, which was finished only fifty years ago, is 80 feet long by 40 wide and 22 feet high. Eight large mirrors and three chandeliers of crystal and silver adorn it. The walls are covered with gray paper, and the trimming of the furniture is gray reps and maroon velvet. With the exception of our public halls, it is probably the largest room in the country, and for its size is certainly the handsomest. It is the Mecca of all lady visitors to the capitol. The president's office, which is in the second story, is also the cabinet room, and is not a very large apartment for the White House, although about thirty-five or forty feet deep, by perhaps thirty feet wide, and with a high ceiling. A long table is in the middle of the floor, with leather seated chairs around it; the two windows have long lambrequin curtains of a dark, bluish gray color. A large map of the United States is on the wall. The carpet is of a red tint, with large figures. The general effect of the room as one enters is that of a library without books. The White House is surrounded immediately by twenty acres of garden and park. The lawn is still a naked plain, reaching on to the Potomac, like a desert coming to the palace stairs. Like Versailles in the time of Louis XVI., Washington is a government creation, and the White House is memorable only for the people who have lived in it. Every one of our presidents, except Washington, has lived in this great house, and he had poked his horse's head into its portals to look at the workmen plastering on the scaffold. The original cost of the building in 1792 was about $333,000, and the total cost of the structure to the present time, with refurnishing, etc., has been about $1,750,000. The unhealthful character of Washington, and of the White House locality in particular, has been for years a subject of complaint.

After Commencement, What?

It is an ungracious thing, perhaps, to tell the young men who are just emerging from college into what they vaguely call the world, that their education is by no means complete. In fact, if they have made the very best of their opportunities, they have only learned how to learn, and have yet to add wisdom to their learning by knocking against some very hard facts which are not catalogued in their philosophies. The farther an alumnus gets from his graduation day, the more clearly he sees that his education was but the veriest substructure of his manhood—the pile-driving and puddling upon which the foundation stones were to be laid. The college faculty, as wise master-builders, have done the best they could. "But let every man take heed how he buildeth thereupon."

The future is every man's personal responsibility, and the graduate who expects that the world is going to open its arms to him and coddle him with sugar-plums is pretty sure to be disappointed. A class that has been out of college twenty years can demonstrate this in its own experience. Youthful brilliancy has counted for almost nothing. The college diploma has not been a passport to special favor, much less to success. Every man who has made his mark in any line of work or thought, has done it through his wisdom in building upon the foundation that was laid. In many cases the foundation does not even appear above the surface; but it is worth having, and the superstructure is the stronger and more beautiful for it. The attempt to mark out one's path in advance is half the time a failure. Unforseen circumstances, unexpected developments of taste and talent will appear, which will lead into strange paths. Perhaps there is no sphere in life where the "Divinity that shapes our ends" is more apparent than in the life of a young man of education; and President Seeley's advice, that each should be content with his providential lot, and seek to follow and not oppose the manifest destiny of his life, is as profoundly wise in the social and material as in the religious aspect of the case.

Positive Cure for Piles.

To the people of this county we would say we have been given the agency of Dr. Marchisi's Italian Pile Ointment—emphatically guaranteed to cure or money refunded—internal, external, blind, bleeding or itching piles. Price 50 cents a box. No cure, no pay. For sale by Waldo & Doty, druggists.

The Western Reserve.

Several of the seaboard States at an early day when, in fact, they were colonies, acquired claims to lands extending westward practically to the utmost limit. Among this number were Connecticut, Virginia, New York, and Massachusetts. These laid claim to portions of the territory embracing Ohio, their claims being based on their chartered grants, but all finally ceded the right of eminent domain to the United States, Virginia and Connecticut reserving however, the ownership of about 3,700,000 acres each. The Connecticut lands formed what was called the Western Reserve, and the Virginia the region about the Falls of the Ohio, which eventually became a part of the State of Indiana. The Western Reserve began to be settled about the year 1800. The pioneers of Ohio were New Englanders, who, however, found their way to that State, settling at Marietta, Cincinnati, and at other points. The Reserve was in the northeastern part of Ohio.

We All Believe

That it is a long lane that has no turning; that many a shaft at random sent, finds a mark the archer little meant; that no remedy sold will cure coughs, colds, croup, whooping cough and all throat and lung troubles so quickly nor permanently as Dr. Bigelow's Positive cure; that our druggists, Baker and Hall, are very generous to give trial bottles of this remedy free of charge.

Interesting Ring Trick.

Some years ago great stress was laid upon the ability of certain spiritual mediums, so-called, to pass upon the arm of another person, an unbroken iron ring, the person's hands being clasped all the time by the medium's two hands. Mr. W. I. Bishop lately showed a gathering of scientific and literary people in London how it is done. He bandaged the eyes of Mr. Sime, saying it was the same for that gentleman as if the gas was turned out. He then caused Mr. Simes to place his hands, together on his knees, brought his own hands from each shoulder of Mr. Sime to his hands, placed one of his hands on Sime's two, and said:

"You feel now that both of my hands are touching yours." "Certainly," said Mr. Sime, "I feel both of your hands." Bishop had one hand perfectly free, and slipping it through an iron ring placed the free hand back. The ring thus held on their joint arms, Mr. Sime having no idea that Mr. Bishop's right hand had left his for an instant. He said the illusion was perfect. So much can be done with a remarkably shrewd Scotchman in the dark, while every one is smiting his neighbor. Mr. Bishop then got Henry Labouchere to write five names and roll them up in pellets, *a la Foster*. After they had been written and placed by Mr. Labouchere in an envelope, Mr. Bishop came upon the platform and sat opposite him at a table. Mr. Labouchere was then requested to lay the pellets out on the table, and Mr. Bishop wrote out successively on a sheet of paper every name that had been folded up. Mr. Labouchere had watched every movement very keenly, but was entirely deceived. Mr. Bishop then showed that it was done by holding between his fingers a dummy pellet which he substituted for each of the five in turn, so that five should always appear on the table, while really one of the pellets was in his hand to read.

In Washington's Day.

In Philadelphia, which was the seat of the Continental Congress and of Washington's administration, many anecdotes are preserved of the men and manners of those earlier days which have never found their way into print.

A venerable physician described lately a dramatic incident, in which his father had taken part. The first blood of the Revolution had been shed at Lexington; each colony had voted to raise its poor quota of men, and in the Colonial Congress, George Washington, a young member from Virginia, had been appointed to lead them to the field.

On the evening of the same day, he was invited, with Thomas Jefferson, John Adams, Charles Thompson (surnamed Truth by the Indians, and probably the last white man whom they would have so named) and one or two others to join a dinner-party, given in a "House of call" at Gray's Ferry, a picturesque suburb of the town.

The dinner was discussed with gusto and merriment until the host called upon his guests to rise, and proposed "the health of General Washington, Commander-in-chief of the Continental armies." Instead of applause there was a sudden death-like silence. The Continental armies were a handful of undisciplined, unarmed men; opposed to them was the most powerful nation on earth.

It was the first time that Washington's position and the desperate venture on which they had entered had been formulated into words. Washington, who had risen, smiling, stood silent and pale; one by one the glasses which had been raised were set down untouched. Not one of the startled men who held at, the moment the destinies of the continent in their hands remembered to drink the toast.

A Sermon on Early Marriages.

I believe that the scriptures teach that early marriage is desirable. Solomon says: "Rejoice with a wife in thy youth." We find the same implication in Isaiah, where the fact is used as an illustration: "For as a young man marrieth a virgin, so shall thy sons marry thee." Again Malachi "Therefore take heed to your spirit, and let none deal treacherously against the wife of his youth." The same implication occurs again and again in the teaching of the book. Not that it in any wise authorizes a man to rush into marriage before he is qualified to support a wife, or before due consideration is given to the matter, but if he have a good trade or profession, or lawful business, which has the reasonable promise of support in it, and have correct morals, is not that capital? I verily believe that the land would be vastly better if all young people would be content to begin life humble, if need be, and build up their fortunes and their homes together as the birds do their nests. Then, again, an early marriage secures a more ready assimilation of character and tastes. It furnishes a worthy object which stimulates to industry. It saves many of those temptations against which the charms of a christian home in wedlock is the surest protection.—*Rev W. A. Robinson.*

HINTS FOR SUNSTROKE CASES.—Sunstroke was in many Cincinnati cases, during the terrible heat, treated with hot water instead of cold. The following directions were published by such physicians as favored the plan: Lay the patient on his back, loosen the clothing, so as to encourage a free flow of blood; expose the chest, especially over the region of the heart, and with a large cloth, towel or sponge freely bathe the head, face neck and chest with hot salt water, as hot as can be handled, continually adding more hot water and applying it until the patient is soft. Use one teaspoonful of salt to every quart of hot water. Have the feet made bare and rubbed or slapped, and in extreme cases apply mustard poultices. Give internally, if a temperate man, a teaspoonful of whisky in hot water; if a drinking man, use a little ammonia or hartshorn in hot water; if soon after a meal, put a teaspoonful of yellow mustard into a glass of warm water and have the patient drink it, following up with more until he vomits freely. As he convalesces give at first lime water and milk (one-fourth lime water and three-fourths milk,) afterward a liquid diet until the stomach is strong enough for solids.

Thousands Say So.

Mr. T. W. Atkins, Girard, Kan., writes: "I never hesitate to recommend your Electric Bitters to my customers, they give entire satisfaction and are rapid sellers." Electric Bitters are the purest and best medicine known and will positively cure Kidney and Liver complaints. Purify the blood and regulate the bowels. No family can afford to be without them. They will save hundreds of dollars in doctor's bills every year. Sold at fifty cents a bottle.

Sold by C. A. Wright & Co.

WHAT SHE CALLED HIM.—A well-known educationalist vouches for the truth of the following:

A teacher in a lower grade of one of our public schools received a new pupil—a little miss of 6 or 7 years, named say, Hattie Brown. After taking her name for the school-rolls, according to the custom, the teacher said:

"What is your papa's name, Hattie?"

"Mr. Brown."

"Yes, but what is his first name?"

"Don't know—his name is just Mr. Brown."

"Yes, yes—I know," then, as a bright idea struck her, "What does your mamma call him?"

"Oh, I know what you mean now," the innocent child replied; "ma calls him a darned old fool."

It is safe to conclude that the teacher did not register the child's father as D. O. F. Brown.

KAHOKA, Mo., Feb. 9, 1880.

I purchased five bottles of your Hop Bitters of Bishop & Co., last fall, for my daughter, and am well pleased with the Bitters. They did her more good than all the medicine she has taken for six years.

Wm. T. McClure.

The above is from a very reliable farmer, whose daughter was in poor health for seven or eight years, and could obtain no relief until she used Hop Bitters. She is now in as good health as any person in the country. We have a large sale, and they are making remarkable cures.

W. H. Bishop & Co.

TREES OVER A THOUSAND YEARS OLD.—The lumbermen of California every day cut pines twice as tall and two and a half times as large as that wonderful tree at Waterloo, N. Y.. We have seen 16,000 feet of lumber from a single California pine, and, the contract with the haulers being to cut no logs above the lowest limbs, the top left in the woods was more than four feet through where the last log was cut off. And then when it comes to a venerable age for trees, the big trees of Calaveras were larger than this Crystal Lake tree ever grew to be 800 years before the Magna Charta was signed by King John, which was 666 years ago.—*Salt Lake Tribune.*

No family can afford to be without the following remedies in the house to use in case of emergencies, before a physician can be called—oftentimes saving calling one, and also saving the lives of the little ones: A bottle of Hatch's Universal Cough Syrup, which cures coughs, colds, croup, &c.; a bottle of Home Relief for sudden attacks of colic, cramps, cuts, bruises, sprains, etc.; a box of A. H. Davis' Family Pills, for constipation, torpid liver, kidney difficulties, headache, bones ache and fever symptoms. 25c sizes will cost only 75 cents for the outfit.

HE HAD TO STAND IT.—There were half a dozen ladies and gentlemen in a street-car, when the driver stopped the car and said: "There is somebody in this car trying to beat me out of a fare." The passengers loooked at each other, and all said they had put in their fare. "It don't make any difference. There are only six fares in the box and seven people in the car." Then a gentleman got up, and with a sigh, put in the missing fare, remarking: "I put one in before, but as I was once in the legislature everybody will say it can't be anybody else but me, so I will have to stand it."

Hay Fever.

From Col. J. Maidhof, of New York: "I have suffered severely for the last ten years from Hay Fever in early and mid-summer and in the fall. I desire in the interest of my fellow sufferers to testify in favor of Ely's Cream Balm. My short use of it demonstrates its efficacy. J. Maidhof, 401 Broadway.

I can recommend Ely's Cream Balm to relieve all persons suffering from Rose Cold and Hay Fever. I have been a great sufferer from these complaints and have used it. I have recommended it to many of my friends for Catarrh, and in all cases where they have used the Balm freely they have been cured. T. Kenney, Dry Goods Merchant, Ithaca, N. Y.

A PRETTY OLD SETTLER.—There was a good specimen of American wit in the reply made by the old settler, who had lived in his city since it was a log cabin or two, to the young man who was putting through a course of interrogatories:

"You must have lived here a long time?"

"Well, I reckon."

"Why, how long since you came here?"

"Young man," said the old settler, seizing the questioner by the coat lappel, "do you see that hill across the river (pointing to a lofty peak)?"

"Yes," said the other, "I do."

"Well, I kim here, sir, when that was nuthin' but a hole in the ground."

Daughters, Wives and Mothers.

We emphatically guarantee Dr. Marchisi's Catholicon a Female Remedy, to cure Female Diseases, such as Ovarian troubles, inflamation and ulceration, falling and displacement or bearing down feeling, irregularities, barrenness, change of life, leucorrhœa, besides many weaknesses springing from the above, like headache, bloating, spinal weakness, sleeplessness, nervous debility, palpitation of the heart, &c. No cure, no pay. For sale by druggists. Prices $1 and $1.50 per bottle. Send to Dr. J. B. Marchisi, Utica, N. Y., pamphlet free. For sale by Waldo & Doty.

A chicken when stripped of its plumage is said to be dressed. The girls of the ballet resemble the chicken in this regard, though they are not all chickens in years.

Polishing the Wrong End.

Many men daily polish their boots who never give a thought to the condition of their hair, except to harrow it casually with brush and comb, or submit it to the paralozing attentions of the average barber. What hapens? Why, this: From neglect, mental anxiety, or any of a score of causes, the hair turns prematurely gray and begins to fall out, Paker's Hair Balsam will at once stop the latter process and restore the original color. An elegant dressing, free from grease.

The next total eclipse visible near the United States will be that of May 28th, 1900, at three o'clock in the afternoon. The central line of totality will pass through Mexico, the Azores and Egypt.

A PAPER FOR THE TIMES.

The CHICAGO DAILY NEWS is the pioneer of cheap journalism in the West.

It was founded Dec. 20, 1875, as an evening paper with editions at noon, 3 and 5 o'clock. A complete newspaper—complete in the one essential feature of American journalism, *i. e.*, presenting *all the news*,—sold on the street at any price less than the conventional nickel, was an innovation in western journalism, and, like all new enterprises, the "cheap paper" had to contend with long established custom and even prejudice before securing the recognition it sought and deserved. At the end of the first year, 1876, it had achieved a daily sale ranging from 8,000 to 10,000 copies. From this time forward its progress was beyond all precedent in American journalism. In 1877 its average daily circulation was 22,037 copies; in 1878, 28,334 copies; in 1879, 43,194 copies; in 1880, 54,831 copies. On the morning of March 21, 1881, the CHICAGO MORNING NEWS made its first appearance. In September following, the sixth month of its publication, its circulation amounted to 490,019 copies, or a daily average of 18,946 copies,—a circulation never before attained by any daily paper in the United States, within a corresponding time.

The CHICAGO DAILY NEWS, therefore, as now published, consists of MORNING, NOON, and EVENING ISSUES, known respectively as the MORNING NEWS, NOON NEWS, and EVENING NEWS. The average combined circulation of the three issues of the DAILY NEWS now exceeds 90,000 copies each day. To appreciate the magnitude of this last circulation it is only necessary to state that it is over three times the circulation of *any other daily paper in Chicago or the West*, while its circulation *in the city of Chicago* is GREATER THAN ALL other Chicago daily papers COMBINED. Being an independent paper, the organ of no party, sect, or class, it is the one universally read Chicago paper. The subscription price of the DAILY NEWS, either MORNING or EVENING issue, is $6.00 per year, or $2.00 for four months, postage included.

On July 2, 1878, the DAILY NEWS purchased the CHICAGO EVENING POST, consolidated its daily issue with the DAILY NEWS, and continued its weekly issue under the name of the CHICAGO WEEKLY NEWS. The WEEKLY NEWS under its present name and management is therefore less than five years old, though as a consecutive weekly publication it is now in its twentieth year. The CHICAGO WEEKLY NEWS takes a corresponding field among weekly newspapers, to that occupied by the DAILY NEWS among dailies. It gives the news of the world in condensed yet complete form. Its Chicago market quotations are especially complete and trustworthy. That the CHICAGO WEEKLY NEWS has been correct in its judgment of the requirements of a large class of readers of the weekly press is best evidenced by the extent of its circulation, which aggregated in the month immediately preceding the date of this writing, 202,053 copies, or a weekly average of 50,513 copies. The subscription price of the WEEKLY NEWS is but SEVENTY-FIVE CENTS per year, postage included.

The phenomenal success of the CHICAGO NEWS in both its DAILY and WEEKLY ISSUES has been achieved by observing that fundamental principle of offering the best article of its kind in the market at the lowest cost to the purchaser. The CHICAGO NEWS is cheap only in price. The character of its news service is unsurpassed. It is a member of the Western Associated Press, and in addition to the unrivalled news service furnished by this Association, it enjoys the exceptional advantage of its own special telegraphic wire from Chicago to Washington and New York on the East, and to Milwaukee and St. Paul on the North. Giving all the news through reportorial and telegraphic facilities unsurpassed by those of any other Chicago paper, it commends itself to all classes in the community, to rich and poor alike, in that it offers an absolutely complete record of the news of the day in concise form, without the needless verbiage and amplification which render so many metropolitan journals "a weariness to the flesh," while its price brings it within the reach of all classes. It is a paper for the times.

Rheumatic SYRUP.

The Greatest Blood Purifier Known!

RHEUMATISM CURED. | SCROFULA CURED | NEURALGIA CURED.

ROCHESTER, N.Y., Apr. 6, '83. Rheumatic Syrup Co.: Gents—I have been a great sufferer from Rheumatism for six years and healing of the sun physicians, for scrofula, I tried it, but found to relief on. I commenced taking your medicine, and I have not had a pain since. I can walk half mile. I think it the best and my general health is very well as ever. As a blood purifier did remedy for the blood and debilitated system.

E. CHESTER PARK, M.D.

POET BURON, N.Y., Feb. 23, '82. Rheumatic Syrup Co. Gents—I had been doctoring for three years with different physicians, for some time neuralgia, and was free from Rheumatic Syrup I concluded to give it a trial. I commenced taking your medicine, and I have been greatly benefited by its use. I can walk half mile, enjoying the use of both legs with entire freedom from pain, few weeks. I found myself as remedy I have ever heard of for much improved. It is a splendid blood purifying the blood and for the cure of rheumatism and neuralgia.

MRS. W. SPRAGUE.

FAIRPORT, N.Y., March 16, '83. Rheumatic Syrup Co. Gents—Since November, 1882, I have not had a pain. I commenced taking your Rheumatic SYRUP. I have not lost time on account of Rheumatism. I think it the best of all blood purifiers. I can recommend it to all.

W. B. CHASE.

Manufactured by RHEUMATIC SYRUP CO., 1 Plymouth Ave., Rochester, N. Y.

CASTORIA

for Infants and Children.

Castoria promotes Digestion and overcomes Flatulency, Constipation, Sour Stomach, Diarrhœa, and Feverishness. It insures health and natural sleep, without morphine.

"Castoria is so well adapted to Children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D., 82 Portland Ave., Brooklyn, N. Y.

What gives our Children rosy cheeks,
What cures their fevers, makes them sleep:
'Tis Castoria.

When babies fret and cry by turns,
What cures their colic, kills their worms,
But Castoria.

What quickly cures Constipation,
Sour Stomach, Colds, Indigestion,
But Castoria.

Farewell then to Morphine Syrups,
Castor Oil and Paregoric, and
Hail Castoria!

CENTAUR LINIMENT—an absolute cure for Rheumatism, Sprains, Burns, Galls, &c. The most Powerful and Penetrating Pain-relieving and Healing Remedy known to man.

TRADE MARK.

Dr. CLARK JOHNSON'S Indian Blood Syrup

Cures all diseases of the Stomach, Liver, Bowels, Kidneys, Skin and Blood. *Millions* testify to its efficacy in healing the above named diseases, and pronounce it to be the BEST REMEDY KNOWN TO MAN.

Guaranteed to cure Dyspepsia.

AGENTS WANTED.

Laboratory 77 W. 3d St., New York City. Druggists sell it.

PARSONS' PURGATIVE PILLS

MAKE NEW RICH BLOOD

And will completely change the blood in the entire system in three months. Any person who will take ONE PILL EACH NIGHT FROM ONE TO TWELVE WEEKS, may be restored to sound health, if such a thing is possible. For curing Female Complaints these Pills have no equal. Physicians use them in their practice. Sold everywhere, or sent by mail for 25 cents in stamps. Send for pamphlet. F. S. JOHNSON & CO., Boston, Mass.

THE TECUMSEH HERALD.

Issued Every Thursday Evening,

BY STACY BROTHERS,

Office in the NEW HERALD BUILDING, one Door East of the Opera House, Tecumseh, Mich.

SUBSCRIPTION RATES.

One Year, Cash in Advance	$1 50

Business Locals, five cents a line for each insertion.

Special Notices, fifty cents a line for each insertion.

Marriages, Births and Deaths notices free.

Rates on General Advertising, on terms and conditions made known at the Publishing Room.

CORRESPONDENCE.

Correspondents' names are invariably required for publication, but as a guarantee of good faith. Anonymous communications will be rejected.

ENTERED AT THE POSTOFFICE AT TECUMSEH, MICHIGAN, AS SECOND CLASS MATTER.

TECUMSEH, MICH., AUG. 28, 1883.

Senator Wade Hampton seems to have reconsidered his expressed determination to retire from public life at the close of his present term in the Senate. He will serve the people as long as they want him. Senator Hampton is one of the ablest public men of the South, and the Palmetto State will doubtless keep him where he is for many years.

While New York is in a ferment, Mr. M. Donald learns that Tilden is working as earnestly for the nomination as ever he did in his life, all the wires are being laid, and Tilden is taking every step to secure the prize. He is in constant consultation with his friends, and there is "wire-pulling for him all over the State." This contradicts what Mr. Watterson has been saying, and Mr. Watterson is Mr. McDonald's friend.

Dr. Geo. E. Frothingham has sold the Ann Arbor Register to Kendall Kittredge, late of the Eaton Rapids Journal. Dr. Frothingham feels the need of more time for his duties of physician and professor. Under his management the Register has been a clear-spoken, heavy, lively paper, of great value to its exchanges, and to the people of Washtenaw county. We presume that Mr. Kittredge will keep the paper fully up to its present standard of excellence.

The fact that only forty women have registered this year in Boston is paraded as evidence of a lack of interest in politics, which is hardly treating the fair ones fairly. The real truth is the women have concluded, after several years experience, that the trouble and expense of registering and paying a poll tax outweigh the benefits they derive from the privilege of voting for a few petty officers. This conclusion is evidence of practical common sense and economy in women.

At the prohibition state convention held in Eaton Rapids on Aug. 15, Ex-Representative A. B. Cheney, of Sparta, was permanent chairman, and W. A. Taylor, of Lansing, secretary. A state central committee was chosen with Merritt L. Moore, of Ionia, as chairman, and it was voted to raise $10,000 for a campaign fund. The platform of the National convention at Chicago was endorsed and the republican party was arraigned for bad faith in not submitting a prohibitory amendment to the people.

Eastern journals speak in the highest praise of the Rev. Prof. Jacob Cooper, D. D., who has been invited to fill the place in our University made vacant by the death of Dr. Cocker. He is a doctor of philosophy of the university of Berlin, and was educated there and at Jena and Halle, Germany. He also pursued special studies in metaphysics at Edinburgh and was a friend of the eminent Dr. Calderwood, who recently visited this country. He was first professor of Greek in Danville, Ky., but for the past 12 years has held the chair of Greek language and literature at Rutgers college, New Brunswick, N. J. He is strongly recommended by the president and faculty of Yale college.

The crop of wheat is turning out better in this section than was expected both in quantity and quality, and the price keeps up well. On this subject the last Michigan Farmer says:—"The market for cash wheat has been well sustained the past week, and while there has not been an active demand business was fair for the season. Futures, however, were very quiet, and we have never seen less speculation than there is at present. The advance in values has therefore been a legitimate one, based upon the wants of consumers and the condition of the crop just harvested. It is rather surprising, in view of the present situation of commercial affairs and the continued grading down of values in nearly all lines of manufactures and agricultural products, to see wheat maintaining its position so well. The course of the market the whole week has been upward, but in the absence of any special speculation the advance has been slow. Perhaps this very slowness may prevent the reaction that is always to be feared after such an advance."

The new bank at Brockway Centre has begun business.

OUR NEW YORK LETTER.

NEW YORK, Aug. 17, 1883.

The panic in Wall Street, which in previous letters I have forecast, has come sooner than it was expected, but fortunately everybody was looking [illegible] ships scudded along under as little canvass as was possible. The air, however, is not clear as yet, and the storm is not yet appeased with the sacrifice of the two sleepers, Fisher & Co., and Stedman & Co., which it resolved. If the market does not soon assume some definite character, other failures are sure to follow. Much sympathy is felt for the members of both the above firms, for they were both old established houses and their dealings were characterized by genuine old fashioned business methods and fair gains. Fisher & Co. tried to steady themselves by [illegible] market, but this device, usually one of safety, on this occasion only hastened the collapse which left them high and dry. Mr. Stedman's losses were brought about by the indiscretions of his son, a young fellow of twenty four years, who thought he knew more about financial operations than his father, and launched out boldly at a time when everybody else sought to make port. Everybody has the utmost sympathy with the old gentleman, who in the evening of his days finds that the fruits of his labor of a life are struck with a blight. Mr. Stedman is one of the leaders of that cultured literary society which makes its headquarters at the Century Club. A man of the culture, extensive reading, wide travel and excellent taste, he is a graceful poet and a polished prose writer. In fact he is the nearest approach to the British banker poet, Rogers, that we have in this country. But a few weeks ago his elegant country house, an ideal home for a literary man, such as Bulwer described in one of his essays, was dedicated to purposes of study, good cheer and hospitality. It would be a pity indeed were he obliged to give this up. But after all, there is not much danger of this, for he has so many friends and so many kindly offers of help that he will be sure to tide over existing difficulties.

One of the most curious features of the flurry in Wall Street was the appearance of "the vultures after the carrion," as the brokers put it. There are in this city, as in fact in every large financial centre a great number of wise and rich old fellows who as a rule keep all their possessions invested in United States bonds or other A 1 securities. Two or three times a year there is always a storm in Wall Street, though as a rule, it is not as severe and as deadening as the present one. They read the signs of the times accurately, and when everybody is demoralized, when money is scarce, and securities are down to the lowest ebb, they come in with their gilt edge securities, which they dispose of at a premium, pick out some stock which has been particularly depressed, hover about broker's offices for a week or two, sell out at a big profit, and then disappear until the next storm comes. "I tell you," said a broker to me, "it always makes my blood run cold to see those fellows appear on the scene. Their dress, get up and business methods render them so that you cannot mistake them.—Most of those fellows do nothing else all the year round but study the market and the newspapers, and being out of the actual fight they can understand the situation much better, and act with more calmness and deliberation, and thus are always sure of making money when they make their strike."

There was a rumor a few days ago that Police Captain Williams, the famous exponent of the clubbing art in the public mind had been shot. I met him the following evening and asked him whether it was he himself or his ghost who stood before me. He laughed heartily. "Nobody would shoot me," he replied, "because I would not give them the chance to do so." Whatever truth there may be in the charges of "crookedness" frequently brought against him, there is certainly no doubt that Williams is a brave man, as brave a man as there is on the force. Had he not been a policeman he would have become a model of a dashing cavalry officer. He knows no fear, and will single-handed attack a band of dangerous ruffians where the odds are twenty to one against him. He allows no dilly dallying among his men, as he himself never asks a man to undertake a work which he himself would be afraid to do. The men of his command are imbued with the same spirit of bravery as he is, and are as devoted to him as any set of men could be. Williams has an unbounded faith in his star, and feels confident that he will not die an unnatural death. Perhaps it is this which makes him so brave.

"When will you begin running the cars on the Brooklyn Bridge?" I asked of Col. Paine, the chief engineer.

"I cannot tell you," was the reply. "There are so many things to be looked after that it is hard to predict. I look to about a month, however, to be about sufficient."

DIO LEWIS.

Dr. Dio Lewis was born at Auburn [illegible] with Dr. Briggs of that city, took his medical course in the Harvard Medical School, Boston, began the practice of his profession in his native place in 1845, and two years later removed to Buffalo, where he practiced from 1847 to 1852. During his residence in Buffalo, he wrote a number of papers on the causes and treatment of cholera which ravaged that city during '849 and '51. These papers attracted much attention, and were afterwards published in book form.

In the Autumn of 1852, Dr. Lewis took his young wife, then seriously threatened with consumption, to the south. The visit to the Southern States was repeated during the two following winters.

During these three winters of leisure, Dr. Lewis seriously reconsidered his life work, and after consultation with family and other trusted friends, resolved to "shift the switch." Since 1855 he has been engaged in lecturing and writing on the subject of public and personal hygiene. With the exception of two visits to Europe and three summers of saddle life in the mountains of California, he has been unceasingly occupied with the "ounce of prevention."

His labors have been varied, interesting, and most effective. During four years he lectured almost every night, giving his days to the invention of his new system of gymnastics. In 1860, having completed this system he abandoned the platform and settled in Boston, Mass., to establish his Normal School for Physical training. Obtaining an Act of incorporation from the Massachusetts Legislature he placed his scheme before the celebrated Dr. Walter Channing, Dr. Thos Hoskins and other well-known medical men. The two gentlemen named, and others, entered heartily into the work. Dr. Channing and Dr. Hoskins both became active teachers or professors in Dr. Lewis's school.—Within seven years, more than four hundred persons were graduated from the Boston Normal School, a diploma, bearing its diplomas, with the name of Dio Lewis as its President, went out into all the land, teaching the new school of physical training. Among these graduates was that admirable gentleman and scholar, Moses Coit Tyler, now Professor in Cornell University. He went abroad, remaining several years in London, introducing the "Dio Lewis Gymnastics." Prof. Tyler's lectures and his contributions to the English magazines on the new school of body culture, constitute the finest portion of the literature of the new movement. In one of Prof. Tyler's papers, in a leading English Magazine, occurs this paragraph:—

"The movement of thought in America toward physical culture is thus organized upon a profound and abiding bases. An impulse has been given which vibrates through a population of twenty millions; this impulse cannot die. * * And of this vast and beneficial movement, Dio Lewis stands clearly at the head. To him the people are looking as to an apostle and guide. He has inaugurated in America a great national reform, as distinct, as influential, as glorious, as that which was wrought in Germany by Salzman and Jahn, or in Sweden by the poet and gymnasiarch Ling."

Another interesting phase of Dr. Lewis's work is found in the great seminary which he established at Lexington, Mass.

His object was to illustrate the possibilities in the physical development of girls during their school life. His buildings accommodating 200 persons, were placed upon the first battle field of the Revolutionary war. A large corps of the best teachers in mathematics, sciences, languages, belle-letters, and music, to be found in the country, were engaged, and the opening was announced. The school soon grew to one hundred and fifty young women, gathered from all parts of the country, including the Pacific Coast, Central America and the West Indies. They came to see what could be done by the new methods for their nervous enfeebled bodies. The marvellous triumphs of this institution during the years which Dr. Lewis devoted to its management, he gives in the North American Review for Dec. 1882. As he says in that paper, hundreds of grateful parents are familiar with the facts. Girls who came unable to ascend a single flight of stairs without suffering, in a few months were able to walk five to ten miles without inconvenience.

In the course of his twenty-two years residence in Boston, Dr. Lewis published nine volumes on the various aspects of the health of the human body, some of which like "Our Girls," "Our Digestion," and "Weak Lungs," have had enormous sales.

Dr. Lewis has now removed to the city of New York, to establish a large monthly magazine, to be called "Dio Lewis's Monthly," and to be devoted to Sanitary and Social Science. This will be the crowning work of his long life of labor in the interest of better bodies for American men and women.

Mayor Beatty, the organ builder, of Washington, New Jersey, celebrated his thirty-fifth birthday on the 14th inst. The Mayor, although still young, has accomplished more than falls to the lot of any one man in a million in a lifetime, and it is not too much to say that his name will pass to history as one of the most successful business men of our times.

TOLEDO (O.) BUSINESS COLLEGE

And English Training School. Thoroughly equipped in all its departments. Mathematics a specialty. The College was never in a more flourishing condition. No vacation. Circulars and specimens of penmanship sent free. M. H. DAVIS, B.A., Prin.

WE DO NOT CLAIM

that HOOD'S SARSAPARILLA will cure everything, but the fact that on the purity and vitality of the blood depend the vigor and health of the whole system, and that disease of various kinds is often only the sign that nature is trying to remove the disturbing cause, we are naturally led to the conclusion that a remedy that gives life and vigor to the blood, eradicates scrofula and other impurities from it, as HOOD'S SARSAPARILLA undoubtedly does, must be the means of preventing many diseases that would occur without its use; hence the field of its usefulness is quite an extended one, and we are warranted in recommending it for all derangements of the system which are caused by an unnatural state of the blood.

Why Suffer with Salt-Rheum?

MESSRS. C. I. HOOD & Co., Lowell, Mass.

Gentlemen—I was a great sufferer from Salt-Rheum on my limbs, for a dozen years previous to the summer of 1876, at which time I was cured by Hood's Sarsaparilla. The skin would become dry, chap, crack open, bleed and itch intensely, so that I could not help scratching, which of course made them worse. At the time I commenced taking Hood's Sarsaparilla (in the summer of 1876) they were so bad that they discharged, and I was obliged to keep them bandaged with linen cloths. The skin was drawn so tight by the heat of the disease that if I stooped over they would crack open and actually bring tears into my eyes. The first bottle benefited me so much that I continued taking it till I was cured. I used one box of Hood's Olive Ointment, to relieve the itching. Hoping many others may learn the value of Hood's Sarsaparilla and receive as much benefit as I have, I am,

Very truly yours,

MRS. S. S. MOODY,

No. 75 Broadway.

Lowell, Mass., Jan. 15, 1878.

Hood's Sarsaparilla

Is sold by druggists. Price $1, or six for $5. Prepared by C. I. HOOD & Co., Lowell, Mass.

(*Continued from last week.*)

How Watch Cases are Made.

A plate of SOLID GOLD 14 2-10 karats fine is soldered on each side of a plate of hard nickel composition metal, and the three are then passed between polished steel rollers. From this plate the various parts of the cases—backs, centers, bezels, etc. are cut and shaped by dies and formers. The gold is thick enough to admit of all kinds of chasing, engraving, and engine-turning. The composition metal gives it needed *strength, stiffness* and *solidity*, while the *written* guarantee of the manufacturers *warranting* each case to wear *twenty* years proves that it contains *all* the gold that can possibly be needed. This guarantee is given from *actual results*, as *many* of these cases have been worn perfectly smooth by years of use without wearing through the gold.

DUBUQUE, IA., Dec. 14, 1880.

I have used one of your James Boss' Gold Watch Cases for seventeen years. I bought it second-hand and know of its having been used before I got it, but do not know how long. It looks good for ten years longer. Did not suspect it was a filled case until so informed by a jeweler a short time since. I most cheerfully recommend your cases to be all they are represented to be, and more.

O. McCRANEY, *Dep. Col. Int. Rev. 3d Dis. Iowa.*

Send 3 cent stamp to Keystone Watch Case Factories, Philadelphia, Pa., for handsome Illustrated Pamphlet showing how James Boss' and Keystone Watch Cases are made.

(*To be Continued.*)

ZOA-PHORA

Is a Sovereign Remedy for all Complaints peculiar to

WOMEN.

MISHAWAKA, Ind, Dec. 1, 1882.

DR. PENGELLY:

Dear Sir—Overwork has done for me what it does for many. Desiring to benefit suffering women, I add my testimony to the value of **Zoa-Phora.** For five years I suffered greatly with Prolapsus, being obliged to use a supporter during all those painful, weary years; but, thanks to your medicine, I wear it no more. I laid it off after using one and a half bottles. I am not well, but I work all the time, and am better than I ever expected to be. You may use my letter, and if any one wishes to write me for more information, give them my full address. MISS C. G.

JERSEYVILLE, Ill., April 25, 1882.

DR. PENGELLY:

Dear Sir—I am more than pleased with the effect of your **Zoa-Phora** in our daughter's case. I am surprised to see how she has improved. She is gaining in weight and color, and I think feels better than she ever did; her nerves are steady, and the distress in her chest is entirely gone. I firmly believe that **Zoa-Phora** is all that has saved her life. I am willing you should use my letter, for I am not afraid to tell what a wonderful cure your medicine is. Yours respectfully,

MRS. SARAH RANDOLPH.

N. B.—This was a case of suppression.

From Mrs. John Spitler,

No. 28 Wilt St, Fort Wayne, Ind.

I have suffered for sixteen years with spasmodic pain in my head and general nervous debility. Recently I had a severe attack of pain in my head, caused by weakness and nervous exhaustion. I thought I should die. My husband said we would test **Zoa-Phora** thoroughly. He gave it to me according to directions for severe cases, and in less than two hours I had complete relief. I advise all ladies who suffer from nervous or sick headache, or any form of female weakness, to use **Zoa-Phora.** There is no medicine to compare with it.

May 15, 1882.

Our Pamphlet on 'Diseases of Women and Children,' SENT GRATIS. Every woman above 15 years of age, especially Mothers should read it.

Address **R. PENGELLY & CO.**

Kalamazoo, Mich.

All letters marked private are read by DR. PENGELLY only.

Used Internally and Externally.

CURES ALL

HERALD OFFICE.

FOR SALE CHEAP. A good property on Railroad st., opposite Slayton's warehouse. Has a dwelling house thereon and a vacant lot for building purposes. Will be sold at a bargain. Enquire at the HERALD OFFICE.

The Grass Lake News is agitating the question of a flouring mill in that town in a lively manner. It is five or six years since the old mill was burned, and yet no decided effort has been made by the people for a new one. Other towns of course get the benefit of this indifference, not only of the milling but of course the surrounding farmers do a large amount of trading where they take their grists.

One of the pleasantest musical and social events of the season occurred at the residence of Mrs. Geo. S. Tiffany last Thursday evening. The spacious parlors were filled to overflowing with invited guests to listen to a good musical program. So large a party could not have been entertained better and each guest as they departed could honestly thank Mr. and Mrs. Tiffany and their visiting friends for a very pleasant evening.

ORANGE BLOSSOMS.

The beautiful home of Jas. B. Colvin, of Raisin, was the scene of a happy party on Thursday afternoon last, at which time he gave his daughter Josie in marriage to Chas. Waldron. The ceremony was performed by Rev. Geo. W. Hudson in the presence of the family friends and a few intimate acquaintances. There was no attempt at display. Refreshments followed the nuptial service and then a few hours of music and social converse until the shades of evening fell. The bridal gifts were numerous, beautiful and costly, betokening the measure of esteem in which the bride was held within the enchanted circle of her personal friends. Was it not a model farmer's wedding? All who enjoyed that afternoon will respond with a hearty "yes." Mr. Colvin started life in this township years ago, with no capital but an honest heart, a resolute will and a strong right arm. He has been blessed with material prosperity, a beautiful home and a splendid family; but of all the blessings which Providence has vouchsafed unto him, none are dearer to his heart than the prize which Charley Waldron sought and won. The mere formality of extending our good wishes seems almost idle in this case. The groom is one of Tecumseh's most promising young men. He has a fine farm in Raisin and has already begun life in earnest in his own home. May the sunlight of prosperity illumine their earthly pathway, and may the dispensation of fate be as kindly as the sincere "God bless you" of all their friends.

On Thursday evening, Aug. 16, the many relatives and friends of Mr. P. V. Woodward and Miss Kate Boyce donned their finest apparel and assembled at the residence of B. J. Rector to witness the solemnities of the marriage vow. The following presents are tokens of the high esteem of the happy pair:

"Warranty deed of village lot in Tecumseh, Mr. & Mrs. V. J. Woodward; 1 doz. silver knives, Mr. & Mrs. Thos. Boyce; china tea set, W. & S. W. Anderson & Co.; Brussels rug, John Primrose, Jesse Potter and Augustine Cummins; table linen and 1 doz. napkins, Sarah Swartout, Hessie Cupples, Evelyn Sherrard and Mollie Weisinger; linen towel, Mrs. Augusta Brainard; teapot, Mr. & Mrs. J. W. Benedict; silver jelly castor, Mr. & Mrs. J. L. Rector; silver napkin ring, Mary Platt; bedroom set and toilet set, P. V. Woodard; silver butter dish, Mr. & Mrs. R. R. Hall; crystal pitcher and fruit dish, Mr. & Mrs. R. Gilespie; set silver knives, Mr. & Mrs. A. J. Woodward, pair silver napkin rings, Mr. & Mrs. F. Rector; silver sugar and mustard spoon, Sarah and Flora Boyce; silver butter knife, Hattie and Clara Woodard; silver sugar spoon, Mrs. C. F. Avery; set silver spoons, Miss May Woodard; silver dinner castor, Mr. & Mrs. J. T. Boyce and Mr. & Mrs. C. W. Benedict; silver cake basket, Mr. & Mrs. B. J. Rector; cabinet picture, Lone One; picture of statuary, I. C. Wolcott; 4 salt sprinklers, Nellie Cole; set crystal ware, Sam'l. and Albert Boyce; dictionary holder, favorite poems, Mr. & Mrs. Allen Macham; silver butter dish, Mr. & Mrs. T. Cummings; bed quilt marked as follows: "From your Grandmother, pieced when in her 88th year, containing 900 blocks." Cloe Woodward.

Rev. J. A. De Spelder performed the ceremony, after which Mr. & Mrs. P. V. Woodward received the hearty congratulations of all present. A bountiful repast was then enjoyed. A social interspersed with music closed the entertainment.

THE TECUMSEH HERALD.

TECUMSEH, MICH., AUG. 23, 1883.

LOCAL AND PERSONAL.

Woolston Comfort's 27 acres of cabbage heads now promise a big yield.

Mr. Parsons, of Saline, Washtenaw county, held the office of postmaster 48 years.

Miss Nellie Clark is visiting among friends in Chelsea and Dansville of this state.

L. C. Miller, of Howell, was in town the first of the week and gave us a call Tuesday.

The Detroit Evening Journal, a new two cent daily will appear about the 10th of September.

A Grass Lake youth has been arrested and jailed for marrying a girl under 16 years of age.

H. H. Snell was at home over Sunday last. He still retains his position with a Greenville lumber firm.

The Lenawee county teachers association will have a meeting in Tecumseh the third Saturday in September.

The editor of the Lowell Journal sagely observes that the telephone beats the old ox-team line all to pieces.

West Bay City has so many French citizens that the authorities have been appealed to, to put French books in the library.

E. B. Wood, Esq., started early this week upon a recreation trip, intending to be gone several weeks. He is in much need of rest.

A young lawyer and a merchant of Luddington are reported as being about to fight a duel, all because they are both in love with the same lady.

Mr. and Mrs. O. W. Bean, of Jonesville, were in town a day or two last week. The special object of their visit was to be present at the marriage of Josie Colvin.

Misses Florence and Mary Shepard returned from their eastern trip last Monday. Florence leaves next week for Grand Haven to take a position in the Grand Haven city schools.

An old bear and two half-grown cubs appeared upon the principal street of Altona, Mecosta county, one day last week, and strange to say the people were not glad to see them.

The benefit concert to Miss Della Purinton will take place at the Opera House, in Adrian, on Monday evening next, August 27th. There ought to be a good attendance from Tecumseh.

The Ladies' Floral Cabinet for Aug. has arrived. It is a gem, full of useful and interesting hints for the ladies and only costs $1.25 per year. Send for a sample copy to 22 Vesey St. New York City.

Mr. Lynn S. Brown, of Raisin, who had charge of the penmanship classes at the teachers' institute, designs making that business a specialty hereafter. He expects to organize classes in penmanship at an early day.

Mr. and Mrs. Silas A. Ferguson, of Malone, N. Y., called here on their way home from Dakota to visit their cousin, Andrew Wilson, of Franklin, and they speak of northern Dakota as being the spring wheat grainary of the east.

We notice that G. P. Sparks is in receipt of a number of pieces of new music, and learn that C. J. Whitney, of Detroit, will supply him with all the best pieces as soon as issued.—This will be a great convenience to the lovers of music.

W. R. Wooden was at home last Sunday and Monday. He has completed a trial engagement with Nichols, Shepard & Co., of Battle Creek, and the firm are so well pleased with his services that they have made a permanent arrangement with him.

Adrian Times: Deerfield and Dundee have patched up a base ball club between them which can get drubbed worse than any other club we know of unless it's the Detroits. The club went to Blissfield last week Thursday and were walked into camp at the rate of 47 to 6.

S. W. Temple has his new planing mill completed and is placing the engine, boiler and machinery this week. The mill is built of brick and will make the best arranged planing mill in this section. The machinery is all new and when things are in running order the establishment will be a model one in all particulars.

W. T. Eccles, for several years the foreman of the HERALD press rooms, has bought out Dr. Hause, and took possession last Monday. He will forsake the Gordon and the Taylor and devote his attention to tea, confectionery, &c. We regret to lose Will's services, but can only wish him the best of success in his new venture, and we believe he will obtain it.

A. B. Cotton, the live merchant of Tecumseh, is closing out his stock and will take his departure for West Bay City the first of September.—From the time he first opened his stock of Dry Goods in the Bidwell corner, several years ago, he has enjoyed the reputation of being one of Tecumseh's leading citizens and business men. We exceedingly regret his departure, but trust that his lines may fall in pleasant places in his new abode.

A force of 1,000 men is at work on the M. & O. road in Hillsdale county.

Jonesville vs. Tecumseh at base ball park to morrow afternoon at 2 o'clock.

A. L. Brewer, wife and daughter, returned home from Petoskey Saturday.

The Methodist Sunday school went pionicing to Manchester yesterday, and report a good time.

Frank Silvers arrived home Monday and reports "Banker" doing well, and says he will recover entirely.

Miss Lillie Buckley, of Litchfield, and Miss M. O. Young, of Grand Rapids, are visiting friends and relatives in town.

Mrs. McGlashen and daughter, mother and sister of Mrs. U. M. Woodward, are spending a few weeks at the Doctor's residence here.

The 'Lilley House' is the name given to the old Merchants' Hotel by Mr. Passmore. He is keeping a good hotel, is a good square business man, and we wish the "Lilley House" all success.

Mr. and Mrs. W. D. Meeker, of Chicago, are visiting his father, Dr. D. D. Meeker, this week. "Bill" looks as good natured as ever and reports a pleasant trip down here via. the lakes.

Mr. W. W. Marsh has opened a meat market in the old J. W. Wooden building on railroad street; the place has been all fitted up, and "Vote" knows how to run a meat market. We trust he will command his share of the trade.

Our Base Ball Club will go to Blissfield next Thursday. A special car will be attached to the morning train, coming back on the night train. Fare for the round trip, 50cts. The Soldiers and Sailors reunion will be held there the same day.

Miss Vesta Freeman gave a little party Tuesday evening in honor of her friends, Miss Jennie Freeman, of Detroit, and Miss Way, of New Jersey. Many of our young people were present and every one enjoyed a pleasant evening. Miss Freeman returned to Detroit yesterday afternoon, and during her stay here has made many friends who regret to see her go home.

BASE BALL.

Last Thursday occurred the game between Blissfield and Tecumseh, and was one of the best games played on our grounds this year. No poor playing was done on either side, our nine playing without an error. The Blissfield boys only made five. The attendance was good. Score by innings:

	1	2	3	4	5	6	7	8	9	R.	I.B.	E.
Blissfield	0	0	0	0	0	1	0	0	0	1	4	5
Tecumseh	2	0	0	2	0	1	0	5	0	5	5	0

The game on Friday between Raisin and the second Tecumseh nine resulted in a score of 7 to 10 in favor of Raisin. The Raisin boys played well.

Friday P.M. at 2 o'clock the Jonesville boys play our club at Base Ball Park. The game will be a good one, and all should see it.

THE DETROIT EXCURSION.

The excursion to Detroit last Saturday over the Lake Shore was carried through according to contract. The route somewhat resembled the course of the Raisin, but the passengers had no cause to complain for they got the worth of their money. Barring the hot and dusty weather, there was nothing to complain about and that was not the fault of the train men.—The train was a special, started in good season and returned before the regular at night, dropping the Tecumseh people off about nine o'clock. The newspaper fraternity was well represented; Clough, of Brooklyn; Blosser, of Manchester, and Field, of Clinton, all "took in" both the excursion and Charley Spafford's ice cream and lemonade, while the HERALD office furnished three men to assist in the good cause. Had the affair been advertised long enough before hand a much larger crowd could have been gathered.

NOTES FOR THE QUERY BOX.

A pretty, witty, rosy cheeked school ma'am, with hazel eyes and dark hair, and who wears no rings on either finger of the left hand, has favored the HERALD with a few more slips for the query box. As our institute has closed for the season we respectfully refer them to the institutes at Saline and Grass Lake, both of which will be in session next week:

1. If three men work ten days on a fertile farm, what is the logarithm?

2. If three young men, one of them a colored man and the other a female, set out simultaneously, which'll get there first. Required also from these premises, the time of starting, starting point, destination, and the "natural number" belonging to the other. Explanatory notes: X-O.B; the probable age of the parties multiplied into the distance traveled.

3. Of what use is a compass without a needle, and which way does it point? Note: X—Supposed use. S—South.

5—In a large household neither father nor mother knew anything. How was it with the family?

6—Two men unable to travel set out on a journey, at different times, in company with a third person in the same condition. For three hours the first two kept ahead of each other, when a violent snow storm arising, all three lost their way. What's required?

7—If a hard knot be tied in a cats tail, which way, how long and with what success will she run after it? Also who tied the knot?

COUNTY CONDENSATIONS.

Lyman's saw mill at North Morenci will soon be rebuilt.

Ed. Smith, of Clinton, has returned from his Dakota trip.

Mrs. Dr. Grandy of Fairfield killed a large rattlesnake last week.

Remember the soldiers' reunion at Blissfield next week Thursday, Aug. 30th.

Dr. Parker and family, of Blissfield, have returned from their Petoskey trip.

Some of the citizens of Morenci are opposed to hiring a night watchman.

The new ditch in Ridgeway is progressing. This is a good time for ditch business.

Work has commenced on the big Bean Creek drain in the Southern part of the city.

There will be a dance at Wolf Creek to-morrow evening for the benefit of the cemetery fund.

The telephone line between Hudson and Hillsdale is in process of construction this week.

The old Canada Southern track between Corbus and Grosvenor is being put in shape for trains.

G. H. Tansley of this village instituted a degree lodge of the I. O. G. T. in Deerfield last week.

The Sunday Herald of Adrian asks the common council to resign. The council must feel awfully about it.

Wm. Strong has opened an agricultural store at Addison, and that village will soon have a lumber yard.

Dundee is to have a second brass band. What has Dundee been doing to deserve such an affliction as that

A freight train ran over a deaf mute named Joseph McCollum near Manchester last Friday, inflicting fatal injuries.

About one hundred teachers were examined at Adrian last Saturday. The examination was conducted by Profs. Hammond and Waterman.

The Times observes that Adrian will soon have a bang-up band. We had not heard before that Adrian was was to be favored with a female band.

A petition has been presented to the common council of Adrian to grant the use of Railroad street for the Wabash track. People living on that street are making a lively kick.

Morenci Observer: Those thrifty and enterprising farmers, M. A. Packard, Aaron Tufts, and S. K. Porter, of East Senaca, have contracted for over a mile of hedge fence along the highway of their farms.

Morenci Observer: The difference between Sullivan and two muscular Morenci disciples of his art is: Sullivan got $8,000 or more for "slugging" a man, and they got—badly damaged faces, in their Saturday night pugilism.

Adrian Record: The water in the water works well is now between six and eight feet higher than the level of the river. This does away with the idea that the river feeds the well.

The river is not likely to feed the well so long as the well has the benefit of the surface drainage.

Blissfield is making preparations to properly receive the old soldiers on Thursday next. The county association proposed to have a basket picnic, but the Blissfielders kick at this arrangement and insist upon entertaining the soldiers themselves. Let all the old soldiers go to Blissfield. They can rely upon having a good time.

Judge Geddes has appointed Prof. Curtis of Adrian to the position of school examiner to fill the vacancy caused by the resignation of Prof. Walker. This is an admirable selection. But the query arises: Why didn't Prof. Walker resign two weeks earlier and allow the county board to choose his successor?

Blissfield Advance: The game of ball between the old men last Saturday afternoon was witnessed by a large crowd, and was an endless source of amusement. It was fun to see the "boys" run to make the first base, and when hit almost invariably tumbled, to the delight of the small boy. Capt. Staples was beaten by a score of 32 to 15. We understand another game is to be played soon.

Below we give the program for Macon Grange meeting for Aug. 31, at 7:30 P. M.:

Address by Dr. Geo. Howell—Subject, "The tariff as it relates to the interest of farmers."
Quartette—Frank Aten.
Declamation—Miss Emma Bailey.
Essay—A. H. Briggs, of Adrian.
Song—Miss Josie Clarkson.
Select Reading—Mrs. Chas. Skinner.
Inst. Music—Miss Julia Easlick.
Question for discussion—Best variety of wheat and its culture.

In the August crop report of the Secretary of State, we find this item:

"Lenawee Co.—Clawson is the principal white variety of wheat grown, and according to threshers' reports, yields the best. The red varieties grown are Fultz, Lothrop, Lancaster and Egyptian. Fultz yields nearly as much as Clawson and ripens two to five days earlier than other varieties. Harvest began about July 12. All varieties have been damaged by rust and blight, especially fields that were partially winter-killed. Clawson is damaged more from sprouting than the red varieties. Oats are an average crop. Corn is backward and will be a short crop.

STATE TEACHERS' INSTITUTE.

THURSDAY'S PROGRAM.

9:00 A. M.—Opening Exercises.
9:15—Lecture, Advanced Reading, Prof. Demmon.
10:05—Sec. 1, Grammar, Prof. Demmon. Section 2, U. S. History, Hammond. Sec. 3, Physiology, Curtis.
11:00—Recess.
11:15.—Sec. 1, U. S. History, Prof. Hammond. Sec. 2, Physiology, Prof. Curtis.
2:00 P. M.—Lecture, Spelling, Prof. Demmon.
2:30—Sec. 1, Physiology, Prof. Curtis. Sec. 2 Grammar, Prof. Demmon. Sec. 3, U. S. History, Prof. Hammond.
3:30—Recess.
3:45—Lecture, Alcohol and Tobacco, Prof. Curtis.

At 2 P.M. Prof. Demmon gave a talk on spelling.

Spelling is a means to an end. We do not learn to spell in order to spell, simply, but to write well, also to give assistance in reading. On account of the irregularity of the English language, spelling will not to any very great extent help us in pronunciation, which we have to get from the dictionary. In early times our language was almost wholly phonetic, written as pronounced. Good spelling cultivates the memory. A person may have a good memory for spelling while they are very indifferent as reasoners. Some pupils learn spelling much more readily than others. Teachers should guard against using the old style dance block as a punishment, while the pupil is not to blame. During nearly the whole of the scholar's school life, he should have oral and written work. Closed with practical illustrations at 3:45.

As teachers we are to look at this from a physiological point of view. Here came an illustrated description of how to abstain alcohol. Alcohol, not having to be digested, passes immediately to the blood, prevents perfect oxidation of the blood by the lungs, being given out from the lungs in breathing, taints the breath. As teachers we deal with the faculties of the human mind; as teachers we set examples. Alcohol and tobacco are the kindlings that consume the mind, as such we must endeavor to keep our scholars from their use.

FRIDAY'S PROGRAM.

9:00—Opening Exercises.
9:15—Lecture, Written Examinations.
10:00—Sec 1—Grammar, Demmon. Sec. 2, U. S. History, Hammond. Sec. 3, Physiology, Curtis.
11:00—Recess.
11:15—Sec. 1, Physiology, Curtis. Sec. 2, Grammar, Demmon. Sec. 1, U.S. History, Hammond.
1:30 P.M.—Sec. 1, U. S. History, Hammond. Sec. 2, Physiology, Curtis. Sec. 3, Grammar, Demmon.
2:20—Query Box and distribution of certificates.
3:00—Address.

In the forenoon the usual routine was carried out. The institute convened at 1:30 P.M. in order to finish by 3 o'clock. After the recitation of the sections all the teachers gathered for the last time in the high school room, and listened to a few parting remarks from Profs. Demmon, Hammond and Curtis. All expressed themselves as well pleased with the attendance and general conduct of Lenawee County teachers. Prof. Curtis made mention of the meeting of the Association of Teachers of this county to be held here the third Saturday in September, Prof. Wendell, of Hudson, has a paper on Reading. The School Inspector from Clinton also has a paper, together with other exercises. As the association has four meetings the ensuing year, there will be another sometime in November.

Prof. Hammond said he had become acquainted with many of the teachers, being on the Board of Examiners, that he had taken a great interest in the schools of this county, as well as in the teachers. He was to officiate at the examination to-morrow, which would end his duties in that line, however he wished the teachers all God speed.

At this point Mr. Triplet, of Macon, arose. I think it our duty as teachers, after the great good our being here under such benefiting instruction for two weeks, to extend a vote of thanks to Profs. Demmon, Curtis and Hammond. All in favor to raise their right hand. It is needless to say that every hand went up instantly, showing that the Lenawee teachers were not insensible to the fact.

Prof. Demmon thanked the institute for their kind regard, and also thought it his duty to return thanks for the kind and extensive notices which the Press had given them both in Tecumseh and Adrian. There are so many present we cannot take you all by the hand, though we should very much like to do so. We now bid you good bye.

The certificates were then distributed to each one, certifying to the number of half days each one had been in attendance. This closed the two weeks' institute, which to say the least, has been one of the most successful county institutes ever held in this state. Average attendance about 120.

As it may be of interest to some to know who attended the exercises, we give the following names which were enrolled on the regular membership.

LADIES.

Nettie E. Wilcox, Lula J. Wilson, Libbie Stanley, Sarah B. Stanley, Mrs. Minnie Stevens, Clara Sheffield, Mary Sheffield, Julia L. Page, Mattie Barber, Anna V. Rose, Grace L. Underwood, Grace M. Nixon, Nina C. Edminston, Alice Climenson, Permina Beaver, Lillie M. Patterson, Nora E. Kinney, Hattie E. Porter, Ella M. Freer, Celia B. Jones, Grace A. Jones, Gertrude A. Roath, Viola B. Sheffield, Jessie Shaver, Sarah Rice, Lida E. Fisher, Mrs. Belle Dunbar, Miss E. A. Palmer, Adrian; Lodie M. Webster, Armada; Ada A. Hodges, Minnie E. Jenkins, Addison; Minnie McAdams, Sara Green, Brooklyn; Lottie Kemberling Lucy Miller, Carrie Tolford, Blissfield, Mattie Harrison, Palmyra; May McAllister, Blissfield; Mary I. Bowerman, Effie L. Hunson, Palmyra; Carrie Moore, Blissfield; Vevia Wadsworth, Ida Hawkins, F. J. Moreland, Emma O. Skinner, Sadie Soper, Adrian; Ella E. Wellwood, Sadie Taylor, Clinton; Flora B. The Big Rapids board of education have ordered the compulsory school law enforced in that town.

—New Departure.—Having purchased the business and stock in trade formerly owned by Dr. E. Hause, I shall endeavor to continue the trade in a competent manner, and shall make a specialty of confectionery, teas, coffees, ice cream, by the dish or gallon. Oysters in their season.—Lunches at all hours.
Will. T. Eccles.

—Slayton & Son are selling a number of the Cassaday Sulky Plows now and it would do you good to see the smile on a farmers' face after he has used one an hour.

—If you want a Drill, see the Hoosier Champion and Rooler Grain Drill at Snedicor's.

—No more poor bread made from Heck's all roll flour. Try it.
Heck Bros.

—The Improved Domestic with the new set of attachments beats them all. Call at Sparks' and see it.

—Natural looking and serviceable artificial teeth can be procured at Dr. B. F. Snyder's Dental Rooms.

—The Wilder Raw Sulky and Elwood Sulky Plow, for sale by Snedicor.

—You can have your decayed and aching teeth extracted at Dr. B. F. Snyder's dental rooms, without pain, by taking vitalized air.

—Call at Sparks' and see the Improved Domestic. It is just too lovely for anything.

—Ladies, call at Slayton & Son's and see the Champion Creamery.—Save you lots of hard work.

—Don't forget that Snedicor sells the best plows in Tecumseh. Call and see for yourself and try one.

—Spring Tooth Harrows at Snedicor's.

—Call at the yard and mill of the Tecumseh Lumber Co., and examine their stock.

—Leave your orders for Sash, Doors, blinds, mouldings, window frames, tanks, troughs, etc., with the Tecumseh Lumber Co. They will receive prompt attention.

—One of the best blood purifiers ever made is "King of the Blood."—Sold by Druggists generally. Manufactured by D. Ransom Sons & Co., Buffalo, N. Y.

—Grain Drills.—A very complete stock at Slayton & Son's. The one horse drill for standing corn, Roller Grain Drills, Shoe Drills and Tooth Drills. Call and get prices.

TECUMSEH, Mich., March 25, '83.
I have been troubled with a hard cough for many years, and have found nothing to help me until I tried Dr. Bigelow's positive cure, which has completely cured me.
WELCOME SHERMAN.

The medicine is manufactured by Griggs & Co., Ottawa, Ill., and sold by Baker & Hall, Tecumseh.

AYER'S Ague Cure

IS WARRANTED to cure all forms of Fever and Ague, and all malarious diseases, such as Fever and Ague, Chills and Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint. Because of its power over these diseases, we can recommend it to the sick with the confidence we feel that it will cure them. Not to cure is the exception, and we hold ourselves and our agents ready to refund the money in all such cases where our CURE does not cure, and we make the same offer with other AYER'S Medicines we have been so long and so extensively advertising, to refund the money.

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists.

Vital Questions.

Ask the most eminent physician of any school, what is the best thing in the world for quieting and allaying all irritation of the nerves and curing all forms of nervous complaints, giving natural, childlike refreshing sleep always?

And they will tell you unhesitatingly, "Some form of Hops."

CHAPTER I.

Ask any or all of the most eminent physicians:

"What is the best and only remedy that can be relied on to cure all diseases of the kidneys and urinary organs, such as Bright's disease, diabetes, retention, or inability to retain urine, and all the diseases and ailments peculiar to women?"

"And they will tell you explicitly and emphatically, "Hunt's Remedy."

Ask the same physicians:

"What is the most reliable and surest cure for all liver diseases, dyspepsia, [illegible] Malaria, or Backache, Head, Side, or Kidney Pains, Piles, [illegible] and all female complaints?"

And emphatically the Hop bitters answer, "[illegible] Hop Bitters."

CATARRH

ELY'S CREAM BALM

Is placed into the nostrils, spreads over a surface of mucous membrane, and is absorbed. Relief is immediate and a cure follows. It is not a snuff or a powder. Only a few cents for a sufficient quantity. Full size, 50 cents, at druggists or by mail.

CURES THE WORST CASES

ROSE COLD

IS NOT LIQUID OR SNUFF

HAY-FEVER

Applied by the finger into the nostrils, it is agreeable, healing, and quickly relieves the most severe cases of catarrh, clearing the head, restoring the lost sense of taste, smell, hearing, and health. Agents wanted everywhere. Sample by mail, 50 cents. Circulars free. Address ELY BROTHERS, Owego, N. Y.

HERALD OFFICE.

THE SKEIN WE WIND.

BY GEORGE KLINGLE.

If you and I, to-day,
Should stop and lay
Our life-work down, and let our hands fall where they will—
Fall down to be quite still—
And if some other hand should come and stoop to find
The threads we carried so that it could wind
Together what we [illegible] should expect to know
Our life-work's web, seek
To carry on the good design
Instantly made years or mine,
What would it find?

Some work we must be doing, true or false,
Some threads we wind, some purpose so exalts
Itself that we look up to, or down,
As [illegible] crown;
To do [illegible] and [illegible] through all
Of different lengths and thicknesses—some bare, some shrouded—
A [illegible] round,
To inflate skein of life [illegible],
Sometimes forgetting all [illegible]
To seek
The value of the threads or chance
Strong stuff to use,
No hand but winds some thread
It cannot stand quite still, but it is dead;
But what it spins and winds a little skein,
God made each hand for work—not too slain
Is required, but every hand
Spins, though but ropes of sand
If Love should come,
Stooping above when we are done,
To find bright threads
That we have held, that it may spit them longer—find out shreds
That break when touched how cold,
Sad, shivering portionless, the hands will hold
The broken strands and know
Fresh cause for woe.

Japanese Women.

AN INTERESTING LETTER BY AN INTELLIGENT NATIVE.

A Japanese gentleman writes to the Boston *Herald*, as follows:

The Western people are invariably aggrieved to see the inferior state of women in Asiatic countries, and heartily sympatize with them in their condition of total subjection under the despotic hands of family tyrants. To this the Japanese ladies are an exception; they are never reduced to the same degree as in other Asiatic countries. They are undoubtedly treated as the gentler sex, and also with respect and considerate care. In this, as in so many other things, we totally differ from the Chinese. We see them treated with adoration and deference; in fact, in Japan, as in America, the ladies rule the house. They are allowed greater freedom and have more self-confidence than any other Eastern ladies; yet it is true that a Japanese lady is deprived of the privilege of receiving her young male friends in such an unrestricted manner as is allowed in this country, nor is, without a chaperon, permitted to indulge in the pleasure of strolling or to share the amusement of theater-going with him with whom she may stand on terms of friendship, or of a more tender relation. We scarcely hear, in any Japanese family, such a free expression of love and affection as is tolerated in this country; in fact, it is there considered too delicate an affair to speak of or demonstrate in the presence of parents or friends, if not a violation of the propriety of social etiquette. We can easily infer from these facts that marriage in Japan is seldom the fruit of mutual love and admiration. The matrimonial union is wholly to be arranged and settled by the hands of parents, and the proposed husband and wife have to take each other, either for better or for worse upon the judgment of others. But it is amazing to find that there are no more unhappy couples in Japan than there are in this country, where marriage is the sweet result of long acquaintance and mutual love.

Through the influence of Confucianism and Buddhism, obedience has been inculcated as the chief and most amiable virtue of ladies, and undoubtedly this prevailing notion has prevented them from securing a position of equality with men. Happily, or, shall I say unhappily?—for us men, our wives have hardly ever attained such an ascendency as to henpeck their husbands, a custom often discoverable among the so-called civilized countries. In tracing the history of any nation, we invariably seem to come across an age in which the female sex was more or less brought under subjection. The ancient Teutonic race is said, even during its barbarous times, to have regarded the gender sex with the greatest respect and courtesy; but if we turn to the common law of England, we find the assertion quite inconsistent with it. Unfortunately for them, Japanese women have thus far been deprived of many rights, and also of the means of elevating themselves, but to-day the education of our girls is receiving the greatest attention from our educational department. The prospect is cheering, and it may safely be predicted that, at no distant day, our scholastic institutions will produce myriads of school-marms, the pleasing feature of the New England landscape. Japanese young ladies are generally admired by foreigners as pleasing and graceful in their deportment, and for their gentleness, neatness, and good taste in dress. As far as my recollection goes, I can say this much, that they are generally demure and diffident in society, and apparently fall short of such an activity and ease of manner as is shown by American young ladies. Our misses neither reduce the size of their feet, like the Chinese, nor contract their waists, like the Western ladies, nor wilfully injure what is given to them; that is, by piercing the ears, a custom prevalent almost everywhere, both in the civilized countries of Europe and America and the half-civilized countries of Asia. Among our married women it has, from ancient times, been the custom to shave off the eyebrows and to blacken the teeth. This novel sight attracts the attention of strangers, and is not infrequently ridiculed as a most singular and unnatural custom. Every nation has its own customs and peculiarities, and we doubt if those ladies who are inclined to condemn the custom are normally free from the shade of any singular fashions and peculiarities attendant upon their persons. We have a common saying, "Correct yourself before you criticize others." We gladly state that our married women are sensible enough to perceive the shortcoming in the custom above alluded to, and it is now noticeable how rapidly it is disappearing.

U. S. Surgeon Recommends.

Dr. J. M. G. Pheeton, is a U. S. Ex-Surgeon, residing now at Bloomington, Ind. The Dr. writes to say: "I recommend Samaritan Nervine because it cures epilepsy." Physicians generally, are its friends.

Plant pansy at the roots of your plum trees, or hang branches of the plants on the limbs of the trees, and you will not be annoyed with curculio. An old and successful fruit-grower furnishes the above, and says it is the most successful curculio preventive he has ever tried.

The American Flag.

The first European banners unfurled upon the shores of the New World, of which we have any authentic account, are those of Columbus, who landed on the small island of San Salvador, Oct. 12, 1492. Doubtless his ideas of a new world came from Iceland, which he visited early in 1477.

His son writes that Columbus, dressed in scarlet, stepped ashore and planted the royal standard of Spain, emblazoned with the arms of Castile and Leon. A white flag with a green cross was its companion.

In 1499 the eastern coast of South America was explored, and eight years later the discovery was announced to the world by a Florentine, Americus Vespucius, who gave name to the Western Continent. About this time the Cabots planted on the shores of North America the banners of England and of St. Marks of Venice. The early voyagers found that the Indians of North America carried as a standard a pole decked with the wing feathers of eagles.

The red cross of St. George floated from the mast of the Mayflower, 1620, when the Pilgrims landed on Plymouth rock. For a century and a half, during the colonial and provincial periods, the use of the English flag continued in North America, with the addition of many devices and mottoes.

Some flags were all red, with white horizontal stripes, or red and blue stripes. Others were red, blue, white or yellow. Upon these were the pine or "Liberty tree," and the words, "An Appeal to Heaven;" also stars, the crescent, anchor, beaver and serpent. Under the latter, "Don't tread on me." A flag at the battle of White Plains bore the words "Liberty or death."

On January 2, 1776, at Cambridge, Mass., was first hoisted the "Grand Union" flag of the crosses of St. George and St. Andrews, and the thirteen alternate red and white stripes, emblamatic of the union of the thirteen colonies against the oppressive acts of British tyranny.

This was the flag in use when the Declaration of Independence was read by the Committee of Safety at Philadelphia, in the presence of Washington in New York, and from the balcony of the State House in Boston.

On the 14th of August, 1777, Congress resolved "that the flag of the United States be thirteen stripes, alternately red and white, and that the union be thirteen stars, white, in a blue field, representing a new constellation."

Once the stripes were increased to fifteen, but in 1818 they were changed back permanently to thirteen, perpetuating the original thirteen States of the Union, and it was decreed that for every new State coming into the Union a star should be added. The stars have five points; those on our coins six. They were first arranged in a circle, afterwards in the form of a large star, and now in parallel lines.

Flaxseed for Stock.

In some parts of the West, farmers sow flax on newly-turned sod for the purpose of turning the ground for a crop of wheat the following year. It requires less labor to sow and harvest a crop of flax than to plant and gather a crop of corn. Sod corn is not salable, but flaxseed always finds a ready market. The expense of marketing flaxseed is less than for any crop that can be raised on the same amount of land. It is generally worth more per bushel than any kind of grain, and it is manufactured in the West instead of in the East. In many sections the manufacturers of linseed oil furnish seed to homesteaders and other poor farmers with a view of securing their crop when harvested. The manufacture of this oil is very profitable, as the oil-cake sells for more than half the sum paid for the seed from which it is made. Nearly all of it goes to Great Britain, where its value for feeding to all kinds of stock is better appreciated than in this country. But little use is made of oil-cake or of ground flaxseed in the United States, except to feed to calves and milch cows that are in poor condition in the spring. Few have employed either of them as a part of the regular diet for stock, or for the purpose of preparing animals for the butcher. There is no necessity for extracting the oil from flaxseed before feeding it to stock. In fact the oil it contains is the most valuable portion of it. Pure ground flaxseed, when fed alone, is too rich, but if mixed with meal, bran or shorts it is excellent for all kinds of stock. An experienced feeder recommends mixing one bushel of flaxseed with seven of corn and the same number of oats and grinding them together. There is no better feed for calves "brought up by hand" than boiled flaxseed and skimmed milk. A small amount of flaxseed should be increased to a pound a day by the time the calves are a month old.

In London no liquor can be procured after 12 o'clock at night. Every bar, big or little, is closed, and this law is not evaded, for the risk is too great. A man's license would be taken from him immediately, and without remedy. Persons are not licensed to sell liquor in England. It is the premises that are licensed. The board having it in charge license one public house in a district, basing it upon the supposed necessity, and those premises hold this license till deprived by violation of law. If you desire to sell liquor, you cannot go and rent a room and open your bar, you are compelled to buy the lease of a place which carries the license with it. Consequently a licensed place is a valuable piece of property. Sunday is an especially drought day in London. All the bars are closed till 1 o'clock P. M., and are then opened but an hour. Then they are closed till 6, and are permitted to keep open till 11. And let it be remembered that law in England is law. You can't laugh at it as you do in America. There is no evasion of this law attempted. The places are required to be closed, and they are closed. There are no side-doors. There is no selling on the sly—they are closed.

CUTTING STONE WITH STONE.—It has been held by some archæologists that various sculpturings could not have been cut without the use of iron tools; but others have of late years succeeded in reproducing similar markings on granite slabs, using solely stone implements; and in doing so they found that diorite and other such tough stones cut the granite better than flint. This corresponds with the practice of the stone-cutters of the present time, whose steel tools for cutting granite are of a much softier temper then those they use for cutting sandstone. The great sculptured stone of Montezuma, in Mexico, is a striking proof of the extent to which granite can be sculptured with stone implements. Gama, in his work describing this stone, states that 10,000 Indians were employed in transporting it to the city of Mexico, where it was sculptured by thirty workmen with stone axes.

"We are selling at the rate of three doz. bottles of Baker's Japanese Liniment a week." Pegg & Wilson, Druggists, Morenci, Mich.

Miscellaneous Recipes.

Pop-Overs:

One cup flour; one cup milk; one egg; a piece of butter the size of a walnut; a pinch of salt. Bake in gem-pans. Double this if necessary.

Flannel Cakes:

One full quart of sifted flour; one quart of thick milk; three eggs; one teaspoonful soda dissolved in milk; one teaspoonful salt rubbed in the flour; two tablespoonfuls melted butter.

Junkets:

A cup and a half of Indian meal; a handful flour; half a teaspoonful soda; one teaspoonful salt; boiling water to make a thick batter. Take care that every particle of the meal is scalded. The flour may be mixed smooth in a little milk before being added. Fry on a griddle with a good deal of lard.

Genuine Boston Brown Bread:

Four tablespoonfuls full of sifted Indian meal, two cups rye flour, either wheat or rye; one teaspoonful salt; one teacup molasses, and boiling water added to make it as thick as griddle-cake batter. When cool add half a teacup yeast, either home-made or distillery. Put the mixture into an iron baking dish, cover tightly, let it stand in a warm place until it cracks over the top (which should be smoothed over with wet hands before it is placed to rise). Bake it five or six hours in a moderate oven which will not burn the crust to a cinder.

Barby's Waffles:

One pound and a half of flour; one pint or less of boiled rice; two and a half pints sweet rich milk; one teaspoonful salt; four eggs. Put the rice in a four quart bowl, separating the eggs, putting the yolks with the rice; add the salt, flour, and two pints of the milk, beating very thoroughly; then the remaining half pint of milk; beat the whites of the eggs to a stiff froth, add them to the batter, and beat well together. When well beaten, make the batter still lighter by lifting and pouring it with a tin cup for five minutes.

Graham Shortcake:

One cup sour milk, one-half cup cream; one teaspoonful soda; one teaspoonful salt; make a batter as thick as can be stirred with a spoon, spread a layer of it in a baking-tin, put bits of butter over it, then another layer of batter. Bake in a moderate oven until well browned. When cool enough to handle, open between the layers, and put in berries, peaches, stewed apples, or any kind of juicy fruit; let stand a few minutes, and you will have "a dainty dish to set before a king."

Rules for Keepers of Sheep.

1. Keep sheep dry under foot with litter. This is even more necessary than roofing them. Never let them stand or lie in mud or water.
2. Take up lamb bucks early in summer, and keep them until December following, when they may be turned out.
3. Count ever day.
4. Begin graining with the greatest care and use the smallest quantity at first.
5. If a ewe loses her lamb, milk her daily for a few days, and mix a little alum with her salt.
6. Let no hogs eat with the sheep, by any means, in the Spring.
7. Give the lambs a little mill-feed in time of weaning.
8. Never frighten sheep if possible to avoid it.
9. Sow rye for weak ones in cold weather, if you can.
10. Separate all weak or thin or sick from those strong in the fall, and give them special care.
11. If any sheep is hurt catch it at once, and wash the wound, and if it is fly-time apply spirits of turpentine daily, and always wash with something healing. If a limb is broken bind it with splinters tightly, loosening as the limb swells.
12. Keep a number of good bells on the sheep.
13. Do not let the sheep spoil wool with chaff or burs.
14. Cut tag locks in early spring.
15. For scours give pulverized alum in wheat bran; prevent by taking great care in changing dry for green food.
16. If one is lame, examine the foot, clean out between the hoofs, pare the hoof if unsound, and apply tobacco with blue vitriol, boiled in a little water.
17. Shear at once any sheep commencing to shed its wool, unless the weather is too severe, and save carefully the pelt of any sheep that dies.
18. Have at least one good work by you to refer to. This will be money in your pocket.

Josh Billings Heard From.

Newport, R. I., Aug. 11, 1880.

Dear Bitters—I am here trying to breathe in all the salt air of the ocean, not having been a sufferer for more than a year with a refactory liver, I was induced to mix Hop Bitters with the sea gale, and have found the tincture a glorious result. I have been greatly helped by the Bitters, and am not afraid to say so.

Yours without a struggle,
Josh Billings.

TWO THINGS AT ONCE.—Among the many anecdotes of Sir Edwin Landseer contained in a recent biography, is one about the famous artist's mastery of hand.

At a large party in London, the conversation turned on dexterity and feats of skill with the hand; a lady remarked:

"Well, there is one thing no one has ever done, and that is, draw two pictures at the same moment."

"Oh, I can do that," said Landseer, "lend me two pencils and I will show you."

The pencils were handed him, a piece of paper laid upon the table, and Sir Edwin drew simultaneously and without hesitation, with one hand the profile of a stage's head, all its antlers complete, and with the other the perfect profile of a horse's head.

Both subjects were said to be full of life and energy, and the drawing with the left hand fully equal to the one made with the right.

A Life Saving Prescription.

Mr. M. E. Allison, Hutchinson, Kan.: Saved his life by a simple Trial Bottle of Dr. King's New Discovery for Consumption, which caused him to procure a large bottle that completely cured him, when doctors, change of climate and everything else had failed. Asthma, Bronchitis, Hoarseness, Severe Coughs, and all Throat and Lung diseases, it is guaranteed to cure. Trial Bottle free. Large size $1.00.

Sold by C. A. Wright & Co.

A "HEARTY MEAL."—A woman at Cape Girardeau, Mo., who had suffered from a husband's neglect, traced him to a bar-room where he was playing cards with several companions. Setting a covered dish she held in her hands down upon the table she said: "Presuming, husband, that you were too busy to come home to dinner, I have brought you yours," and departed. With a forced laugh he invited his friends to dine with him, but on removing the cover from the dish found only a slip of paper on which was written: "I hope you will enjoy your meal; it is the same your family have at home."

Grave Robbers.

Of all classes of people the professional grave robbers are the most despised. He robs us of our dear friends for a few dollars. How different is this new grave robber, Dr. Bigelow's Positive Cure, which robs graves of thousands of consumptives. This unequalled remedy for coughs, colds and consumption, whooping cough, croup and all throat and lung diseases, subdues and conquers these troubles speedily, safely and thoroughly. Trial bottles free, of Baker & Hall.

That is the most perfect government in which an injury to one is the concern of all.

DR. J. W. KERMOTT'S

STRICTLY VEGETABLE. ACT WITHOUT PAIN.

MANDRAKE PILLS,

CURE Sick-Headache, Dyspepsia, Liver Complaint, Indigestion, Constipation, and PURIFY THE BLOOD.

NOTICE.—Without a parallel. These Pills are the most popular of any. Have been before the public for years, and have always proved satisfactory. Recommended for them, they never fail to give satisfaction. Price [illegible] cents per box. For sale by all druggists.

DR. A. TRASK'S MAGNETIC OINTMENT.

The Great Healer of all Inflamed Injuries and Disorders.

It is constantly effecting the most wonderful cures, while the unparalleled demand with which it meets, stamps it at once as the greatest medicine of the age for outward application.

The most incredulous are convinced, and the most skeptical are compelled to believe in the power of this great remedy.

WHAT IT CURES.

All Sores, Cuts, Bruises, Sprains, Burns, Sore Throat, Lameness, Rheumatism, Piles, Inflammation of Lungs and Bowels, Bronchitis, Croup, Salt Rheum, Chilblains, Affection of the Spine, Erysipelas, Nervous Irritation, and all disorders attendant with Inflammation.

It never fails to restore the natural functions of the skin and equalize the circulation of the blood. By this means a controlling power is gained over the most malignant forms of disease. It penetrates to every portion of the human frame; every bone, muscle, vein, nerve and ligament is searched out and made sensible to its soothing and healing influence. Hence it copes readily with internal as well as external diseases.

Over 40 Years,

This Ointment has been used by the people throughout the United States, and our confidence in its qualities is such that as we have no space here to insert any of the numerous certificates of cures which we have from all parts of the country, we simply ask those readers of this notice who have ever used this Ointment, to frankly state their experience with it to inquiring friends. If but one in a hundred would do this we should be perfectly satisfied with the result. Full directions for use will be found on pamphlet around each bottle.

Price 25 and 40 cents per bottle. Sold by all dealers in medicine.

D. RANSOM, SON & CO., Prop's
Buffalo, New York.

A CURE GUARANTLED IN ALL CASES.

For Old and Young, Male and Female,

Magnetic Medicine; a Brain and Nerve Food. Positively cures Night Losses, Spermatorrhœa, Impotency, Nervous Debility, Leucorrhœa, Barrenness; and for all (BEFORE) weaknesses of the Generative (AFTER) organs in either sex. It is an unfailing and positive cure. Tones up the debilitated system, arrests all involuntary discharges, removes mental gloom and despondency, and restores wonderful power to the weakened organs. With each order for twelve packages, accompanied with five dollars, we will send our Guarantee to refund the money if the treatment does not effect a cure. It is the Cheapest and Best Medicine in the market. Full particulars in Pamphlet, which we mail free to any address. Sold by all druggists one package 50 cts.; Six for $2.50, or sent by mail on receipt of price by addressing the MAGNETIC MEDICINE CO., DETROIT, MICH. Guarantees issued in Tecumseh by Waldo & Doty.

COMPOUND OXYGEN NOT A DRUG

A NEW TREATMENT.

For Consumption, Asthma, Bronchitis, Dyspepsia, Catarrh, Headache, Debility, Rheumatism, Neuralgia, and all Chronic and Nervous Disorders.

A CARD.

We the undersigned, having received great and permanent benefit from the use of "COMPOUND OXYGEN," prepared and administered by DRS. STARKEY & PALEN, of Philadelphia, and being satisfied that it is a new discovery in medical science, and all that is claimed for it, consider it a duty which we owe to the many thousands who are suffering from chronic and so-called "incurable" diseases to do all that we can to make its virtues known, and to inspire the public with confidence.

We have personal knowledge of Drs. Starkey & Palen. They are educated, intelligent and conscientious physicians, who will not, we are sure, make any statement which they do not know or believe to be true, nor publish any testimonials or reports of cures which are not genuine.

WM. D. KELLEY,
Member of Congress from Philadelphia.
T. S. ARTHUR,
Editor and Publisher "Arthur's Home Magazine," Philadelphia.
V. L. CONRAD,
Editor "Lutheran Observer," Philadelphia.
PHILADELPHIA, PA., June 1, 1882.

In order to meet a natural inquiry in regard to our professional and personal standing, and to give the public increased confidence in our statements, and in the genuineness of our testimonials and reports of cases, we print the above "CARD" from gentlemen well and widely known and of the highest personal character.

Our "Treatise on Compound Oxygen," containing a history of the discovery of and mode of action of this remarkable curative agent, and a large record of surprising cures in Consumption, Catarrh, Neuralgia, Bronchitis, Asthma, etc., and a wide range of chronic diseases, will be sent free. Address,

DRS. STARKEY & PALEN,
1109 and 1111 Girard St., Philada.

$500 Reward!

WE will pay the above reward for any case of Liver Complaint, Dyspepsia, Sick Headache, Indigestion, Constipation or Costiveness we cannot cure with West's Vegetable Liver Pills, when the directions are strictly complied with. They are purely vegetable and never fail to give satisfaction. Sugar coated. Large boxes containing 40 pills, 25 cents. For sale by all druggists. Beware of counterfeits and imitations. The genuine manufactured only by John C. West & Co., "The Pill Makers," 181 & 183 W. Madison St., Chicago. Free trial package sent by mail prepaid on receipt of a 3 cent stamp. Sold by all druggists in Tecumseh.

$1,000 Forfeit!

Having the utmost confidence in its superiority over all others, and after thousands of tests of the most complicated and severest cases we could find, we feel justified in offering to forfeit one thousand dollars for any cases of coughs, colds, sore throat, influenza, hoarseness, bronchitis, consumption in its early stages, whooping cough, and all diseases of the throat and lungs, except Asthma, for which we only claim relief, that we cannot cure with West's Cough Syrup, when taken according to directions. Sample bottles 25 to 50 cents; large bottles one dollar. Genuine wrappers only in blue. Sold by all druggists or sent by express on receipt of price. John C. West & Co., sole proprietors, 181 & 183 W. Madison St., Chicago, Ill. Sold by all druggists in Tecumseh.

FITS A Leading London Physician establishes an Office in New York for the Cure of EPILEPTIC FITS. From Am. Journal of Medicine.

Dr. Ab. Meserole (late of London), who makes a specialty of Epilepsy, has without doubt treated and cured more cases than any other living physician. His success has simply been astonishing; we have heard of cases of over 20 years' standing successfully cured by him. He has published a work on this disease, which he sends with a large bottle of his wonderful cure free to any sufferer who may send their express and P. O. Address. We advise any one wishing a cure to address

S. and Europe. Diseases of the blood own it a conqueror. For sale by all leading druggists. $1.50.

The Dr. S. A. Richmond Med. Co., Props., St. Joseph, Mo. (12)

Put a Brand on Him.

"Women are a necessary evil," he said, bringing down his fist hard on the counter to emphasize the heartless remark. It was in the village store at West Milton, Saratoga County, and the speaker was the central figure of a group of bucholic philosophers. He was homely, slovenly and sixty. "There's where I differ from you altogether," said Mr. George T. Graham, of the same place. "Women are mostly what men make 'em. When husbands are brutes, wives will fall in submission or make home hot for the men; and they're unnatural in either character. Love them, and especially be good to them when they're sick, and you'll have no trouble. There's my own wife, now. She's suffered a good deal with dyspepsia, nervous prostration and other ailments that took the bloom off her cheeks and the spring out of her steps. Well, she saw an advertisement of PARKER'S TONIC, and thought it would be just the thing for her case. Gentlemen, I sent five miles after a bottle. She took it. I sent again after more. So several times. Trouble? Why, if you could see how much good it has done her, you would say that women are the greatest of God's blessings and Parker's Tonic is the next."

This preparation which has been known as Parker's Ginger Tonic, will hereafter be called simply Parker's Tonic. This change has been rendered necessary by substitutes imposed upon their customers by unprincipled dealers under the name of ginger; and as ginger is really an unimportant flavoring ingredient, we drop the misleading word.

There is no change however in the preparation itself, and all bottles remaining in the hands of dealers, wrapped under the name of Parker's Ginger Tonic contain the genuine medicine if the fac simile signature of Bliscox & Co., is at the bottom of the outside wrapper.

A CLEAR HEAD.

"One year ago I was induced to try AYER'S PILLS as a remedy for **Indigestion, Constipation, and Headache,** from which I had long been a great sufferer. Commencing with a dose of five Pills, I found their action easy, and obtained prompt relief. In continuing their use, a single Pill taken after dinner, daily, has been all the medicine I have required. AYER'S PILLS have kept my system regular and my head clear, and benefited me more than all the medicines ever before tried. Every person similarly afflicted should know their value. 152 State St., Chicago, June 6, 1882.

M. V. WATSON."

For all diseases of the stomach and bowels, try AYER'S PILLS.

Table [illegible]

It is not now the custom, as it used to be, to wait until every one is helped before eating; haste or impatience are out of place, but it is proper to eat whenever food is placed before you. One is not expected to ask twice for soup fish, or salad, and is seldom helped twice to dessert.

Preference for white or dark meat, rare or well done, should be expressed without hesitation, and all food accepted or declined in courteous terms. Well-bred people never handle the glass, silver or china unnecessarily, or the food; they never make bread pills, or drink or speak with food in their mouths, or leave the table while eating, or complain of the dinner.

When the child is strong enough to manage a fork, give him one instead of a spoon, and when the dignity of a knife is arrived at, teach him the use of it, and also, when done with the knife and fork, to lay them in close parallel across the plate, the handles to the right. Teach him to use a spoon properly; to lay it in the saucer when he drinks his tea noiselessly, (holding the cup by the handle), to leave it in the saucer if the cup is to be re-filled, and place it in the empty cup when done.

Young people should not be allowed to flourish their bread in the air while spreading it with butter; it is to be laid on the plate; neither should they sop up gravy or soup with bits of bread, or scrape their plates clean or tilt their soup plates in order to drain them dry, or take the meat or bones with their fingers. The mouth should be carefully wiped before drinking, and the glass or goblet lifted without putting the fingers over the brim.

Table manners forbid all unnecessary clattering of knives and forks. Salt is taken on the knife, which is tapped on the forefinger of the left hand, instead of on the fork. The hand is the proper medium for removing grape skins, and fruit pits from the mouth to the plate, and the napkin should hide all use of the toothpick.

Vegetables are usually eaten with a fork or spoon. Asparagus may be taken with the fingers; water-cresses, celery, radishes and olives are always so eaten. Cheese is generally taken with a fork.

Economical housewives cover the table with a square of baize, canton flannel, or cloth of some kind, over which the linen one is spread; this improves the appearance, keeps the cloth from wearing at the edges of the table, and prevents noise.

However much one may economize in household labor, good taste and much painstaking should govern the appointments of the dining room. An attractive table is a good appetizer and has something to do with good behavior. Human nature is easily affected by the atmosphere with which it is surrounded: children cannot be expected to behave well in an hour given to fretfulness and disorder. Table manners for the housekeeper begin in seeing that her table is neat and attractive and calculated to inspire cheerfulness; from it she should banish as far as possible all vexations, care and worries.

How Women Look at Domestic Work.

There is very little difficulty in getting gardeners and even tolerable grooms and coachmen, and none whatever in getting clerks and salesmen and errand boys. We men regard work as honorable; but women conspire together to stigmatize all domestic work as a sort of disgrace. If they engage in such work at all, it is secretly, and they are humiliated if they are caught at it, and they do not allow their daughters to do it if they can help themselves; and then they wonder that it is so hard to find good cooks and housemaids. Pride, madam, is the great incentive to good work. The men enlist it on their side; you women enlist it against yours; and then you wonder that your servants take no pride in their work. It seems to me one of the incidental disadvantages of what people call the "higher education for women" that it tends to increase this feeling. A young girl goes to boarding-school—I beg pardon, to a female college—for three or four years. During all that time she is waited on by servants. They cook her meals, they wait on her at the table, they make her bed, they sweep her room, and when she goes home, she has a dressmaker to do her sewing; and all this time she is learning to look down upon the common work of housekeeping as a menial kind of drudgery. When at last she is married and begins life for herself, she has to unlearn a considerable part of her four years' course, unless her husband can afford to provide her with servants to do all the housework, and even then she needs to unlearn her habit of thought and feeling about it in order to inspire her servants with the pride which is essential to success in any toil. For this reason, I should like to see every public school adopt the fashion of Wellesley and South Hadley, and give their pupils some part of their own work to do. Perhaps they would learn a trifle less of Latin, Greek, and the higher mathematics, but this loss would be more than compensated, for, if they acquire the characteristics of Lemuel's virtuous woman, who "worketh willingly with her hands."—*Laicus, in Christian Union.*

Power of School Directors.

The supreme court of Iowa has decided a very important case, settling the rights of school directors in certain cases.

In Des Moines the directors established a rule that pupils of the public schools who damage a school building should pay all damages, and be suspended from school until the amount is paid. A child of Perry Perkins, while at play on the grounds, accidentally knocked a ball through a window of the school house. The boy was suspended. Perkins denied the right of power of the board to suspend the boy, and decided to test the question, not because of the amount of damages involved, but to establish the law in the case; and therefore, by mandamus proceedings in the circuit court, sought to compel the directors to re-admit his son. The defendants, the directors, demurred to Perkins' petition, on the ground that the court had no jurisdiction, the law having provided that appeals fro[illegible] decisions of school directors shall go to the county superintendent, and from hi[illegible] the stat[illegible] superintendent. The lower co[illegible] sustai[illegible] the demurrer, when Perk[illegible] appealed [illegible] the supreme court, and [illegible] decided that the circuit cour[illegible] jurisdiction, and was the proper tr[illegible] and further, that the school di[illegible] power or authority to m[illegible] While a child may be [illegible] for breach of discipli[illegible] good order and m[illegible] overt acts done. [illegible] as not to secure [illegible] an obligation [illegible] money. The direc[illegible] or enforce such [illegible] r's Sar- son [illegible] own in th[illegible] en liv in[illegible]

Take Care of the Eyes.

"Nellie, I fear you will injure your eyes," I said to a young girl, who sat reading in the twilight. "My eyes are very strong," she replied, "why, I can look right straight at the sun." Now every one will acknowledge that such eyes are a great blessing, seldom possessed by the present weak-eyed generation; but I fear even Nellie's strong eyes will soon be injured if she persists in using them under such trying circumstances—reading fine print in the moonlight, or at a long distance from the lamp, or allowing the full glare of the noonday sun to reflect into her eyes from the printed page. Sewing on black goods by the lamp light she thinks nothing of, nor of sitting up until midnight half the nights in the week to read an interesting book. Now all these things are hurtful to the eyes, and no more than one person in a thousand can practice them and remain uninjured. As no one can be sure of being the lucky person, it behooves all to take proper care of these priceless members.

When the eyes are tired and inflamed at night I find it rests them for the next day to bind over them a wet towel on retiring. Lately, I have laid next my eyes a little sack containing dampened salt, and find it better still. No matter if the brine finds its way beneath the closed lids; the smarting will last but a minute. Indeed I often find it into the eyes and find it strengthens them. Years of practicing this have proved that although it will not make weak eyes strong, it will do more toward warding off the day of spectacles than an improper use of them, and a dozen bottles of eye water and boxes of salve. I became quite interested in knitting lace; but last winter I found that the necessary fine work with my reading and writing was all my eyes could endure. I have not knit six inches of lace in as many months, and although I often think of the real thread I wanted for my curtains, I know it will not pay to knit it.

Another source of weak eyes is in the bright, unshaded lights we use. No one, without trial, knows how much rest a shade gives. It pays to be careful of the eyes, for once lost they can never be replaced. Science has not yet invented a mode of inserting new ones, as lost hair and teeth and limbs are supplied. Once lost they can never be replaced.

Improving the Cereals.

In regard to raising and using the best seeds, I think the farmers, as a class, are quite deficient. Especially is this true in regard to the cereals. Heavy or light, of good quality or poor, the result of the harvest is generally attributed to the richness of the soil or the nature of the season.

A few careful observers and experimenters have shown that, with the same care in all other respects, a crop may be increased from one-tenth to one half, by using the best seed adapted to the soil and climate. Such seeds are worth much more than the average farmer is likely to be willing to pay for them. Every one claims to believe in the use of good seeds, and generally thinks he uses no other. Very few persons appreciate the great amount of study, and care, and money, which have been employed in improving the various breeds of our domestic animals. The process is a slow one, and many meet with moderate success. These men study the qualities of both parents, and their ancestors, and always have what seems to them good reasons for every step they take in breeding.

In the same manner we need large numbers of experimenters to improve our cereals. Principles underlie the breeding of plants as well as the breeding of animals. The results are much more rapidly obtained; the larger increase gives us a much greater chance for selecting the best. How shall the cereals be improved? Many of the processes have been again and again stated. Study the writings of a Sturtevant, or a Blount, or a Hallett. Repeat what they have done, add thought to the work, and make additional experiments. Let an enthusiastic student, with practical tact, plant a piece of corn, or wheat, or other crop, on good soil, near his house, where he can easily watch it every day. Let him carefully observe the difference to be found in the same plot from the seed from the same ear. Select parents which suit, see that they are crossed, and select the seed for future use. Do not neglect the soil and cultivation. Here is a grand field for experiment—one but little worked, and ready to reward skill and patience with a bountiful harvest.

Incisors of Some Animals.

The incisors of the horse, once worn down or lost are gone forever, but in many species a provision exists by which the wear and tear of mastication is compensated by the perpetual growth of certain members of the dental series. This very convenient arrangement exists in all the rodents, or gnawers, an order of which the beaver and the rat and the rabbit are familiar examples, and also in the elephant, walrus, wild boar, etc. The incisors of the rodents are the seat of this perpetual growth, and any one who will take the trouble to examine the skull of a rabbit will at once see how admirably they are adapted to the animal's wants. They are of curved shape and occupy sockets extending to the back part of both jaws, the upper pair describing a larger part of a smaller circle, and the lower ones a smaller part of a larger circle. Each tooth consists of a solid column of dentine, with a plate of enamel in its outer surface, and, consequently diminishes in hardness from front to back. The constant wear produced by the continual collision of the opposing surfaces forms an oblique chisel-like surface, sloping from the hard enamel of the front to the softer dentine of the back part of the tooth. As these teeth are perpetually growing, they require constant exercise to keep their growth within bounds, and the rat and others of this most mischievous family might assign, as an excuse for their ravages, the necessity of finding constant employment for their teeth.

PAY YOUR DEBTS.—Nothing is more discouraging to a wife than to find her husband remiss in paying the household debts. It ought to be to every one a pleasure to pay one's bills as it is to the creditor to receive his dues. And we have always noticed that, whenever there is a lagging behind, and a disinclination to pay what we owe, there is a screw loose somewhere. Indeed, we would not give much for the self-respect and reputation of any one who did not desire to pay his debts, when they are due. We, therefore, say to all, pay your debts, especially your household debts, and relieve your wife from any unpleasant thoughts on the subject.

Your health depends on the purity of your blood. People who realize this are taking Hood's Sarsaparilla with the best results.

A Quick Recovery.

It gives us great pleasure to state that the merchant who was reported being at the point of death from an attack of Pneumonia, has entirely recovered by the use of Dr. Wm. Hall's Balsam for the Lungs. Naturally he feels grateful for the benefits derived from using this remedy for the throat and lungs; and is giving publicity to this statement we are actuated by motives of public benefaction, trusting that others may be benefited in a similar manner. On sale by all Druggists.

Mott's Liver Pills.

Are purely vegetable, act effectually on the Liver, cleanse the Stomach, aid Digestion, cure Biliousness, Dyspepsia, Sick-headache, and all disorders of the Stomach. They are the best Stomach and Liver Pills made.

Durno's Catarrh Snuff cures Catarrh and all affections of the mucous membrane.

A Whale Parents Devotion.

Sperm whales usually travel in schools, and in going into a body composed of "cows and calves," the latter, although yielding but a small amount of oil, are "struck" first. By this method both are captured. The mother will not leave her offspring, neither will it attack the boat; but will remain close to the calf, apparently urging it to escape by sounding or flight. The "little one" can only remain a short time under water, consequently its dame is almost constantly a target for lances, which she will continue to receive, although not being fast to the boat, until life is extinct, when the calf will be killed. She will sacrifice her own life in the attempt to assist her young, and to any one, except a whaler, it would appear like a cold-blooded and heartless murder. Even they cannot help admiring the devotion, and will endeavor to make the struggle as brief as possible. The "calf" exhibits no such filial affection, for if the mother is harpooned first, he will immediately take French leave, leaving the "old lady" to fight her own battles. Extreme caution is used when striking a calf to avoid a mortal wound, as his death is sure to be followed by the flight of the cow, who knows it instantly.

We Know All

That water never runs up hill; that kisses taste better than they look, and the better after dark; that is better to be right than to be left; that those who take Dr. Jones' Red Clover Tonic never have dyspepsia, costiveness, bad breath, piles, pimples, ague and malaria diseases, poor appetite, low spirits, headache, or diseases of Kidneys and Bladder. Price 50 cents, of Baker and Hall.

Milk and Lime Water.

A HINT TO DYSPEPTICS.

Milk and lime water are frequently prescribed by physicians in cases of dyspepsia and weakness of the stomach, and in some cases are said to prove very beneficial. Many persons who think good bread and milk a great luxury, frequently hesitate to eat it for the reason that the milk will not digest readily; sourness of stomach will often follow. But experience proves, says the *Journal of Materia Medica*, that lime water and milk are not only food and medicine at an early period of life, but also at a later, when, as in the case of infants, the fuctions of digestion and assimilation are feeble and easily perverted. A stomach taxed by gluttony, irritated by improper food, inflamed by alcohol, enfeebled by disease, or otherwise unfitted for its duties—as is shown by the various symptoms attendant upon indigestion, dyspepsia, dysentery, and fever—will resume its work, and do it energetically, on an exclusive diet of bread and milk and lime water. A goblet of cow's milk may have four tablespoonfuls of lime water added to it with good effect. The way to make lime water is simply to procure a few lumps of unslacked lime, put the lime in a stone jar, and add water until the lime is slacked and of about the consistency of thin cream; the lime settles, leaving the pure and clean lime water on the top.

Griggs' Glycerine Salve.

The best on earth can truly be said of Griggs' Glycerine Salve, which is a sure cure for cuts, bruises, scalds, burns, wounds and all other sores. Will positively cure piles, tetter and all skin eruptions. Satisfaction guaranteed or money refunded. Only 25 cents. For sale by Baker & Hall.

GUARDIAN SALE.

BY virtue of an order of the Probate Court for Lenawee County, Michigan, made on the second day of July, A.D. 1883, authorizing the same, I, as guardian of Alvinzie R. Arner, Louisa M. Arner and Ambrose C. Arner, minors, will, on the 22d day of August, 1883, at ten o'clock in the forenoon, on the premises hereafter described offer for sale and sell at public vendue to the highest bidder the undivided one-half of all those tracts or parcels of land situate in the township of Ridgeway, County of Lenawee and State of Michigan, known and described as follows, to wit: All that portion of the Northwest quarter of section eighteen, town six south of Range five East, lying West of the center line of the ridge road (so called) leading across said quarter section—excepting therefrom the North twenty acres thereof now owned by Morgan M. Florence; also all that part of the West half of said Northwest quarter of said section eighteen, town six South of Range five East, lying East of the center line of said Ridge road, bounded by commencing at the Southeast corner of said West half of said quarter section, running thence North on the dividing line of East and West halves of said quarter section about forty-five rods to the Southeast corner of a parcel of land sold and deeded by John Arner to said Morgan M. Florence, thence West on the South line of said parcel about twenty-two rods to the center line of said Ridge road, thence Southwesterly along the center line of said road to the South line of said quarter section thence East along that line to the place of beginning, containing of the entire amount of land, forty acres, more or less; subject to the dower right of Elizabeth Arner, widow of said John Arner, deceased, therein. Further terms of sale published at and before sale.

Dated July 2, 1883.

J. DE WITT ARNER,
Guardian of said Minors.

CHANCERY SALE.

STATE OF MICHIGAN, The Circuit Court for the County of Lenawee in Chancery.

William Hayden, Complainant,
vs.
Daniel O'Connor, Defendant.

In pursuance, and by virtue of a decree rendered by said court in the above entitled cause on the 18th day of June, 1883, I the subscriber, a Circuit Court Commissioner in and for said county, will sell at public auction to the highest bidder on the 28th day of September 1883, at 10 o'clock in the forenoon, at the front door of Dean's opera house, in the city of Adrian in said county, (that being the place of holding said court) the premises described in said decree to wit: All those certain pieces or parcels of land situate in the city of Adrian in the county of Lenawee and state of Michigan, and described as follows, viz: Lots one hundred and thirty-eight, (138) one hundred and thirty-nine, (139) and two hundred and ninety-five (295) and two hundred and ninety-six (296) of the eastern addition of the city of Adrian, according to the recorded plat thereof.

Dated July 31, 1883.

FRANK R. PAYNE,
Circuit Court Commissioner.

E. R. WOOD,
Solicitor for Complainant. aug9

THE "FISHING LINE."

TAKE THE

GRAND RAPIDS & INDIANA RAILROAD.

The only route to the Trout, Grayling and Black Bass Fisheries and the famous Summer, Health and Game Resorts and Lakes of

Northern Michigan.

The waters of Grand Traverse Region and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

Brook Trout abound in the streams, and the famous American Grayling is found only in these waters.

The Trout Season begins May 1st, and ends September 1st. The Grayling Season opens June 1st and ends November 1st.

Black Bass, Pike, Pickerek and Muskalonge also abound in large numbers in the many lakes and lakelets of this territory. The sportsman can readily send trophies of his skill to his friends or "Club" at home, as ice for packing fish can be had at nearly all points.

Take Your Family with You. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing.

The Climate is peculiarly beneficial to those suffering with Hay Fever and Asthmatic affections.

New Hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw city forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit, Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns, and Fishing Tackle carried free at owner's risk. It is our aim to make Sportsmen feel "At Home" on this route. For Tourist Guide, a handsomely illustrated book of 160 pages free, Time Cards, Folders and further information address

A Lively Business.

Within the past week B. J. Collier, of Adrian, has sold 2 fine Christie & Son's pianos; 1 square grand to Mr. H. H. Searles, Blissfield; 1 upright grand to A. Sigler, city; and within the past four weeks 12 Chicago Cottage Clough & Warren, Estey & Reading organs, and 11 Light Running New Home and Singer sewing machines; making the largest sales he has ever had in the same length of time at this season of the year. Below are the names of the parties who purchased organs.

Mrs. M. C. Youngs, Morenci; G. W. Rogers, Morenci; Rev. Foor, Dover; Wm. Ash, Raisin; Wm. Cooley, Adrian; Young People's Social Club, Dis. No. 5, Clifton; John Pease, Raisin; Edith Mead, city; Rev. Seeley, 2d Congregational Baptist church, city; Good Templars, Rogue Center.

SEWING MACHINES.

James Sweet, Clinton; Mr. Randolf, Franklin; Benj. Lankin, Franklin; Prof. Hammond, Tecumseh; Mrs. McAlrey, Newberg; Miss Nafley, Anderson, Tecumseh; Samuel Nash, Palmyra; W. J. Kirkendall, city; J. J. McCollum, city; Emily Smith, Franklin; J. W. Vandegriff, city; S. G. Aten, Cambridge; Chas. Hewkins, city; Wm. H. Spaulding, Palmyra.

Mr. Collier has a large and select stock of goods and any one thinking of buying should first call, examine and get prices.

PROHIBITION IN KANSAS.

Kansas is the only state that adopted a constitutional prohibitory amendment on the liquor question and passed a law to enforce this temperance principle. Those of our people who wish to have an intelligent idea of this struggle in Kansas can secure very full information upon the subject by sending for the Weekly Capital, of Topeka, Kansas. The Capital is eight pages in size, carefully edited, the Official State Paper, and a stalwart advocate of prohibition, giving fresh information upon the temperance issue in that state. It is sent postage paid to any address one year for $1. Sample copy free to all applicants. Send money by registered letter or post office order, to J. K. Hudson, Ed. and Propr. Topeka, Kansas.

Below is the programme of the farmers' picnic to be held at Devil's lake next Week Wednesday, Aug. 20th:

1. Called to order at 10 a. m. by the president of association.
2. Music by Whipple's band.
3. Prayer.
4. Report of secretary.
5. Report of treasurer.
6. Music by band.
7. Address of welcome by president Samuel Morey.
8. Music by Weston glee club.
9. Reminiscences of Pottawatamie Indians, by F. A. Dewey.
10. Music by band.
11. Addresses by special speakers.
12. Music by Weston glee club.
13. Election of officers for 1884.

The "Treasury of Song" for the home circle, vocal and instrumental, contains the richest gems sacred and secular, carefully selected from the best works of the various authors. It embraces the grandest harmonies of the best composers, comprising their favorite songs, hymns, glees, ballads, anthems, chants and selections from opera and oratorio in delightful variety, chosen especially for their eminent fitness to promote the happiness of every home. I shall be most happy to introduce this beautiful book to the lovers of music in Tecumseh.

BOOKS.---125 TONS

of Standard Books, many of them the best editions published. Your choice sent for examination before payment, on reasonable evidence of good faith, the books to be returned at my expense if not satisfactory. Special bargains this month. New publications every week. Prices lower than ever before known, ranging from two cents for Tennyson's "Enoch Arden," unabridged, large type, to $15 for the largest and best American Cyclopædia. Not sold by dealers—prices too low. Circulars free. Mention this paper.

JNO. B. ALDEN, Publisher, 18 Vessey St., N. Y.

THIS PAPER may be found on file at GEO. P. ROWELL & CO'S NEWSPAPER ADVERTISING BUREAU (10 Spruce Street), where advertising contracts may be made in New York.

'Tis only a fact all people should know—
Everybody high, everybody low—
All who desiring their teeth to look white,
Brush with Tearberry each morning, each night.
Each speck of Tartar will yield to its Power,
Removes instantly all substances sour;
Really, you'll find it a very great treasure;
You'll prove by its use—try it at leisure.

CUT THIS OUT.

"Frank P. Warner came into our store to purchase a sample bottle of Zopesa for a friend, and stated that he Mr. Warner was afflicted with Kidney and Liver trouble for five years, and had paid $200 or $300 doctors bills, and has now been completely cured by the use of two large bottles and one sample bottle of Zopesa. He was so bad at one time that he lost 37 pounds of flesh, but after using Zopesa claims he is a sound man, and now weighs 145 pounds. He was loud in its praise and readily consented to allow us to use his name for reference.

TIRED OUT. The distressing feeling of weariness of body and mind without effort, which makes life a burden to so many people, is due to the fact that the blood is poor, and the vitality of the system low. If you are suffering from this feeling, or dyspepsia, biliousness, or any other form of sickness or disease, you should at once take AYER'S SARSAPARILLA.

Ayer's Sarsaparilla

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists. $1, six bottles for $5.

ESTATE OF WILLIAM WARING.

STATE OF MICHIGAN, County of Lenawee, ss. At a session of the Probate Court for the County of Lenawee, holden at the Probate Office, in the City of Adrian, on Friday, the 8th day of August, in the year one thousand eight hundred and eighty-three.

Present, Norman Geddes, Judge of Probate. In the matter of the estate of William Waring, deceased.

On reading and filing the petition, duly verified, of Anna Waring, praying that administration of said estate may be granted to Perrin B. Wood.

Thereupon it is ordered that Monday, the 8th day of September next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs-at-law of said deceased, and all other persons interested in said estate, are required to appear at a session of said Court then to be holden at the Probate Office, in the City of Adrian, and show cause if any there be why the prayer of said petitioner should not be granted.

And it is further ordered that said petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said county of Lenawee, for three successive weeks previous to said day of hearing.

A. H. BRIGGS, Probate Register. aug28.

ESTATE OF IDA M. HASTINGS.

STATE OF MICHIGAN, County of Lenawee, ss. At a session of the Probate Court for the County of Lenawee, holden at the Probate office, in the city of Adrian, on Wednesday, the 22d day of August, in the year one thousand eight hundred and eighty-three.

Present, Norman Geddes, Judge of Probate. In the matter of the estate of Ida M. Hastings, formerly Ida M. Odell, minor.

On reading and filing the petition, duly verified, of Edwin B. Wood, guardian of said minor, praying for license to invest the money in his hands belonging to said minor in certain real estate particularly described in said petition for reasons therein set forth.

Thereupon it is ordered. That Monday, the 15th day of September next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the next-of-kin of said minor and all other persons interested in said estate, are required to appear at a session of said court then to be holden at the Probate office, in the city of Adrian, and show cause if any there be, why the prayer of said petitioner should not be granted.

And it is further ordered, that said petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said county of Lenawee, for three successive weeks previous to said day of hearing. Rheumatine!

An Internal Remedy and a Sure Cure for all kinds of

Rheumatic Complaints!

If you are suffering from

Kidney Complaints

Give Rheumatine a fair trial. You will never regret having done so.

Testimonial from Mr. Thomas H. Day, of No. 82, 23d street, Chicago, who has been for many years employed by the Wagner Sleeping Car Co. and is now conductor of one of their cars running between New York and Chicago.

J. N. SUTHERLAND,
Manager Rheumatine Mfg Co.,
Niagara Falls.

CHICAGO, June 25, 1882.

Dear Sir—It gives me pleasure to inform you of the benefit your rheumatic cure "Rheumatine" has been to my daughter, who for the past few years has been a great sufferer from Rheumatism at times being quite helpless. She took three (3) bottles of your preparation, and I can bear testimony to its speedy action in affording her relief from pain and soreness. Thanks to Rheumatine her health is now quite restored.

Yours very truly,
THOS. H. DAY.

SHE WAS SCREAMING WITH PAIN.

CRAWFORD CO., PA., CITY OF TITUSVILLE.

Personally appeared before me, Mary Murry, who, being duly sworn, according to law, deposes and says: That she resides at the corner of Franklin and Water streets in said city. That she was suffering with excruciating pain from the inflamatory Rheumatism for the space of seven days, that she was screaming from the pain and got no rest during all this time. That she received relief within twenty minutes after taking the first dose of Wilson's Lightning Remedy for Rheumatism, and went to sleep. And that she has had a permanent cure within ten days, and that she was up and about within five days.

MARY MURRY.

Sworn and subscribed to before me April 15th, 1883.

TECUMSEH, - MICHIGAN.

DR. B. MINCER,

Scientific Optician!

I have devoted 25 years wholly to a study of the eye, and how to aid vision properly, and I make a specialty of fitting glasses to the eyes that have been injured by cheap, inferior glasses. I manufacture every kind of glasses, and guarantee satisfaction. Read what prominent physicians of Adrian say:

Having for some time past used glasses to improve my sight, without satisfactorily gaining my object, I called on Mr. Mincer, optician, of Detroit, who properly adapted glasses to my eyes, with which I am so well pleased, that I either fully speak in his favor. Dissatisfied or examining and its application in selecting glasses to fit the eye can only be acquired by a knowledge of the useful organ to which, must be added extensive experience. He has also adapted glasses to Mrs. Fisher's eyes with which she is well pleased. I recommend him to all who need glasses. Adapted to their wants; poor glasses are an abomination.

V. A. BAKER, M.D.

ADRIAN, Nov. 18, 1882.

I have used spectacles bought of Mr. B. Mincer for the past three months, and find them superior to any I have ever used, and can cheerfully recommend him to any one in need of glasses, and the benefit of his experience in the science of optics to adjust proper lenses.

DANIEL TODD, M.D.

I have investigated the work of Mr. B. Mincer, optician. I have reason to believe that he understands his profession, and adjusts excellent glasses on scientific principles. C. RYND, M.D.

PARKER'S GINGER TONIC.

ONCE TESTED ALWAYS PREFERRED!

This great remedy has won its way to the highest place in the esteem of the most intelligent people. There are daily recruits to its hosts of friends. Its performance is invariably

BETTER THAN ITS PROMISE.

It gives tone and power. For complaints of the kidneys, bowels, stomach, liver and lungs, for all the subtle troubles of women and for those bodily disorders induced by anxiety, care and mental strain, its effects will surprise and charm you. It is not an essence of ginger. Delicious to the palate, an antidote to the liquor habit, and exceedingly helpful to the aged and feeble. 50c. and $1 sizes. HISCOX & CO., New York.

TIRED ALL OVER.

What Rested and Refreshed a Weary Man in Memphis.

"No, it never amounted to an acute pain, but continued to be a dull weary ache in the small of my back," writes Mr. James Thomas, of No. 59, Madison st., Memphis, Tenn. "This was an old experience, and life became dull music. I was tired all over, with pain in the lower limbs, and a habit of lying awake of nights. Recently I tried one of Benson's Capcine Porous Plasters and was decidedly relieved within twenty-four hours. It may have been Providence that did the work, but I give the credit to Benson's porous plaster." Mr. Thomas' reverential idea does him credit, but Providence works by agents, and among them Benson's plaster ranks first as an external remedy. It acts quickly in relief and healing, and renders life better worth living. Price 25c. Look in the middle of the plaster for the word Capcine. Ask your physicians about it. Seabury & Johnson, Chemists, New York.

For Sale Cheap,

And on easy terms, A FARM OF 120 ACRES, located in the township of Norvell, Jackson co., three miles from the village of Brooklyn and ½ mile from district school. The farm is well fenced, has good buildings and is under a high state of cultivation. A good brick house with eight rooms besides closets, and a brick bottom cellar. It has 75 acres of plow land, 10 acres of well assorted timber, 20 acres of meadow, and 15 acres of pasture. There are two wells on the place and a brook of living water that never freezes over. A good apple orchard, a young peach orchard, and lots of small fruit. The location is an excellent one and the neighborhood is first-class. For further particulars call at the

Special attention given to furnishing pic-nic or wedding parties.
Cheapness and cleanliness shall be our Motto.
Lee's Block, Tecumseh, Mich.

THE EARLIER AND LATER TIMES—1837 AND 1883.

WASHINGTON, Aug. 1883.

EDITOR HERALD:

Ever since I received the first number of the new-dressed and improved HERALD, it has been my design to write you a short epistle of the earlier times of Tecumseh and Lenawee, as contrasted with their later condition, and now seems an appropriate occasion, after my recent visit west, to carry out that purpose.

Among those whom I now think of and best remember as citizens of Tecumseh at the time of my first settlement there were the Blanchards, Browns, Bloods, Finches, Fargos, Germains, Hewitts, Holmes, Kneelands, Dr. Patterson, Patchens, Spaffords, Spoffords, Stacys, Snells, Wrights and others. But how few of them are there now! At my visit there in the last year or two I felt almost alone and lost, not being able to see more than two or three of those who were there on my settling there. According to my best recollections there are Ezra Blood, Judge Stacy, Mr. Kneeland and one of the Snells; the rest have all, or nearly all, passed beyond the dark river. Of my own dear ones, who rest in Tecumseh cemetery, are father and mother, brother and sister, wife and son,—so the place is interesting and hallowed to me, both by my earliest manhood's career, and the sepulture of my kin.

In the fall of 1837, with my father's family, I moved to and settled in Tecumseh, a then fledgling of a village, and I a green young man. And what a handsome and flourishing town it has grown to be since then; although the county seat was wrested from it by Adrian, with the aid of interested outside parties and capital. And how Lenawee county has grown to be one of the finest farming counties in the state, occupied by thrifty, intelligent farmers. We recollect the efforts and struggles made to get up and build the Tecumseh & Ypsilanti R. R. We also remember a sleigh ride in wagons and carts we made one winter to Palmyra, on the occasion of the opening of a hotel in that place by Pomeroy; when his table was bountifully supplied with at least four kinds of wild game, three kinds of wild birds and several kinds of fish, all taken in the woods and waters of Lenawee county. Among others, of the merry party, in that expedition, were Gen. Brown, Judge Blanchard, some of the Finches, Dr. Patterson, Judge Stacy, some of the Spaffords and Spoffords, and many others whose names at this long interval I do not recall. Then we remember the "wild cat" bank career, when bank bills were as plenty as Falstaff's black berries; but while we never have too many of the latter, we had a full surfeit of the former as you all know.

Then we remember a patriotic 4th of July celebration, which was enjoyed in the new hotel, "Fargo House" I think, on the backbone ridge, between Brownville and Tecumseh, on which occasion, according to my recollection Dr Patterson delivered the oration, and this writer prepared the toasts; there was a grand gathering for that new country, and was a finer celebration than is often seen in older and larger towns, with plenty of patriotic zeal and less spread eagle. About that time the Globe mills were erected and went into operation, the pride and benefit of a large circle of farming country. River Raisin and Evans creek furnished good water-power, and was then only partly appropriated, but I presume the whole of their powers are now profitably utilized—made to do work meet for the brilliant progress of the county.

And yet, amid all, do I turn to Tecumseh and Lenawee with satisfaction and sympathy, in its splendid mechanical improvements since my early residence there; and with admiration of their rich and well managed surroundings of agricultural operations, which, after all, is the real foundation and sure guaranty of wealth, prosperity and stability.—May good farming always prevail and prosper in old Lenawee and its surroundings.

So much, Mr. Editor, of the retrospective have I hastily scratched off; and when I see this march of improvements, since my advent there in 1837, I am astonished and delighted, and feel that I would like to be enrolled among the members of the Pioneer Society of that county, the proceedings of whose pleasant meetings I often read in the columns of the HERALD. May they all live to enjoy many reunions, and their posterity after them.

D. S. C.

Gov. Begole has pardoned 24 prisoners already this year.

MICHIGAN STATE ITEMS.

Heavy forest fires in Iosco county.

A big wooden ware factory is talked of at Bay City.

Wheat in Cass county is threshing 20 to 40 bushels per acre.

A child was terribly lacerated by a coach dog at Grand Rapids a few days ago.

The number of windmills manufactured at Buchanan this year will reach 800.

It is proposed to divide Ontonagon county and name the new county thus to be created Agogebic.

The Grand Rapids board of education decides not to insure the city school houses.

Hall, the Ionia county man charged with violating the pension laws, has been discharged.

It is stated that Speaker Howard, of Flint, will go to Dakota to engage in the law business.

Ed. Green, of Fenton, convicted of selling liquor without license and sentenced to pay a fine and go to jail.

The new G. R. & I. bridge at Gd. Rapids is to be a timber truss structure.

The veteran soldiers of Buchanan own a lot in Oak Ridge cemetery upon which they will erect a monument.

A farmer in Fawn River, St. Joseph county, killed 12 rattlesnakes a few days ago.

The Grand Rapids and Indiana railroad company has expended over $20,000 in improvements at Kalamazoo this year.

The budget of the Grand Rapids board of education calls for $108,240 this year, of which $52,000 is for teachers' salaries.

John D. Smith, of East Saginaw, and Wm. Moore, of Detroit, have been held for trial at Pontiac on a charge of robbing Patrick Ryan.

A company has been formed at Gd. Rapids for the manufacture of "Diamond wall finish" from plaster. It has a capital stock of $40,000.

There is trouble in a Leoni church society. Some of the members went to a circus, and the preacher has vigorously raked them down for it.

Kalamazoo pumps a million and a quarter gallons of water daily from its great water works well, and the supply holds out nobly.

Thirty priests of the catholic diocese of Grand Rapids are holding a retreat for prayer, meditation and instruction at Grand Rapids.

The spire of the episcopal church at Lexington was struck by lightning last week and demolished, and the church was otherwise damaged.

Al Godsmark, formerly in business at Battle Creek, had his left hand blown off, by the premature discharge of a blast, in a mine at Lulu, Col.

May Forbes, of Cassopolis, who recently married a colored man and went to Canada to live with him committed suicide last week at Chatham, Canada.

Mrs. Eugene Hamilton, of Grand Rapids, who was shot by her husband who mistook her for a burglar, died last week from the effects of the wound.

A Flint woman being accosted by a "masher" a few evenings ago, concluded to do some mashing herself, and did it with a club. The dude was crushed.

One night last week fire broke out in the lumber camp of Foster, Blackman & Co., 10 miles east of Big Rapids, doing damage to the extent of $30,000. There was an insurance of $18,000 on the property.

A barn, the property of Wm. Van Deventer, of Sturgis, was burned last week, and a span of horses worth $400 were consumed, and a mule was badly burned. Total loss $600. The citizens have raised $200 for the loser.

Two years ago it was thought valuable traces of oil were made at Roscommon, and last week in widening Beaver creek unmistakable evidences of an oil deposit were discovered, it is claimed.

H. W. Sage, who made the people of West Bay City a present of a handsome library building, has supplemented the gift by giving 8,000 books, worth $12,000, and proposes a further gift of real estate which will bring the whole donation up to over $40,000.

G. W. Freeman, of Palmyra, is in hard luck. Three weeks ago a horse kicked him in the breast, seriously injuring him. A few days ago he had another interview with the same horse and was again kicked in the same place and is now nursing some broken ribs. He had better try a wooden horse for a time.

COUNCIL PROCEEDINGS.

VILLAGE OF TECUMSEH,
Council Room, Aug. 20, 1883.

Regular session.

At this regular session council convened at the usual hour.

Present, the entire council except Mr. Burridge.

Minutes of last regular session read and approved.

REPORTS OF COMMITTEES.

On Finance:

Report in writing, and recommend the payment of the following claims out of the contingent fund.

Robt. McGill,	for 12	days	labor	on	streets.	$18 60
Wm. Brown,	" 11	"	"	"	"	16 50
A. J. Crowley,	3	"	"	"	"	4 50
John Cannon.	6	"	"	"	"	9 00

On motion the report was accepted and adopted, and orders directed to be drawn for the respective bills.

On Cemetery:

Report in writing and recommend that the charges of the sexton from and after this date for digging graves be for an adult $3, and for children under 10 years of age $2.

The committee would also recommend that notice be given that hereafter the ordinance relative to removing trees in the cemetery be strictly enforced against all parties.

On motion the report is accepted and adopted.

On Streets:

Report in writing on the petition of E. C. Baird in behalf of the Michigan & Ohio Railway company, and recommend that the prayer of the petitioner be not granted. On motion the report is accepted and adopted, and on further motion the prayer of the petitioner is refused.

NEW BUSINESS.

The President called the attention of the street committee to the manner in which the ditch on the north side of Chicago street, west of Democratic street was dug to the injury of the adjoining property, and desire that the committee should examine the same and report at the next meeting of Council.

It appearing that the night watch association neglected to make to Council the report required, the Recorder is instructed to call on Mr. Lilley, he being supposed to be the president of said association, and represent to him the necessity of making such report as soon as convenient.

On motion an appropriation of $33.33 was made to pay the night watchman's salary until such time as the request of the Council is complied with by the association.

Council then adjourned.

P. S. MCKINNON,
Recorder.

Col. Sylvester B. Smith, died at Adrian on Tuesday last. He had long been a prominent citizen of Adrian, was once sheriff of Lenawee county, had also been county treasurer, and was widely known in masonic circles. He was engaged in the banking business as a member of the firm of Smith & Toby, and was about 50 years of age at the time of his death. He was a soldier of the late war, having been commissioned captain of the 11th Michigan infantry, Aug. 24, 1861; became a major just a year later; was wounded at Stone river and promoted to a lieutenant colonelcy five days afterwards, and resigned on account of his wounds about three months later. The wound he received was an ugly one and gave him much trouble, a ball having struck his jaw and nearly cut his tongue out.

REAL ESTATE TRANSFERS.

Following are the real estate transfers in Lenawee county, for the week ending Aug. 25, 1883:

RAISIN.

Charles D. Lossing to Abe Lossing. Land on sec. 36. $2,000.

RIDGEWAY.

John and Sara A. Britton to Edgar R. Wells. Land on sec. 3. $120.

TECUMSEH.

Caroline Bills et al. to John Sutfin. Land in village. $300.

Charles A. Wright to Harriet E. Spofford. Land in village. $2,000.

Harriet E. Spofford to Charles A. Wright. Land in village. $400.

Nehemiah M. Sutton to Toledo and Milwaukee railroad. Land on sec. 33. $1,650.

PROHIBITION IN KANSAS.

Kansas, it will be remembered, adopted a constitutional prohibitory amendment on the liquor question and passed a law to enforce this temperance principle. Those of our people who wish to have an intelligent idea of this struggle in Kansas, can secure very full information upon the subject, by sending for the Weekly Capital, of Topeka, Kansas. The Capital is eight pages in size, carefully edited, the Official State Paper, and a stalwart advocate of prohibition, giving much information upon the temperance issue in that state. It is sent postage paid, to any address, one year, for $1. Sample copy free to all applicants. Send money by registered letter or post-office order, to J. K. Hudson, Ed. and Prop'r, Topeka, Kansas.

Wm. Leishman, of Flint, gets 90 days selusion for beating his wife.

The Kalamazoo farmers will indulge in a harvest picnic trip to Petoskey.

John Bennett, of Cass county, held for trial for burning wheat stacks.

The Peninsular Sangerfest for 1884 will be held at East Saginaw.

Thomas Carey is building a new and commodious hotel at Republic.

A strong lodge of good templars has been organized at Delta Center.

"WHO'S AFRAID?"

Courage, brothers! there is nothing
In the world brave men should fear;
If the heart be firm and steady,
If the arm be strong and ready,
Half our danger disappears.
Only cowards faint and falter,
Only cravens shrink and palter,
Only dastards are distinguished.
Men each trial, each peril
Face undaunted and defy it;
Courage, brothers!—who's afraid?

Courage, brothers! there is nothing
In thy world to be men regretted;
Still be true to men and women,
To the God of truth a true man,
True to self when pitfalls yawn.
He that's false to worst foe quails;
Will find evils find scrutinies;
Lying's still a losing game;
In the right and fear no evil;
Speak the truth and shame the devil,
Courage, brothers!—who's afraid?

Courage, brothers! there is nothing
Brave and true men should affright us;
Death is but a fiery bush and horse
For the lowly and the lowly;
God and angels watch the flight;
In the roar, and rush, and rattle,
In the sword and hail of battle,
Fight as men for right arrayed,
Whether vanquished or victorious;
Goodness, wives and deaths are glorious;
Courage, brothers!—who's afraid?

A PLEASANT SURPRISE.

HOW IT CAUSED A CODICIL.

Happening to say something before my friend Smith one day about pleasant surprises, he replied with a groan and shake of the head, "Ah, don't tell me about pleasant surprises. They are a snare and a delusion. Surprises may be the essence of wit, as some authors tell us, but they certainly are not the essence of pleasure."

"You speak feelingly on the subject," said I.

"You would not wonder at that," said he, "if you knew what cause I had to do so. I could a tale unfold on this point if you would care to hear it."

On my assuring him that I would, he proceeded to give me the following recital:

"When I was a youth my mother had a maiden sister, with whom I was an acknowledged favorite, and as Aunt Abigail possessed a handsome fortune in fee simple, there were other grounds besides those of sentiment for rendering her favor a desirable thing. She lived at a handsome country place, which she took great pride and pleasure in keeping in the best of order. Indeed, it would have vexed and mortified her for her own brother or sister to have found the least thing out of place or repair on her premises, so ambitious was she of sustaining her reputation of having the best-ordered establishment in the community. Nor did she take less pains with her dress and personal appearance, which like her home were handsome and imposing. Being somewhat ceremonious herself, she did not encourage informality in others, so they seldom approached or visited her, except by express invitation, and no one had an opportunity to see either herself or her house behind the scenes. Hence she kept up all the greater prestige amongst her friends and acquintances, whose almost solitary impression of her was of a queenly dignified woman, clad in elegant black silk or satin, with soft thread lace at her throat and wrists, a faint rose-tinge like the pale reflection of the last rose of summer still lingering on her cheek, soft chestnut locks bordering her brow, and a row of sound, white teeth gleaming in her mouth when she would smile graciously.

'Through in a stately kind.'

When I was in my eighteenth year, Aunt Abigail attended the intermediate celebration at my school on February 14th, and seemed much pleased with our professor, whose ornate and excessively-polished manners (after the Grandisonian school) were exactly to her taste. He entertained her with many labored gallantries and much 'genteel conversation,' judiciously seasoned with delicate flattery and profound deference for her own views. In looking back to all this, I now see what I was too unsophisticated to see at the time, viz., that the professor executed all these freaks with some views to matrimony: at least he had a vague idea that if the worst came to the worst, Cedarwood (my aunt's home) would not be an undesirable retreat for an elderly widower. My aunt had no idea of contracting any matrimonial alliance, but she had not reached the age (what woman ever does?) when the homage and admiration of the other sex were distasteful to her, so she permitted the professor to offer her his antiquated gallantries and was not ill-pleased by them. In fact, he so far ingratiated himself with her that she invited him to come with me and spend Easter at her house, together with a large party of friends she expected then from town.

Owing to severe sickness on the part of the assistant teacher, our Easter vacation was granted three or four days earlier than usual, and it flashed over my impulsive mind, 'It will be a good idea to give Aunt Abigail a pleasant surprise. I will run right down to her house to-morrow.'

On the spur of the moment I hurried off to the professor and insisted on his accompanying me. At first he demurred on the score of its being three days earlier than the time appointed by Aunt Abigail, but on my assuring him that this would make no difference, he seemed to think I ought to know my aunt and her ways better than one did and finally agreed to my proposition; so we started off the next morning. It was a balmy April day when we set out, but, with the fickleness characteristic of that month, the weather had changed by the time we reached our destination, and we got off at the station in a cold, drizzly rain, which both literally and figuratively threw a damper over us. Aunt Abigail awaiting for us on this occasion. I had to reconnoitre for a vehicle to carry us to Cedarwood, but met with only indifferent success, finding nothing but an open farm wagon, in which we jolted along slowly and roughly for five miles, the rain steadily increasing all the time, so that by the time we reached Cedarwood we were fairly enduring cataracts, 'not all in our eye,' either.

After standing a long time at the door, it was at length opened, slowly, cautiously and reluctantly by Aunt Abigail's housekeeper. 'Is that you Mr. Alfred?' she asked, with disheartening tone and countenance. 'We didn't know you were coming to-day.'

'I didn't know it myself till last night,' replied I. 'But where is my aunt?'

'Your aunt returned from spending the winter in town only yesterday, and is very much engaged. She is in the dining-room, but you cannot see her yet.'

But I was still resolved, in my willfulness and headstrong folly, to give Aunt Abigail a pleasant surprise, so I pushed past the housekeeper, and carrying the professor with me through dismantled and disheveled rooms and halls, hastened into the dining room. What a spectacle met my eyes! Amid rubbish and confusion, boxes of china and silver, rolls of carpet and household wares of various kinds, stood a figure at which I stared open-eyed, unmouthed, astonished and aghast. Ye gods! was this my queenly, handsome Aunt Abigail, with the pale rose-tinted cheeks, the sunny chestnut locks, the smiling white teeth, the rustling robes of silk and satin with the soft ruffles, this gray shadow, this old woman who might have personated one of the three fates or the three furies, this faded old woman, clad in a dingy wrapper, with gray hair, collapsed, ashy cheeks and bare gums? But my distress was no greater than hers, for there she stood, a prophetess unveiled, a queen dethroned, and all this mischief done by the thoughtless, headstrong folly of a boy who, to add to his offense, must needs bring a witness to the ruthless unveiling and dethroning. It was several minutes before either of us spoke. Indeed, it was the professor who first broke the silence with a confused stream of apologies. The housekeeper, coming in now, my aunt motioned her to show us to the parlor, where we spent several tedious and wretched hours, whilst our rooms were being prepared, after long search in my absence. We did not see her again until dinner, when she had been metamorphosed by the arts of the toilet, but both sides had a distinct and embarrassing consciousness of the occurrence of the morning, and felt that it was impossible for things ever to return to their former footing. From that day forward a change came over the spirit of her dream. She could never get over the chagrin, mortification, anger and inconvenience entailed on her by my 'pleasant surprise.' In my observations of human nature I have found, indeed, that one can forgive anything sooner than being placed in a mortifying and ridiculous position. This far outweighs a grave wrong or injustice.

Aunt Abigail treated me, as well as my friend, with formal politeness, but our visit was not a pleasant one, and we were heartily glad when Easter was over. After that I went to Cedarwood but seldom, and then was careful to observe the exact time fixed by my aunt. When she died a few years later, and her will was read, the body of it filled me with satisfaction, for it bequeathed Cedarwood and other valuable property in the shape of stock, etc., to her dear nephew, Alfred Smith. But oh, the codicil! How it did nonplus me and make me curse my own folly! It was dated a week later than the ill-fated Easter of my 'pleasant surprise,' and read thus: 'I hereby revoke the bequest of my estate Cedarwood, etc., etc., to my nephew, Alfred Smith, and transfer the said Cedarwood and other properties to the children of my brother Joseph, in Missouri.'

'Do you wonder now,' said Smith, in conclusion, 'that I shudder at the bare mention of a 'pleasant surprise?'

'Indeed I do not,' I replied, 'and though they are not often attended with such disastrous results as you have just described, yet they are almost always objectionable, and lead to some inconvenience and contretemps. If you decide to give a friend a pleasant surprise in the shape of an unexpected visit, ten to one you arrive at his house on the very day his wife has selected to take up or put down carpets, or perhaps you will find the house crammed full of other guests, with some of whom, perhaps, you are not on speaking terms. In some cases you will find illness in the family; in others you will find only the house at home. Altogether, I think a moderate degree of ceremony essential to the smoothness and comfort of social life, and I am much of the opinion of a lady in Richmond, who, on having a hint given her by a young man that he was getting up a surprise party to invade her peaceful domains, replied, 'When I want you all, I will invite you.'

'I have known of artless and confiding women on a summer trip,' resumed Smith, 'whose enjoyment was quite dashed by the thoughts of the lonely and ascetic life led by their husbands whom they imagined to be pursuing a round of ceaseless toil in order to afford them recreation. Sometimes the impulse to give their husbands a pleasant surprise by returning home a few days earlier than appointed, has led to the revelation that these anchorites were very much like the rigid hermit described in Scott's Ivanhoe, who kept a store of rich venison and generous wine for refection in his austere hermitage. By coming home a few days sooner than expected, a woman may sometimes walk in upon a dinner or wine party given by her lonely husband to his bachelor friends, and find them all as merry as that jolly old soul, the famous King Cole. Pleasant surprises are generally fatal to innocent and agreeable delusions. Indeed, they are dangerous things in all respects, as I am ruefully aware. In regard to visiting one's friends, I think we might, with a slight alteration, quote the French proverb and conclude that propriety and forethought should teach us to avoid them.'—Mary W. Early, in *Detroit Free Press.*

How to Have a Bad School.

1. Elect the most ignorant, bigoted, close-fisted fogies in the district for the school board.

2. Employ the cheapest teacher you can get, regardless of qualifications, reputation or experience.

3. Find all the fault you can with the teacher, and tell everybody; especially let the pupils hear it.

4. When you hear a bad report about the teacher of the school, circulate it as fast as you can.

5. Never visit the school nor encourage the teacher.

6. If you should happen to visit the school, take close notice of what seems to go wrong, and tell everybody about it, except the teacher.

7. Never advise your children to be obedient to the teacher, and when one is punished, rush to the school-room before your passion is cooled, and give the teacher a lecture in the matter in the presence of the school.

8. Be indifferent about sending your children to school regularly.

9. Do not be concerned whether they have the necessary books.

10. If any of the pupils make slow progress, blame the teacher for it.

11. Occupy your old, tumbled down school-house as long as you can, and do not go to any expense to repair it.

12. Do not go to any expense to get apparatus, improved furniture, etc.

13. If the teacher or pupils complain of an uncomfortable or inconvenient school-room, do not consider it worthy of notice.

14. Get the cheapest fuel you can.

In general, conduct your school on the cheapest possible plan, and let your chief concern be to find fault and devise ways of retrenchment.

If these rules are faithfully carried out you are very likely to have a bad school.

In order to destroy the contagious germs which remain in the bodies of such animals as have succumbed to a pestilential disease, a new method of cremation has been invented by which the infected animals are quickly and totally destroyed.

Her New Shoes.

She was a woman. If you ever run a shoe store you will know what followed as she entered the store. She looked all around, picked up a pair of shoes off the counter, rubbed her thumb along the soles, and timidly asked of the smiling clerk:

"Do you keep ladies' shoes here?"

"We do," he promptly answered. "What style shall I show you?"

For more than three weeks she had had her mind made up for a pair which laced on the inside, and all her friends had encouraged her idea, but it wouldn't have been like a woman to ask the clerk for that particular style.

"Let's see? Let's see?" she mused. "I suppose you have the French heels?"

"Oh, yes," he answered, and he soon had twenty pairs before her. She closely inspected each pair, from 2's up to 6's, asked the grade of the material in each, and twice during the fifteen minutes she seemed on the point of trying on a pair.

"Are you sure these are the French heels?" she finally asked.

"Oh, yes; you can be sure of that."

"Well, I guess I won't buy any to-day. I did think some of looking at some button shoes."

"Certainly, here is a large variety. Do you wish kid?"

"I presume," she answered, as she wet her finger and rubbed the heel of the shoe, "that kid will wear longer than morocco?"

"Of course. These are patent buttons, you see."

"Yes, I see. If I ever buy a pair of button shoes, I shall insist on the patent button."

"Didn't you want a pair of these?"

"Let's see," she mused again, fastening her eyes on the top shelf.

She was buried in the deepest thought for a long minute, and the clerk hardly dared draw his breath. Then her eyes gradually dropped from shelf to shelf until they rested on his garnet necktie, and she said:

"Not to-day. Have you shoes which lace?"

"Oh, yes."

"Those which lace in front?"

"Yes'm. Here is something fine. I can sell you a pair of these for 20 shillings."

"Can you? Why shoes must have either gone up or down!" Shoes which lace in front are stylish, aren't they?"

"Oh, yes."

"And they wear as good as any?"

"Just as good. I can recommend the material in these shoes, as they were made for us here. Will you try on a pair?"

She seemed about to do so. She looked over at the lounge, seized a pair of threes, and was then halted by a new idea. She put the shoes down, let her eyes drop to the floor, and, after a mental calculation of seventy seconds, she suddenly inquired:

"Did you say you had shoes laced on the side?"

"Yes, we have. Would you like to see them?"

She hesitated, looked up and down the shelves as if perplexed, and finally said she would. He emptied two boxes, praised the style and material, and advised her by all means to get those shoes if she wanted to be in style and have a good fit.

"I can wear threes," she observed, as she partly turned away; but owing——"

"Yes'm. You do not want a glove-fitting shoe. You are very sensible on that point. Fives are much too large, of course, but they are better for the feet in winter. These are fives but very small ones. In some stores they would be marked threes."

"I guess I'll try them on," she faintly remarked, as she sat down.

"Yes'm. I'm sure——"

"No, he wasn't. She had such a way again. What if there was a hole in the heel of her stocking! Suppose her big toe had worked through, as big as it sometimes will!

"I can try them on alone," she finally said, and, while the clerk was busy on the other side of the counter, she ripped the buttons off her right shoe, pulled it off, and got her foot into the new one. It was a pinch. Her toes felt cramped, and her heel complained.

"Do they fit?" asked the clerk, as he leaned over the counter.

She didn't say.

"Perhaps you had better try sixes, with a broad sole and a low instep," he suggested.

"What!" she exclaimed, as her face reddened: "why I can hardly find my foot in these! I'll take them on account of my chilblains, but only to wear around the house.

"Very well; I'll wrap them up."

She paid for the shoes, took them in her hand and went out with a sweet smile on her face, but she was the woman who was heard saying to herself on the street car:

"Gone and made a dunce of myself again by getting tight shoes! I wish I'd thrown the money into the fire!"—*M. Quad.*

Articulation.

A recent writer says: "As regards articulation, the Americans, we think, have a natural advantage over the English, in a superior delicacy of structure of the vocal organs. Very many Englishmen, apparently, have to contend with a thick unmanageable conformation of the organs of speech, which occasions the splutterings and mumblings in their public speaking. That the Americans have great natural facility for clear and fine articulation is shown by the readiness with which they acquire the pronunciation of foreign tongues, and by the fact that, with proper early training and care, they do attain to remarkable grace of utterance. It still remains true that much more importance is attached to articulation in England than here; that more pains is taken in training the young to habits of clear utterance, and that, on the whole, the English is more conscientiously articulated by educated persons in England than by the same class in this country. We mean by this to say that the consonants are more distinctly and duly uttered: that, for instance, 'shrink' and 'shrine' would not, as with us, be softened into srink and srine, 'suggest' into sudjest, 'arms' into alms. On the other hand, there is a tendency in this country to more distinct syllabification and more marked secondary accent in long words. The English say 'int'rsting,' 'circms'nce,' 'diction'ry,' tripping lightly over all the syllables after the accent, articulating plainly all the consonants, but almost eliminating the vowels, while we put a secondary accent on the penultimate syllable of long words, and give to the others as much stress as to unaccented syllables in short words. It is this peculiarity which brings upon Americans the charge of drawling, and which occasions the remark of foreigners that they can understand an American more easily than an Englishman."

In a little family discussion the other day, the madam remarked somewhat tartly, "When I marry again——" "I suppose you will marry a fool," interrupted the husband. "Beg your pardon," she said, "I shall do nothing of the kind. I prefer a change." The lord and master wilted.

The Moth Plague.

CHARACTERISTICS OF THE INSECT, AND HOW IT MAY BE SUPPRESSED.

According to the most eminent housewives, the moth is a winged insect that lays eggs in every variety of wearing apparel—with a preference for the more costly articles—from which are hatched caterpillars, which instantly begin to devour all the clothing within their reach.

The moth enters houses at all times of the day and night, and the housewife must be continually on the alert to repel its attacks. In this respect it may be said that the price of clothing is eternal vigilance. One moth is as unable to make a complete summer as is a single swallow, but it can produce a winter of discontent in the mind of the careful woman with a success that no other insect can rival.

There are various spells and talismans which are believed by superstitious women to be efficacious against moths. Prominent among these are camphor. There are women who stoutly affirm that if a garment is sprinkled with gum camphor, no moth will approach it. This belief is of vast antiquity, but it is wholly devoid of any basis of fact. There are moths which appear to have a positive fondness for camphor, and regard it as a sort of condiment designed to add piquancy to flannel and fur. The same may be said of tobacco, which in many cases serves to actually draw moths. Whatever else the moth may be, it is intelligent, and cannot be frightened by superstitious rites nor repelled by the pretended power of a fetich.

The only way in which to oppose the moth plague is to kill every moth that enters the house. Our leading housewives know and act upon this principle. At this very moment there are hundreds of women in our fair land who are stealing across the floor with hands upraised in the devotional attitude and a look of profound earnestness and reverence on their faces. They are not engaged, as the unthinking observer might imagine, in a religious exercise, but are striving to capture an alleged moth which they have seen floating in the air. The sharp concussion of their hands sometimes crushes the doomed insect, but in too many instances the moth escapes, and the tender palms suffer in vain. Husbands and sons manifest a heartless indifference to moths. When the wife exclaims, "Stop, there's a moth. Oh, kill it! kill it!" the unfeeling husband usually remarks, "I don't see any moth, and refuses to stir from his chair. He sometimes is guilty of even more atrocious conduct, as when he replies, "O, that isn't a moth; why don't you women learn a little natural history." There is undoubtedly a lamentable lack of certainty in the female mind as to the exact identity of the flannel-devouring moth. There is but one species of insect to which this title belongs; but few women agree as to what particular insect it is. The average housewife holds that all small insects having wings are moths, and deserve instant death. It may be pointed out to her that if the small white-winged creature which she called the moth last night is the true moth, the large brown insect she calls a moth this morning cannot be the guilty devourer of clothing. This argument, however, makes no impression upon women. They class all flying insects under the general head of moths, and the larger any particular insect may be, the more firmly are they convinced that "it will fill the whole house with moths." This peculiar method of reasoning has led to many painful accidents. There are women who persist in regarding the wasp and the hornet as especially reprehensible varieties of moth, and have suffered severely by incautiously catching them with bare hands. The definition of the moth undoubtedly needs to be made clearer and more distinctive, in order that women may be spared the labor of unnecessary slaughter, and preserved from pushing a dangerous acquaintance with moths armed with stings.

A Sad Death.

A minister was summoned to the bedside of a dying man. The man, who lay gradually obeying the grave summons, gasped and groaned. The minister moved to the bedside and held the hand of the victim. The wife, wild with grief, sank to the floor.

"My friend," said the minister, "you are a man whose prosperous condition in this life has allowed you much time for devotional exercises. Your dear little children, your wife informs me, are visiting relatives. They will not see their father die. How many children have you?"

"Thirteen," gasped the dying man.

"I had no idea that you had so many. Poor little ones. Your poor wife looks as though she will die. Judging from your number of children I should think that you had been married more than once. How many wives has the good Lord granted you?"

"Fifteen," groaned the man.

"Surely not so many said the minister. "Think of this matter seriously. How many times have you been married?"

"Fourteen," and the victim fell back exhausted.

"Are you willing to die?" asked the minister after a pause.

"Move three up, six down and eight to the left!"

"Are you prepared to share the glorious territory of Abraham's bosom?"

"Move ten up!"

"Have you made your peace with your Saviour?"

"Simplest thing in the world—move nine down!"

"Take your mind from the confused arithmetic of the world and place it on heaven's holy algebra. Are you willing to stand before the great white throne?"

"Three."

"Can you go fearlessly?"

"Eleven."

"After life's desperate struggle, what have you accomplished?"

"Fourteen, fifteen, fourteen," and the man was dead.—*Little Rock Gazette.*

No human being can be isolated and self-sustained. The strongest and bravest and most helpful have yet acknowledged or unacknowledged to themselves moments of hungry soul-yearning for companionship and sympathy. For the want of this, what wrecks of humanity lie scattered about us—youth wasted for the mocking semblance of friendship, adrift at the mercy of chance, without the grasp of a true, firm hand—without a kindly loving heart to counsel.

NIHILISM.—Here is a definition of nihilism, of which so much is said in the papers: A Nihilist is one who believes in Nihilism, which, according to Webster, is the doctrine that nothing can be known; it is skepticism carried to the denial of all knowledge and all reality. It is probably applied to the Russian Communistic agitators because they advocate the principle of doing away with all government, and the inference is that if this were carried out Russia as a nation would cease to exist.

Standing the Test.

The following is a good one in the way of a religious test—good because it is true. A minister not long since held protracted meetings not far from Port Austin and Bad Axe, Mich. One day one of his converts, while driving his oxen with a heavy load behind them over the bad roads between the above named places, accidentally looked back and discovered his pastor covertly following behind. The convert could not imagine the cause of such strange conduct, but thought he would keep an eye on his movements. For two or three miles the man of holy orders hung on the rear of the slowly moving oxen. Now crouching behind stumps, now moving like a phantom through the skirting forest, occasionally spurting like a quarter-horse across some open space to gain the cover of some friendly fence to keep the field side like some stray dog, again dodging through thickets, diving through cat-tails, crawling behind logs, bounding over pools of water—the pastoral legs seemed equal to any emergency. All the while the pursuer kept ever near, ever eager, ever listening, finally straightening up and calling the brother by name: "Brother——, I have followed you for two miles to find out whether you would swear at them oxen. I am satisfied the Lord has filled you with the genuine article. Bless the Lord! Another soul saved! Amen! Good morning." And the good man walked contentedly back. The man with the oxen drove slowly on, studying on the mysterious ways of Providence and wondering how it would have been with his soul if he had not been his watchful pastor all the time.

Care of Machinery.

A certain amount of original genius is required to fully develop the improvements in any branch of mechanical science, and bring them into the most practical shape, so that each of the parts may be properly proportioned with reference to the particular function which it is desired to fulfill. When this is done, its useful mission has commenced; yet, complete in itself it may be, it is not endowed with the faculty of self-preservation, and should, therefore, be properly cared for, or it will be subject to numerous accidents. This care needs only the exercise of plain common sense. When, for instance, the bearings of the shafts are not oiled with sufficient frequency, not only does the increased friction necessitate a greater amount of power to drive the shaft, but the journals are abraded to a greater or less extent. If the caps of the journal-box are left too loose, the journal "wobbles," and if there is gearing attached to the shaft, its teeth are quickly worn out of proper shape; while, if the caps are screwed down too tight, the journal heats, the lubricating material is forced out or burned up, and both the shaft and bearing are soon rendered worthless. These matters may appear trivial; but the aggregate loss resulting therefrom is very great. Many other things might be specified, in which little attention to details will guard against great and unnecessary waste of power and wear of valuable machinery; and the pecuniary returns can only be secured by bringing to bear the plain and undeniable principles derived from everyday experience—or, in other words, by the employment of common sense.

Weighing Elephants Without Scales.

An Indian writer relates an interesting anecdote concerning Shajee, the father of the first ruling prince of the Mahrattas of Hindostan, who lived at about the beginning of the seventeenth century. On one occasion a certain high official made a vow that he would distribute to the poor the weight of his own elephant in silver money; but the great difficulty that at first presented itself was the mode of ascertaining what this weight really was; and all the learned and clever men of the court seem to have endeavored in vain to construct a machine of sufficient power to weigh the elephant. At length, it is said that Shajee came forward, suggested a plan, which was simple, and yet ingenious in the highest degree. He caused the unwieldy animal to be conducted along a stage specially made for the purpose by the water-side, into a flat-bottomed boat; and then, having marked on the boat the height to which the water reached after the elephant had weighed it down, the latter was taken out, and stones substituted in sufficient quantity to load the boat to the same line. The stones were then taken to the scales, and thus, to the amazement of the court, was ascertained the true weight of the elephant.—*Little Folks.*

A Druggist's Story.

Mr. Isaac C. Chapman, Druggist Newburg, N. Y., writes us: "I have for the past ten years sold several gross of Dr. William Hall's Balsam for the lungs. I can say of it what I cannot say of any other medicine. I have never heard a customer to speak of it but to praise its virtues in the highest manner. I have recommended it in a great many cases of Whooping Cough with the happiest effects. I have used it in my own family for many years; in fact, always have a bottle in the medicine closet ready for use."

Henry Carbolic Salve.

Is the best Salve for cuts, bruises, sores, ulcers, salt rheum, tetter, chapped hands, chilblains, corns, and all kinds of skin eruptions, freckles and pimples. Get Henry's Carbolic Salve as all others are counterfeits. Price 25 cents.

All is Vanity.

When I look upon the tombs of the great, every motion of envy dies in me; when I read the epitaphs of the beautiful, every inordinate desire goes out; when I meet with the grief of parents upon a tombstone, my heart melts with compassion; when I see the tomb of the parents themselves, I consider the vanity of grieving for those whom we must quickly follow. When I see kings lying by those who deposed them, when I consider rival wits placed side by side, or the holy men that divided the world with their contests and disputes, I reflect with sorrow and astonishment on the little competitions, factions, and debates of mankind. When I read the several dates of the tombs, of some that died yesterday, and some six hundred years ago, I consider that great day when we shall all of us be contemporaries, and make our appearance together.—[Addison.

IMPORTANT

When you visit or leave New York City, save Baggage, Expressage and Carriage hire, and stop at the **Grand Union Hotel** opposite Grand Central Depot.

Elegant rooms, fitted up at a cost of one million dollars, reduced to $1 and upwards per day. European plan. Elevator. Restaurant supplied with the best. Horse cars, stages and elevated railroad to all depots. Families can live better for less money at the Grand Union Hotel than at any other first-class hotel in the city.

AYER'S Cherry Pectoral.

No other complaints are so insidious in their attack as those affecting the throat and lungs, none so trifled with by the majority of sufferers. The ordinary cough or cold, resulting perhaps from a trifling or unconscious exposure, is often but the beginning of a fatal sickness. AYER'S CHERRY PECTORAL has well proven its efficacy in a forty years' fight with throat and lung diseases, and should be taken in all cases without delay.

A Terrible Cough Cured.

"In 1857 I took a severe cold, which settled on my lungs. I had a terrible cough, and passed night after night without sleep. The doctors gave me up. I tried AYER'S CHERRY PECTORAL, which relieved my lungs, induced sleep, and afforded me the rest necessary for the recovery of my strength. By the continued use of the PECTORAL I became entirely well. I am now 63 years old, hale and hearty, and am satisfied your CHERRY PECTORAL saved me."
HORACE FAIRBROTHER.
Rockingham, Vt., July 15, 1882.

Croup.—A Mother's Tribute.

"While in the country last winter my little boy, three years old, was taken ill with croup; it seemed as if he would die from strangulation. One of the family suggested the use of AYER'S CHERRY PECTORAL, a bottle of which was always kept in the house. This was tried in small and frequent doses, and to our delight in less than half an hour the little patient was breathing easily. The doctor said that the CHERRY PECTORAL had saved my darling's life. Can you wonder at our gratitude? Sincerely yours,
MRS. EMMA GEDNEY."
159 West 128th St., New York, May 16, 1882.

"I have used AYER'S CHERRY PECTORAL in my family for several years, and do not hesitate to pronounce it the most effectual remedy for coughs and colds we have ever tried. A. J. CRANE."
Lake Crystal, Minn., March 13, 1882.

"I suffered for eight years from Bronchitis, and after trying many remedies with no success, I was cured by the use of AYER'S CHERRY PECTORAL. JOSEPH WALDEN."
Byhalia, Miss., April 5, 1882.

"I cannot say enough in praise of AYER'S CHERRY PECTORAL, believing as I do that but for its use I should long since have died from lung troubles. E. BRAGDON."
Palestine, Texas, April 22, 1882.

No case of an affection of the throat or lungs exists which cannot be greatly relieved by the use of AYER'S CHERRY PECTORAL, and it will *always cure* when the disease is not already beyond the control of medicine.

PREPARED BY
Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists.

ZOA-PHORA

Began life 12 years ago under the name of
WOMAN'S FRIEND.

Without puffery, simply on the recommendation of those who have used it, it has made its way in every State in the Union.

NOT A CURE ALL,

But a gentle and sure remedy for all those complaints which destroy the freshness and beauty, waste the strength, mar the happiness and usefulness of many **GIRLS AND WOMEN.**

SOLD BY ALL DRUGGISTS.
Testimonials or our Pamphlet on
"Diseases of Women and Children"
Sent gratis. Every woman above 15 years of age, especially Mothers, should read them. Address

K. B

KING OF THE BLOOD.

The Most Thorough Purifier of the Blood Yet Discovered.

Cures all Humors, from a Common Eruption to the worst Scrofula.

It purifies the Blood.
It invigorates the Liver.
It regulates the Bowels.
It strengthens the stomach.
It gives vivacity in place of lassitude; cheerfulness in place of gloom, and robust vigor in place of debility.

Dyspepsia, Biliousness, Disordered Liver, Constipation, Nervous Affections, General Debility, in short all the numerous diseases and discomforts caused by impure blood are speedily conquered by this powerful corrector, the chief and sovereign of all ancient or modern medical discoveries—KING OF THE BLOOD.

Its name is its best description as it is a royal dispenser of the blessings of health and vanquishes the foes that lurk in the blood.

It banishes PIMPLES, SALT RHEUM, SCALY ERUPTIONS, ULCERS, SCALD HEAD, FEVER SORES, and all SCROFULOUS DISORDERS.

It checks CONSUMPTION in its early stages. It has frequently cured it when advanced.

It disperses TUMORS and CANCERS without the Surgeon's knife.

It cures DROPSY, general or partial.

It cures FEMALE WEAKNESS and DISEASE.

It reduces in a safe and effectual manner all swellings, external or internal.

It eradicates the effects of Venerial Disease and Mineral Poisons, and establishes a sound constitution.

Many certificates, much further information and full directions for using, will be found in the pamphlet, "Treatise on Diseases of the Blood;" in which each bottle is enclosed.

Price $1 per bottle containing 12 ounces, or to 50 doses. Sold by dealers in medicine.

If your druggist does not happen to have it on hand, request him to order a supply of it for you, as it will be cheaper than for you to order direct of us, and less trouble.

"Does yere kape nothin but dry goods here?" "No ma'am." "Thin where will I be afther goin' for a watered silk?"

When the lights are low and a fellow occupies a big rocking chair with his girl, how he does wish he was at the North Pole where it would be six months till morning.

A Wisconsin woman has been married fifty-eight years and has never missed building her kitchen fire. Her husband is probably the oldest firescape on record.

A young couple were found out at the front gate one cold night this week locked in each other's arms. They said the combination was lost and they could not get it because the janitor was asleep.

The following ludicrous sentence is the result of a compositor's erroneous punctuation: "Cæsar entered upon his head, his helmet upon his feet, armed sandals upon his brow, a cloud in his right hand, his faithful sword in his eye, an angry glare."

A red nose is a suspicious facial ornament on a man or woman, and sometimes gives small boys a handle to play with. An urchin who had begged a penny of an old toper in vain, rewarded him with this advice—"Don't you carry that nose of your'n near to no powder fact'ry or they might play the hose onto yer."

After a telegraph pole had fallen on a Savannah negro's head he threw up his hands and shouted: "Don't hit me again, Massa P'liceman; it wasn't me dat stole de chickens; it was Deacon Henry." Then, looking around and seeing what struck him, he walked off muttering to himself: "Golly, I'se in luck dis mornin'. I 'spected de 'pliceman had me shuah dat time."

"Sure,' said Pat, rubbing his head with delight at a prospect of a present from his employer, "I always mane to do my duty." "I believe you," replied the employer, "and therefore I shall make you a present of all that you have stolen from me during the year." "I thank your honor," Pat retorted, "and may all your friends and acquaintances treat you as liberally." But a little better than that was the reply of a Brooklyn Irishman as a funeral procession passed; he was asked who was dead, and responded, "Troth, I don't know, except it be the man in the coffin."

Stepping-Stones to Success.

Learn your business thoroughly.

Keep at one thing—in no wise change.

Observe system and order in all you do and undertake.

Be self-reliant; do not take too much advice but rather depend upon yourself.

Never fail to keep your appointments or to be punctual to the minute.

Never be idle, but keep your hands or minds usefully employed except when sleeping.

Use charity with all; be generous in thought and deed—help others along life's thorny pathway.

Make no haste to be rich, remembering that small and steady gains give competency with tranquility of mind.

Never put off till to-morrow what you can do to-day, and never trouble others to do what you can perform yourself.

Accustom yourself to think and act vigorously, and to be prompt and decided for the right against the wrong.

Earn money before you spend it; never buy what you do not want—adopt the "pay-as-you-go" principle, and never deviate from it.

Make few promises. Always speak the truth and nothing but the truth; and in all your business relations be guided by strict integrity and unflinching honesty.

Buy, suscribe to, and read all that is necessary to fully inform yourself on the doings, discoveries and reforms of the age in which you live.

Develop a wealth of character by personal courage. Possess the courage to speak your mind when it is necessary you should do so, and to hold your tongue when it is prudent you should do so; to acknowledge your ignorance rather than seek credit under false pretences.

Finally, in all you do and say, think and act out, so live that your daily growth of soul and body may be ever upward in the direction of perfection.

Is there a Central Sun?

It is singular, remarks Mr. R. A. Proctor in the Newcastle *Weekly Chronicle*, how strongly some errors retain their hold on men's minds. When Madler announced his belief that Alcyone, the chief star of the Pleiades, is the central star of the universe, men's minds were attracted by the thought that the steller system, like the solar system, revolves around a center. Yet astronomers knew perfectly well that the evidence on which Madler based his theory was exceedingly feeble. Sir John Herschel also pointed out how unlikely it is that the [illegible] of the Milky Way, if such a centre really is, can lie so far away from the plane of the Milky Way as the Pleiades. I have shown since that the only piece of positive evidence advanced by Madler, the drift of the stars of the constellation Taurus in one direction, is in reality no evidence at all, for the simple reason that a similar drift can be recognized in other regions of the steller heavens. I believe that no astronomer of repute would now venture to maintain the theory that Alcyone is the central sun of the steller system, while scarce any (if any) would maintain that there is a central sun at all. Yet I find that not only is the belief still widely spread among the general public that Alcyone is the central sun, but that the theory excites far more interest than most of the real discoveries, interesting though they are, which have been made during the last half century. When I reached Indianapolis I found myself called on to decide, not whether the theory is true or not, but whether it is due to Bessel or Madler. My statement that the origin of the theory was scarcely worth considering, since the theory itself was long since exploded, was received in solemn silence, as if my words were scarcely credited. And when I had endeavored, and I think succeeded, in showing good reasons for rejecting the theory, I could still feel that most of my audience would a great deal rather have seen the theory established than overthrown. Such is the dominion which error sometimes achieves over men's minds.

Cured of Spasms.

"I am well and happy again," says our fair correspondent, Miss Jennie P. Warren, 740 W. Van Buren St., Chicago, Ill., "your Samaritan Nervine cured me of spasms."

The Open Sky.

It is strange how little, in general, people know about the sky. It is the part of creation in which nature has done more for the sake of pleasing man—more for the sole and evident purpose of speaking to him, and teaching him, than in any other of her works; and it is the part in which we least attend to her. There are not many of her other works in which some more material or essential purpose than the mere pleasing of man is not answered by every part of their organization; but every essential purpose of the sky might, so far as we know, be answered, if, once in three days or thereabouts, a great ugly black rain-cloud were brought over the blue, and everything well watered, and so all left blue again till the next time, with perhaps a film of morning and evening mist for dew. And instead of this, there is not a moment of any day of our lives when nature is not producing scene after scene, picture after picture, glory after glory, and working still upon such exquisite and constant principles of the most perfect beauty, that it is quite certain that it is all done for us, and intended for our perpetual pleasure. And every man, wherever placed, however far from other sources of interest or of beauty, has this doing for him constantly. The noblest scenes of the earth can be seen and known but by few: it not intended that man should live always in the midst of them; he injures them by his presence; he ceases to feel them, if he is always with them. But the sky is for all; bright as it is, it is not "too bright nor good for human nature's daily food." Sometimes gentle, sometimes capricious, sometimes awful; never the same for two moments together; almost human in its passions—spiritual in its tenderness—almost divine in its infinity, its appeal to what is immortal in us is as distinct as its ministry of chastisement or of blessing to what is essential. And yet we never attend to it, we never make it a subject of thought, but as it has to do with our animal sensations; we look upon all by which it speaks to us more clearly than to brutes, upon all which bears witness to the intention of the Supreme, that we are to receive more from the covering vault, than the light and the dew which we share with the weed and the worm, only as a succession of meaningless and monotonous accidents, too common and too painful to be worthy a moment of watchfulness, or a glance of admiration.—*Ruskin.*

The Advertisement.

SOME REMARKS TELLING WHAT TO DO AND WHAT NOT TO DO.

If you have goods to sell, advertise.

Hire a man with a lampblack kettle and a brush to paint your name and number on all the railroad fences. The cars go whizzing by so fast that no one can read them; to be sure, but perhaps the conductor would stop the train to accomodate an inquisitive passenger.

Remember the fences by the roadside as well. Nothing is so attractive to the passer by as a well painted sign: "Millington's Medical Mixture for Mumps."

Have your card in the hotel register by all means. Strangers stopping at hotels for a night generally buy a cigar or two before they leave town, and they need some inspiring literary food besides.

If an advertising agent wants your business advertised in a fancy frame at the depot, pay him about two hundred per cent. more than it is worth, and let him put it there. When a man has three quarters of a second in which to catch a train, he invariably stops to read depot advertisements, and your card might take his eye.

Of course the street thermometer dodge is excellent. When a man's fingers and ears are "phewing" at the heat, is the time above all others when he reads an advertisement.

Print in the blackest ink a great sprawling card on all your wrapping paper. Ladies returning from a shopping tour like to be walking bulletins, and if the ink rubs off and spoils some of their finery, no matter. They never will stop at your store again.

Don't fail to advertise in every circus programme. It will help the circus to pay its bills, and visitors can relieve the tedium of the clown's jokes by looking over your interesting remarks about "twenty per cent. below cost," etc.

A boy with a big placard on a pole is an interesting object on the street, and lends a dignified air to your establishment. Hire about two.

Advertise on a calendar. People never look at a calendar to see what day of the month it is. They merely glance hurriedly at it so as to be sure that your name is spelled without a p, that's all.

Pay As You Go.

This advice is always good, but it is especially timely when the prospects ahead for work or business look encouraging, and everybody feels cheerful. How many times have you said to yourself, in the past few years: "If I could only get my bills paid up I never would be caught in this way again," and you have fussed and worried over debts contracted when the times were flush and the prospect for paying them seemed fair. Now it is a good time to turn over a new leaf, because it is just the time when the temptation to do the same thing is strong upon you. If your wages are increased, or you are selling more goods and getting a better profit, you begin to think, "now I can buy that new carpet or chamber set that my wife wants, and can pay for it in a short time." You had better wait until you have all the old debts paid first. Pay for your provisions as you go along, and husband what you have over. The relief from your old debts will be like the recovery from a boil—you feel better when it is well—and the comfort of feeling that the little pile you have accumulated is subject to nobody's lien, is a positive pleasure. Flush times almost invariably lead to speculation, and speculation includes not only the investment in stocks or lands for a rise, but the discounting for the future for anything that you want. The man who buys what he is unable to pay for at the time of purchase, is mortgaging his life and labor, and incurring a burden which most likely he will regret. "Pay as you go" is a wise maxim, for yourself honest, for your heighbor just. Its observance will lighten the burdens and cares of life, sweeten toil, encourage industry, reward honesty, promote good neighborhood and induce prosperity.

Butler, N. Y., March 10, 1882.
Rheumatic Syrup Co.:
Gents—I take this opportunity to express my gratitude for what your Rheumatic Syrup has done for me.—After suffering over one year with the rheumatism in my shoulders, so I could hardly get my coat on without help, a friend induced me to try a bottle of Rhematic Syrup. After taking it I could see such a decided change, that I continued its use a short time and it cured me. Daniel Roe.

The Newspapers in a Farmhouse.

People who live near the great thoroughfares, where they have access to two or three dailies and a half-dozen weeklies, do not fully appreciate the value of a newspaper. They come, indeed, to look upon them as necessities, and they would as cheerfully do without their morning meal as their morning mail. But one must be far off in the country, remote from "the maddening crowd," to realize the full luxury of a newspaper. The farmer who receives but one paper a week does not glance over its columns hurriedly, with an air of impatience, as does the merchant or lawyer. He begins at the beginning and reads to the end, not omitting a news item or an advertisement to escape his eye. Then it has to be thumbed by every member of the family, each looking for the things in which he or she is most interested. The grown-up daughter looks for the marriage notices, and is delighted if the editor has treated them to a love story. The son who is just about to engage in farming, with an enthusiasm that will carry him far in advance of his father, reads all the crop reports and has a keen eye for hints about improved modes of culture. The younger members of the family come in for the amusing anecdotes and scraps of fun. All look forward to the day that shall bring the paper with the liveliest interest, and if, by some unlucky chance, it fails to come, it is a bitter disappointment. One can hardly estimate the amount of information which a paper which is not only read but studied can carry into a family. They have, week by week spread before their mental vision, a panorama of the busy world, its fluctuations and its vast concerns. It is the poor man's library, and furnishes as much mental food as he has time to consume and digest. No one who has observed how much those who are far away from the places where men most congregate value their weekly paper, can fail to join in invoking a blessing on the inventor of this means of intellectual enjoyment.

Injury to School Children.

A German physician of the very highest reputation, Dr. Treichler, has recently sounded a note of alarm to the effect that ill-directed and excessive brain work is inflicting serious injury to school children. In a paper read before the German association of natural historians and physicians, he claimed that habitual headache was greatly increased of late, among boys and girls, and that "this headache not only destroys much of the happiness and cheerfulness of life, but that it produces impoverishment of the blood and loss of intellectual tone." "Undoubtedly," he says, "the principal cause of the headache is intellectual overtaxation entailing work at night, and the insisting by parents on the too earnest taking up of a variety of subjects, music among the rest." Another case is "a state of dilation of the blood-vessels of the brain, by which the removal of effete material and the repair of the nervous tissues are both seriously impeded." He also says that "The method of instruction now-a-days pursued is not only a cause of disease, but also perfectly useless, because instead of increasing knowledge, it produces mental confusion, and becomes simply a Danaides, or like carrying water in a sieve." Excessive and especially nocturnal labor "produces a state of exhaustion of the brain in which the molecular changes necessary for the reception and assimilation of learning are not competed; so that new ideas cannot be really grasped, and confusion is produced at night with regard to subjects which have been learnt in the day. The Chicago *Tribune* notes it as a little remarkable that an eminient American physician, who has long been interested in educational matters, recently gave expression to almost identically the same views. As the same paper suggests, the concurrence of such authorities ought to induce educational officials to give this matter serious attention, to ascertain if we are cramming the brains of our children at the expense of their health.

Extreme Tired Feeling.

A lady tells us "the first bottle has done my daughter a great deal of good her food does not distress her now, nor does she suffer from that extreme tired feeling which she did before taking Hood's Sarsaparilla." A second bottle effected a cure. No other preparation contains such a concentration of vitalizing, enriching, purifying and invigorating properties as Hood's Sarsaparilla.

"If life be a battle, now mad must he be who fails to arm himself for the contest! If life be a storm, how infatuated is he who sleeps while his bark is driven amid unknown waters! If life be a pilgrimage, how unwise is he who strays from the right road, nor seeks to return till the shadows gather round his pathway."

Positive Cure for Piles.

To the people of this county we would say we have been given the agency of Dr. Marchisi's Italian Pile Ointment—emphatically guaranteed to cure or money refunded—internal, external, blind, bleeding or itching piles. Price 50 cents a box. No cure, no pay. For sale by Waldo & Doty, druggists.

No family can afford to be without the following remedies in the house to use in case of emergencies, before a physician can be called—oftentimes saving calling one, and also saving the lives of the little ones: A bottle of Hatch's Universal Cough Syrup, which cures coughs, colds, croup, &c.; a bottle of Home Relief for sudden attacks of colic, cramps, cuts, bruises, sprains, etc.; a box of A. H. Davis' Family Pills, for constipation, torpid liver, kidney difficulties, headache, bones ache and fever symptoms. 25c sizes will cost only 75 cents for the outfit.

Daughters, Wives and Mothers.

We emphatically guarantee Dr. Marchisi's Catholicon a Female Remedy, to cure Female Diseases, such as Ovarian troubles, inflamation and ulceration, falling and displacement or bearing down feeling, irregularities, barrenness, change of life, leucorrhœa, besides many weaknesses springing from the above, like headache, bloating, spinal weakness, sleeplessness, nervous debility, palpitation of the heart, &c. No cure, no pay. For sale by druggists. Prices $1 and $1.50 per bottle. Send to Dr. J. B. Marchisi, Utica, N. Y., pamphlet free. For sale by Waldo & Doty.

"We are selling at the rate of three doz. bottles of Baker's Japanese Liniment a week." Pegg & Wilson, Druggists, Morenci, Mich.

A PAPER FOR THE TIMES.

The CHICAGO DAILY NEWS is the pioneer of cheap journalism in the West.

It was founded Dec. 20, 1875, as an evening paper with editions at noon, 3 and 5 o'clock. A complete newspaper,—complete in the one essential feature of American journalism, *i. e.*, presenting *all the news*,—sold on the street at only price less than the conventional nickel, was an innovation in western journalism, and, like all new enterprises, the "cheap paper" had to contend with long established custom and even prejudice before securing the recognition it sought and deserved. At the end of the first year, 1876, it had achieved a daily sale ranging from 8,000 to 10,000 copies. From this time forward its progress was beyond all precedent in American journalism. In 1877 its average daily circulation was 22,037 copies; in 1878, 38,314 copies; in 1879, 45,194 copies; in 1880, 54,801 copies. On the morning of March 31, 1881, the CHICAGO MORNING NEWS made its first appearance. In September following, the sixth month of its publication, its circulation amounted to 490,019 copies, or a daily average of 88,848 copies,—a circulation never before attained by any daily paper in the United States, within a corresponding time.

The CHICAGO DAILY NEWS, therefore, as now published, consists of MORNING, NOON, and EVENING ISSUES, known respectively as the MORNING NEWS, NOON NEWS, and EVENING NEWS. The average combined circulation of the three issues of the DAILY NEWS now exceeds 90,000 copies each day. To appreciate the exceptional extent of this vast circulation it is only necessary to state that it is over three times the circulation of *any other daily paper in Chicago or the West*, while its circulation *in the city of Chicago* is GREATER than ALL other Chicago daily papers COMBINED. Being an independent paper, the organ of no party, sect, or class, it is the one universally read Chicago paper. The subscription price of the DAILY NEWS, either MORNING or EVENING issue, is $6.00 per year, or $2.00 for four months, postage included.

On July 2, 1878, the DAILY NEWS purchased the CHICAGO EVENING POST, consolidated its daily issue with the DAILY NEWS, and continued its weekly issue under the name of the CHICAGO WEEKLY NEWS. The WEEKLY NEWS under its present name and management is therefore less than five years old, though as a consecutive weekly publication it is now in its twentieth year. The CHICAGO WEEKLY NEWS takes a corresponding field among weekly newspapers so that occupied by the DAILY NEWS among dailies. It gives the news of the world in condensed yet complete form. Its Chicago market quotations are especially complete and trustworthy. That the CHICAGO WEEKLY NEWS has been correct in its judgment of the requirements of a large class of readers of the weekly press is best evidenced by the extent of its circulation, which aggregated in the month immediately preceding the date of this writing, 202,053 copies, or a weekly average of 50,513 copies. The subscription price of the WEEKLY NEWS is but SEVENTY-FIVE CENTS per year, postage included.

The phenomenal success of the CHICAGO NEWS in both its DAILY and WEEKLY ISSUES has been achieved by observing that fundamental principle of offering the best article of its kind in the market at the lowest cost to the purchaser. The CHICAGO NEWS is cheap only in price. The character of its news service is unsurpassed. It is a member of the Western Associated Press, and in addition to the unrivalled news service furnished by this Association, it enjoys the exceptional advantage of its own special telegraphic wire from Chicago to Washington and New York on the East, and to Milwaukee and St. Paul on the North. Giving all the news through reportorial and telegraphic facilities unsurpassed by those of any other Chicago paper, it commends itself to all classes in the community, to rich and poor alike, in that it offers an absolutely complete record of the news of the day in concise form, without the needless verbiage and amplification which render so many metropolitan journals "a weariness to the flesh," while its price brings it within the reach of all classes. It is a paper for the times.

Rheumatic SYRUP.

The Greatest Blood Purifier Known!

RHEUMATISM CURED

ROCHESTER, N.Y., April 5, 83. Rheumatic Syrup Co.: Gents—I have been a great sufferer from Rheumatism for six years, and have tried the skill of the best physicians for a cure, but found no relief till I commenced using your Rheumatic Syrup. After taking it a short time I felt that I was on the road to health, and I cheerfully say my own case, and I cheerfully say Syrup. that I have been greatly benefited by its use. I can walk with ease, and my general health is much improved. It is a splendid remedy for the Blood and debilitated System. E. CHESTER PARK, M.D.

SCROFULA CURED

PORT BYRON, N.Y., Feb. 23, 83. Rheumatic Syrup Co.: I had been doctoring for three years with different physicians for a scrofulous sore on my leg, but found no relief till I commenced using your Rheumatic Syrup. I now feel that I am on the road to health, and I cheerfully say Syrup. After taking it a short time I felt no pain, and my surprise it began to heal. It has now been three months since using the Syrup, and the sore is entirely healed. I can walk with entire freedom from pain, for weeks, I found myself as well as ever. As a blood purifier and for the cure of Rheumatism and neuralgia it is the best remedy I have ever heard of. MRS. WM. STRANG.

NEURALGIA CURED.

FAIRPORT, N.Y., March 12, '83. Rheumatic Syrup Co.: Gents—Since November, 1882, I have been a constant sufferer from Neuralgia, and have not found any relief till I began using your Rheumatic Syrup. I have taken four bottles of your Syrup, and I can say that it has been of more benefit to me than all the medicine I have taken for years. I shall use your Syrup in my family, and shall recommend it to all my friends as the best blood purifier and cure of Rheumatism and neuralgia I know of. W. B. CHASE.

Manufactured by RHEUMATIC SYRUP CO., 1 Plymouth Ave., Rochester, N. Y.

CASTORIA

for Infants and Children.

Castoria promotes Digestion and overcomes Flatulency, Constipation, Sour Stomach, Diarrhœa, and Feverishness. It insures health and natural sleep, without morphine.

"Castoria is so well adapted to Children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D., 82 Portland Ave., Brooklyn, N. Y.

What gives our Children rosy cheeks,
What cures their fevers, makes them sleep;
'Tis Castoria.

When babies fret and cry by turns,
What cures their colic, kills their worms,
But Castoria.

What quickly cures Constipation,
Sour Stomach, Colds, Indigestion,
But Castoria.

Farewell then to Morphine Syrups,
Castor Oil and Paregoric, and
Hail Castoria!

CENTAUR LINIMENT—an absolute cure for Rheumatism, Sprains, Burns, Galls, &c. The most Powerful and Penetrating Pain-relieving and Healing Remedy known to man.

Dr. CLARK JOHNSON'S
Indian Blood Syrup
Cures all diseases of the Stomach, Liver, Bowels, Kidneys, Skin and Blood. *Millions* testify to its efficacy in healing the above named diseases, and pronounce it to be the
BEST REMEDY KNOWN TO MAN.
TRADE MARK. *Guaranteed to cure Dyspepsia.*
AGENTS WANTED.
Laboratory 77 W. 3d St., New York City. Druggists sell it.

PARSONS' PURGATIVE PILLS
MAKE NEW RICH BLOOD
And will completely change the blood in the entire system in three months. Any person who will take ONE PILL EACH NIGHT FROM ONE TO TWELVE WEEKS may be restored to sound health, if such a thing is possible. For curing Female Complaints these Pills have no equal. Physicians use them in their practice. Sold everywhere, or sent by mail for 25 cents in stamps. Send for pamphlet. I. S. JOHNSON & CO., Boston, Mass.

THE TECUMSEH HERALD.

Issued Every Thursday Evening,

BY STACY BROTHERS,

Office in the NEW HERALD BUILDING, one Door East of the Opera House, Tecumseh, Mich.

SUBSCRIPTION RATES.

One Year, Cash in Advance $1 50
Six Months, " " 75
Four Months, " " 50

Twenty-five cents will be added to the subscription price for every three months that payment may be delayed.

ENTERED AT THE POSTOFFICE AT TECUMSEH, MICHIGAN, AS SECOND CLASS MATTER.

TECUMSEH, MICH., AUG. 30, 1883.

If milk be introduced into a bottle put into a pan with cold water, and gradually raised to a boiling point, and after being allowed to cool, be taken out, corked, and set away in a cool place, it may be preserved perfectly sweet for upwards of half a year. The reason is said to be that heat deprives the sugar of its power of changing into lactic acid.

According to the Milling World, sack cloth or canvas can be made perfectly impervious to moisture, equal to leather by steeping it in a decoction of one pound of oak bark with fourteen pounds of boiling water. The cloth has to soak twenty-four hours, when it is taken out, passed through running water, and hung up to dry.—This is sufficient for eight yards of stuff. The flax and hemp fibres in absorbing the tannin are the same time better fitted to resist wear.

Andrews' Bazar for September, just received, fully justifies the claim of its new managers that they are "making the best and cheapest Fashion Paper now published." The designs in this number will be pronounced by all the ladies to be excellent. Aside from its abundance of fashion news, its stories, sketches, wit and humor and illustrations are of a high order. Subscription price only $1,00 a year, besides a choice from a list of 67 valuable premiums. Send 10 cents for a sample copy to The American Bazar Co., 202 Broadway, N. Y.

Coldwater Republican: And now comes the "paint racket," a trap for confiding farmers. It has been successfully worked in our neighboring counties. An advance agent comes along and offers to paint your barn for so much per yard, making him believe that it will cost but $10 or $15.—When the gang comes along and does the painting, it paints the barn, roof and all, and charges by the square yard, making a bill amounting to over $100. If the farmer is foolish enough to have signed a contract, he is "bit" and has to grin and bear it. The only way to avoid such experiences is to patronize reliable, home dealers.

Act 167, laws of the legislature of 1883, regulating the practice of medicine in this state, goes into effect on the 6th of September. In order to secure uniformity in the affidavits required by said act to be made, a form has been prepared, which physicians and surgeons are respectfully requested to use, and which will be furnished free on application to the county clerk, after September 6. It is preferable that the affidavit should be sworn to at the clerk's office, to avoid the necessity of returning the same for correction in case the law should not be fully complied with, although the jurat can be taken by any officer authorized to administer oaths. The affidavit must be recorded at length, and hence the necessity of uniformity can be readily seen.

Nothing more certainly marks the substantial progress of civilization in this country than the increasing attention given to music. America has not yet produced any great musician, but we have developed a wonderful capacity for enjoying the music of the master composers of the world. Beethoven, Bach, Schumann, and Mendelssohn, are familiar names in thousands of our homes, and their divine music may be heard almost everywhere. It is worthy of note that our University, so renowned for its scientific and literary privileges, is adding the study of music to its many and varied elective courses, and, in connection with the Ann Arbor School of Music, at the head of which is the University Professor of Music, offers to young men and women the most desirable advantages for the pursuit of this study. Three years of successful work have demonstrated that in the education of the young, music must henceforth hold a leading position. This is as it should be, for all true culture and refinement find their natural and perhaps highest expression in music. And since we are a music-loving people, it is of the highest importance that our young people should have their musical studies turned into the purest channels. Under the fostering care of such institutions as our University, we believe America will yet produce musicians worthy of a great nation.

The Pitch Lake of Trinidad.

The Pitch Lake of Trinidad is one of those extraordinary natural wonders of which much has been reported on hearsay, but little from personal observation. Writers have been content to borrow from former accounts, when describing the place, so that errors have been perpetuated which ought to have been corrected. The island of Trinidad, in which the Pitch Lake is situated, lies out of the ordinary routes of travelers, and the lake is not accessible without the expenditure of some trouble, even after the traveler has been landed at Port of Spain. These reasons will account for a good deal of obscurity with which the accounts of this singular phenomenon are surrounded.

A morning's sail down the south-western coast of the island will bring the traveler from Port of Spain to Cape La Brea, in the neighborhood of Naparima. For several miles before reaching the cape, there will be perceived a strong pitchy smell, and it will be found on landing that the beach and shore are perfectly black, being either composed of, or overlaid with, the pitch which has at some time or other found its way down from the lake. There is abundant vegetation springing up in dark earth more or less impregnated with pitch, and the bright fresh green of the shrubs and trees serves the better to set off the vulcan-like colour of the ground. A walk inland for a mile over a black road, on which the finely-divided particles of pitch form a choking and a blinding dust, which flies with every puff of wind hither and thither, brings the traveler to the lake. The road has been ascending from the shore, and the lake is at a level of eighty feet above the level of the sea. At the lake, as on either side of the road for the whole way, the number and the luxuriant growth of the trees are very remarkable. Nearly all the tropical plants are represented, and, as if not to allow the animal kingdom to be unfavorably contrasted with the vegetable, numbers of the most beautiful butterflies it is possible to see, and of the most gorgeously-dressed humming-birds, flutter and flit about in the sunlight, or fly in or out among the branches of the trees.

The lake itself is contained in a basin about a mile and a half in circumference. In the months of July, August, and September the contents are in a simmering condition; fountains of pitch, boiling water, and argillaceous matter are thrown up here and there to a height of thirty feet, and objects, however light, allowed to fall into the lake, sink down and are irrecoverably lost. During the rest of the year, however, the pitch at the borders, and for a considerable extent away from them, is comparatively hard; soft and dangerous parts are indicated by the bubbling asphalte and by the increasing insecurity of the footing. Even at times when it is practicable to walk on the lake, it is not safe to stand still; the footsteps leave their imprint on the soft substance of the surface, and it is necessary to keep moving on in order to avoid sinking as into a quick-sand. At these times the pitch lies in large hummocks, between which run small rivulets of fresh water, clear as a crystal, and with a sulphureo-pitchy taste, which act as a system of veins and arteries to the Tartarean lake. Small islets, covered with the greenest shrubs and plants, are dotted about the surface of the lake, which engulfs them immediately the liquefying season comes, but reproduces them on the arrival of the next cool season. It is supposed that the lake has subterranean communication with the sea, poles marked with special characters having been found on the coast, which had erewhile been thrust into the asphalte of the lake. That a communication does exist is more than likely; for at some distance from Cape La Brea there are submarine pitch volcanoes which throw up quantities of pitch and Pitch Lake products into the sea; and it is at all events reasonable to suppose that these and the lake are connected. Humboldt, De Verteuil, and other authorities affirm that there is a correspondence between all of these and similar phenomena in the South American continent, with which the island of Trinidad was unquestionably once joined.

Artificial Production.

Mr. P. Simmonds reviews in the British *Trade-Journal* the various substitutes for natural products which modern art has invented. The fact, he says, is apparent beyond question that art is fast invading the domain of nature. Chemistry is enabling us to replace animal and vegetable dyes, and to form artificial gems, or, creditable imitations; mineral oils replace animal and vegetable ones for illuminating purposes, and the electric light is treading upon the heels of gas. The expensive outfits for the whale fisheries are comparatively abandoned; whalebone and blubber from the huge marine mammals being less in request; coral insects may proceed with their submarine constructions unmolested; the sea tortoise will be pursued less eagerly for its carapace; the ostriches of the desert be less sought after; and even the great pachyderms of India and Central Africa can be spared to be more usefully employed in extending the march of commerce. Under our enlightened civilization we can now manufacture our own whalebone, coral, tortoise shell, ivory, and feathers, without the need of penetrating into wild jungles and arctic or tropical seas for our supplies. The extinction of whalebone in commerce will not deprive us of our umbrellas, or the female sex of their parasols and corset backs. Rattans have been converted into wallosin, and horn shaped into pliable bones, while steel ribs also do duty effectually for baleen. In fact, he adds, there is no end to the artificial productions, and the list might be extended indefinitely, including artifical ice, which renders us independent of King Frost; artificial sugar, which we can make from starch or rags; artificial fruit essences, artificial horn from seaweed, artificial wood from compressed sawdust or straw, artificial leather from old scraps of the leather cloth, artificial parchment from paper chemically treated with sulphuric acid, and as hides for leather become more in demand, we have come to utilize the formerly neglected skins of alligators, snakes, kangaroos, the porpoise and other sea mammals, and fishes.

ANSWER YOUR INVITATIONS.—If a person speaks to another on the street, and that other takes no notice of the salutation, it is a clear case of insult. But there are hundreds of people who are noticed every week by invitations to social gatherings, and who insult the senders by taking no notice of them until they go to the party. Then they put in a bright and cheery appearance, unconscious that anything wrong has happened. There is hardly given in a city a social event of any kind,—whether a wedding, a reception, or what not—where two-thirds of the invitations are acknowledged; and yet there is but one rule in the matter. The first person to answer an invitation is the politest person.

A Word on the Care of Orchards.

Aside from a neat, comfortable farm residence, and the requisite number of outbuildings, there is nothing which contributes so largely to the beauty of the homestead and the comforts and luxury of the household as a good orchard. And this beauty and luxury are increased in proportion to the attention the orchard receives; for, as there can be no acre of farm product which will yield as remunerative a crop as an acre of bearing fruit-trees "well tended to," neither can there be anything more unprofitable on a farm than a scant barren lot of fruit-trees, as they consume the sap and exhaust the strength of the land without giving any remuneration.

The farmer who imagines that he has nothing to do but to purchase a large number of fruit-trees, and plant them out, regardless of subsequent care, in order to have in a few years plenty of apples and cider, is as likely to be disappointed as the fatalist who ploughs his land and shakes on the seed and leaves the rest to Providence. Nothing should receive more careful attention on the farm than a good well-assorted orchard, as it no doubt tends in a great measure to the promotion of health, wealth, and happiness. Doctors assure us that there is nothing more healthy, or nothing that contributes more to the perpetuity of good health, than plenty of good ripe fruit; and, apart from this, the fruit-grower can show by figures that there is no produce in which there is so much money as in a well assorted orchard, properly and skillfully attended to. But it is certain that an orchard must be attended to, otherwise nothing may be expected from it, save what is of very little good to man or beast. There is not to be found one who does not feel pleased and happy at the presence of a dish of delicious fruits. But the fruit-tree, like everything else that lives and grows, has its maladies, and also its antidotes; and hence, in order to realize all that is hoped for from it, much attention must be given to it, especially in the first years of its existence, as it is during these years that all branches not taking a proper position to form a perfect head at maturity are to be removed, and the whole force of sap sent to invigorate the permanent limbs, otherwise the tree must of necessity suffer in the future, either from heavy pruning, or too much "head," which is sure to impair the crop in every form. Besides, too, when branches are removed while small and young, the wound soon heals up, so that no wounds will be visible, nor will there be any necessity for sawing off large limbs from the head or trunk when the tree arrives at maturity.

The next object needing close attention in young trees is what may be called the incidentals of growth. Foremost among those are the crotch scald, produced by rancid sap, the canker-wart, and black heart. But the first of these seems to be the promoter of the latter two, and its origin is in this way: it often happens that if there is warm, favorable fall weather, trees are apt, especially on dry warm soil, to start a "fall growth" and remain green and full of sap until late in the season; then, should a sudden snap of severe frost set in, the sap gets frozen, and becomes clotted in the pores of the bark, so that the portion of the tree thus affected shows a smoky and blackish appearance the next spring, and unless this is removed by a good washing of very strong soft-soap suds, well charged with rye, the branches soon become black-hearted, by being inert in circulation of new sap, and soon begin to decay. Washing is also very beneficial for other purposes, as by doing it in proper season the fruit insects—which deposit their larvæ in the crevices of the bark and crotches—are all killed, and the young fruit saved from being ant-stung, or moth-eaten.

A farmer in passing through his orchard may observe many of his trees looking sickly, and not throwing out a full healthy growth of new wood, and by examining in the main forks or crotches of the limbs, and especially where they shoot off from the body, he will find a decayed reddish spot in the bark, which proves on examination to be lifeless, hard, and of a reddish hue. He may also find a portion of the wood inside the bark corroding: this is the crotch scald, and canker-wart. Again, by picking around the point of the angle in the fork or crotch of the tree, he will soon discover a hard knotty substance about the size of a small peach pit, the analysis of which would be a puzzle to the scientist. Hence an annual examination of each and every tree in the orchard becomes something to those that would wish to raise good fruit. Some kind of trees are, however, more liable to disease than others. But, notwithstanding this, care must be given to all; the clotted sap which is sometimes to be found lodged in the crotches of the limbs, more especially those having an acute angle or a sharp V shape, and also around the base of many of the limbs, should be invariably scraped out, as by so doing vigor and growth will be given to the tree, and diseases kept away. Again, the ground at the root of the trees should be kept clean, hoed, etc., as this is in perfect keeping with the laws of growth; but as to pruning, no person should be allowed to try to perform this task, without knowing the varieties of trees and becoming somewhat familiar with their habits of growth and customs of bearing, as some trees carry their fruit on the directly opposite end of the limbs from that of others. Take, for instance, the spy, the baldwin, the greening and the russet—no two of these carry their fruit alike. On the baldwin will be found the entire crop on the extreme ends of the main top branches. On the spy, the great bulk of the crop grows upon biennial shoots on the lower extremities of the limbs, and comparatively few on top. On the greening, the great bulk of the crop hangs on the side limbs, and makes the tree umbrella-shaped while bearing. Again, the russet bears part of it's crop on top outside, but as much more grows on short sharp fruit-spurs projecting from the sides of the limbs pretty well down the body of the tree. Hence it may be seen that not every wood-chopper can go up into a tree and trim that tree in a proper manner. The peculiar habits of the growth of the limbs require that they be pruned with the special intention of directing the young shoots, instead of having them veering to all the points of the compass,—as is the natural habit of a good many kinds of fruit-trees if not well watched.

Most of the diamonds now found are cut in Amsterdam. The origin of the word carat-weight is from an Arabic word "Kuara." There is a pot bearing plant growing on the gold coast of Africa, the seeds of which are almost invariably of an equal weight, and these seeds, called Kuara, were formerly used for weighing against the grains or dust of gold, from which originated the carat weight. The largest diamond known is the Braganza, in the crown of Portugal. It was found over a hundred years ago in Brazil, and weighs 130 carats.

TOLEDO (O.) BUSINESS COLLEGE

And English Training School. Thoroughly equipped in all its departments. Mathematics a specialty. The College was never in a more flourishing condition. No vacation. Circulars and specimens of penmanship sent free. M. H. DAVIS, B.A., Prin.

SCROFULA.

A remedy that can destroy the germs of scrofula, and when once settled has the power to root it out, must be appreciated by those afflicted. The remarkable cures of young children and the more wonderful cures of those of middle age and late in life, as illustrated by our printed testimonials, prove HOOD'S SARSAPARILLA to be a reliable remedy, containing remedial agents which do positively cure scrofula and eradicate it from the blood.

MESSRS. C. I. HOOD & CO., Lowell, Mass., Jan. 21, 1879.

Gentlemen—For ten years previous to the early part of 1877 I had been a constant sufferer from scrofulous ulcers or sores, which had finally reduced me to a helpless condition, as I described in my letter to you in September that year. The continued excellent health which enables me to keep house for my aged father and to enjoy life, keeps alive my intense personal interest in HOOD'S SARSAPARILLA and I cannot refrain from expressing my gratitude for the permanent cure this wonderful medicine effected in my case nearly two years ago, while living in Lowell, when all my physicians gave me up as being in an incurable condition. One thing before I close. I have recommended your Sarsaparilla to hundreds, and I think more than a thousand cases, and my faith in its invincibility in curing scrofula has become absolute by the wonderful cures it has effected aside from my own. I trust you will not be slow in making the merits of HOOD'S SARSAPARILLA known everywhere, for it is a duty you owe to mankind. With best wishes I remain very truly yours,

SARAH C. WHITTIER.

HOOD'S SARSAPARILLA

Is a skillfully-prepared compound, concentrated extract, *by a process peculiarly our own*, of the best remedies of the vegetable kingdom known to medical science as alteratives, blood-purifiers, diuretics, and tonics.

Sold by all druggists. Price $1, or six for $5. C. I. HOOD & CO., Lowell, Mass.

(*Continued from last week.*)

How Watch Cases are Made.

It is a fact not generally known that the *James Boss' Gold Watch Cases* really contain more *pure gold* than many "solid" gold cases The demand for these watch cases has led to the manufacture of a very poor grade of solid gold watch cases—low in quality, and deficient in quantity. These cases are made from 4⅜ to 10 karats, and a 5 or 6 karat case is often sold for 12 or 14 karats. It is NOT economy to buy a watch case so poor in quality that it will soon lose its color, or one so soft that it will lose its shape and fail to shut tight, thus letting in dust and damaging the works, or one so thin that a slight blow will break the crystal, and perhaps the movement. It IS economy to buy a *James Boss' Gold Watch Case*, in which NONE of these things ever occur. This watch-case is *not an experiment*—it has been made nearly *thirty years*.

HAZLETON, PA., Oct. 24, 1882.

I sold two James Boss' Gold Watch Cases thirty years ago, when they first came out, and they are in good condition yet. One of them is carried by a carpenter, Mr. L. W. Drake, of Hazleton, and only shows the wear in one or two places; the other by Mr. Bowman, of Cunningham, Pa.; and I can produce one or both of these cases at any time.

SYLVESTER ENGLE, *Jeweler.*

Send 3 cent stamp to Keystone Watch Case Factories, Philadelphia, Pa., for handsome Illustrated Pamphlet showing how James Boss' and Keystone Watch Cases are made.

(*To be Continued.*)

ZOA-PHORA

Is a Sovereign Remedy for all Complaints peculiar to

WOMEN.

MISHAWAKA, Ind, Dec. 1, 1882.

DR. PENGELLY:

Dear Sir:—Overwork has done for me what it does for many. Desiring to benefit suffering women, I add my testimony to the value of **Zoa-Phora.** For five years I suffered greatly with Prolapsus, being obliged to use a supporter during all those painful, weary years; but, thanks to your medicine, I wear it no more. I laid it off after using one and a half bottles. I am not well, but I work all the time, and am better than I ever expected to be. You may use my letter, and if any one wishes to write me for more information, give them my full address MISS C. G.

JERSEYVILLE, Ill., April 25, 1882.

DR. PENGELLY:

Dear Sir:—I am more than pleased with the effect of your **Zoa-Phora** in our daughter's case. I am surprised to see how she has improved. She is gaining in weight and color, and I think feels better than she ever did; her nerves are steady, and the distress in her chest is entirely gone. I firmly believe that **Zoa-Phora** is all that has saved her life. I am willing you should use my letter, for I am not afraid to tell what a wonderful cure your medicine is. YOURS respectfully,

MRS. SARAH RANDOLPH.

N. B.—This was a case of suppression.

From Mrs. John Spitler,

No. 28 Wilt St, Fort Wayne, Ind.

I have suffered for sixteen years with spasmodic pain in my head and general nervous debility. Recently I had a severe attack of pain in my head, caused by weakness and nervous exhaustion. I thought I should die. My husband said we would test **Zoa-Phora** thoroughly. He gave it to me according to directions for severe cases, and in less than two hours I had complete relief. I advise all ladies who suffer from nervous or sick headache, or any form of female weakness, to use **Zoa-Phora.** There is no medicine to compare with it.

May 15, 1882.

Our Pamphlet on 'Diseases of Women and Children,' SENT GRATIS. Every woman above 15 years of age, especially Mothers should read it.

Address R. PENGELLY & CO.

Kalamazoo, Mich.

All letters marked private are read by Dr. PENGELLY only.

Used Internally and Externally.

CURES ALL

Nervous Diseases, Pains, Colds, Cramps,

And General Debility.

For sale by all druggists, 25c, 50c, and $1 a bottle.

Dr. Jno. Lesson, Prop'r, Cadillac, Mich.

A 160 ACRE FARM

SPECIAL NOTICES.

FOR RENT. The undersigned would like to rent a farm of 100 or 200 acres, convenient to railroad, with privilege of buying with good buildings. Will pay cash rent half yearly in advance, if necessary. Address, stating amount of acres, terms and particulars,
JOHN SHEA, Climax Mich.

FOR SALE. One solid iron gray mare coming three. Sire, "Banker," dam, a "C. M. Clay" mare. Price $100. One thorough-bred Jersey bull, 14 months old, solid fawn black points, sure, and from No. 1 butter stock. Price $75. One thoroughbred Jersey-red boar, eleven months old, bred by Benson, Maule & Co., Philadelphia, Pa., Price $25. One roller grain drill, price $25.
JOHN T. CLARK,
Clinton, Mich.

SEED WHEAT for sale, of the Lochrop or Morgan variety. Yielded nearly 35 bushels per acre on stubble ground this season. Been grown on my farm only two seasons. Cut and threshed at exactly the right time. Leave your orders early.
S. C. STACY.

TRUE VALLIS WHEAT after two years' trial, has proved to be the hardiest, most yielding and best wheat I ever raised. Did not rust, blight or shrink. Choice clean seed for sale.
A. P. CODDINGTON,
Tecumseh.

STRAWBERRY PLANTS FOR SALE. Choice plants of the Bidwell, Kentucky, Green Prolific and Wilson's Albany varieties. These plants were bought of professional growers and are warranted true to name.
S. C. STACY.

FOR SALE CHEAP. A good property on Railroad st., opposite Slayton's warehouse. Has a dwelling house thereon and a vacant lot for building purposes. Will be sold at a bargain. Enquire at the HERALD OFFICE.

EVANS' BUSINESS COLLEGE AND Institute of Rapid Writing; Adrian, Mich. Twenty years of success of this thorough actual business Institute. Send for sample of our work.
U. R. Evans, Principal and Teacher.
John Dersham, Assistant Bookkeeper.
D. C. Hardy, Teacher of Shorthand Writing, and also Type Writing.
Adrian, Aug. 28, 1883. U. R. EVANS.

The books have arrived for the Ladies' Library and will soon be ready to circulate. A neat room has been procured between Dr. House's office and Heesen's hall where the library will be domiciled.

At the coming Lenawee County Fair to be held at Adrian, Sept. 25, 26, 27 and 28, Moreland Bros. & Crane, owners of the famous Hero brand of plug tobacco, offer the following special prizes: To the person who will bring the largest pumpkin 1 ten pound box of Hero plug.
2d best 1 eight pound box.
3d " six " "
4th " four " "
5th " two " "
All who compete for these prizes must exhibit in Moreland Bros. & Crane's special pumpkin booth in floral hall. The size will be determined be the addition of the circumference of the pumpkin each way divided by the figure 2.

BASE BALL.

The game last Thursday between Jonesville and the home team was a good one and resulted in a score of 5 to 3 in favor of Tecumseh.

This morning our boys started for Blissfield and will play the Blissfield team this afternoon.

Below is the score by innings of the Jonesville-Tecumseh game.

	1	2	3	4	5	6	7	8	9	R.	I.B.	E.	T.B.
Jonesville...	1	0	0	0	2	0	0	0	0	3	2	7	2
Tecumseh...	0	0	1	1	0	1	1	0	1	5	2	6	3

We understand that the association are making arrangements with Lansing and other clubs for games as rapidly as possible.

AUCTION SALE.

Robert I. Dowling having rented his farm, will sell at auction on the premises, one and a half miles east of Springville, on Tuesday, September 4, 1883, at 12 o'clock, m., the following property: Two work horses, 1 cow and calf, 98 sheep, 15 lambs, 3 hogs, 4 shoats, 1 lumber wagon, 1 set of bobs, 1 set of one-horse bobs, 1 double harness, fanning mill nearly new, steel plow, 1 single harness, land roller, corn sheller, 10 acres of good corn, cutting box, quantity of hay, cook stove, chickens, turkeys, and many other things. Usual terms.
BEN REYNOLDS, Auctioneer.

At a meeting held at Amory hall, Wednesday, Aug. 22, Capt. A. D. Lawrence resigned his position as captain of Co. C, and at the same time turned over all state and company property, and receipts of money received by him.

Capt. A. D. Lawrence was one of the charter members of Co. C, when mustered into the state service in '70, at which time he was 1st Lieut. He has been a member of the company nearly ever since. In 1876, he as captain, took the company to the first encampment of the state militia, which with the exception of the two encampments at Island Lake was the best ever held in the state. In the spring of '82 Co. C was flat and the officers in command, at that time, were flatter. There seemed to be no one able to take command, who was willing to do so. At last Capt. Lawrence stepped forward and took command, with the understanding that he might withdraw when the company was on its feet again. At this time besides being short of officers in command, the company was short of cash, there not being one cent in the treasury, even if a treasurer could have been found. They did have a place they called an armory underground somewhere. With the company in this condition Capt. A. D. Lawrence took command, and carried the best company through two of the best encampments ever held in the state.—To-day the company is united, have one of the best new armories in the state, money in the treasury, and men who are able to fill any office in the company. To Capt. Lawrence the company extend their sincere thanks for the help he gave them in their time of need. COMPANY C.

THE TECUMSEH HERALD,

TECUMSEH, MICH., AUG. 30, 1883.

LOCAL AND PERSONAL.

Did you see Casey run?

The fall term of school will open next Monday, Sept. 3d.

The Hudson telephone exchange is now in good working order.

The Purinton benefit concert last Monday evening netted $193.25.

The opening of Adrian college has been postponed until September 12.

P. W. Adams has our thanks for a few splendid specimens of Delaware peaches.

A big coach load of Tecumseh people took the train for Blissfield this morning.

Horatio Kepler and his nephew Milburn are taking quite a trip in the western part of the state.

We have received a copy of the proceedings of the last meeting of the Michigan Press Association.

Thanks to Tom Adamson for a few copies of the San Francisco Daily Chronicle, giving the details of the Knights Templar's conclave.

Miss Augusta Bowen, of Franklin, left at our office some fine specimens of last years russet apples. They were apparently as sound as when picked.

Peter R. Adams is seriously ill, and his son, P. W. Adams, has been summoned from Delaware, as there are fears that his father's illness may terminate fatally.

A man in Hillsdale lost a diamond from a shirt stud while at work in a planing mill. He can probably borrow another of any of the newspaper men in that city.

Lawyers and others will be interested to know that the postmaster general has decided that all printed or written matter produced by type writing machines belong to the first class, and must pay full letter postage.

Frank Baxter was at home the first of the week indulging in a flying visit. He has been engaged for the past six months in Kansas canvassing for a state gazetteer. He seems to like the business well, and it evidently agrees with him.

Miss Niles, who has been visiting Mrs. G. S. Tiffany for some time, started for her home, London, Canada, this morning. During her stay here Miss Niles has made many warm friends who regret very much to bid her "good-bye."

Joe Sage gave another party at Macon last evening, which was well attended. These parties at Pennington's corners are getting to be quite popular. They are conducted in the right way and tend to improve the society of young people in that locality.

Blissfield has enacted an ordinance ordering owners to cut down noxious weeds in front of their property, within five days after notification by the street commissioner; else that officer will do the work and the cost shall be charged against the property, to be collected with the taxes.

We are pleased to notice the fine quality of crayon work that C. A. Thatcher, of Tiffin, O., is delivering in town. He has been here during the past two months and is receiving more orders than ever before. One of the finest portraits we have seen is a life size sketch of Mr. Lilley.

Mr. Dana, of the New York Sun, has taken a peculiar way to amuse himself in his old age. He owns a majority of the stock of the Sun, which brings him an income of over $200,000 a year. Latterly he has taken to collecting china and chickens. He has already $50,000 invested in china, and $10,000 in fancy chickens.

Died, on the 25th inst., of cholera infantum, the Adrian Sunday Herald, aged four months. If seven-eighths of patent plates made in Chicago, and one-eighth gas of home manufacture, could have made a success of it, the Herald deserved to live. Its sex had not yet been discovered, and this unfathomed mystery will now be buried with the corpse. Let us drop a sympathetic tear upon its bier and "let her r—i—p."

Brooklyn Exponent: We have one of the best subscribers in America.—He has taken the paper from the beginning, and has never paid a cent.—He is one of the kind who don't take the paper for the reading—of course not—but he takes it for the purpose of supporting a home institution. As we believe that a proper interest in home institutions should be encouraged, we continue sending the paper and will soon give him a free advertisement.

The history of the "Chandler family," prepared by Dr. George Chandler, of Worcester, Mass., is out, and contains the names of 12,000 persons, among whom are many Michigan people. Rutherford B. Hayes, who was in some way connected with the family, has two lines devoted to him, and Zach Chandler is sketched in four pages. Willie Peake, the famous "Bell Ringer," Rev. Wellington De Puy, of Grand Ledge, and "Pearl Diamond," a well-known Tecumseh writer, are among those mentioned.

Dr. Hause expects to go to Florida at an early day to engage in orange culture.

Rev. C. E. Conley took his vacation in Detroit, making the trip with his horse and buggy.

There is nearly a dozen grass-widowers boarding at the Lilley House, whose wives have gone off on pleasure excursions.

Miss Mabel VanCamp, formerly of this village, sang a solo at the Purinton benefit concert at Adrian last Monday evening.

Mrs. O. B. DeWolf had a beautiful night blooming cereus in bloom last Saturday evening. It was one of the largest blossoms we ever saw.

Even News: The Tecumseh base ball club has beaten clubs at Jonesville, Blissfield, Hudson and Clinton, and now sighs for other clubs to knock out.

There was a big crowd at the Devil's Lake pic-nic yesterday, and everything passed off pleasantly. We will give our readers a report of the affair next week.

The game of base ball played this forenoon at Blissfield between the Tecumseh Blue Stockings and a Deerfield club resulted in a victory for the latter. Score 8 to 13.

Street Commissioner Jordan has been doing a fine piece of work on Chicago street at the west end. Adrian street, for two blocks south, will be similarly treated very soon.

The citizens of Adrian who are opposed to the Wabash branch extension are getting belligerent. They will appeal to the courts, and propose to fight it out on that line if it takes all summer.

That good old horse, Jerry, belonging to Cousin George Burdett, of Macon, passed in his checks last week and was buried on the banks of the Macon. His age was 24 years, 11 months and 33 days.

A new 2-cent daily will make its appearance at Detroit September 10th, to be called the Detroit Evening Journal. It will be in all things independent, not neutral. Its telegraph service will be complete and its columns will contain all the freshest local and State news. J. Lloyd Brezee is editor of the new daily.

Even. News: There is a bridge at Tecumseh which displays a sign reading "$5 fine for driving on this bridge faster than a walk." Tecumseh people did as they chose about driving slow there, however, until recently, when an deputy marshal devoted a little attention to watching the bridge and $75 in fines rolled into the village treasury.

The Jackson Patriot says: Henry G. Wagner, aged 74 years, was a recent arrival at the prison, whither he was sent for stealing a cow. He was an inmate of the institution nine years ago, but was incarcerated under the name of Henry G. Clark, and for an offense similar to that just specified. He is from Monroe, and explained that he did the thieving to secure a home in the penitentiary, as otherwise he would have been compelled to go to the poor house. He is a cheerful old fellow, and performs whatever is required of him without grumbling.

The Brooklyn Exponent has the following: A country lad has given his plan of operations in capturing woodchucks. He catches a mud-turtle, bores a hole through its shell through which he passes a wire, which is attached to a ball of candle wicking saturated with oil. When he finds a wood-chuck hole he puts the turtle in, sets fire to the wicking, and awaits the result. The turtle is sure to find the outlet of the hole, and out comes both turtle and wood-chuck, whereupon the boy with club and dog dispatches the wood-chuck and secures his scalp, gathers up the turtle and starts for fresh fields.

EXPLAINS ITSELF.

A man by the name of Penock was relating to a crowd on the corner a few evenings ago how he drank beer last Sunday morning in one of our saloons with the village marshal and a dispute arising between them about arresting parties, Penock asserted he was a better man than the marshal, and they clinched, and when parted were on the floor, Penock on top. Whether this is all so or not we do not know, but it is Penock's story, and it may have all arisen from the arrest of Penock's nephew; we merely note it for the benefit of the council, as they undoubtedly will investigate, and as they are very exacting in regard to the marshal's office they will get at the bottom facts of the case.

The above appeared in the Adrian Times of Friday, Aug. 24th, under the head of "Tecumseh Topics." As I have the honor to be the village marshal I deem it incumbent upon me to say that the assertion of the "man by the name of Penock" is false in every particular, and as proof of its utter falsity wish to submit to the people of this village the following card.
JAMES W. COLE.

Tecumseh, Mich., Aug. 25, 1883.

My attention having been called to the above article which appeared in the Adrian Times of yesterday, and as I am the "man by the name of Penock" therein referred to, I wish to say that the remarks made by me, and upon which the said article is founded, were false in every particular and without the slightest foundation in fact. A. PENNOCK.

COUNTY CONDENSATIONS.

Blissfield has a new barber.

Lots of Tecumsehites are visiting Blissfield to-day.

Miss Ida Davis is spending a few days at her old home in Clinton.

Three Seneca farmers have each contracted for a mile of hedge fence.

The sexton of the Deerfield cemetery has been "slicking up" his premises.

The Adrian Sunday Morning Herald is dead, having survived just four months.

Col. Eldredge entertains the 11th Mich. boys at Drew's hotel to-day at his own expense.

The soap vender visited Deerfield but failing to get a license he migrated to the next town.

Spencer Snow, of Morenci, has added six new suites of rooms to his hotel accommodations.

The soap vender has visited Blissfield, and shown the denizens of that burg how it was done.

Mat Flewelyn, of Hudson, threshed 178 bushels of wheat from four and one half acres of ground.

The arrangements which have been made insure a grand time at the Blissfield soldiers' re-union to-day.

Henry Ferguson, of Deerfield, has been railroading in the west and lately arrived home from the city of Mexico.

The old guard of the salvation army evacuted Adrian Monday and leaves the town in the hands of its old enemy.

Dr. Grandy, of Fairfield gets pay from the insurance company for the removal of his goods during the late fire.

T. S. Applegate, editor of the Times, and wife, of Adrian, returned from their trip to the Yellowstone Park on Saturday last.

A fellow went through the county, near the Ohio line, last week, selling patent medicines and grave stones—cause and effect.

The factories of Morenci employ about one hundred hands, and of these nearly one half are engaged in the brick business.

John Q. Adams was chosen as trustee of the Clark fund by Adrian Lodge I. O. O. F., last Monday, vice Geo. W. Westerman resigned.

The Brooklyn Exponent has entered upon the third year of its publication with a good business in hand and bright prospects for the future.

Evening News: At Adrian, "the war that for a space did fail now trebly thund'ring fills the vale," and the Times says Ald. Stearns, of the Press, utters flapdoodle in his speeches.—The Raisin river will yet o'erflow with blood.

Adrian Times: County Clerk Hunter returned Saturday from his eastern trip. He has "done" a good share of New York state during his absence and reports a very enjoyable time, indeed. Mrs. Hunter remains at Elmira for a time to visit friends.

Deerfield Record: The teamsters who left last week to work on the M. & O., have with one or two exceptions, returned home. They were set at work in a 22-foot cut through a swamp near Jerome, and preferring not to work in mud and water 'struck' Saturday night.

Adrian Press: Abraham Sanford, of Woodstock, has erected in the cemetery at Brooklyn a handsome granite monument, sixteen feet high and weighing eleven tons, and has removed thereto from Woodstock cemetery the remains of his parents, and also those of a daughter buried at Clark's lake.

Dr. Ward, the Laingsburg humorist, inspected the Adrian reform school for girls the other day, and thinks that "notwithstanding only a portion of those who should graduate there will ever do so, still by the aid of the present generation of weak-minded mothers the institution will doubtless fill up rapidly."

Blissfield Advance: The Tecumseh base ball club will play the return game with the Blissfields next Thursday afternoon on our grounds. The Tecumsehs are regarded as the strongest club in the county, and the game will probably be the most interesting yet played on the grounds. It will be worth your while to witness it.

Clinton News: A large number of young people assembled at the residence of Mr. and Mrs. H. Bartlett Monday evening to celebrate the 18th birthday of their daughter, Ella.—The company was finely entertained, and the mutual wish of all present was, no doubt, that she live to see many more birthdays and give a birthday party every few weeks.

The Blissfield correspondent of the Adrian Times says: "The young ladies who attended the teachers' institute at Tecumseh, speak very highly of it. But they think time, patience and money would have been saved to them, had the examination of teachers been held then, while all were together, instead of requiring all to meet again for examination at Adrian the next day after the closing of the institute at Tecumseh."

A THREE DAYS TRIP.

Among the Villages of Western Lenawee Making a Directory.

The Directory of Tecumseh village, which was started a short time ago, is now going through the press. After taking Tecumseh and Clinton, the idea struck us that it might be a good plan to "spread out" to the westward and take in the other villages of Northern Lenawee. The idea was a good one, and it was an easy matter to put it into execution.

Accordingly on Thursday morning last we packed our grip sack with the necessary hair combs, tooth brushes, extra lead pencils, and sample copies of the HERALD, and taking "Peeler" along to do the canvassing, we set out on the Chicago turnpike to visit the villages thereon, and takes notes for the directory.

We arrived at Springville just in time for dinner and put up at Smith's hotel, where we got a good square meal to which ample justice was done. After our dinner had settled we took a circuit of the town. Found our friend Thos. H. Mosher, who now enjoys the distinction of being the oldest merchant in Lenawee county, at the old quarters still selling goods and welcoming all comers with his accustomed cordiality. His store and the Lake Mills engage his entire attention, but business has become a second nature to him, and he can always find time for a social chat. J. B. Stephenson is running the corner store now, and appears to be doing a creditable business, while Mr. Jessup carries on the grocery store and post office on the north-west corner. We are indebted to Miss Rachel Mosher for assistance in procuring some of the village statistics which will appear in the directory.

The second station was at Cambridge. Here we found C. H. Dewey & Son on deck as usual. They conduct a general country store and are having a good trade. We dropped in to see landlord Nearing but found him out, and the same with F. A. Dewey who was absent from home.—Having taken the necessary notes on Cambridge we again started westward on the pike, and about sundown halted at "Uncle Alvin Osborn's," and we were easily persuaded to pass the night beneath his hospitable roof.—Had a good visit with him that evening talking over the old times when he lived in Tecumseh years ago. The next morning while breakfast was preparing he showed us some of his old relics. One was a sign board with the words "Jesse Osborn" thereon, which was nailed on the post in front of the "Silver Creek" house, when his father first took up his abode in Woodstock; a small plow and a pair of sheep-shears which came in with the original Tecumseh party in June, 1824, were among his mementos.—Jesse Osborn and his family came to Tecumseh in the summer of '24, and bought eighty acres along the creek north of John Whitenack's residence in the village. Mr. Osborn was a boy then, but his recollection is remarkably accurate in regard to events which transpired in those old times.

After an excellent farmer's breakfast we set out for Kelly's Corners, where we found quite a lively little country village. Geo. M. Lewis is the man who runs the general store and he seems to be the right man in the right place. Most of our information in regard to the village we obtained from him.

Turning southward, a drive of seven miles brought us to Addison, the growing bustling village on the western border. Our last visit to Addison was two years ago this summer, and we were surprised to see how much the town had improved during that period. We put up at Terpenning's Exchange and found it a good place to hang out at, although he is somewhat in "the suds" just at present with repairing and overhauling his house. He is making extensive improvements which will greatly increase his accommodations and make the Exchange a first class hotel in every respect. Among the principal business establishments of Addison we would note the following: O. B. Bowen runs an extensive harness store, which will compare favorably with any store of the kind in the county. Wm. N. Kline runs a good hardware store on the east side, and M. F. Turrell carries a similar stock equally as good on the west side.—Wm. E. Harrington has a good stock of canned goods, fresh and salt meats and runs a meat market in connection therewith. C. A. Smith runs a general country store and carries a very large stock of everything a person would wish to buy. This establishment is the leading mercantile house of Addison, and it has earned by honorable dealing the reputation it has so long enjoyed. We attempted to interview Mr. Smith, the proprietor of the mills, but somehow we happened to dodge each other. We found his head miller, J. H. Underwood, on deck however, and the business seems to move right along under his management. The entire business is practically in his hands as the proprietor lives at Gambolville, six miles away. The mill has a new turbine water wheel, two run of stones and two new set of rollers. Mr. J. H. Lane carries a large stock of groceries, boots and shoes, notions, etc., and is one of Addison's most promising young men. S. A. Power & Son have opened a new store lately on the west side and deal in drugs, paints and oils, tobacco, notions, &c. They have one of the neatest stores in the village.—S. D. Nesmith, a young merchant from Boston, has just opened a stock of dry goods and notions in the Swart out block, and proposes to give the citizens of Addison the nobbiest Dry Goods store in that section. We are somewhat known here, having recently married Miss Stella Burger. We predict that he will be a valuable addition to the businessmen of Addison. A. J. Kempton is opening a stock of watches, clocks and jewelry, and expects soon to establish himself in the village. Fred Curtis will open a bank in the house at the early day the safe has already arrived. A lumber yard is also an enterprise of the near future. There are several other business institutions in Addison, but we have no room to particularize. We took a drive out to see Fred Curtis on his big stock farm, but we failed to see him, as he was absent at Hillsdale. We were more fortunate with the Hathaways and found them at home on their beautiful farm east of the village, and the "latch string was out." They are dealing quite extensively now in well bred sheep, and intend to make a specialty of this hereafter. Had a good square dinner there Saturday noon.

The grading on the M. & O. road is nearly completed through Woodstock and the bridge ever the pond at Addison is completed. Addison will hear the whistle of the iron horse in a month or two more, and then will begin a career of business prosperity for the village to which her natural advantages entitle her. We started for home at two o'clock P. M., took supper with W. H. Smith, at Springville, and arrived at home in good season for Saturday night.

The Adrian common council, by a vote of five to three, has consented to let the Wabash company lay tracks on certain streets in that city, despite the protest of the property holders thereabouts.

—New Departure. — Having purchased the business and stock in trade formerly owned by Dr. E. Hause, I shall endeavor to continue the trade in a competent manner, and shall make a specialty of confectionery, teas, coffees, ice cream, by the dish or gallon. Oysters in their season. Lunches at all hours.
Will. T. Eccles.

—Slayton & Son are selling a number of the Cassaday Sulky Plows now and it would do you good to see the smile on a farmers' face after he has used one an hour.

—If you want a Drill, see the Hoosier Champion and Rooler Grain Drill at Snedicor's.

—No more poor bread made from Heck's all roll flour. Try it.
Heck Bros.

—The Improved Domestic with the new set of attachments beats them all. Call at Sparks' and see it.

—Natural looking and serviceable artificial teeth can be procured at Dr. B. F. Snyder's Dental Rooms.

—The Wilder Plow Sulky and Ellwood Sulky Plow, for sale by Snedicor.

—You can have your decayed and aching teeth extracted at Dr. B. F. Snyder's dental rooms, without pain, by taking vitalized air.

—Call at Sparks' and see the Improved Domestic. It is just too lovely for anything.

—Ladies, call at Slayton & Son's and see the Champion Creamery.—Save you lots of hard work.

—Don't forget that Snedicor sells the best plows in Tecumseh. Call and see for yourself and try one.

—Spring Tooth Harrows at Snedicor's.

—Call at the yard and mill of the Tecumseh Lumber Co., and examine their stock.

—Leave your orders for Sash, Doors, blinds, mouldings, window frames, tanks, troughs, etc., with the Tecumseh Lumber Co. They will receive prompt attention.

—One of the best blood purifiers ever made is "King of the Blood."—Sold by Druggists generally. Manufactured by D. Ransom Son & Co., Buffalo, N. Y.

—Grain Drills.—A very complete stock at Slayton & Son's. The one horse drill for standing corn, Rollers, Grain Drills, Shoe Drills and Tooth Drills. Call and get prices.

TECUMSEH, Mich., March 25, '83.
I have been troubled with a hard cough for many years, and have found nothing to help me until I tried Dr. Bigelow's positive cure, which has completely cured me.
WELCOME SHERMAN.

The medicine is manufactured by Griggs & Co., Ottawa, Ill., and sold by Baker & Hall, Tecumseh.

AYER'S Ague Cure.

IS WARRANTED to cure all cases of malarial disease, such as Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint. In case of failure, after due trial, dealers are authorized, by our circular of July 1st, 1882, to refund the money.

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists.

Vital Questions.

Ask the most eminent physician

Of any school, what is the best thing in the world for quieting and allaying all irritation of the nerves and curing all forms of nervous complaints, giving natural, childlike refreshing sleep always?

And they will tell you unhesitatingly, "Some form of Hops!"

CHAPTER I.

Ask any or all of the most eminent physicians:

"What is the best and only remedy that can be relied on to cure all diseases of the kidneys and urinary organs; such as Bright's disease, diabetes, retention or inability to retain urine, and all the diseases and ailments peculiar to women."

And they will tell you explicitly and emphatically "Buchu."

Ask the same physicians

What is the most reliable and surest cure for all liver diseases or dyspepsia: constipation, indigestion, biliousness, malarial fever, ague, etc.," and they will tell you:

Mandrake or Dandelion!"

Hence, when these remedies are combined with others equally valuable

And compounded into Hop Bitters, such a [illegible] (Concluded next week.)

CATARRH

ELY'S CREAM BALM

has gained an enviable reputation wherever known, displacing all other preparations. An article of unbounded merit.

CURES ROSE COLD IS NOT A LIQUID OR SNUFF.

HAY-FEVER

Apply by the finger into the nostrils. It will be absorbed, effectually cleansing the nasal passages of catarrhal virus, causing healthy secretions. It allays inflammation, protects the membranal linings of the head from additional colds, completely heals the sores and restores the sense of taste and smell. Beneficial results are realized by a few applications.

A Thorough Treatment Will Cure.

Unequalled for COLD in the HEAD, Headache and Deafness, or any kind of mucous membranal irritation. Send for circular. By mail, prepaid, 60 cents a package—stamps received. Sold by all wholesale and retail druggists.

HERALD OFFICE.

Typhoid Fever.

Typhoid fever is, of all diseases, preeminently a filth disease, traceable with as much certainty as fire from smoke. Wherever it exists it points unequivocally to unremoved filth; and is a disease, therefore, altogether and wholly preventable by proper sanitary measures. Notwithstanding, during the census year of 1870, there were in the United States 22,187 preventable deaths from typhoid fever. But, had there been the same ratio to the total population of the United States as in Philadelphia during Centennial year, the mortality from this cause would have been over 37,000. And this was far from being all, as regards Philadelphia. All over the country fatal cases of typhoid fever, and other diseases nearly allied to it, were attributable to the Centennial visitation, the neglected drainage, criminal insufficiency of water-closets and bad plumbing. These conditions so prominently manifest at the Centennial, and apparently to an extraordinary degree in Philadelphia even yet, as judged by the prevalence of typhoid fever, are, of all diseases of mortality, the most criminal, because the most easily preventable. Universal experience attests that water-closets inadequately provided with means for speedy and complete cleansing and aeration are prolific sources of typhoid fever and kindred affections in all temperate latitudes, and, with prevailing high temperature and moisture, of the still more deadly disease, yellow fever. And all the more dangerous are these conditions because they are not infrequently the means of spreading that disease to distant places. The existence of typhoid fever or allied diseases in any place is prima facie evidence of filthy surroundings.

About Letter Writing.

From Hill's Manual of Social and Business Forms.

As a rule, every letter, unless insulting in its character, requires an answer. To neglect to answer a letter, when written to, is as uncivil as to neglect to reply when spoken to.

In the reply, acknowledge first the receipt of the letter, mentioning its date, and afterwards consider all the points requiring attention.

If the letter is to be very brief, commence sufficiently far from the top of the page to give a nearly equal amount of blank paper at the bottom of the sheet when the letter is ended.

Should the matter in the letter continue beyond the first page, it is well to commence a letter above the middle of the sheet, extending as far as necessary on the later pages.

It is thought impolite to use a half sheet of paper in formal letters. As a matter of economy and convenience for business purposes, however, it is customary to have the card of the business man printed at the top of the sheet, and a single leaf is used.

In writing a letter, the answer to which is of more benefit to yourself than the person to whom you write, enclose a postage stamp for the reply.

Letters should be as free from erasures, interlineations, blots and postcripts as possible. It is decidedly better to copy the letters than to have these appear.

A letter of introduction or recommendation should never be sealed, as the bearer to whom it is given ought to know the contents.

A Good Poultry House.

For the foundation dig a ditch ending northwest and southeast, one foot deep, size of the building; in this build a wall two feet high on the surface, cement the whole space inside the walls and paint the walls inside and outside with cement, fill the remaining foot with dirt or anything else preferred; the house 10x12 and eight feet high to top of plate; it can be built of any kind of lumber, and studded or girted to suit the builder; clapboard or shingle the roof—it will be seen that one corner of the building is to stand exactly south; each side of this and close to it put in a large window, putting the frames on top of the sill; these will be provided with tight shutters for cold nights; this will give them the sun as soon as it rises, and they will be plentifully supplied until sunset.

This I consider of the greatest importance to laying fowls in winter. The ventilators will be furnished with tight-fitting slides to be moved with a cord. Inside the house is to be plastered the sides and top with mortar, mixed with an equal quantity of cement; this prevents the fowls from picking off the plastering. The furniture should be movable you then have a house that can be kept free from vermin very easy, and I don't think Jack Frost can injure the Leghorn family much in this house. This size house would keep thirty-three fowls.—*Poultry Journal.*

Summer in Norway.

The Norwegian house is one-half window. In their long winters they need all the sun they can get; not an outside blind, not an inside shutter, not a dark shade to be seen. Streaming, flooding, radiating in and round about the rooms comes the light, welcome or unwelcome, early and late. And to the words "early" and "late" there are in a Norway summer new meanings. The early light of the summer morning sets in about half-past 2, the late light of the summer evening fades into a luminous twilight about 11. Enjoyment of this species of perpetual day soon comes to an end. After the traveler has written home to everybody once by broad daylight at 10 o'clock the fun of the thing is over; normal sleepiness begins to hunger for its rights, and dissatisfaction takes the place of wondering amusement. This dissatisfaction reaches its climax in a few days; then, if he is wise, the traveler provides himself with several pieces of dark green cambric, which he pins up at his windows at bed-time, thereby making it possible to get seven or eight hours' rest for his tired eyes. But the green cambric will not shut out sounds; and he is lucky if he is not kept awake until 1 or 2 o'clock every night by the unceasing tread and loud chatter of the cheerful Norwegians, who have been forced to form the habit of setting up half their night-time, to get in the course of a year their full quota of c[illegible] time.

A housemaid writing to a friend respecting the fashions, said: "As for lonees, the loer it is the moar fashunable you air drest. Miss Goodra gave me a blue silk of hern; I cut its nek off, and Susin Simmons cut orf hern, and we attrax a grate deal of attenshun to our neks, promunading in the streets like uther ladys, and holding up our cloze. Nobody isn't nothing now which dosent hold up her cloze, and the hier you holes 'em the more you is notised."

Much distress and sickness attributed to dyspepsia and chronic diarrhoea is occasioned by humor in the stomach. Hood's Sarsaparilla is the remedy.

Dangerous Sport.

Dr. Peck, of the surgical institute, yesterday performed a surgical operation on the leg of a young girl by the name of Jordan, from Illinois, sent here for treatment. The bones of both of her legs will have to be partially removed, and the little sufferer will have to submit to two painful operations. The cause of her affection is from "jumping the rope," a pastime engaged in generally by young girls, resulting in necrosis or death of the bone. The doctor stated to a reporter in this connection, that similar cases were constantly occurring from the same cause, but more frequently resulting in necrosis of the spine, and that there has not been a month passed but more or less of this character come to the institute for treatment. He says that rope-jumping produces continuous concussion of the joints which impinges upon the bone, causing at the first stage periostitis, and finally resulting in death of the bone. He thinks that parents and teachers should be warned of this dangerous sport, and eradicate it entirely from the play grounds of [illegible] as it is ruinous in its effects, and is the prime cause of more cripples among the female portion of the community than probably any other cause. He also added that during the practice of his profession deaths had been occurring coming under his observation, which were the result of this and said: "I would warn children against rope-jumping, and would advise parents and teachers to prohibit it under all circumstances."—*Indianapolis Sentinel.*

Nigh. Air.

An extraordinary fallacy is the dread of night air. What [illegible] can we breathe at night but night air? The choice is between pure night air without, and foul air from within. Most people prefer the latter. An unaccountable choice. What will they say if it is proved to be true that fully one-half of all the diseases we suffer from are occasioned by people sleeping with their windows shut? An opened window, most nights in the year, can never hurt any one. In great cities, night air is often the best and purest air to be had in twenty-four hours. I could better understand shutting the windows in town during the day, than during the night, for the sake of the sick. The absence of smoke, the quiet, all tend to make the night the best time for airing the patient. One of our highest medical authorities on consumption and climate, has told me that the air in London is never so good as after ten o'clock at night. Always air your room then from the outside air, if possible. Windows are made to open, doors are made to shut—a truth which seems extremely difficult of apprehension. Every room must be aired from without—every passage from within. But the fewer passages there are in a hospital the better.—*Florence Nightingale.*

Wouldn't Contribute.

When Lincoln was practicing in the old Sangamon county court house, in the days of the old-fashioned slat settees, a tall, slim lawyer, noted for wearing a very short coat, slid along on the seat to be nearer the advocate addressing the jury. A protruding nail tore the seat of the lawyer's pantaloons. Obliged to follow his opponent immediately, there was no time to sew up the rent in the garment. A legal wag present wrote a subscription paper: "We, the undersigned, agree to pay the sums set opposite to our several names for the purpose of purchasing Brother Brown a new pair of pantaloons." Several of the lawyers put down sums ranging from fifty cents to ten cents. The paper was presented to Lincoln, who sat opposite the rear of the advocate, who, bending over in gesticulation, made quite an exposure. Lincoln took out his pencil, and wrote upon the paper: "I have nothing to contribute to the end in view." The lawyers roared with laughter; the judge asked to see the paper, when he, too, in turn, had to roar. All this time the unconscious victim of the fun was ignorant of the cause of the laughter, and at last joined in the merriment.

The Earth's First Land.

If one wishes to see the oldest parts of the world, let him go to Trenton Falls, N. J., and, after visiting the excavations made by the natural action of a mountain torrent into the ancient rocks, go to the hotel and see the collection made by the landlord, at an expense of $10,000, of specimens which prove the record of a geological age so remote that no imagination can grasp it. Professor Agassiz declared that the land reaching from Trenton Falls to Saratoga was the first that appeared above the sea on the creation. Here are the trilobites in great variety, all modeled in black marble, so perfectly preserved in form that the multitudinous lenses of their eyes are as apparent under the microscope as are those of a living fly. Millions of years before man walked the earth these creatures lived their life, the limestone took on their forms, and here they are! What are *scarabæi* and ancient *intaglii*, or any other engraved or modeled semblance of the old life, compared to the trilobites? These creatures not only lived, but had become everlasting stone millions of years before there was a living man to see them.

An Undoubted Blessing.

About thirty years ago, a prominent Physician by the name of Dr. William Hall discovered, or produced after long experimental research, a remedy for diseases of the throat, chest and lungs, which was of such wonderful efficacy that it soon gained a wide reputation in this country. The name of the medicine is Dr. Wm. Hall's Balsam for the Lungs, and may be safely relied on as a speedy and positive cure for coughs, colds, sore throat, &c.—Sold by all Druggists.

Durno's Catarrh Snuff.

This well-known remedy for Catarrh still maintains its well earned popularity. E. A. Savage, of Geneva, Kansas, writes, March 4, 1880. "I have used Durno's Catarrh Snuff, and it is the only thing that does me any good. It always effects a cure." Sold by all druggists everywhere.

Townsly's Toothache Anodyne cures instantly.

There are two sorts of ignorance; we start from the one, we repose in the other; they are the goals from which, and to which, we tend; and the pursuit of knowledge is but a course between two ignorance, as human life is only a traveling from grave to grave.

Ayer's Sarsaparilla contains Iodide of Potassium and Iron, with the best vegetable blood purifiers.

Reading Servants.

There are many women who complain if their housemaids show a fondness for reading, even in moments of leisure; but they could hardly find the kind of service they like in the servant who cannot read. Did any of you ever notice the difference between the educated and the uneducated housekeeper? The one brings all her intelligence to bear upon her work, the other works with a stolidness that betrays her sluggish brain. If all servant girls were educated, one would save money even at a higher rate of wages than by employing uneducated women. One of the first business houses in New York, known as well in Europe as in this country, furnishes books, teachers and apparatus for a thorough instruction of all their employes in the common branches, and the rudiments of science and mechanics, requiring them to give an hour daily at recitation, for which they prepare out of work hours. No deduction is made because of this hour's absence from the work room or on account of instruction or board. The house gets its return from outlays of this sort from the increased skill and intelligence of its employes. If the house mistress can feel and take an interest in the substantial improvement of her domestic help and make them sensible of it, she will have a basis for expectation that they in turn will be conscientious in their regard for her interests and her rights. In all stations of life intelligence is to be praised.

Detectives and Private Officers

Usually wear their badges of authority concealed under their clothing, but Dr. Thomas' Eclectric Oil wears its badges in the form of printed labels attached to each and every bottle, so that all may know its mission. It is given full and complete authority to arrest all aches and pains, and does its duty every time.

Artificial Respiration

The Medical Press and Circular, 1880, informs us that in a communication to the French Academy, Professor Fort raises against the question of premature interments. One fact he mentions is, that he was enable to restore to life a child three years old, by practicing artificial respiration on it in four hours, commencing three hours and a half after apparent death. Another case was communicated to him by Dr. Fournol, of Billancourn, who, in July, 1878, reanimated a nearly drowned person after four hours of artificial respiration. This person had been in the water ten minutes, and the doctor arrived one hour after asphyxia. Professor Fort insisted also on the utility of artificial respiration in case of poisoning, in order to eliminate the poisons from the lungs and glands. The length of time it is desired to practice artificial respiration in any case of apparent death from asphyxia, Professor Fort has not yet determined, but his general conclusion is that it should be maintained perseveringly for several hours.

What Three Applications Did.

"I was troubled very much with sore feet. Three applications of Thomas' Eclectric Oil entirely cured them. Nothing better in the market." Jacob Butler, Reading, Pa.

—In asking a man questions concerning his wife, you should not say "How is your lady?" This is vulgarity, and invariably betrays lack of cultivation. The term of wife is far more beautiful and appropriate and refined, whatever may be said to the contrary. Suppose a lady were to say, instead of "my husband," "my gentleman," or suppose we were to speak of "Mrs. Fitzmaurice and her gentleman." The thing would be positively ludicrous, and its obverse is none the less so if rightly considered. A man's wife is his wife, and not his lady. The term should be tabooed.

The Kind we Like.

The medicine we most like is that which does its work quick and well. Burdock Blood Bitters are the quickest kind of a cure for dyspepsia and liver and kidney affections.

SELF-CONTROL IN SPEECH.—If a man would get through life honorably and peacefully, he must necessarily practice self denial in small things as well as great. The temper has to be held in subjection to the judgment, and the little demands of ill-humor, petulance and sarcasm kept resolutely at a distance. If once they gain an entrance into the mind they are apt to return and establish for themselves a permanent occupation there. It is necessary to one's personal happiness to exercise control over our words as well as acts, for there are words that strike even harder than blows. The stinging repartee that rises to the lips, and which, if uttered, might cover an adversary with confusion, how difficult it is sometimes to resist saying it.

Hay Fever.

For twenty-five years I have been severely afflicted with Hay Fever.—While I was suffering intensely I was induced, through Mr. Tichenor's testimonial to try Ely's Cream Balm.—The effect was marvellous. It enabled me to perform my pastoral duties without the slightest inconvenience, and I have escaped a return attack. I pronounce Ely's Cream Balm a cure for Hay Fever. Wm. T. Carr, Presbyterian Pastor, Elizabeth, N. J.

I can recommend Ely's Cream Balm to all Hay Fever sufferers, it being in my opinion, founded upon experience; a sure cure. I was afflicted with Hay Fever for twenty-five years, and never before found permanent relief. Webster H. Haskins, Marshfield, Vt.

The most disgusting thing in humanity, is a female snob. A masculine fop is unendurable enough, but the female snob is worse. A woman with a woman's heart is never a snob. Neither wealth nor position can make her such. She may occupy the highest social position, and have wealth in abundance, but she never fails to be a lady, and is known as such in all classes. Instead of repelling those beneath her in social standing and wealth she commands their respect. The snob feminine is a woman who has been pulled up the social stairway, probably by some one above her or with some one who has wealth, and who then immediately assumes the air of snobbery over those with whom she has formerly walked. There are two things the feminine snob never possesses, brains and heart. Without these neither wealth nor assumed superior social standing count for much with sensible people.

Pittsford, Mass., Sept. 28, 1878.

Sirs—I have taken Hop Bitters and recommend them to others, as I found them very beneficial.

Mrs. J. W. Tuller.

Sec. Women's Christian Temp. Union

Grave Robbers.

Of all classes of people the professional grave robbers are the most despised. He robs us of our dear friends for a few dollars. How different is this new grave robber, Dr. Bigelow's Positive Cure, which robs graves of thousands of consumptives. This unequalled remedy for coughs, colds and consumption, whooping cough, croup and all throat and lung diseases, subdues and conquers these troubles speedily, safely and thoroughly. Trial bottles free, of Baker & Hall.

That is the most perfect government in which an injury to one is the concern of all.

DR. J. W. KERMOTT'S

MANDRAKE PILLS,

CURE Sick-Headache, Dyspepsia, Liver Complaint, Indigestion, Constipation, and PURIFY THE BLOOD.

NOTICE.—Without a particle of doubt Kermott's Pills are the most popular of any on the market, having been before the public for quite a century, and having always performed their work [illegible] unsolicited for them have [illegible] never attained. Price [illegible] Sold by all druggists.

The Great Healer of all Inflamed Injuries and Disorders.

It is constantly effecting the most wonderful cures, while the unparalleled demand with which it meets, stamps it at once as the greatest medicine of the age for outward application.

The most incredulous are convinced, and the most skeptical are compelled to believe in the power of this great remedy.

WHAT IT CURES.

All Sores, Cuts, Bruises, Sprains, Burns, Sore Throat, Lameness, Rheumatism, Piles, Inflammation of Lungs and Bowels, Bronchitis, Croup, Salt Rheum, Chilblains, Affection of the Spine, Erysipelas, Nervous Irritation, and all disorders attendant with Inflammation.

It never fails to restore the natural functions of the skin and equalize the circulation of the blood. By this means a controlling power is gained over the most malignant forms of disease. It penetrates to every portion of the human frame; every bone, muscle, vein, nerve and ligament is searched out and made sensible to its soothing and healing influence. Hence it copes readily with internal as well as external diseases.

Over 40 Years,

This Ointment has been used by the people throughout the United States, and our confidence in its qualities is such that as we have no space here to insert any of the numerous certificates of cures which we have from all parts of the country, we simply ask those readers of this notice who have ever used this Ointment, to frankly state their experience with it to inquiring friends. If but one in a hundred would do this we should be perfectly satisfied with the result. Full directions for use will be found on pamphlet around each bottle.

Price 25 and 40 cents per bottle. Sold by all dealers in medicine.

D. RANSOM, SON & CO., Prop's
Buffalo, New York.

A CURE GUARANTEED IN ALL CASES

For Old and Young, Male and Female,

Magnetic Medicine; a Brain and Nerve Food; Positively cures Night Losses, Spermatorrhœa, Impotency, Nervous Debility, Leucorrhœa, Barrenness; and for all (BEFORE) weaknesses of the Generative (AFTER) organs in either sex, it is an unfailing and positive cure. Tones up the debilitated system, arrests all involuntary discharges, removes mental gloom and despondency, and restores wonderful power to the weakened organs. With each order for twelve packages, accompanied with five dollars, we will send our Guarantee to refund the money if the treatment does not effect a cure. It is the Cheapest and Best Medicine in the market. Full particulars in Pamphlet, which we mail free to any address. Sold by all druggists, one package 50 cts.; Six for $2.50, or sent by mail on receipt of price by addressing the MAGNETIC MEDICINE CO., DETROIT, MICH. Guarantees issued in Tecumseh by Waldo & Doty.

COMPOUND OXYGEN NOT A DRUG

A NEW TREATMENT.

For Consumption, Asthma, Bronchitis, Dyspepsia, Catarrh, Headache, Debility, Rheumatism, Neuralgia, and all Chronic and Nervous Disorders.

A CARD.

We the undersigned, having received great and permanent benefit from the use of "COMPOUND OXYGEN," prepared and administered by Drs. STARKEY & PALEN, of Philadelphia, and being satisfied that it is a new discovery in medical science, and all that is claimed for it, consider it a duty which we owe to the many thousands who are suffering from chronic and so-called "incurable" diseases to do all that we can to make its virtues known, and to inspire the public with confidence.

We have personal knowledge of Drs. Starkey & Palen. They are educated, intelligent and conscientious physicians, who will not, we are sure, make any statement which they do not know or believe to be true, nor publish any testimonials or reports of cases which are not genuine.

WM. D. KELLEY,
Member of Congress from Philadelphia.

T. S. ARTHUR,
Editor and Publisher "Arthur's Home Magazine," Philadelphia.

V. L. CONRAD,
Editor "Lutheran Observer," Philadelphia.

PHILADELPHIA, PA., June 1, 1882.

☞ In order to meet a natural inquiry in regard to our professional and personal standing, and to give the public increased confidence in our statements, and in the genuineness of our testimonials and reports of cases, we print the above "CARD" from gentlemen well and widely known and of the highest personal character.

Our "Treatise on Compound Oxygen," containing a history of the discovery of and mode of action of this remarkable curative agent, and a large record of surprising cures in Consumption, Catarrh, Neuralgia, Bronchitis, Asthma, etc., and a wide range of chronic diseases, will be sent free. Address,

DRS. STARKEY & PALEN,
1109 and 1111 Girard St., Philad'a.

$500 Reward!

WE will pay the above reward for any case of Liver Complaint, Dyspepsia, Sick Headache, Indigestion, Constipation or Costiveness we cannot cure with West's Vegetable Liver Pills, when the directions are strictly complied with. They are purely vegetable and never fail to give satisfaction. Sugar coated. Large boxes containing 30 pills, 25 cents. For sale by all druggists. Beware of counterfeits and imitations. The genuine manufactured only by John C. West & Co., "The Pill Makers," 181 & 183 W. Madison St., Chicago. Free trial package sent by mail prepaid on receipt of a 3 cent stamp. Sold by all druggists in Tecumseh.

$1,000 Forfeit!

Having the utmost confidence in its superiority over all others, and after thousands of tests of the most complicated and severest cases we could find, we feel justified in offering to forfeit one thousand dollars for any cases of coughs, colds, sore throat, influenza, hoarseness, bronchitis, consumption in its early stages, whooping cough, and all diseases of the throat and lungs, except Asthma, for which we only claim relief, that we cannot cure with West's Cough Syrup, when taken according to directions. Sample bottles 25 to 50 cents; large bottles one dollar. Genuine wrappers only in blue. Sold by all druggists or sent by express on receipt of price. John C. West & Co., sole proprietors, 181 & 183 W. Madison St. Chicago, Ill. Sold by all druggists in Tecumseh.

FITS A Leading London Physician establishes an Office in New York for the Cure of EPILEPTIC FITS. From Am. Journal of Medicine.

Dr. Ab. Mesrole (late of London), who makes a specialty of Epilepsy, has without doubt treated and cured more cases than any other living physician. His success has simply been astonishing; we have heard of cases of over 20 years' standing successfully cured by him. He has published a work on this disease, which he sends with a large bottle of his wonderful cure, free to any sufferer who may send their express and P. O. address. We advise any one wishing a cure to address

For sale by all leading druggists. $1.50. (12)

The Dr. S. A. Richmond Med Co. St. Joseph, Mo.

Put a Brand on Him.

"Women are a necessary evil," he said, bringing down his fist hard on the counter to emphasize the heartless remark. It was in the village store at West Milton, Saratoga County, and the speaker was the central figure of a group of bucholic philosophers. He was homely, slovenly and sixty. "There's where I differ from you altogether," said Mr. George T. Graham, of the same place. "Women are mostly what men make 'em. When husbands are brutes, wives will fall in submission or make home hot for the men; and they're unnatural in either character. Love them, and especially be good to them when they're sick, and you'll have no trouble. There's my own wife, now. She's suffered a good deal with dyspepsia, nervous prostation and other ailments that took the bloom off her cheeks and the spring out of her steps. Well, she saw an advertisement of PARKER'S TONIC, and thought it would be just the thing for her case. Gentlemen, I sent five miles after a bottle. She took it. I sent again after more. So several times. Trouble? Why, if you could see how much good it has done her, you would say that women are the greatest of God's blessings and Parker's Tonic is the next."

This preparation which has been known as Parker's Ginger Tonic, will hereafter be called simply Parker's Tonic. This change has been rendered necessary by substitutes imposed upon their customers by unprincipled dealers under the name of ginger; and as ginger is really an unimportant flavoring ingredient, we drop the misleading word.

There is no change however in the preparation itself, and all bottles remaining in the hands of dealers, wrapped under the name of Parker's Ginger Tonic contain the genuine medicine if the fac simile signature of Hiscox & Co., is at the bottom of the outside wrapper.

WORDS FAIL.

"Words fail to express my gratitude," says Mr. SELBY CARTER, of Nashville, Tenn., "for the benefits derived from

Ayer's Sarsaparilla.

Having been afflicted all my life with **Scrofula**, my system seemed saturated with it. It came out in **Blotches, Ulcers, and Mattery Sores**, all over my body." Mr. Carter states that he was entirely cured by the use of AYER'S SARSAPARILLA, and since discontinuing its use, eight months ago, he has had no return of the scrofulous symptoms.

All baneful infections of the blood are promptly removed by this unequalled alterative.

PREPARED BY

Mere Forms of Law.

One of the officials of Justice alley was the other day called upon by an old gray headed farmer and his wife, together with a neighbor, and outside the door they hitched an old half blind horse whose cash value was reckoned at $25.

"You see" explained the old farmer, nabur Jones wants to buy the old hoss out there; but he wants a bill o' sale signed by wife and I. We want you to draw up one for us."

The justice reached down one of the printed blanks, read it out, and then said:

"Now, you listen while I read this over and see if it is all right. All ready, now."

"Know all men by these presents. That ——"

"Presents! Why I'm not going to present him with the hoss!" interrupted the farmer.

"And we don't want any presents from him!" added the wife.

"That's all right—only a legal form," exclaimed his honor. Listen:

"Know all men by these presents. That Andrew Jackson Wayne ——— first part ——— for and in consideration ——— sum of $25 ——— grant ——— bargain and sell ——— party ——— second part ——— his executors, administrators ——— and assigns forever ——— covenant and agree ——— defend the same ——— heirs executors and administrators ———"

"I haven't got any executors or administrators!" interrupted neighbor Jones.

"No; all he's got is a wife and two girls!" added the owner of the horse.

"All form—all mere form," explained the justice, and he went on:

"And assigns forever ——— covenant and agree ——— defend the same ——— heirs executors and administrators ———"

"William, I shall never sign no such paper!" suddenly exclaimed the wife as she rose up.

"Nor I, either," stoutly replied the husband.

"Why, I'd shake in my boots every time I met a constable!"

"It is all mere form according to law," explained his honor. "All bills of sale read this way."

"Looks to me as if it was sort o' tangled up," said neighbor Jones. "The old hoss is blind of one eye, and how can they warrant him?"

"And what has this hoss sale got to do with his heirs and covenants?" inquired the old man.

"I won't sign—I won't have anything to do with it!" exclaimed the wife, as she walked around. "We've always kept clear of the law, and we hain't going to get into no scrape and lose our farm now—not if we know it!"

The more the justice tried to explain, the bigger the words looked, and the trio finally walked out. While they were unhitching the horse along came a house painter, and when he had heard their story he picked up a piece of paper in the alley, pulled out a stub of a pencil and wrote:

"We hereby sell this horse to John Jones for $25, cash down. We raised him from a colt, and his name is Andrew Jackson."

The paper was signed, passed over with the horse, and as the farmer received the money he said:

"That's all there is to it, law or no law, and it didn't take two minutes. Why I'd taken Andrew Jackson back home and knocked him in the head, afore I'd put my name to that paper binding us to keep on covenanting and agreeing and assigning and administering a whole life-time on one old hoss!"

BUSINESS LETTERS.

1. In letters of business use as few words as possible.
2. Business letters should be promptly answered.
3. Use a clear, distinct writing, avoiding all flourish of penmanship or language.
4. Come at once to your subject, and state it so clearly that it will not be necessary to guess your meaning.
5. Give town, county, state and date explicitly. It is frequently of great importance to know when a letter was written.
6. Read your letter carefully when finished, to see that you have made no omissions and no mistakes. Also carefully examine your envelope, to see that it is rightly directed, with postage stamp affixed.
7. Copy all business letters of your own, by hand, or with the copying press, made for the purpose.
8. Send money by draft, post-office order, or express, always stating in the letter the amount, and by what means sent. Thus you have something to show for money, guaranteeing you against loss.
9. Write date and from whom received across the end of each letter, and file for future refrence, fastening the letters together with rubber bands, or binding in a letter-file adapted to the purpose. The posession of a letter sometimes prevents litigation and serious misunderstanding.

In ordering goods, state very explicitly the amount, kind, quality, color, shape size, etc., and on what terms wanted. Whether on wish the same sent by freight or express and what express. Much inconvenience is experienced among business men because of a neglect to designate explicitly what is wanted.

Should the writer wish to make suggestions, ask questions, or add other matter to the letter, which is foreign to the subject, such words should be placed entirely separate from the order. Of fifty or a hundred letters received to-day, by the merchant, that one which is mixed up with complaints enquiries, etc., will probably be laid over till to-morrow, or until such time can be gained as will enable the merchant to read it through. Had the order been explicitly stated, and the suggestions placed elsewhere, the goods would have been forwarded immediately.

Send your order, also, early enough to give yourself plenty of time to wait for the goods to arrive.

Indulgent parents who allow their children to eat heartily of high-seasoned food, rich pies, cake, &c., will have to use Hop Bitters to prevent indigestion, sleepless nights, sickness, pain, and, perhaps, death. No family is safe without them in the house.

Why Mail Matter Goes Amiss.

In this country there are 18 Brooklyns; 7 Baltimores, 5; Buffaloes, 16; Burlingtons, 17; Charlestons, 17; Chicagoes, 4; Cincinnattis, 8; Clevelands, 10; Columbuses, 19; Daytons, 25; Detroits, 5; Indianapolises, 2; Louisvilles 15; Lowels, 15; Memphis', 8; Milwaukees, 3; Nashvilles, 14; Omahas, 5; Pittsburghs, 8; Philadelphias, 7; Portlands, 24; Quincys, 15; Richmonds, 22; Springfields, 25; St. Josephs, 15; St. Louises, 4; St. Pauls, 12; Toledos, 7; Washingtons, 30; Wilmingtons, 13; and Williamsburgs, 28. There are eleven Bostons in the United States—one each in Texas, Georgia, Louisiana, Kansas, Kentucky, Missouri, Ohio, New York, Pennsylvania, Tennessee and Virginia.

No family or traveler, in a malarial district, should ever be without that sure antidote—Ayer's Ague Cure.—Warranted to cure all malarial disorders.

Growth of America.

In the number and importance of its cities the United States, as Mr. Robert P. Porter shows in the *International Review*, has advanced to the third rank. Among the countries of Europe, only Great Britain and Russia now have more cities of 25,000 inhabitants and upward than appear in our enumeration of 1880. So slight is the advantage of these two foreign nations that the next census will undoubtedly show the United States at the head of the column. Since 1870 old cities have grown and new ones have sprung up at a rate that must astonish the Old World. In the great West cities have doubled and trebled in size within less than ten years, and one—Denver—shows a sevenfold increase of population. Taking 8,000 inhabitants as a minimum size, we now have 225 cities, a gain of fifty-nine in ten years, while the cities of 50,000 inhabitants and upward have increased in number from seventy-one to 141. In 1870 no American city had a million inhabitants, and only two had half that number. In 1880, one appears with more than a million and four with more than half a million each. To-day nearly one-quarter of our population is urban. In 1800 only one in 31 lived in cities, in 1850 one in 15, in 1880 one in 10, and in 1890 nearly one fifth was urban. This is a significant indication of the striking advance made in manufacturing and other industries which flourishes in cities and towns. If the growth in population and in cities has been rapid, the material progress made since 1870 has been generally great and in many directions extraordinary. It is but a day or two ago that we gave in these columns the census figures showing the unprecedented increase of nearly 100 per cent. in the cereal product of the United States. The yield of the two leading grain staples was enormous ten years ago, but the wheat crop has now attained a magnitude 73 per cent. and the corn crop 133 per cent. greater than they were then. Returns of the cereal crops are the only agricultural statistics of the new census yet given to the public. But other trustworthy reports show that the general progress in agriculture has been extraordinary. Since 1870 the production of cotton has increased from 3,000,000 to 6,090,000 bales, while the wool clip of the country has nearly doubled. Still more marvelous is the growth of our export trade in farm and domestic products. From 1870 to 1880 the bread and bread-stuffs sent to foreign countries advanced in value from seventy-two to two hundred and eighty-eight million dollars, provisions from twenty-nine to one hundred and twenty-seven millions, and live animals from one to fifteen million dollars. This remarkable agricultural advance has been attended with an equally striking extension of the transportation system of the country. There are now two miles of railroad where there was one in 1870, while the cost of moving agricultural produce from the Northwest to the seaboard is now only about one-third of what it was then. The rich mines of the far West have also been made to contribute handsomely to the material prosperity of the past ten years. The production of gold has, indeed, been gradually declining for a long series of years, but the annual yield of silver has been raised since 1870 from $15,000,000 to $40,000,000.—*New York Herald, July*, 1881.

Nearer to Nature.

Nature has made her laws with us, which we must obey or suffer the penalty. This penalty is often lung or throat trouble, which leads on to consumption. Every man believes consumption incurable. People have been educated to this belief which is proven incorrect by Dr. Bigelow's Positive Cure, which is nature's great helpmate, and it cures consumption and all throat and lung diseases speedily and permanently. Trial bottles free, of Baker and Hall.

Kiss And Make

What married life needs to give it new tone and sweetness is more of the manner as well as the spirit of the old courting days. The beautiful attentions which before marriage were so pleasant are too often forgotten afterward. The gifts, cease or come only with the asking; the music dies out of the voice; everything is taken as a matter of course. Then come dull, heavy, hard days to the unhappy souls that have solemnly promised to "love honor and obey," etc., and the consequence is they begin by wishing themselves apart, and are not always content with the mere wishing.

Very much of the pleasure of courtship is derived from the constant attention of the parties to each other. Their affection for each other's voices evinces itself in every possible way. Every sentence is gilt-edged with compliments spoken in tender tones. Every look is a confession of love; every act is a new word in the exhaustless vocabulary of love. Gifts and personal sacrifices are the more emphatic expressions of the spirit no language can articulate; no evidence declare. It is a fact that devotion declares itself continually in words and acts. At the touch of Cupid's wand the language grows more rapid, the fingers gentler in their touch, and the voice more musical. Love is very like the silver jet of a fountain that leaps heavenward; if denied its natural outlet it ceases to flow altogether. The love of courtship can be kept bright and beautiful through married life by giving it utterance or expression in words; and the more it is allowed to flow out in delicate attentions and noble, helpful services the stronger it will become and the more satisfying. The beautiful attentions of the husband refresh, brighten and make the wife strong-hearted and keen-sighted in everything pertaining to her home and her husband's happiness. And the parting words of love from the wife give the husband new courage as he goes forth to meet the trials and difficulties of business. The home is home only when pervaded with this blessed influence of love, and the marriage vow should not be made once for all at the altar, but should be kept by husband and wife "until death do them part."

Husbands, talk to your wives lovingly as in the early days of courtship, when you wished to win their affection. Wives, meet every show of tenderness from your husbands as you did in the beautiful days that linger so pure and sweet in your memory, and your home will be a type of that heavenly home that only is promised to those who love.

The True Test.

If a man is hungry within an hour more or less after a meal he is a dyspeptic, it shows his stomach is not able to dispose of what he has eaten, but to eat again, and thus impose more work, is absurdity. Take Dr. Jones' Red Clover Tonic which cures dyspepsia, and all stomach, liver, kidney and bladder troubles. It is a perfect tonic, appetizer, blood purifier, a sure cure for ague and malaria diseases. Price 50 cents, of Baker and Hall.

A Shrewd Reply.

Sir Walter Scott says that the alleged origin of the invention of cards produced one of the shrewdest replies he had ever heard given in evidence. It was made by the late Dr. Gregory, at Edinburgh, to a counsel of great eminence at the Scottish bar. The doctor's testimony went to prove the insanity of the party whose mental capacity was the point at issue. On a cross interrogation he admitted that the person played admirably at whist. "And do you seriously say, doctor," said the learned counsel, "that a person having a superior capacity for a game so difficult, and which requires, in a pre-eminent degree, memory, judgment, and combination, can be at the same time deranged in his understanding?"

"I am no card player," said the doctor, with great address, "but I have read in history, that cards were invented for the amusement of an insane king." The consequences of this reply were decisive.

Polishing the Wrong End.

Many men daily polish their boots who never give a thought to the condition of their hair, except to harrow it painfully with brush and comb, or submit it to the repulsive attentions of the average barber. What hapens? Why, this: From neglect, mental anxiety, or any of a score of causes, the hair turns prematurely gray and begins to fall out. Paker's Hair Balsam will at once stop the latter process and restore the original color. An elegant dressing, free from grease.

Old Bourbon.

"Old Bourbon" is a name given to the whiskey made in Bourbon county, Ky., in times gone by, when there was but little made elsewhere. Then every well-to-do farmer converted all his surplus grain into whisky, which was mashed by hand and boiled in two little copper stills; clean water used, and all the grain selected with the greatest regard to soundness; consequently, when ripened by age, it was eagerly sought after, and acquired a world-wide reputation, and nearly all whiskies now are branded "Old Bourbon." There is no more of that kind made now. The great bulk of whisky is made of sweet or sour mash, or scalded with water. There cannot be much difference in the qualities of the same strength.

Griggs' Glycerine Salve.

The best on earth can truly be said of Griggs' Glycerine Salve, which is a sure cure for cuts, bruises, scalds, burns, wounds and all other sores. Will positively cure piles, tetter and all skin eruptions. Satisfaction guaranteed or money refunded. Only 25 cents. For sale by Baker & Hall.

ESTATE OF WILLIAM WARING.

STATE OF MICHIGAN, County of Lenawee, s.s. At a session of the Probate Court for the County of Lenawee, holden at the Probate Office in the city of Adrian on Friday, the 17th day of August, in the year one thousand eight hundred and eighty-three.

Present Norman Geddes, Judge of Probate.

In the matter of the estate of William Waring, deceased.

On reading and filing the petition, duly verified, of Alva Waring praying that administration of said estate may be granted to Frederick B. Wood.

Thereupon it is ordered, That Monday, the 17th day of September next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs-at-law of said deceased, and all other persons interested in said estate, are required to appear at a session of said Court, then to be holden at the Probate office, in the City of Adrian, and show cause if any there be, why the prayer of said petitioner should not be granted.

And it is further ordered, That said petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said County of Lenawee for three successive weeks previous to said day of hearing.

THE "FISHING LINE."

TAKE THE
GRAND RAPIDS & INDIANA RAILROAD.
The only route to the Trout, Grayling and Black Bass Fisheries and the famous Summer, Health and Game Resorts and Lakes of

Northern Michigan.

The waters of Grand Traverse Region and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

Brook Trout abound in the streams, and the famous American Grayling is found only in these waters.

The Trout Season begins May 1st, and ends September 1st. The Grayling Season opens June 1st and ends November 1st.

Black Bass, Pike, Pickerel, and Muskallonge also abound in large numbers in the many lakes and lakelets of this territory. The sportsman can readily send trophies of his skill to his friends or "Club" at home, as ice for packing fish can be had at nearly all points.

Take Your Family with You. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing.

The Climate is peculiarly beneficial to those suffering with Hay Fever and Asthmatic affections.

New Hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw city forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit, Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns, and Fishing Tackle carried free at owner's risk. It is our aim to make Sportsmen feel "At Home" on this route. For Tourist Guide, a handsomely illustrated book of 160 pages free, Time Cards, Folders and further information address

The Upper Yosemite Fall.

This magnificent waterfall is one of the most stupendous of nature's wonders. It is the highest fall yet discovered, leaping clear from the rocks into the air, and falling in one unbroken sheet 1,550 feet into the chasm below. After it leaves the rock above it is soon torn into spray, being swayed and moved by the wind with marvelous grace and endless variety of motion. For a short distance this cataract descends in a wide unbroken sheet, with a continuous rumble; it is then caught and whirled upward in a rising seething and ceaseless wreathing mist, finally falling into the chasm below, and rising in a fine cloud-like spray, often tinged with all the varying colors of the rainbow. The aspect of this majestic water fall is awe inspiring in the extreme. The great mass of water descending with a continuous roar in one unbroken sheet, swayed by the force of the wind in graceful undulations, its white foaming mass in bold relief like a broad ribbon on the dark rocks, with its many tinted rainbow mists, is a sight to move the beholder with admiration and awe. From a distance this fall resembles a great sheet of white satin; [illegible] first of a series of three cataracts of the Merced River, the second being 250 feet and the third 450 feet high. The course of the river below the falls is covered with boulders and rocks carried down by the seething waters, the rocks are covered here and there with moss and ferns, rendering many agreeable contrasts of color.

Prof. Brewer, describing this fall, says: "It seemed as mobile as smoke, and assumed new varieties of outlines each instant, so light and airy that it seemed as easily swayed by the wind as lace; yet it struck with deadening thunder. The concussion was perceptible through the granite for some distance. The discharge of water is estimated at 250 to 300 cubic feet per second. In winter the water falls behind a great cone of ice, which is from 100 to 200 feet thick, and emerging beneath this ice, a grand stupendous arch is formed like those in the glaciers at Mt. Blanc. Standing at the foot of this magnificent fall, a thousand feet above the bottom of the valley, the violent tempest of spray, ice pellets, or hail, is felt with great force, the hands and face being stung like shot by pelting hail stones. These fell in great profusion, but rapidly melted, for the sun shone full on the fall, and the adjoining rocks reflected the heat. The diameter of some of these pellets was 1.10 of an inch. Thus we have here the spray of a waterfall condensed and frozen into hail. The water of this stream, being supplied from the melting snows, plunges over the brink of the precipice just at the freezing point. In its fall it appears to be atomized for 1,200 or 1,400 feet of its descent. A large volume of air is drawn into this falling mass along its whole course, the sheet spreading as it descends. The quantity of air is so great that it pushes outward on the bottom of the valley and is very perceptible as a cool current more than a mile distant from the base of the upper fall. The air as sucked into the fall is immediately cooled to 32° by the ice cold water. As it passes in, it is very dry, and the rapid saturation within the sheet is sufficient to freeze a portion of the drops."

Preservation of the Eye-Sight.

A remarkable proof of the harmlessness of using glasses, even a single glass, is furnished by watchmakers, who appear to enjoy an enviable immunity from eye diseases. It is uncommon to see a watchmaker in an ophthalmic hospital. The habitual exercise of the eye upon fine work tends to the development and preservation of its powers. This is in analogy to a truth now getting currency that brain work is necessary to physical health. The idea is developed in this remarkable passage from a book by Robert Brudenell Carter on "Eye-sight, Good and Bad." The man who would preserve the full integrity of his functions to a ripe old age must avoid excess of every description, and must endeavor to employ the higher faculties of his mind somewhat more energetically than is now always customary. A time comes to every one when the physical powers begin to decay, and then, unless the brain has been kept active and recipient by exercise, there is nothing left to live, and the man perishes. We say that he died of gout, or of overeating, or of heart disease, or of kidney disease, or of the failure of the particular organ which was the first to exhibit symptoms of the approaching end. In reality he has died of stupidity, artificially produced by neglect of the talents with which he was endowed. That which is true of the organism as a whole, is true also of its parts; and the eyes, among others, are best treated by an amount of systematic use which preserves the tone of their muscles and the regularity of their blood supply. The acuteness of sight, moreover, is in a great degree dependent upon the mental attention habitually paid to visual impressions; and I have often observed this acuteness to be below the natural average in agricultural laborers who, if able in one sense to read, were not in the habit of reading, and who were not accustomed to look at small objects. I have even had reason to think that the wives of such men were indebted to their household needle work for the maintenance of a higher standard of vision than that of their husbands; and I have no doubt that idleness of the eyes, if I may use such an expression, is in every way hurtful to them, and that proper and varied employment is eminently conducive to their preservation in beauty and efficiency.

Noises of Workshops.

To those who carry on operations requiring much hammering or pounding, the following will be found a great relief: 1. Rubber cushions under the legs of the work bench. 2. Kegs of sand or sawdust applied in the same way. A few inches of sand or sawdust is first poured into each keg; on this is laid a board or block upon which the log rests, and around the legs is poured fine dry sand or sawdust. Not only all noise, but all vibrations and shocks are prevented; and an ordinary anvil, so mounted, may be used in a dwelling house without annoying the inmates. To amateurs, whose workshops are usually located in dwelling houses, this device affords a cheap and simple relief from a great annoyance.

PAPER WINDOW SHUTTERS.—An Ohio man has taken out a patent for shutters in which pasteboard is used instead of wood. The slats or panels can be covered with colored or stamped paper, so as to imitate any desired kind or pattern of wood. The inventor claims as the advantages for such shutters, that they are lighter and cheaper than wood, that they do not warp or split, that they can easily be fitted to new positions, that they are susceptible of a greater variety of patterns, and that they will contribute to an improvement in the appearance of cheap dwellings.

'Tis only a fact all people should know—
Everybody high, everybody low—
All who desiring their teeth to look white,
Brush with Teaberry each morning, each night;
Each speck of Tartar will yield to its Power,
Removes instantly all substances sour;
Really, you'll find it a very great treasure;
You'll prove by its use—try it at leisure.

CUT THIS OUT.

"Frank P. Warner came into our store to purchase a sample bottle of Zopesa for a friend, and stated that he Mr. Warner was afflicted with Kidney and Liver trouble for five years and had paid $200 or $300 doctor's bills, and has now been completely cured by the use of two large bottles and one sample bottle of Zopesa. He was so bad at one time that he lost 37 pounds of flesh, but after using Zopesa claims he is a sound man, and now weighs 147 pounds. He was loud in its praise, and readily consented to all we asked, to use his name for reference.

DRAIN COMMISSIONER'S NOTICE.

PUBLIC notice is hereby given that on the 8th day of September A. D., 1883, at ten o'clock in the forenoon at the residence of the undersigned, in the township of Clinton, County of Lenawee, and State of Michigan, I will meet for the purpose of letting contracts for the construction of a drain in said township of Clinton, described as follows: Beginning at a point in an old ditch about 36 rods North and [illegible] East of the quarter post between sections [illegible] and 12 of said township of Clinton and running thence in the general direction of the ditch or water course as marked out and laid down on the plat or map of said ditch or water course made by Fred Dudley, surveyor, and dated August, 1883; thence on a magnetic bearing S 10° W 25 rods; thence S 27° 10' W 25 rods; thence S 45° 45' W 20 48-100 rods; thence S 31° 45' E 26 80-100 rods; thence S 2° 45' W 20 4-100 rods; thence S 14° 20' W 19 96-100 rods; thence S 2° 30' E 54 72-100 rods; thence S 45° 45' E 26 rods; thence S 24° 0' E 13 8-100 rods; thence S 15° 0' W 18 32-100 rods; thence S 24° 45' W 7 28-100 rods; thence S 8° 45' E 6 80-100 rods; thence S 42° 30' W 14 4-100 rods; thence S 2° 30' E 35 52-100 rods; thence S 18° 15' E 20 56-100 rods; thence S 47° 0' E 22 32-100 rods; thence S 75° 15' E 18 28-100 rods; thence S 45° 15' E 6 80-100 rods; thence S 25° 30' W 12 48-100 rods; thence S 2° 30' W 20 28-100 rods; thence S 30° 30' W 4 rods; thence S 7° 0' E 19 64-100 rods; thence S 61° 0' E 19 28-100 rods; thence S 7° 45' W 32 52-100 rods; thence South 36° 30' W 5 rods; thence S 22° 30' W 4 04-100 rods to the stake at the bridge on East and West dividing line between sections 13 and 24, about 49 rods West of the East quarter mile post. The dimensions of said drain to be as follows: Width of bottom, [illegible] feet, slope of each side, 1½ feet to one foot rise, depth as marked on the profile drawing of said ditch at each stage, and at that time I will let contracts for the construction of said drain by sections to the lowest responsible bidder or bidders.

Also take notice that I will then and there, at the time of letting of such contracts, be present to review all assessments of benefits upon the lands upon which said drain is to be constructed, and assessed for the construction thereof.

Dated at Clinton township this 28th day of August, 1883.

PHILIP KEHOE,
Township Drain Commissioner for the township of Clinton, Lenawee County, State of Michigan.

BOOKS.---125 TONS

of Standard Books, many of them the best editions published. Your choice sent for examination before payment, on reasonable evidence of good faith, the books to be returned at my expense if not satisfactory. Special bargains this month. New publications every week. Prices lower than ever before known, ranging from two cents for Tennyson's "Enoch Arden," unabridged, large type, to $15 for the largest and best American Cyclopedia. Not sold by dealers—prices too low. Circulars free. Mention this paper.

Rheumatine!

An Internal Remedy and a Sure Cure for all kinds of

Rheumatic Complaints!

If you are suffering from

Kidney Complaints

Give Rheumatine a fair trial. You will never regret having done so.

Testimonial from Mr. Thomas H. Day, of No. 83, 23d street, Chicago, who has been for many years employed by the Wagner Sleeping Car Co. and is now conductor of one of their cars running between New York and Chicago.

J. N. SUTHERLAND,
Manager Rheumatine Mfg Co.,
Niagara Falls.

CHICAGO, June 25, 1882.

Dear Sir—It gives me pleasure to inform you of the benefit your rheumatic cure "Rheumatine" has been to my daughter, who for the past few years has been a great sufferer from Rheumatism at times being quite helpless. She took three (3) bottles of your preparation, and I can bear testimony to its speedy action in affording her relief from pain and soreness. Thanks to Rheumatine her health is now quite restored.

Yours very truly,
THOS. H. DAY.

See our change of Testimonials every week in Daily Papers.

SHE WAS SCREAMING WITH PAIN.

CRAWFORD CO., PA., CITY OF TITUSVILLE.

Personally appeared before me, Mary Murry, who, being duly sworn, according to law, deposes and says: That she resides at the corner of Franklin and Water streets in said city. That she was suffering with excruciating pain from the inflamatory Rheumatism for the space of seven days; that she was screaming from the pain and got no rest during all this time. That she received relief within twenty minutes after taking the first dose of Wilson's Lightning Remedy for Rheumatism, and went to sleep. And that she has had a permanent cure within ten days, and that she was up and about within five days.

MARY MURRY.

Sworn and subscribed to before me April 15th, 1880.

DR. B. MINCER,

Scientific Optician!

I have devoted 25 years wholly to a study of the eye, and how to aid vision properly, and I make a specialty of fitting glasses to the eyes that have been injured by cheap, inferior glasses. I manufacture every kind of glasses, and guarantee satisfaction. Read what prominent physicians of Adrian say:

Having for some time past used glasses to improve my sight, without satisfactorily gaining the object, I called on Mr. Mincer, optician, of Detroit, who readily adapted glasses to my eyes, with which I am so well pleased, that I cheerfully speak in his favor. His method of examining and its application in selecting glasses to fit the eye can only be acquired by a knowledge of the useful organ to which must be added extensive experience. He has also adapted glasses to Mrs. Baker's eyes with which she is well pleased. I recommend him to all who need glasses adapted to their wants; poor glasses are an abomination.

V. A. BAKER, M.D.

ADRIAN, Nov. 15, 1882.

I have used spectacles bought of Mr. B. Mincer for the past three months, and find them superior to any I have ever used, and can cheerfully recommend him to any one in need of glasses, and the benefit of his experience in the science of optics to adjust proper lenses.

DANIEL TODD, M.D.

I have investigated the work of Mr. B. Mincer, optician. I have reason to believe that he understands his profession, and adjusts excellent glasses on scientific principles.

C. RYND, M.D.

PARKER'S GINGER TONIC.

ONCE TESTED ALWAYS PREFERRED!

This great remedy has won its way to the highest place in the esteem of the most intelligent people. There are daily recruits to its hosts of friends. Its performance is invariably

BETTER THAN ITS PROMISE.

It gives tone and power. For complaints of the kidneys, bowels, stomach, liver and lungs, for all the subtle troubles of women and for those bodily disorders induced by anxiety, care and mental strain, its effects will surprise and charm you. It is not an essence of ginger. Delicious to the palate, an antidote to the liquor habit, and exceedingly helpful to the aged and feeble. 50c. and $1 sizes. HISCOX & CO., New York.

TIRED ALL OVER.

What Rested and Refreshed a Weary Man in Memphis.

"No, it never amounted to an acute pain, but continued to be a dull weary ache in the small of my back," writes Mr. James Thomas, of No. 59, Madison st., Memphis, Tenn. "This was an old experience, and life became dull music. I was tired all over, with pain in the lower limbs, and a habit of lying awake of nights. Recently I tried one of Benson's Capcine Porous Plasters and was decidedly relieved within twenty-four hours. It may have been Providence that did the work, but I give the credit to Benson's porous plaster." Mr. Thomas' reverential idea does him credit, but Providence works by agents, and among them Benson's plaster ranks first as an external remedy. It acts quickly in relief and healing, and renders life better worth living. Price 25c. Look in the middle of the plaster for the word Capcine. Ask your physicians about it. Seabury & Johnson, Chemists, New York.

For Sale Cheap,

And on easy terms, A FARM OF 120 ACRES, located in the township of Norvell, Jackson Co., three miles from the village of Brooklyn and ½ mile from district school. The farm is well fenced, has good buildings and is under a high state of cultivation. A good brick house with eight rooms besides closets, and a brick bottom cellar. It has 75 acres of plow land, 10 acres of well assorted timber, 25 acres of meadow, and 15 acres of pasture. There are two wells on the place and a brook of living water that never freezes over. A good apple orchard, a young peach orchard, and lots of small fruit. The location is an excellent one and the neighborhood is first-class. For further particulars call at the

SPECIAL CORRESPONDENCE.

ADDISON ATOMS.

Jack Frost hasn't called on us as yet but is expected nightly.

Farmers express some fears that the corn crop will be a partial failure; the cool weather having materially impeded its maturity of late.

If it be true that anticipation affords more pleasure than participation the cider drinker of western Lenawee will be afforded a blissful autumn this year. Apples, like ten dollar notes, are few and far between.

The boys bustle and business booms in this villa—was appropriately observed by an ex-resident a few days since.

Building is progressing finely on the west side, while preparations are making for a commodious ware house east of the mill to be controlled by the Smiths.

Rev. Duke Whiteley, pastor of the M. E. church for two years past, preached an appropriate farewell sermon last Sabbath evening from the text "And now brethren I commend you to God."

The village school will open for the fall term on Monday next with Mr. Hutchins, of Woodstock, as principal, and Miss Ada A. Hodge, of this place as assistant.

CLINTON CULLINGS.

N. B. Banks, dentist, and wife, left yesterday for Detroit where they expect to make their future home. The Dr. made many warm friends while here and we regret that he found it necessary to leave.

Geo. W. Lewis, of South Bend, Ind., is here, probably to look after his interests in the woolen mills.

Mr. Haskins, a grain buyer of Adrian, came up here Monday to canvass the situation and prospects for buying grain at this place, and for making it the base of his operations in the future. He found the merchants and business men pretty well stirred up in the matter, and seemed favorably impressed with the outlook. The demand for a good resident buyer has become chronic, and there is to be no let up until we have one. The business men are all determined that the wrongs they have suffered, and the great disadvantages under which they have labored for the past year or two shall be removed, and that right soon. We need a buyer in whom the public (especially the farmers) can have implicit confidence and one whose interests are identical with those of the town, and we are going to have such an one.

SPRINGVILE SNUFF.

J. H. Smith has sold his house and lot and expects to make Tecumseh his home after the 17th.

T. H. Mosher is about to repair his mill by putting in the roller system, and has ordered $1400 worth of machinery to be put in at once.

R. S. Rogers has the foundation laid for an extension to his horse barn.

Misses Belle and Lizzie Kinney have returned to Brooklyn again to attend school.

Miss Cynthia Monaghan and Miss Winnie Rogers have returned to Tecumseh to attend school.

Wm. Clayson goes to Monroe this week to attend to the duties about a farm for a year.

Railroad collision on the M. & O. one day last week, at or near Cambridge station, between the walking boss and the time-keeper. Blowing off steam the cause.

J. H. Breese will soon move into his newly purchased house in the village, while Fred Groger and family will occupy the one at the mill.

School meeting passed off very quiet and the district expect soon to have a general turnout of men and teams to grade off the grounds in proper shape about the new school house.

COUNCIL PROCEEDINGS.

VILLAGE OF TECUMSEH,
Council Room, Sept. 3, 1883.

Regular session.

At this regular session council convened at the usual hour.

Present, Messrs. Mills, Heesen, Smith, Sparks and the Recorder.

Minutes of last regular session read and approved.

REPORTS OF COMMITTEES.

On Finance:

Report in writing, and recommend the payment of the following claims out of the contingent fund.

W. C. Jordan, services as St. Com. 25 days	$50 00
Robt. Magill, 9½ days labor on streets	14 25
Wm. Brown, 10 " " " "	15 00
John Hubbard, for watching on streets two nights	4 00
J. W. Patterson, for hay 2130 lbs	10 65
H. H. Keyser, 26 bu. oats	7 40
Mt. Vernon Lantern Wks. Co., lamp supplies	16 82
John M. Hibbard, for one day, services as Deputy Marshal	2 00

On motion the report was accepted and adopted, and orders directed to be drawn for the respective bills.

NEW BUSINESS.

The following resolution was adopted by Council:

Be it Resolved by the Common Council of the Village of Tecumseh that subdivision nine, (9) of section two, (2) of an ordinance relative to licenses, passed August 7, 1881, be and the same is hereby amended so as to read as follows:

9.) The proprietors, managers, or persons in charge of any concert, musical entertainment, theater, public exhibition, plays, games or shows for money, shall pay a license for each day of not less than three, or, more than five dollars at the discretion of the President and Recorder: provided, nothing in this chapter contained shall apply to selling property by virtue of legal process, or under mortgage, nor persons selling fruit, garden, dairy or farm products, nor to any exhibition of any public or private school, or music-teacher, or association, order or society being resident of said village, nor any concert or entertainment for the benefit of any church.

The committee on streets recommend that the grade of Maumee street be raised at the crossing of the Michigan & Ohio railway to correspond with the grade of such railway. On motion the matter is left with the committee with instructions to do what to them seems for the best interests of the village.

The Marshal, in behalf of Mr. James, came before the Council and represented that the assessors, in extending the valuation of the property of E. M. Gray, made a mistake whereof the taxes on that property was $4.20 in excess of what were intended by the assessor, and Mr. James having paid this sum into the village treasury, he asks that it be refunded to him by Council.

On motion the Recorder is directed to draw an order on the treasurer in favor of Mr. James, that the above matter might be equitably adjusted.

The following claims were presented and referred to Finance Committee:

John M. Hibbard, services as Deputy Marshal	$5 00
John M. Hibbard, services in the arrest of Pat Redmond	1 70
John Smith, services in the arrest of John Campbell	1 25
Thos. Kyle, services in the arrest of James King	1 70
Charles Bidwell, for board of persons committed to jail under the ordinance to wit:	
John Campbell, 30 days	$18 00
James King 20 days	12 00
Patrick Redman, 25 days	15 00
Locking the above prisoners	2 10

Council then adjourned.

P. S. McKINNON,
Recorder.

THE DETROIT ART EXPOSITION.

An Admirable Building and a Magnificent Art Exposition.

The Detroit Art Loan Exhibition opened September 1st promises to exceed the most sanguine expectations of the projectors, both as to size and quality, numbering over four thousand exhibits, one thousand of which are paintings by the best living artists or originals and valuable copies of the old masters.

The building is of brick, 135x153, and has eighteen exhibition rooms, beside the necessary offices, &c.

The ground plan herewith will measurably show the scope of this ambitious enterprise:

It is impossible to give briefly an adequate idea of the details of the exhibition; as a help, however, to the proper understanding of the same, it will be well to know that each of the twelve smaller rooms, 30x30 will be as large as any apartment in the Louisville Art Exhibition, the latter having but four all told.

Several of these in the Detroit Art Loan are occupied by single exhibitors, whose collections, in some cases, will be of at least $150,000 in value.—Such citizens of Detroit as the Hon. James F. Joy, General R. A. Alger, Senator Palmer, Mr. James McMillan, together with Mr. Hurlburt, of Cleveland, and many of his friends, are fully identified with the work, and their choicest treasures will be placed on exhibition. Among the articles of special interest will be a fine painting sent as a gift from Pope Leo XIII. at Rome, with his blessing upon it and the Loan, a bit of gold and silver embroidery once belonging to Queen Elizabeth, antique bronzes from Commander Goringe, who brought the obelisk to New York, and Cyprian antiquities from General de Cesnola, many elegant silk textile fabrics, costly laces, curious almost without number, exquisite etchings and water colors (a room full of each); more than twenty fine marble statues form a single feature of the exhibit.

The various railroad and steamboat lines have decided upon offering excursion tickets at extremely low rates.

The Lime-Kiln club is coming.

MICHIGAN STATE ITEMS.

The house of Andrew Fraser, of Corunna, burned last week.

A new middlings purifier factory is to be built at Jackson.

The new salt works at Marine City will be put in operation in a few days.

Rumors of another daily paper being started at Lansing.

Caro has a population of 1,763 an increase of 401 since the census of 1880.

The large new threshing machine factory at Battle Creek will be occupied about Oct. 1.

James Dawson, a pioneer of Allegan, died last week. He had lived in Allegan since 1837.

Mrs. John Hite, of Charlotte, has been adjudged insane and taken to the asylum at Pontiac.

A post of the G. A. R. is the newest thing at Brighton. The boys are closing up the ranks solidly in Michigan.

A 12-years-old lad, son of H. R. Hill, of Muskegon, was drowned last week while playing on the saw logs at North Muskegon.

The Mancelona iron furnace, which burned down last May, will rebuild immediately, and will give employment to 150 men.

The Roscommon school inspectors having neglected or failed to elect a county examiner, M. F. Parker has been appointed to fill the place.

Burglars visited the house of Peter Oakley, of Galesburg, last week, and took a suit of clothes, a watch and chain, and $5 in cash.

The new prison or asylum for insane convicts will be located at the southeast corner of the house of correction grounds.

Marshall's central school building is now heated by means of a complete steam apparatus, put in at a cost of $4,000.

The editor of the Romeo Observer is in the cave of gloom. Some malicious person imposed upon him a bogus marriage notice of two persons who have no idea of marrying.

The boiler shop, pattern room and barn owned by Ford & Madison and occupied by Hill & Co., foundrymen, at Kalamazoo, burned last week.—Loss about $5,000.

Arthur Tullon, of near Benton Harbor, was shot by some unknown person last week, while at work in the field. The shot was fired from the bushes.

The wife of Rev. E. H. Teale, of Charlotte, has received information from France that, by the recent death of an aunt, she is heir to a large fortune.

There is yet no solution of the Marshall mystery as to the cause of the death of the unknown man, whose body was found in the woods near that city a few days ago.

About three tons of celery are shipped daily from Kalamazoo, and sometimes as much as four tons are shipped in a day. Kalamazoo celery is making the town famous.

A man named Joseph Griffin jumped on and off the night express train bound east; as it drew up at Kalamazoo last Friday, and as he jumped off he fell beneath the wheels and was instantly killed.

A Romeo auctioneer advertises for sale, on account of a local merchant, nine judgments, 21 accounts and 13 notes. The merchant proposes to sell that sort of goods every month until he gets his books clear.

Dr. Henry Baker, of Coldwater, died last Thursday night. He was born in 1812 and was an old settler of Coldwater. He was prominent in odd fellow circles and was buried under the auspices of that order.

Battle Creek rejoices greatly over the fact that the members of their boat club brought home two diamond pins from the Michigan Centre regatta. The boys were given a fine reception on their arrival home.

The logs that ran away from Grand Rapids a few weeks ago during the Grand river floods carrying off the railway bridges are to be hoisted out at Grand Haven and shipped back by rail.

The Lake Shore & Michigan Southern railroad company will greatly enlarge their shipping facilities at Kalamazoo, and have begun the erection of a new freight house and other buildings.

An apiarest at Buchanan has forty stands of bees from which he will get over 2,000 pounds of honey this season. One stand has already yielded over 100 pounds. Both German and Italian bees are kept, but the former are preferred.

IRISH LAMENTATION.

Cold, dark and dumb lies my boy on his bed;
Cold, dark and silent the night dews are shed;
But swift and fierce fall my tears for the dead!

His footprints lay light in the dew of the dawn
As the straight, slender track of the young mountain fawn;

But I'll never again follow them o'er the lawn.

His manly cheek blushed with the sun's rising ray,
And he shone in his strength like the sun at mid-
But a cloud of black darkness has hid him away.

And that cloud forever shall cling to the skies;
And never, ah, never, I'll see him arise,
Lost warmth of my bosom, lost light of my eyes!

THE KEEPER'S DAUGHTER.

A PRETTY GOOD LOVE STORY.

A lighthouse on a rocky coast. Outside, thunder, lightning, wind, and rain, and great black waves dashing up against the rocks at the foot of the tower. Inside, a winding flight of stairs leading to an octagon-shaped room containing the plainest furniture. The occupants, a girl of eighteen, tall and lithe, with black hair hanging in massive bands to her waist, and luminous grey eyes under straight black brows. Her dress of gray waterproof cloth was short and scant, and hung in wet folds about her limbs; and strangest of all girdles, a coil of rope encircled her waist and trailed one end on the floor. By her side a boy of fourteen years, with his blue blouse open at the throat, and a faded plush cap on his dark curls. These two were bending over a man who lay in all his magnificent length on the floor. A picturesque looking man, with fair hair clinging in dripping masses to his forehead; a curling golden beard, and a white firm throat, and one might be persuaded that the closed lids with their long fringes covered a pair of steel blue eyes.

"Reckon he's a goner, Liz," said the boy, as he paused in his vigorous rubbing of the man's hands.

The girl was forcing some liquor from a tin cup between the blue lips, and did not answer directly; but when their patient gave the faintest possible sigh, she exclaimed joyfully: "See, Neddie, he breathes! Now work fast," whereupon they both fell to rubbing him at a great rate.

When Allen McIntyre opened his eyes he looked about him confusedly. The odd little room, the girl with her black braids, and the boy looking so like her that one would at once recognize the relationship; the drenched condition of all three, and the strange languor through all his frame—what did it mean? He closed his eyes wearily, and then the boy spoke up in this bluff fashion:

"You came near going under, cap'n, but Lizzie pulled you out."

Then McIntyre remembered all, and languidly raised himself into a sitting posture.

"It is too wild a night to be afloat in a little craft like that," said the girl, making a gesture seaward, where a tiny boat had broken up an hour before.

"It was fair when I left the shore," replied the man. "I ventured further than I intended. Then the wind went down, and I could only drift until the storm arose. I have a recollection of a fierce rush of wind and wave that upset my boat, and a blow on my head, probably from some part of the boat as I went over.

"Yes," said the boy, "there came a flash of lightning, and Lizzie and I, looking out, saw the boat capsize. So Lizzie caught a rope and ran, and I after her."

"We're used to that sort of thing, eh, Lizzie?" Lizzie nodded and the boy continued animatedly: "You see, my father keeps the light, but he is sick just now, so Lizzie and I tend the light—we always do when father is sick or gone to the mainland—and we've pulled out more than one fellow more than half dead. Why—"

"Never mind that, Neddie," interrupted his sister, gently, and the unspoken reproof in her voice had the effect of making the lad look somewhat shame-faced as he went back to the first part of his story.

"Well, sir, we ran down the slope at the side of the cliff out there, where the waves were tearing up like frozen wild horses. And every time it lightened we could see you bobbing around out there like a piece of cork. We were afraid of your striking against the ledges so Lizzie fastened one end of the rope about her waist and I held the other while she went straight in and struck out for you."

McIntyre uttered a low exclamation, and turned his gaze from Neddie to Neddie's sister. The boy wagged his head proudly.

"Ah," said he with gleaming eye, "that's nothing for our Liz to do! She caught you, and I pulled you both in. But you're monstrous heavy! I thought we'd never get you up stairs."

McIntyre laughed as he rose rather doubtfully to his feet.

"I feel a trifle shakey," he said, and then, "It is easy to see that you are brother and sister. I am Allen McIntyre, at your service, Miss Lizzie," and he bowed in a fashion that gave the lie to his declaration of shakiness. "Of course I realize that you and your gallant brother here have rendered me a great service—one for which you shall not go unrewarded, although I can never hope to fully recompense you."

Lizzie raised her head haughtily.

"Sir, such work as we have done to-night we do not for wages. If you feel strong enough, I will walk with you to the house. I think the storm is passing over. We live a quarter of a mile from the light. Our accomodations are plain enough, but there is no other house on the island."

"O, I am as good as new, now," said McIntyre; "but will you leave this boy here all alone."

She smiled.

"Ned is not afraid, and he can tend the light as well as I."

"Very well, I will go with you."

He waved a smiling adieu to the boy, and followed his guide down the narrow stairway.

Two days later a small sail boat put out from the island, which, when it returned, brought McIntyre's luggage.

Lizzie's father who was laid up with an attack of rheumatism, had taken a fancy to the young man, who expressed a desire to spend a few weeks there at any price they might charge. Capt. Clyde straightway ordered Neddie off in his new boat to the mainland for the gentleman's traps. The youngster obeyed this order with alacrity, for the good humored ease of the stranger, together with his evident appreciation of "our Liz," had wrought favorably on our Neddie. Even the maiden aunt, who kept the house smiled frostily at the prospect of this pleasant addition to their family.

McIntyre who had been wandering about three or four hundred miles from home in search of a quiet place to spend the summer, congratulated himself on having drifted to the very place.

"Although it was an expensive style of drifting," he remarked with a smile, as he enclosed a bank note in an envelope to be sent to the owner of the little craft which had slipped him out into the waves abreast of the light-house.

A week later, as he sauntered shoreward, there came to his ears a wildly sweet strain of melody. As he listened in amazement, for he had seen no musical instrument about the place, he began to realize that it was a part of Strauss' artist life waltzes that he heard—a strain that he often whistled. He stepped round the jutting of the cliff and there, leaning against the granite wall, was Lizzie, her chin dropped carelessly on a little red violin, as she drew the bow across the strings. She flushed like a guilty thing when she saw McIntyre.

"You whistled that the other day," she faltered, "and I liked it so much—it haunted me all the time."

He stepped forward.

"Why, Lizzie! Is it possible you play like that without notes?"

"I don't play much now," she said, drawing her dark brows over her eyes. "A party of ladies and gentlemen came here to visit the lighthouse, once, and overheard me playing. I heard one of the ladies say, 'The idea of a girl with a fiddle!' So I thought perhaps it didn't look well."

"Not look well, indeed!" and he laughed in merry scorn. "Why, child, did you ever hear of Camilla Urso?"

"No."

"Well, she is a lady, and she makes the most exquisite music on a fiddle and thousands of people go to hear her. Why, Camilla Urso herself would listen with pleasure to your music, Lizzie," said McIntyre extravagantly. "Who taught you to play?"

"No one. This violin belonged to my father, and he learned me how to tune it. I pick up tunes that I hear, but I never heard anything half so beautiful as the tunes I hear you sing and whistle."

McIntyre smiled; his repertoire of music consisted of snatches of operas, waltzes, redowas and German airs, which had dimly associated in his mind with nights of brilliant gayety; and he wondered dreamily how this pure-minded, healthy-souled girl would look upon the elegant dissipation carried on by the set of which he was the favorite. A sudden glow warmed his heart as he thought that not one of the fine ladies who had swung languidly through the mazes of that very waltz of the great composer's could have rescued him so bravely from the jaws of death as Lizzie had—Lizzie, who stood there so quietly, with her little violin hanging from her breast, and her fingers straying lovingly over the strings.

"Tell me about Camilla Urso," she said presently. "Did you ever hear her play?"

"Yes, indeed! I have a paper in my trunk containing a little sketch of her life, which you may read for yourself, and which will tell you better than I can of her talent."

For a moment Lizzie's eyes met his own, a look of shame and distress gathering in them.

"Mr. McIntyre, that will be of no use—I cannot read.

"Lizzie!"

Her violin slipped from her grasp and would have fallen to the ground had not McIntyre caught it, and she covered her face with both hands.

"But Lizzie," persisted her companion, in some perplexity, "I do not understand. There are good public schools in the city, and surely your father must have known that it was his duty to give a girl like you an education, to say nothing of Neddie, who is growing up such a splendid young fellow."

"It is very kind of you to say such things of Neddie and me, we are common people, and ours is a common life. Neddie did spend two years with our uncle who lives in York state. He went to school there. But father doesn't think much of book learning. Aunt Jane never had time to help me, and Neddie is too restless to keep still long enough, I suppose." She continued quaintly, "You who live out in the world look at these things in a different way; but I know of many who are just where I am. Why, there is a whole family on that island," pointing to a tiny speck away to the eastward, "who cannot read or write. Once in three months, perhaps, they go the mainland. I scarcely ever go. I suppose I shall always live here, and I am contented—I think," and a look of doubt gathered in her eyes; "at least I was. But lately I have wished so much that I could read and had books—for it is so lonely here in the winter."

"Well, dear child," said the young man gently, this gives me the privilege of paying my debts, doesn't it?"

"Your debts?" echoed Lizzie in surprise.

"Certainly. Did you not fish me out of the water a week ago? Well, now you shall put your six feet of driftwood to some service. I will teach you to read and to write."

After that McIntyre proved the most faithful of teachers, and his pupil made steady progress in her lessons. Neither was the violin any longer in disgrace. Lizzie played to attentive ears while learning a deeper lesson than either at first realized. McIntyre was the first to wake up. He was a man of the world, and understood himself or thought he did, thoroughly. Accordingly he started, one morning for a stroll along the beach to think it all over.

"As the case now stands," he soliloquized, as he lit a cigar and threw away the match, "it is either Lizzie or the world; and I confess, the world has charms for me." Then came a thought which caused his heart to beat faster, and sent the hot blood to his brow. But he shook his broad shoulders indignantly, and lifted his hat to let the cool sea-breeze sweep through his hair. "I must be a greater scoundrel than I am to work so great a wrong on that dear girl. Faith!" and he laughed in bitter scorn of himself, "that would be a fine way to recompense her for saving my life. She might better have left me to feed the fishes! Could I take her home with me as my wife?"

His gaze wandered absently over the swelling waves, and lingered on a far-off sail that dipped and rose, dipped again, until it sank below the horizon. His lip curled involuntarily as he thought of the delicate ladies in his set, and how wretched they would make the poor girl's life in their own high-bred fashion. No—but would they, though?"

A faint amusement lingered in his face as he recalled Lizzie's rather stately carriage and stately dignity that redeemed her from being commonplace. He laughed out.

"It would be fun to see her among all those peacocks. Poor Lizzie! What a shame that she has been neglected! If she had received half the advantages of any one of my acquaintances she would have surpassed them all. Well, well, it is high time I returned home. I have been here six weeks. Yes, I will go away to-morrow, and forget her, as she will forget me."

So saying McIntyre threw away the end of his cigar and started into a brisk walk along the shore, coming directly upon the object of his thoughts, who was pacing to and fro, drawing plaintive music from her violin. She wore a scarlet jacket over her gray dress, and a white handkerchief, tied over her head and under her chin. His heart throbbed faster at the sight of her.

"Fool!" he muttered, "to think I could leave her. Now, then, my man,

"It's all for love, and the world well lost."

Lizzie greeted his approach with a smile, but played to the close of the strain before she spoke. It was a little German air that he had taught her.

"Is that right?" she queried, as she finished.

"I cannot tell you."

Then meeting her look of astonishment with his own earnest gaze, he said;

"Lizzie, will you care very much when I go away from here?"

Her eyes dropped, the red blood died her cheek and brow for a moment, and then faded away, leaving her quite pale.

"I think it will be well for you to go," she said.

"And why, Lizzie, will you tell me? You need not fear to tell me anything," he added, as she hesitated.

She looked away from him, and her voice was almost inaudible as she answered.

"Because—because—O, I cannot tell you! You know—"

"I have thought of going, Lizzie; but I realized to-day that I cannot leave you—ever again, dear."

He put one arm about her, but she drew away from him, trembling from head to foot.

"Don't Mr. McIntyre! I want to remember you kindly, and I cannot if you use such language to me."

"For heaven's sake!" he cried in astonishment, "tell me, have I said anything wrong to you? Is it wrong to love you? If that is a sin, then I am the greatest of sinners."

"I do not forget that you are a gentleman, and I but a poor, ignorant girl, who knows only what you have taught her."

"But, Lizzie, I ask you to be my wife, and you have not answered me. I do not boast when I say my suit would not be rejected in most families of high standing where I am known."

"Ah, that is the idea," she exclaimed, hastily; "if as you say, you do care for me"—she stammered a little over the words, "you would soon grow weary of my stupid ways. I should shame you every day of your life, and your grand friends would wonder at your choice, and I should die of homesickness."

"With me, Lizzie?"

"Yes, even with you!" smiling and blushing as she met his eyes.

He laughed—he was so sure of winning her—and kissed her mouth.

"Well, sweetheart, I will live here then, and turn keeper of the light after your father. Will that suit you?"

"Don't deceive yourself, Mr. McIntyre. We would not be happy together, and think how terrible it would be—bound together forever."

He laughed exultantly and with a great deal of amusement.

"Good! I think it would be a mighty pleasant thing. Come Lizzie, you can deny all my power. Do you not see that your own happiness depends upon your answer? Now kiss me, dear, and tell me that you will take the life you were so brave to save into your own keeping."

He drew her gently toward him, but she faced him suddenly, with great tears trembling on her long lashes.

"Do you think it costs me nothing to refuse you—you who have made my life so beautiful these few short weeks? I am poor and ignorant—such a wife would hinder and disgust you in time. It is for your good that I refuse to accept what seems like a heaven to me?" And then, swift as a deer, she flew along the shore, leaving McIntyre to struggle between anger, amusement and wounded self-love.

All that day he tried to speak with Lizzie alone, but she gave him no opportunity. At last, in very desperation, he tapped at the door of her father's room. Capt. Clyde was again suffering with rheumatism, and the young man found him in the easy chair, while Lizzie hovered about him.

"Capt. Clyde," said McIntyre, as blocked the doorway with his broad shoulders to prevent Lizzie from escaping, "I wish to say a few words to your daughter in your presence, since she refuses to grant me that privilege elsewhere."

"Say on, my lad, she should be proud to hear whatever you have to say to her."

"Well, Lizzie, I will go away from here to-morrow, and stay as long as you bid me. When the time is up I will return to claim you for my wife. You shall see that this is no idle, passing fancy."

His eyes, grave and sad, rested on the girl's flushed face, and the bluff captain's eyes widened in amazement.

"Speak out, gal," he commanded. "Have you anything to say to this young man, who woes you like a gentleman? Shall he come—or no?"

And Lizzie answered with downcast eyes: "If he comes one year from this time, and still cares for me, I will be ready."

"And is that all, Lizzie?" he said, stepping toward her with outstretched arms.

"No, I'll be bound!" said the old man, with a sly twinkle in his eyes. "When I went courting, my little girl used to kiss me." And reaching over he gave Lizzie a little push that sent her into the arms of her lover; whereupon they all laughed, and Lizzie, after kissing McIntyre shyly, slipped from the room.

* * * * * * * *

A whole year passed by, and not unhapily to Lizzie, who had faithfully endeavored to improve herself. She spent the winter "on the mainland," with some friends. She studied, read, watched the people about her, and, never coarse herself, despite her commonplace life at home, she fell easily into the new groove. Although not unhappy, the girl's cheek was paler than of yore, and her eyes held a wistfulness that had grown in them since parting from her lover, for occasionally this thought crossed her dreams for the future: "He may not come at all—he may forget."

But Allen McIntyre was truer than most of his kind; for the early fall brought him again to Lizzie's house. While he waited in the old-fashioned sitting room, the door was opened hesitatingly, and who was this before him?

Allen had left a young gypsy, magnificent in her way, with coal black braids and flashing eyes, yet scarcely the figure for a drawing room, in her short gown and thick coarse shoes; a daughter of the sea, sun-browned and fearless. But this—was this Lizzie? A graceful woman, in trailing robes, and the shining hair braided and coiled about her head, resting in a coronet a queen might envy, above the low broad brow, paler than of old, her eyes downcast, but shining softly through their happy tears, her mouth smiling triumphantly. Was this Lizzie? Why, not a woman in all his brilliant throng he remembered could compare with her.

Every summer a handsome gentleman and his dark-haired wife visit the lightkeeper's home; and every fall they return to their stately home in a far-away city, where the lady does the honors of her grand house with a grace that charms all.

And yet Allen McIntyre laughingly accuses his wife of "fishing for him."

An exchange thus tells about it: "Wanted, one hundred and seventy-five young men of all shapes and sizes, from the tall graceful dandy with hair enough on his upper lip to stuff a barber's cushion, down to the little upstart. The object is to form a gaping corps, to be in attendance at church doors on each Sabbath before the commencement of divine service, to stare at the ladies as they enter, and make delicate and gentlemanly remarks on their person and dress. All who wish to enlist in the above corps will please appear in the various church doors next Sabbath morning and evening, when they will be duly inspected and their names, personal appearance and quantity of brains registered in a book kept for that purpose. To prevent a general rush it will be well to state that none will be enlisted who possess intellectual capacities above that of a well-bred donkey."

Josiah Davis Testimonial.

Josiah Davis, No. Middletown, Ky., writes:

I am now using a box of your Henry's Carbolic Salve upon an ulcer, which, for the past ten days, has given me great pain. The salve is the only remedy I have found that has given me any ease. My ulcer was caused by varicose veins, and was pronounced incurable by my medical doctors. I find, however, that Henry's Carbolic Salve is affecting cures.

Baker's Pain Panacea cures pain in man and beast. For use externally and internally.

Dr. Roger's Vegetable Worm Syrup instantly destroys Worms and removes the secretions which cause them.

Denton's Balsam cures colds, coughs, rheumatism, kidney troubles, etc. Can be used externally as a plaster.

It is a well known fact among coin collectors that a few of the standard silver dollars of the issue of 1878 possessed a feature not common to the others of the same series, the peculiarity being that the tail of the eagle contains eight feathers, one more than the government allows to the ordinary bird. This eighth feather seems like a very insignificant thing, but it has a market value equaling that of the remaining seven. In other words an eight-feathered dollar sells for $2, so that a person who possessed many of them would have his nest well feathered.

The coins were issued from the Philadelphia mint in the early part of 1878, and are limited to a few hundred in number. They were struck in proof, but for some reason the die was afterwards altered to make the coins correspond with the rest of the series. The officers of the mint do not know why the change was made.

Thousands Say So.

Mr. T. W. Atkins, Girard, Kan., writes: "I never hesitate to recommend your Electric Bitters to my customers, they give entire satisfaction and are rapid sellers." Electric Bitters are the purest and best medicine known and will positively cure Kidney and Liver complaints. Purify the blood and regulate the bowels. No family can afford to be without them. They will save hundreds of dollars in doctor's bills every year. Sold at fifty cents a bottle.

Sold by C. A. Wright & Co.

The *Science of Health* says: "If farmers would avoid suddenly cooling the body after great exertion, if they would be careful not to go with wet clothing and wet feet, and if they would not overeat when in that exhausted condition, and bathe daily, using much friction, they would have little or no rheumatism." We question, however, whether the advice to "bathe every day" is judicious. It may do for some people, but all are not alike.

Pittsford, Mass., Sept. 28, 1878.

Sirs—I have taken Hop Bitters and recommend them to others, as I found them very beneficial.

Mrs. J. W. Tuller,
Sec. Women's Christian Temp. Union

THE BEST VEHICLE.—An anecdote is told of a physician who was called to a foreign family to prescribe for a case of incipient consumption. He gave them a prescription for pills, and wrote the direction, "One pill to be taken three times a day in any convenient vehicle." The family looked in the dictionary to get at the meaning of the prescription. They got on well until they got to the word vehicle. They found 'cart, wagon, carriage, buggy, wheelbarrow." After grave consideration they came to the conclusion that the doctor meant the patient should ride out, and while in the vehicle he should take the pill. He followed the advice to the letter, and in a few weeks the fresh air and exercise secured the advantage which otherwise might not have come.

Ayer's Sarsaparilla will cure your catarrh, and do away with that sickening odor of the breath.

"TEABERRY" is very fine,
Makes your teeth as white as mine;
Try "Teaberry" and you will see
If it's not what 'tis said to be.

CONFIDENCE.

ZOPESA is a certain preventative of malarial troubles, as it keeps the liver active. It makes Billious fever impossible. On the same grounds it makes indigestion impossible and the blood pure.

It is want of judgment to allow prejudice to prevent one from trying this remedy. The writer has seen many such, who, being persuaded, were surprised and gratified at the results. Try 10-cent sample.

JAMES E. DAVIS & CO.,
Wholesale Agents, Detroit, Mich.

AYER'S PILLS.

A large proportion of the diseases which cause human suffering result from derangement of the stomach, bowels, and liver. AYER'S CATHARTIC PILLS act directly upon these organs, and are especially designed to cure the diseases caused by their derangement, including **Constipation, Indigestion, Dyspepsia, Headache, Dysentery,** and a host of other ailments, for all of which they are a safe, sure, prompt, and pleasant remedy. The extensive use of these PILLS by eminent physicians in regular practice, shows unmistakably the estimation in which they are held by the medical profession.

These Pills are compounded of vegetable substances only, and are absolutely free from calomel or any other injurious ingredient.

A Sufferer from Headache writes:

"AYER'S PILLS are invaluable to me, and are my constant companion. I have been a severe sufferer from headache, and your PILLS are the only thing I could look to for relief. One dose will quickly move my bowels and free my head from pain. They are the most effective and the easiest pills to take of all pills. It is a pleasure to me to speak in their praise, and I always do so whenever occasion offers."

W. L. PAGE, of W. L. Page & Bro.,
Franklin St., Richmond, Va., June 3, 1882.

"I have used AYER'S PILLS in numberless instances as recommended by you, and have never known them to fail to accomplish the desired result. We constantly keep them on hand at our home, and prize them as a pleasant, safe, and reliable family medicine. FOR DYSPEPSIA they are invaluable.

J. F. HAYES."

Mexia, Texas, June 17, 1882.

The Rev. FRANCIS B. HARLOWE, writing from Atlanta, Ga., says: "For some years past I have been subject to constipation, from which, in spite of the use of medicines of various kinds, I suffered thereby inconvenience, until some months ago I began taking AYER'S PILLS. They have entirely corrected the costive habit, and have vastly improved my general health."

AYER'S CATHARTIC PILLS correct irregularities of the bowels, stimulate the appetite and digestion, and by their prompt and thorough action give tone and vigor to the whole physical economy.

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists.

YOUNG, OLD, AND MIDDLE-AGED. All experience the wonderful beneficial effects of Ayer's Sarsaparilla. Children with Sore Eyes, Sore Ears, or any scrofulous or syphilitic taint, may be made healthy and strong by its use.

Sold by all Druggists; $1, six bottles for $5.

Location unsurpassed in beauty and healthfulness. Reopens September 18. Expenses $330 a year. For circular address Col. J. S. Rogers, superintendent, Orchard Lake, Michigan.

Rheumatine!

An Internal Remedy and a Sure Cure for all kinds of

Rheumatic Complaints!

If you are suffering from

Kidney Complaints

Give Rheumatine a fair trial. You will never regret having done so.

Testimonial from Mr. Thomas H. Day, of No. 83, 23d street, Chicago, who has been for many years employed by the Wagner Sleeping Car Co. and is now conductor of one of their cars running between New York and Chicago.

J. N. SUTHERLAND,
Manager Rheumatine Mfg Co.,
Niagara Falls.

CHICAGO, June 25, 1882.

Dear Sir—It gives me pleasure to inform you of the benefit your rheumatic cure "Rheumatine" has been to my daughter, who for the past few years has been a great sufferer from Rheumatism at times being quite helpless. She took three (3) bottles of your preparation, and I can bear testimony to its speedy action in affording her relief from pain and soreness. Thanks to Rheumatine her health is now quite restored.

Yours very truly,
THOS. H. DAY.

See our change of Testimonials every week in Daily Papers.

K B

KING OF THE BLOOD.

The Most Thorough Purifier of the Blood Yet Discovered.

Cures all Humors, from a Common Eruption to the worst Scrofula,

It purifies the Blood.
It invigorates the Liver.
It regulates the Bowels.
It strengthens the stomach.
It gives vivacity in place of lassitude; cheerfulness in place of gloom, and robust vigor in place of debility.

Dyspepsia, Biliousness, Disordered Liver, Constipation, Nervous Affections, General Debility, to short all the numerous diseases and discomforts caused by impure blood are speedily conquered by this powerful corrector, the chief and sovereign of all ancient or modern medical discoveries—KING OF THE BLOOD.

Its name is its best description as it is a royal dispenser of the blessings of health and vanquishes the foes that lurk in the blood.

It banishes PIMPLES, SALT RHEUM, SCALY ERUPTIONS, ULCERS, SCALD HEAD, FEVER SORES, and all SCROFULOUS DISORDERS.

It checks CONSUMPTION in its early stages. It has frequently cured it when advanced.

It disperses TUMORS and CANCERS without the Surgeon's knife.

It cures DROPSY, general or partial.

It cures FEMALE WEAKNESS and DISEASE.

It reduces in a safe and effectual manner all swellings, external or internal.

It eradicates the effects of Venerial Disease and Mineral Poisons, and establishes a sound constitution.

Many certificates, much further information and full directions for using, will be found in the pamphlet, "Treatise on Diseases of the Blood," in which each bottle is enclosed.

Price $1 per bottle containing 12 ounces, or to 50 doses. Sold by dealers in medicine.

If your druggist does not happen to have it on hand, request him to order a supply of it for you, as it will be cheaper than for you to order direct of us, and less trouble.

THE BETTER LAND.

"I hear thee speak of the better land,
Thou call'st its children a happy band;
Mother! O where is that radiant shore?
Shall we not seek it, and weep no more?
Is it where the flower of the orange blows,
And the fire-flies glance through the myrtle boughs?"
—"Not there, not there, my child!"

"Is it where the feathery palm-trees rise,
And the date grows ripe under sunny skies?
Or 'midst the green islands of glittering seas,
Where the fragrant forests perfume the breeze,
And strange bright birds on their starry wings,
Bear the rich hues of all glorious things?"
—"Not there, not there, my child!"

"Is it far away, in some region old,
Where the rivers wander o'er sands of gold?
Where the burning days of the ruby shine,
And the diamond lights up the secret mine,
And the pearl gleams forth from the coral strand?—
Is it there, sweet mother, that better land?"
—"Not there, not there, my child!"

"Eye hath not seen it, my gentle boy!
Ear hath not heard its deep songs of joy:
Dreams cannot picture a world so fair—
Sorrow and death may not enter there:
Time doth not breathe on its fadeless bloom,
For beyond the clouds, and beyond the tomb,
—It is there, it is there my child!"

—*Felicia Hemans.*

An Old Story Retold.

New York letter to Detroit Free Press.

You may possibly remember something of the terrible scare that Adelaide Neilson's first husband, Lee, got at the Grammercy Park hotel dinner to which he was invited by Wm. J. Florence, E. A. Sothern, Dan Bryant, and some other practical jokers. Lee had heard a good deal about the rough ways of people in America, and his head was full of extravagant notions on the subject. He had come to New York expecting to see bears running loose in Central Park and be able to shoot buffaloes in Harlem. The jokers wanted to "take a rise" out of him, and arranged how they should do it. When the party sat down to dinner, every man except Lee laid a revolver at one side of his plate and a bowie knife on the other. It seemed to be done as a matter of course, and it made Lee rather uneasy at the start. But the party soon fell into pleasant conversation, and after a while the Englishman's nerves became steadier, though his appetite did not appear to be good. There was plenty of wine, of course, and all partook of it freely, though each man was careful not to take too much.

When dinner was nearly over the conversation became more lively. By and by it grew warm. In a little while more it was hot. Then the fun began. The jokers fell to quarrelling furiously. Every man was on his feet with a revolver in one hand and a bowie knife in the other. Chairs were knocked over, revolvers were flourished, and the dishes rattled on the table. Indian war whoops rang through the room and the entire party except Lee was evidently bent on wholesale slaughter. Poor Lee trembled in his shoes. There was no telling but what he might be scalped the next moment. One of the actors opened the door, and then danced back to resume his part in the melee. Lee saw his chance. He fled through the open door like a deer, and did not wait in the hall for his hat. When he afterward told of his narrow escape from murder by a lot of savages, he really belived that the desperate row he had run away from was real. He never forgave the festive rioters for the trick they had played him. "It was a beastly thing to do, you know," he said, and he could not see the humor of it at all.

How Paper Car-Wheels Are Made.

The *Paper World*, in describing the method of manufacturing paper car wheels, says: "The paper is straw board of rather fine texture. It is received in the ordinary broad sheets, differing in no particular from those used for straw-board boxes or other similar work. These sheets, as they come from the paper mill, are square, and must, first of all, be cut to a circular pattern. This is rapidly done on a large table with a knife that is guided by a radial arm that swings freely over the surface of the table from a pivot at the centre. A small disk is also cut from the centre of the sheet to allow for the iron hub. Being thus reduced to the required shape and dimensions, the paper must now be converted from a mass of loose sheets into a compact, dense body, capable of withstanding the tremendous crushing force to which it will be subjected in the wheels. This is accomplished in the following manner: Ten sheets are pasted together, one upon another, making a disk of about one-eighth of an inch thick. When enough of these disks have been prepared to fill a powerful hydraulic press, they are subjected to a pressure of 1800 pounds to the square inch. When removed, the disks are hung on poles in a steam-heated loft and left six days to dry. Thicker disks are then made, each formed by pasting together two or three of those already finished. These are pressed and dried as before, and the process is repeated until a block is built four inches thick and of about the specific gravity of lignum vitæ. After each pasting and pressing six days are allowed for drying, and when the block is complete it is left in a drying room until thoroughly seasoned. The next operation is that of turning the paper blocks to fit the steel tires and iron hubs. This is done in lathes with as much accuracy, and in exactly the same manner as if the material worked on was iron or wood. The circumference is turned to a perfect circle of the precise diameter required, a bed or recess is worked out for the web of the tire, to rest in and the surfaces are left hard and smooth and the edges sharply defined. The block then painted and is ready for its place the wheel.

A Michigan doctor has written a book on the human hair in which he presents these views: "Hairs do not, as a rule, penetrate the scalp perpendicularly, but at an angle. When the angle of different hairs is the same, it is possible to give it the easy sweeps and curves which we generally see it take, but if they are by some freak of nature misplaced, we have the rebellious frizzle-tops, that are not susceptible of the influence of the brush and comb. Many a poor mother has half worried her life out trying to train her Johnny's rebellious locks into better ways, believing it was Johnny's perverseness of manners that induced such dilapidated looking head-gear, when it was really none of Johnny's fault at all, but simply a freak of nature in misplacing the radiating centers of his "hirsute covering." Sometimes fowls suffer from a contrariwise placing of the feathers—they run the wrong way. The author's father had a hen whose leg feathers ran toward the body, those on the body and neck toward the head. This gave her a perpetual 'out-of-sorts' look and she never could fly. The erection of the hair of animals during anger, or human beings in fright, is caused by a change in the skin and the angle at which the hair enters the head or body."

Life Among the Arabs.

Fed by the eternal snows of the Atlas, the Oued Draa river gives life to one of the most charming oases of the Sahara, with a circumference of 40 miles and a population of 250,000. We are now near the borders of the Great Desert, as it is called. This is not such a desert as is pictured by the imagination of the civilized American—sands, and nothing but sand to the end of the chapter. The desert is, in reality, composed of immense plains analogous to the steppes of Russia, the pampas of South America, or the Great American Desert of our Western plains. There is no wood, the water is confined to a few favored spots which necessarily become the halting places of travelers, such as the great oasis of Tronlatt. Even in the Sahara it is only where running water is present, that luxuriant vegetation and productive fruit trees spring forth.

Some of the smaller oases are pocket editions of Paradise. After traveling all day over a dry and almost barren country with only palm trees and stunted vegetation, the sight of one of these, with its bright green foliage and brilliant flowers, is refreshing indeed. The Arabs have a legend that Adam was once permitted to revisit the earth and landed in England, but he did not know the place. Passing over into France, Italy and Spain, the country began to look better; but when he came to the Sahara he recognized his former home, and exclaimed, with enthusiasm "Ah, here is Eden, where I was created, and first saw my beauteous Eve; here I could live forever."

In our journeyings we traveled through a mountain pass different from anything that I had ever seen before. It was five paces in width, with perpendicular natural marble walls on either side, veined and polished, and glistened with various colors in the sun. Through it runs a little stream with lovely green banks and outside entrance, which effervesces in one's mouth like champagne. Antimony is also found in the pass, and gives rise to an oases called Tesna. A carbonic acid spring bubbles up close to its southern vicinity. A peculiar variety of sheep without wool abounds. Quail are plentiful, the sparrow family are found in every house south of the Atlas. They are of the capot variety, and have a sweet note, superior to the nightingale but cannot beat exile to the North.

Butterflies of unusual size and most beautiful colors are found, often measuring from four to six inches across the wings. Mosquitoes and beetles are plenty enough, the cochineal insect, which feeds on the cactus cochenillifera, is gathered in great quantities and sold to the caravan merchants, to be used in making the famous carmine color of commerce.

Dates are plentiful, and are used for food and fattening horses and camels. A camel load of them, 400 or 500 pounds, can be bought for a metkel, 40 cents. Olive oil and a similar oil called argan, not so good for eating, but much used in lamps, are produced in great quantities. Monkeys are numerous and sometimes used as food. I have eaten opossum among the darkies in Kentucky, and muskrat with the Indians on the Calumet, in Illinois, and even tasted of rattlesnake, but I confess roasted monkey was too much for my delicate stomach; it was too horribly like eating a young baby. I found lion meat, however, to be more palatable and nutritious. All through Sahara, but especially in the oases of Sghronat, southwest of Biscara and Tongourt, in the Oned Oasis, wheat, barley and bears are largely cultivated. Grain is cut just below the ear, and trodden out with oxen or threshed with a flail. It is stored in pits of conical shape, dug in the ground, and will keep in good condition for years. Hawking by the use of falcons, and ostrich hunting are the aristocratic amusements of the Sahara. Ostriches are killed by a light blow with a stick on their featherless head, and when closely pressed they run their head into the sand to avoid this death blow, and not to hide themselves from their enemy. Receiving the blow upon their muscular bodies, they draw their head from the sand, and are off with the speed of the wind. Thus vanishes another of the cherished myths of our childhood, imbibed from the geography and Sunday school books.

Negroes are plenty in the Draa, and are on an equal with the other races. Here we begin to see the institution of slavery. Slave women can be bought from $20 to $40, but a good looking young girl is more expensive, reaching sometimes as high as $100. Wives are not purchased, as has been represented, but the expectant husband pays to the parents of his intended the amount of the bridal outfit or trousseau, which is always returned if the parties are divorced. No dowry is ever expected with the wife, so that marriage de convenance are unknown. The women often marry at from 10 to 14. The young people never meet till the wedding day, the negotiations being made through other parties, there being a regular market, like Saratoga or a London season. I attended a Moorish wedding, and I found the young bridegroom seated upon a platform alone at one end of the room, and looking very foolish, while his friends and those of the bride frolicked and regaled themselves below. After about 24 hours the bride was brought in, and the whole company escorted them with lamps and music to the husband's home. No priest was present and no ceremony seemed necessary except that the man, in the language of Scripture, should "take" the woman, and when not satisfied he "puts her away." The position of woman is the key to a nation's social state. Hard is the life and sad the slavery of Arab women, like all females in the pastoral phase of society. No spiritual ties and no tender regard for women. Polygamy, the great bugbear of our times, is here, like our former negro slavery, "a domestic institution." No Arab, however mean, permits his daughter to enter the service of another. The only way to obtain female servants is to take another wife. As to the famous eastern harem, that is an exclusive and fashionable institution, kept up only by the Grand Sultan, the shereefs or other quite rich and influential personages, as a matter of show and pride. The inmates are generally very young girls, from 7 to 12 years of age, and are carefully protected and educated, and given for wives to the favorite officers of the Sultan or other high dignity.

A lady went into a dry-goods store and inquired for "bleached cloth." Several pieces of sheeting were offered for inspection, but failed to suit. "Perhaps," said the lady, "if I should tell you what I want it for you would know better what to give me. It is to be used for reposing robes." The man threw down another piece, called the next salesman, who was a married man and rapidly vanished into the distance.

The Traveling Salesman

Is an irresistable fellow, brim full of stories, jokes, courage, self-assurance and grit. He is very taking withal. Burdock Blood Bitters are a very taking medicine; they take everywhere and are sold everywhere.

A Sensible Girl.

The other day a girl of our acquaintance, who is pursuing a select course of study in one of the collegiate institutions of the city, examined the printed curriculum with reference to deciding what study she would take up in the next term. While consulting about the matter, she read over the long list of text-books on science, language, literature and mathematics, when she exclaimed: "I'll tell you what I would like to study—I would like to study medicine. I don't mean that I want to be a physician, and practice, but only know what to do at home when anything happens. I am sure it will be more useful to me, than—" and she turned to the prescribed course of study—"than spherical trigonometry, navigation, etc. We cannot run for a doctor every time anybody sneezes or coughs, and I would like to know what to do for one who is a little sick." Here is a matter concerning which young women need some simple but careful instruction. But who gives them any? As daughters in the family, they can repeat the dates of Grecian and Roman wars, work out the intricate problems of algebra, and give the technical names of all the bones in the body; but if the baby brother left in their charge burns his hand or is seized with the croup, how many of them know the best thing to do while waiting for the doctor? And when, as wives and mothers, the duties of life increase, how many of them have any practical knowledge which will help them to meet calmly and intelligently the every day experiences of accidents and illness which are inevitable in every family.

Hay Fever.

For twenty-five years I have been severely afflicted with Hay Fever.—While I was suffering intensely I was induced, through Mr. Tiebenor's testimonial to try Ely's Cream Balm.—The effect was marvellous. It enabled me to perform my pastoral duties without the slightest inconvenience, and I have escaped a return attack. I pronounce Ely's Cream Balm a cure for Hay Fever. Wm. T. Carr, Presbyterian Pastor, Elizabeth, N. J.

I can recommend Ely's Cream Balm to all Hay Fever sufferers, it being in my opinion, founded upon experience; a sure cure. I was afflicted with Hay Fever for twenty-five years, and never before found permanent relief. Webster H. Haskins, Marshfield, Vt.

A Parting Scene.

Did you ever hear two married women take leave of each other at the gate on a summer evening? This is the way they do it:

"Good-by!"

"Good-by! Come down and see us right soon."

"Yes, so I will. You come up right soon."

"I will. Good-by."

"Good-by! Don't forget to come soon."

"No, I won't. Don't you forget to come up."

"I won't. Be sure and bring Sally Jane with you next time."

"I will. I'd have brought her up this time, but she wasn't very well. She wanted to come awful bad."

"Did she, now? That was too bad. Be sure and bring the baby."

"I will. I forgot to tell you, he's cut another tooth."

"You don't say! How many has he got now?"

"Five. It makes him awful cross."

"I guess it does, this hot weather. Well, good-by! Don't you forget to come down."

"No, I won't. Don't you forget to come up. Good-by!"

And they separate.

Indulgent parents who allow their children to eat heartily of high-seasoned food, rich pies, cake, &c., will have to use Hop Bitters to prevent indigestion, sleepless nights, sickness, pain, and, perhaps, death. No family is safe without them in the house.

The Engaged in Italy.

The betrothed in Italy are never left alone for one moment. They must not even sit side by side in company and a third party must always take part in their conversation. When out for a walk they must not go arm in arm. As for a kiss, not even the tips of the nails can be touched until after the church and state have firmly bound the poor lovers. This severity is no compliment to Italy. On the contrary it is mistrust carried to the extreme, and the young people rebel against it. Still, when they become fathers and mothers they perpetuate the custom. It may be that this extreme reserve before marriage engenders that after-marriage liberty which in its turn becomes a matter of wonder to more prosaic nations.

Positive Cure for Piles.

To the people of this county we would say we have been given the agency of Dr. Marchisi's Italian Pile Ointment—emphatically guaranteed to cure or money refunded—internal, external, blind, bleeding or itching piles. Price 50 cents a box. No cure, no pay. For sale by Waldo & Doty, druggists.

No family can afford to be without the following remedies in the house to use in case of emergencies, before a physician can be called—oftentimes saving calling one, and also saving the lives of the little ones: A bottle of Hatch's Universal Cough Syrup, which cures coughs, colds, croup, &c.; a bottle of Home Relief for sudden attacks of colic, cramps, cuts, bruises, sprains, etc.; a box of A. H. Davis' Family Pills, for constipation, torpid liver, kidney difficulties, headache, bones ache and fever symptoms. 25c sizes will cost only 75 cents for the outfit.

Daughters, Wives and Mothers.

We emphatically guarantee Dr. Marchisi's Catholicon a Female Remedy, to cure Female Diseases, such as Ovarian troubles, inflamation and ulceration, falling and displacement or bearing down feeling, irregularities, barrenness, change of life, leucorrhœa, besides many weaknesses springing from the above, like headache, bloating, spinal weakness, sleeplessness, nervous debility, palpitation of the heart, &c. No cure, no pay. For sale by druggists. Prices $1 and $1.50 per bottle. Send to Dr. J. B. Marchisi, Utica, N. Y., pamphlet free. For sale by Waldo & Doty.

"We are selling at the rate of three doz. bottles of Baker's Japanese Liniment a week." Pegg & Wilson, Druggists, Morenci, Mich.

A HORRIBLE AFFAIR.

Rheumatic SYRUP.

The Greatest Blood Purifier Known!

RHEUMATISM CURED.

ROCHESTER, N.Y., Apr. 6, '83.
Rheumatic Syrup Co.:
Gents—I have been a great sufferer from Rheumatism for six years and hearing of the success of Rheumatic Syrup I concluded to give it a trial in my case, and I cheerfully say that I have been greatly benefited by its use. I can with entire freedom from pain, and my general health is very much improved. It is a splendid remedy for the blood and debilitated system.
E. CHESTER PARK, M.D.

SCROFULA CURED.

PORT BYRON, N.Y., Feb. 20, '83.
Rheumatic Syrup Co.:
I had been doctoring for three or four years with different physicians, for scrofula, as some called it, but found no relief until I commenced taking your Syrup. After taking it a short time, to my surprise it began to have effect and I continued the use of Rheumatic Syrup. I feel no pain since using the bottle. I can walk without help. Continuing its use a fourth bottle, I think it the best remedy I have ever heard of for purifying the blood and for the cure of rheumatism and neuralgia.
MRS. WM. STRANG.

NEURALGIA CURED.

FAIRPORT, N.Y., March 2, '83.
Rheumatic Syrup Co.:
Gents—Since November, 1882, I have been a constant sufferer from neuralgia, and have not found what it was to be free from pain until I commenced using your Syrup. I feel that it has saved me much time, and I shall use it as long as I live. I have found no pain since using the bottle, and I can walk without it. I think it the best remedy I have ever heard of for the cure of rheumatism and neuralgia.

CASTORIA

for Infants and Children.

Castoria promotes Digestion and overcomes Flatulency, Constipation, Sour Stomach, Diarrhœa, and Feverishness. It insures health and natural sleep, without morphine.

"Castoria is so well adapted to Children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M.D., 82 Portland Ave., Brooklyn, N. Y.

What gives our Children rosy cheeks,
What cures their fevers, makes them sleep;
'Tis Castoria.

When babies fret and cry by turns,
What cures their colic, kills their worms,
But Castoria.

What quickly cures Constipation,
Sour Stomach, Colds, Indigestion,
But Castoria.

Farewell then to Morphine Syrups,
Castor Oil and Paregoric, and
Hail Castoria!

THE DEVIL'S LAKE PICNIC.

THE ELEVENTH ANNUAL GATHERING AT THE LAKE OF THE SATANIC NAME.

The Largest Crowd Ever in Attendance—What was Said and Done—Election of Officers for the Coming Year.

The regular farmers' reunion which has come to be known as the "big picnic" was held at Devil's lake last week Wednesday. In order to be on hand in good season we set out the afternoon beforehand, and having hunted up a traveling companion in the person of L. F. Wheeler, and having stowed his camera and our own grip sack under the buggy seat, we two started at five P. M. Tuesday by the overland route to the big farmers' celebration. Our route lay along the turnpike to the road one mile this side of Springville; we then went south a mile and thence west through Cambridge. It was after eight o'clock when we arrived at "Uncle Robert" Wooden's, and we thought best to halt there for the night. We found good lodging and breakfast beneath his hospitable roof, although his usual family was augmented by a lot of railroad boarders. Twenty-two persons slept in the house that night.—Bright and early the next morning the artist and editor resumed their journey and upon arriving at Beardsell's Landing, shortly after eight o'clock, we found the grove already well filled and teams were pouring in by the score from all points of the compass. By ten o'clock the grove and grounds were swarming with people. Tables were built for each township, and the different township directors presided over these tables. We spent the forenoon strolling about the grounds inspecting the different points of interest, taking a ride on the steamer the "City of Hudson", and shaking hands with the yeomanry of western Lenawee and eastern Hillsdale. Mr Wheeler put in his time to good advantage with his camera and obtained several fine stereoscopic views on lake and shore. During the noon hour the tables presented an animated scene. They were loaded down with all the good things which the farmer's larders could furnish, and the way the provisions disappeared was a sight to behold.

At one o'clock the vast audience was called to order by President Samuel Morey, and the intellectural portion of the feast was presented. The platform was occupied by the officers of the day, the Wheatland cornet band and a few of the old pioneers. The press was represented by reporters from the Hudson Gazette, the Hudson Post, the Hillsdale Leader, the Adrian Times and Tecumseh HERALD. The program of exercises was presented in the following order:

1. Calling to order.
2. Music by the Wheatland band.
3. Prayer by Rev. Mr. Brockway, of Medina.
4. Secretary's report.
5. Quartette by the Weston Glee Club.
6. Treasurer's Report. This report showed the receipts last year to have been $310.30; expenditures $238.30; balance on hand $72.50. The teams on the grounds last year were, single teams 918, double teams 478.
6. Music by the band.
8. Address of welcome by the President, Capt. Samuel Morey.
9. Music by the Weston Glee Club.
10. Reminiscences of the Pottawatamie Indians by F. A. Dewey. We give below the principal portion of Mr. Dewey's address.
11. Singing by Wallace's Tennessee Jubilee Singers.
12. Address by Capt. Allen, of Ypsilanti.
13. Music by the Glee Club.
14. Music by the Band.
15. Election of Officers.

The program was nearly three hours in the presentation and was attentively listened to by the vast throng until the close.

F. A. DEWEY'S ADDRESS.

After an appropriate introduction the speaker said:

Mitteau and Bawbeese were the chiefs of the Pottawatamie tribe. The former was a bold, fearless, active brave, whose residence was often changed in this county and Hillsdale. On the rich alluvial lands corn was planted and harvested by the squaws; here also they were bountifully supplied with fish, ducks, venison, grouse, bear meat and honey. Mitteau had a particular taste for whiskey, and would exchange the last blanket or the useful tomahawk for the poisonous drug. When I first knew him his age was about 50; strong and vigorous; in personal appearance, tall, well formed, with a clear, sharp black eye and bearing that reminded one of the admiral of the forest. It is recorded that fire water was the cause of this brave chief's death. He had been to a town where whisky was sold freely. It was a cold winter's day, and while returning to his wigwam the slumbering sleep which knows no wakening laid him low in his forest hunting ground. Thus this noble red man died alone, in the vast wilderness he loved so well.

It is said of Chief Bawbeese that when but seventeen years of age his abilities, especially his activity in the chase, and his remarkably tenacious memory attracted the esteem and admiration of his tribe. Bawbeese came upon the theater of active life when the power of his tribe had declined and its extinction was threatened; the white man was advancing upon them with gigantic strides. It is with proud remembrance we look back when we first met this chief of the forest. It was on the trail in the timbered lands, about two miles from the old Tecumseh camping ground. A number of braves and squaws, with about twenty ponies were en route for Canada; just 54 years ago this season. We shall never forget the noble countenance, gallant bearing and deliberate voice of that red man. He was then between thirty and forty years of age, a brave of magnificent appearance, filled to the brim with restless and active energy; the pride of a true warrior; dearly beloved by his tribe, and who has been remarkably successful as chief of the Pottawatamies; the finest specimen of Indian character I ever knew, which was sustained with more dignity than that of any other warrior. As an orator his language was beautiful and figurative, as the Indian language always is, and delivered with the greatest ease and fluency. His voice was distinct and clear, and he always spoke with good degree of animation. Bawbeese had for a wife a most excellent, brave and gifted woman, who was loved by her husband with a devotion beautiful to behold. She had a tender, emotional, winning sense of beauty. Long shall we remember the quick, graceful manner and step of that queen of the forest, the mother of three active children, true decendents of a dutiful father and devoted mother. Thus Bawbeese with a remnant part of the numberless Pottawatamie tribe passed the larger part of their lives in the forests of Southern Michigan. In the year 1840 these Indians were hunted and driven from their homes and cherished hunting grounds, and removed by government to the far west, while many, as we afterward learned, rather than be bound to a reservation, moved to the wilds of Canada. There in the fine forests, near the shores of Georgian Bay, the noble Bawbeese was laid to rest.

The writer has hundreds of times met the valiant braves and their squaws in the sublime solitude of the primeval forest, and at their wigwams, far from the white settler's home, was always treated with generous friendship and true Indian hospitality, which was most freely to give of the best of their provisions, with rest in the wigwam. They are some times judged unjustly in their native homes where they seem to be brave, kind hearted, without the grosser vices of many a city belle. It is said they are dirty and miserable because they are scantily covered and fed.—Their dwelling places are rude habitations; but they contain all the comforts that their simple mode of life requires; chairs and tables are not needed with them; silver ice pitchers, knives and forks, with china and glass ware would be superfluous luxuries. They were most strictly temperate and frugal until the fire-water was introduced by the white people, who were called civilized traders.—The savage admired those qualities which are peculiar to his mode of life, and are most practically useful in the vicissitudes to which it is incident.—Courage, strength, swiftness and cunning are indispensible in the constantly recurring scenes of the battle and the chase, while the most patient fortitude is required in the endurance of pain, hunger and exposure to all extremes of climate to which the Indian is continually subjected. They have but few intellectual wants or endowments which are not combined with the art of a warrior. To this rule eloquence forms a notable exception.

In the war of 1812-14 all of the tribes of Michigan were paid allies of the British government. The Pottawatamies went with their brave chieftain Mitteau and were as barbarous as the other tribes, murdering their captives, burning, scalping and disfiguring the body in every part, as was clearly proved in the great massacre at Monroe. I will here state what is an undeniable fact that in the great battle and the bloody scene which followed the disastrous morning of the defeat of Gen. Winchester, Jan. 22d, 1813, at the River Raisin massacre, the most blood-thirsty allies of the British Gen. Proctor's brigade were the Indians of the Pottawatamie tribe. They received for every scalp 25 cents in addition to their annual June pensions, which were paid in Malden, Canada, from the year 1811 to 1832, when the British stopped payment to the United States Indians.

THE PRINCIPAL ORATION.

Capt. Allen, of Ypsilanti, speaker of the day, considered it a great honor to be called to address such a large and intelligent audience. Farming had got to be one of the exact sciences, which required for its successful pursuit not only muscle but brain. The grand country that brings us such abundant crops was fought and toiled for by our forefathers. From Bunker Hill to Yorktown the foundation stone was laid, cemented by the blood of your and my father. They worked it out to its fullness and completeness, and you and I are the heirs of those who now sleep in their silent graves. But we are not sure of the prosperous condition of our country long if we do not wake up and see that several important public questions are rightly settled. We have a vast domain lying to the west of us which should be for the inheritance of our children, but instead, is being filled up with foreigners, and cyndicates are buying up large farms. The pioneer in a few years must buy it of them at a greatly enhanced price. Stop this at once. The tariff will be the coming question and the one that is protecting American industries and its people, regardless of all others, would be the best for all. Mr. Woodman, at Morenci, said that the reduction of tariff on wool had cost him $100 this season.—About corporations: Let us be prudent and conservative, and manage not by the government (for we have federal officers now) but by laws enacted by you and me in our representative capacity. Office-holding is honorable, but the means whereby it is obtained are dishonorable. No poor man could afford to be governor of this state at the low salary the governor receives; therefore none but rich men will ever hold the office until the salary is larger. Every farmer should be a politician—not of the modern stamp—but in that higher and better sense, to have the true welfare of his country at heart and attend the primary caucus and always do your duty at the polls.

THE NEW OFFICERS.

The election of officers for the ensuing year resulted as follows:

President—G. A. Smith, Somerset.
Vice pres.—A. M. Sickly, Woodstock.
Secretary—P. W. Lewis, Medina.
Treasurer—J. U. Harkness, Rollin.

DIRECTORS.

Wheatland—Edmund Childs.
Somerset—Henry Harper.
Pittsford—J. B. Patterson.
Wright—J. B. Emmons.
Ransom—Harvey Higley.
Jefferson—Jas. Leonardson.
Adams—Wm. Wright.
Moscow—Hon. Geo. C. Wyllis.
Hudson—Jonathan Rowley.
Medina—R. H. Rogers.
Rollin—S. Lombard.
Woodstock—A. C. Osborn.
Cambridge—J. E. Gibbs.
Rome—John S. Marks.
Dover—M. P. Stockwell.
Seneca—Casper C. Rorick.
Adrian—Wm. H. Wiggins.

The township of Adrian was admitted to the association, and we understand that Franklin desired to be.

With possibly one exception the attendance was the largest in the history of the association, and the number of teams entered was larger than ever before. Fifteen hundred and fifty teams entered the picnic enclosure exclusive of those put up at Allen's and Pattison's landings, and there were probably one hundred more at each of these places. The Hudson Gazette furnished a thousand copies of an elegant 36 page program which was a credit both to the office and to the day's doings. The entire exercises passed off most favorably, not an accident of the slightest character occurring to mar the pleasure of any one.—The weather could not have been bettered and the farmers in attendance were all "at their best."

At five o'clock we started homewards, stopped at Mr. Wooden's for supper, and reached home in good condition at a seasonable hour. We enjoyed the trip tip-top and recorded a mental pledge that we should certainly be "one of them" again next year.

ESTATE OF JAMES McKINNEY.

STATE OF MICHIGAN, County of Lenawee—ss.

At a session of the Probate Court, for the County of Lenawee, holden at the Probate office, in the city of Adrian, on Monday, the 31 day of September, in the year one thousand eight hundred and eighty-three.

Present, Norman Geddes, Judge of Probate.

In the matter of the estate of James McKinney, deceased.

On reading and filing the petition of James Kingan and John Boyd, executors of the last will and testament of said deceased, alleging, that they have paid the debts of said deceased and the expenses of administration of said estate thus far incurred, and praying for the allowance of their first account as such executors.

Thereupon it is ordered, That Monday, the 1st day of October next, at ten o'clock in the forenoon be assigned for the hearing of said petition, and that the heirs-at-law of said deceased and all other persons interested in said estate, are required to appear at a session of said court then to be holden at the Probate office, in the city of Adrian, and show cause if any there be, why the prayer of said petitioner should not be granted.

And it is further ordered, That said petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said county of Lenawee for three successive weeks previous to said day of hearing.

NORMAN GEDDES, Judge of Probate.

(A true copy.)

A. H. BRIGGS Probate Register. sep16

PRESENT POWER.

To-Morrow a Long Way Off When Help is Wanted To-Day.

Comfort is never in a hurry. Pain and distress are in hot haste. It is to the "friend in need"—the friend who does something now—that the old adage pays the compliment of being "a friend indeed." That they do not keep the sufferer in suspense is the salient excellence of Benson's Capcine Porous Plasters. The plasters of other days—whether porous or otherwise—said—"Wait until to-morrow;" We can promise nothing on the spur of the moment." But pain unrelieved, like hope deferred, maketh the heart sick. Benson's plasters act on application. They permeate, soothe, warm and heal, containing as they do, chemical and medicinal agents of the highest efficiency. Their motto is now and the word, CAPCINE cut in the middle of each plaster. Price 25 cents.

Seabury & Johnson, Chemists, New York.

BOOKS-2 TONS A DAY!

HOOD'S SARSAPARILLA

Is designed to meet the wants of a large portion of our people who are either too poor to employ a physician, or are too far removed to easily call one, and a still larger class who are not sick enough to require medical advice, and yet are out of sorts and need a medicine to build them up, give them an appetite, purify their blood, and oil up the machinery of their bodies so it will do its duty willingly. No other article takes hold of the system and hits exactly the spot like

HOOD'S SARSAPARILLA

It works like magic, reaching every part of the human body through the blood, giving to all renewed life and energy.

My friend, you need not take our word. Ask your neighbor, who has just taken one bottle. He will tell you that "It's the best dollar I ever invested."

LEBANON, N. H., Feb. 19, 1879.

MESSRS. C. I. HOOD & CO.: Dear Sirs—Although greatly prejudiced against patent medicines in general, I was induced, from the excellent reports I had heard of your Sarsaparilla, to try a bottle, last December, for dyspepsia and general prostration, and I have received very gratifying results from its use. I am now using the second bottle, and consider it a very valuable remedy for indigestion and its attendant troubles.

Yours truly,

F. C. CHURCHILL,

Firm of Carter & Churchill.)

☞ A gentleman who has been suffering from the *Debility* and *Languor* peculiar to this season, says: "HOOD'S SARSAPARILLA is putting new life right into me. I have gained ten pounds since I began to take it." Has taken two bottles.

Gained 10 Pounds

HOOD'S SARSAPARILLA is sold by all druggists. Price $1 per bottle; six for $5. Prepared by C. I. HOOD & CO., Lowell, Mass.

(*Continued from last week.*)

How Watch Cases are Made.

In 1875, thirteen men comprised the entire working force used in the manufacture of the *James Boss' Gold Watch Case.* Now over *five hundred* are employed, and the number is constantly increasing. The reason of this increase is this: In the *James Boss' Gold Watch Case* all the metal in sight and subject to wear is *solid gold*, while the remainder, which only lends strength to the case, is of stronger metal than gold, giving gold where gold is needed, and strong, elastic metal where strength and elasticity are needed, a combination producing a watch case *better* than solid gold and at ONE-HALF the cost.

Over 200,000 of these cases have been sold, and every jeweler in the country can testify to their quality and merit.

LUDINGTON, MICH., Dec. 5, 1882.

E. W. Marsh, of the *Democrat*, bought a Jas. Boss' Gold Watch case 18 years ago, and carried it until a short time ago, when I purchased it, and sold it to a customer. The case shows no signs of wear, except that natural to any case, and I am satisfied can be safely guaranteed for at least ten years more. I have sold the James Boss' Gold Watch Case for many years, and the parties who bought the first ones are carrying them to-day, as well satisfied as the men they had bought a solid gold case costing twice the money. I regard them as the only cases of this kind a jeweler should sell who desires to give his customers the worth of their money or values his reputation.

WM. J. CUSHWAY, *Jeweler.*

Send 3 cent stamp to Keystone Watch Case Factories, Philadelphia, Pa., for handsome Illustrated Pamphlet showing how James Boss' and Keystone Watch Cases are made.

(*To be Continued.*) 6

DRAIN COMMISSIONER'S NOTICE.

PUBLIC notice is hereby given that on the 15th day of September A. D., 1883, at ten o'clock in the forenoon at the residence of Caleb Hendershot, in the township of Clinton, County of Lenawee and State of Michigan, I will be present for the purpose of letting contracts for the construction of a drain in said township of Clinton, described as follows: Beginning at a point in an old ditch about 56 rods North and 15 East of the ¼ post on E and W. section line between sections 1 and 12 of said township of Clinton (and following the general direction of the ditch or water course as marked out and laid down on the plat or map of said ditch or water course made by Fred Morley, surveyor and dated August, 1883,) thence on a magnetic bearing S 10° 30' W 20 rods; thence S 27° 10' W 35 rods; thence S 4° 45' W 20 48-100 rods; thence S 31° 40' E 26 80-100 rods; thence S 2° 45' W 20 4-100 rods; thence S 14° 30' W 10 96-100 rods; thence S 2° 30' E 54 72-100 rods; thence S 45° 45' E 26 rods, thence S 24° 0' E 13 8-100 rods; thence S 15° 0' W 18 92-100 rods; thence S 24° 45' W 7 20-100 rods; thence S 8° 45' E 6 80-100 rods; thence S 12° 20' W 54 96-100 rods; thence S 2° 50' E 56 52-100 rods; thence S 48° 15' E 20 56-100 rods; thence S 47° 0' E 22 32-100 rods; thence S 75½ 15' E 18 28-100 rods; thence S 44° 10' E 12 28-100 rods; thence S 19° 45' E 10 8-100 rods; thence S 17° 15' W 25 80-100 rods; thence S 33° 15 W 62 96-100 rods; thence S 60° 55' W 15 56-100 rods; thence S 25° 50' W 12 20-100 rods; thence S 23° 50' W 9 20-100 rods; thence S 59° 30' W 8 rods; thence S 7° 0' E 10 rods; thence S 61° 0' E 10 20-100 rods; thence S 7° 45' W 32 52-100 rods; thence south 36° 50' W 35 rods; thence S 2° 20' W 3 96-100 rods to the stake at the bridge on East and West dividing line between sections 13 and 24, about 40 rods West of the East quarter mile post. The dimensions of said drain to be as follows: Width of bottom, 2½ feet; slope of each side, 1½ feet to one foot rise; depth as marked on the profile drawing of said ditch at each stake; and at that time I will let contracts for the construction of said drain by sections to the lowest responsible bidder or bidders.

Also take notice that I will then and there, at the time of letting of such contracts, be present to review all assessments of benefits upon the lands upon which said drain is to be constructed, and assessed for the construction thereof.

Dated at Clinton township this 28th day of August, 1883.

PHILIP KEHOE,

Township Drain Commissioner for the township of Clinton, Lenawee County, State of Michigan.

FOR SALE CHEAP. A good property on Railroad st., opposite Slayton's warehouse. Has a dwelling house thereon and a vacant lot for building purposes. Will be sold at a bargain. Enquire at the HERALD OFFICE.

EVANS' BUSINESS COLLEGE AND Institute of Rapid Writing, Adrian, Mich. Twenty years of success of this thorough actual Business Institute. Send for sample of our work.
U. R. Evans, Principal and Teacher.
John Dersham, Assistant Bookkeeper.
D. C. Hardy, Teacher of Shorthand Writing, and also Type Writing.
Adrian, Aug. 28, 1883. U. R. EVANS.

Mrs. S. H. Merritt, of Cadillac, arrived in town yesterday and will spend a few weeks among her Tecumseh acquaintances.

One of our citizens whose wife had left town for a short time, took occasion last Sunday to celebrate the event by a little fire of his own, and forthwith cleaned out two bed quilts, two sheets and a pillow sham. Cause, sleep, cigar, hot ashes, all at the same time.

OPENING OF OUR SCHOOLS.

Prof. Hammond is highly elated at the large attendance this week in school. More pupils have already been enrolled in the central building than were in attendance at any time last year. Forty non-resident pupils were enrolled on Monday, the first day of the term, while there were but forty-five in attendance altogether last year.

Several new teachers appear in the list, but it is believed they will prove themselves both faithful and efficient. Below are the names of those who will "teach the young idea" for the coming ten months:

HIGH SCHOOL.

David A. Hammond—Superintendent.
Mary E. Hunt—A Division.
Julia A. Condict—B Division.

THE SOLDIERS AND SAILORS.

Their Annual County Reunion Held at Blissfield Last Week.

The regular annual gathering of the Lenawee County Soldiers and Sailor's Association was held at Blissfield on Thursday of last week. A match game of ball between the Tecumseh and Blissfield base ball clubs on the same day was an additional attraction, and the combined shows drew out the largest crowd probably that Blissfield ever saw. The trains from the west and from Jackson brought several car loads of visitors, and the country round about for miles poured into the village to see the sport. Flags and bunting were unfurled in every part of the village, and Blissfield gave herself up to a holiday. About three hundred old soldiers and sailors were in attendance, every part of the county being represented. The following names were enrolled from this part of the county.

Tecumseh—T. McClenahan, Wm. Cannon, D. Woodback, A. Turner, S. P. Hosmer, G. W. Marsden, A. W. Slayton, M. Wheeler, L. Bauer, Wm. DeMott, Mrs. Darling, G. E. Adamson, Wm. Jordan, Geo. S. Van Tyne, Alex. Turner, S. M. Smith, J. A. Wood, D. P. Spaulding, S. W. Nichols, A. L. Brazee, H. W. Stevens, John Thuriby, J. Davidson, W. H. Waring, J. A. Curry, A. A. Kennedy, J. G. Case, L. Martin, H. McDaniel, G. W. Smith, H. J. Scott.

Tipton—L. Van Dusen.
Franklin—Wm. Jay.
Ridgeway—L. E. Hause, J. Britton, D. M. Heath.
Clinton—A. Middlebrook, E. Coffin, W. A. Millspaugh, O. W. Heath.

The business meeting was held first when the officers for the coming year were chosen as follows:

President—G. W. Fleming, Rome.
Vice Pres.—H. W. Stevens, Tecumseh.
Secretary—H. M. Cole, Adrian.
Treasurer—John Britton, Balch.

It was voted to hold the next re-union at Devil's Lake, on the last Wednesday in August, 1884. The literary exercises were then held and a sumptuous repast followed, such as the ladies of Blissfield know so well how to provide. The reunion as a whole was one of the best ever held in the county.

THE TECUMSEH HERALD.

TECUMSEH, MICH., SEPT. 6, 1883.

LOCAL AND PERSONAL.

The circus is coming.

The Deerfield mill dam is undergoing repairs.

September has come and you can eat oysters now.

The Clinton Methodists indulge in quilting socials.

Go and see Brudder Gardner and the Lime-Kiln club.

Now is an appropriate season to plant fall advertising.

Miss Ella Bartlett, of Clinton, is visiting in New York.

The two-cent postage stamp will arrive the first of next month.

Try the HERALD for the balance of this year. Four months for 50 cents.

The Hudson local telephone exchange is working very satisfactorily.

The Clinton musical society resume their weekly rehearsals this week.

Small boys should now save up their spare pennies, for the big show is coming.

North Adams in Hillsdale Co., has been added to the state telephone exchange.

The new law with reference to practicing physicians takes effect on the 8th inst.

The Tecumseh schools opened last Monday with a full attendance in all departments.

The September term of the Circuit Court will convene on Tuesday next, Sept. 11th.

Miss Hattie Steward, of Scofield, Monroe Co., is visiting at her uncle's, Ed. Snedicor's.

James Schermerhorn, of the Hudson Gazette, takes a trip to Mackinac Island this week.

The Tecumseh Guard have been invited to attend a grand picnic at Monroe on the 10th inst.

Mr. and Mrs. Ure, of the New York millinery store are in New York City purchasing fall goods.

We will send the HERALD four months on a trial trip for fifty cents. Pass in your half dollars.

The Marshall Statesman is 44 years old and celebrates the event with a new $1700 Campbell press.

Peter R. Adams' condition is still very critical and but slight hopes are entertained of his recovery.

A gang of burglars is working Adrian. Lock up your doors for they may soon be over this way.

The Morenci fair which will be held Oct. 2, 3, 4, & 5, is likely to be the best one ever held in that village.

L. F. Wheeler will have a batch of his new Devil's Lake views on sale at Wood's book store in Hudson.

Morenci has her telephone bonus nearly raised, and expects soon to be united with the state exchange.

James Tray, formerly catcher for our base ball club, broke his collar bone at Bay City a few days ago.

James Cook, of Raisin, has been making a trip through Dakota in the interest of the Wood twine binder company.

Tommy Mark has a new boarder in the family, an eleven pound boy.—Mother and boy are well and the father is happy.

They say that A. O. Miller is immense in the new play entitled "The Lime-Kiln Club." Do not miss seeing and hearing him.

Mr. J. B. Swan returned last Saturday from his Florida trip. He was gone only two weeks, but had a pleasant time nevertheless.

Mrs. Eva Hause Satterlee, of Kansas City, who has been sojourning at Tecumseh for several weeks, departed for home last Tuesday.

The Clinton News is still shouting for a wheat buyer. Why doesn't the News man himself sail in? He has a good business location for almost anything.

Sam. James, of Detroit, is rusticating at his old home in Tecumseh this week. It seems like old times to see his portly form and happy countenance again.

Adrian Times: Tecumseh's base ball club seems to stand on the top of the heap in this section. It can't be that they learned a thing or two from our late lamented.

State Oil-Inspector Smith, of Adrian, gave us a call last Friday. He has been making a tour of the upper peninsula, and was feeling in extra good health and spirits.

Misses Manie Monaghan and Jennie Frazer, of this village, have obtained situations in the school at Lake Linden, in the upper peninsula, at a salary of $550 for nine months' school.

The Misses Watts and the Misses Piersal, of Adrian, were the guests of the Misses Powers last week and last Friday evening a very pleasant little company were invited by Misses Anna and Carrie in honor of their visiting friends. The little company were entertained splendidly and could only wish that the evening might have been longer.

New wheat is coming into the market quite freely.

The Tri-State Fair at Toledo will begin next Monday, Sept. 10th.

D. D. Marshall, of Detroit, happened around this way last week. Glad to see him.

Blissfield had a big time last Thursday with the soldiers' reunion and the base ball games.

Mr. & Mrs. J. B. Wells bid good-bye to Clinton last week and will find a new home in Southern California.

The examinations of teachers for the coming year will all be held at Dean's Opera House, Adrian, and on the following dates: Sept. 8 and 22; Oct. 13 and 28; Nov. 10; March 15 and 29; April 12 and 19; Aug. 15.

The compliments of Mrs. F. C. Stoeple and Miss Minnie Sutton were sent to many of our young people for last Tuesday evening, and all went out to the "Sutton home" to have a good time, and every one experienced just what they went out for.

Cupid scores another victory. Another bachelor has surrendered. The marriage of Webb W. Frazer and Emma J. Wilson occurred at the residence of Geo. W. Wilson on Tuesday evening in the presence of a select company of friends. The ceremony was pronounced by Rev. J. Phelps in the Episcopal form. Rooms had been fitted up in the South part of Jacob Van Tyne's residence which were furnished and ready for occupancy before the ceremony. The customary bridal trip was omitted, and the contracting parties began housekeeping in their own home the following day. The groom is one of our promising young attorneys and the bride has long been a favorite in Tecumseh society. We only echo the sentiment of their many friends in extending our hearty congratulations with a wish that the union now cemented may prove a long and happy one.

A CORRECTION.

EDITOR HERALD:—In answer to an article published in the Adrian Times, of Aug. 31st, in relation to a certain bridge situated in the village of Tecumseh displaying a sign "Five dollars fine for driving over this bridge faster than a walk," there has been a good deal of talk in regard to it. I would like to inform the public that I am the only one that created the excitement. I see that the Times refers to my consulting the president of the village and Squire Burridge. This is not so. I simply asked the above named parties as to the strength of the ordinance printed in the by-laws of said village, and was informed that they thought it was all right. So I wish to have the blame thrown on my shoulders alone. I was also the cause of not having the warrants issued. I think if the Times would send about three more men to counsel with their presen. correspondent and read his articles over before they print them they would save considerable time and trouble.

JOHN HIBBARD, Dep. Marshal.

BASE BALL.

Last Thursday our team accompanied by many members of the base ball association took a trip to Blissfield and endeavored to play a game of ball with the Blissfield nine. The game started nicely and everything went smoothly until the last half of the eighth innings, Blissfield kicked on the rulings of the umpire and the game was thrown up with a score of 15 to 13 in favor of Tecumseh. Heavy batting was the main feature of the game, Bostwick making a 3-base hit the first time the ball went over the plate. Our boys only made two errors and Blissfield made 20, and yet when the stop was made the Blissfield club claimed that they could easily have won the game had it been played out. Mr. Frazer, of Tecumseh, umpired the game and has umpired almost every game of ball that has been played in Tecumseh for the last five years, and in no case has his decision before been disputed. He is not a member of our club or base ball association, and had no money up on the game. This decision was the first one that had been thought of disputing during the entire game. The Blissfield men, who had put up their "little wad" on the game, thought the thing was likely to run a little against them, and were either compelled to play the "baby act,"—which they did—or lose what little cash they had bet, on the result. The men from here who went to Blissfield to see the game did not care to put up any amount of money, but when a Blissfielder shook a ten dollar bill under their nose it was never refused. Perhaps this was a different crowd than Blissfield had been in the habit of dealing with. The whole business was a disappointment to every fair person either in Blissfield or Tecumseh, and had there been the least fairness extended on the part of the Blissfield nine, certainly another umpire would have been chosen and the game finished.

The exercises were a grand success in every way. Two cars were packed full and everybody had a good time. All we have got to say is, if they will "get up and square themselves," we will give them such a drubbing as they never dreamed of before.

Albert S. Hayden, of Milan, was in town last Monday.

Telephone communication was established last Saturday between Hillsdale and Adrian.

The Gardeners' Monthly for September is at hand. It is crowded as usual with interesting and useful reading for the market and amateur gardener. Published at 814 Chestnut St., Philadelphia.

David T. Phelps started for Chicago yesterday. He has been taking a course in short hand and fitting himself for repertorial work. We hope he may soon succeed in getting a good situation.

The first number of the Detroit Evening Journal was issued on Saturday the 1st inst. It is a seven column folio, ably edited and neatly printed, and it has evidently come to stay. May its shadow never grow less.

Adrian Record: The Tecumseh HERALD now owns the building in which it is published, and is prospering in worldly matters. Now if the Stacys and Burlingame could only be converted—but no. They have resisted mercy too long.

Mrs. Caroline Hand, who has been visiting in New York state since April last, returned to her home in this village last Saturday. She was accompanied by her sister, Mrs. R. E. Lee, who will remain in Tecumseh for a couple of months.

A branch line of the Tecumseh local telephone exchange has been run to Holloway with instruments at B. Kelly & Co's. store, Jerome Green's, T. I. Sutton's and John Hanley's. This adds four instruments to our local exchange and practically moves these parties into the village.

Big Pumpkins.

FRANKLIN, Sept. 3, 1883.

EDITOR HERALD:

We notice in the last issue of your paper a notice that Moreland Bros. & Crane of Adrian were to give prizes of "Hero" tobacco for big pumpkins to be exhibited at the county fair. Is there any such firm as Moreland Bros. and Crane, and are they reliable parties? If this is not a swindle we think we can beat the world on pumpkins.

SUBSCRIBER.

Why, my dear friend, Moreland Bros. & Crane is the name of the enterprising Adrian firm who are scattering their celebrated "Hero" plug tobacco all over the northwest. You had better go in out of the wet, young man, and take a chew.

ANNUAL SCHOOL MEETING.

The annual meeting of School District No. 7 was held at the Central Building last Monday evening. The attendance was not large and the session was very quiet and harmonious. The Moderator, E. B. Wood, Esq., called the meeting to order, after which the minutes of the last annual meeting were read and approved.

The Director then read the annual report, containing the financial statement and estimates for the coming year, which was accepted and adopted. We give this report herewith.

ANNUAL REPORT.

Annual report of School District No. 7 of the township of Tecumseh, Mich., for the year ending Sept. 3d, 1883:

RECEIPTS.

Balance on hand Sept. 4, 1882	$1272 91
Mill tax	1190 27
Special tax	3300 00
Primary money	845 13
Library money	15 40
Dog tax	62 70
Foreign tuition	350 05
	$7336 46

EXPENDITURES.

Teachers' salaries	$1430 00
Janitor's salary	360 00
Director's salary	50 00
Fuel	456 44
Incidentals and repairs	669 74
Balance on hand	1370 28
	$7336 46

LIBRARY FUND.

Am't on hand Sept. 4, 1882	$44 71
Rec'd the past year	15 40
	$60 11
Expended last year:	
1 Webster's dictionary	$ 4 50
Balance on hand	55 61
	$60 11

RECOMMENDATIONS.

The Board of Trustees recommend that the length of time for which school shall be taught in this district during the ensuing year shall be ten months commencing Sept. 3, 1883, and ending the last Friday in June, 1884, and by both male and female teachers. Also that fifty dollars be raised by special tax to pay the Director for a salary for his services.

ESTIMATES FOR COMING YEAR.

EXPENSES.

Teachers' salaries	$4700 00
Janitor's salary	384 00
Director's salary	50 00
Incidentals	300 00
Repairs	300 00
Fuel	437 25
Insurance	378 75
	$6550 00

ESTIMATED RECEIPTS.

Mill tax	$1500 00	
Primary money	900 00	
Foreign tuitions	250 00	
Drawn from surplus	500 00	$3250 00
Special Tax		$3300 00

Under an amendment of the school law which was passed last winter, but one trustee was chosen this fall instead of two, making the membership of the Board hereafter five instead of six. The terms of office of E. B. Wood and Wm. Hayden expired. Alfred James and Dr. L. G. North were appointed tellers, and a ballot was then taken for the one trustee to be chosen. Dr. L. G. North having received the most votes was declared elected as trustee for the ensuing three years. No new business was introduced and the meeting then adjourned.

FROM THE "BAPTIST ITEMS."

Mary Sweet is living at present in Ohio. She thinks of remaining some time.

Mr. A. W. Mills' new house opposite the parsonage is going up with dispatch. It will, when done, add much to the beauty of that part of town.

Mrs. Marsh, member of the First Baptist church in Toledo, has been spending a few weeks with friends in Tecumseh. Sister Marsh is always cordially greeted.

Bro. P. B. Swick seems to enjoy buggy riding. He and his wife and son Frank have recently returned from an overland trip to Kalamazoo. We are glad that P. B's steppers did not step into a run with them, and that we see them safe and sound among us again.

Miss Carrie Osborn and Miss Lina Burton left a couple of weeks since for Laingsburg, in this state, for a three or four weeks' visit. The former is now at East Saginaw and the latter is at Lansing. They will be away some two or three weeks yet. We hope they are enjoying themselves.

Mr. and Mrs. S. Bryan gave an old ladies' afternoon party to some of the village ladies at their residence, one and a half miles west of town, Tuesday last. It looks as though they selected those whom they knew had no means of going into the country, for Mr. Bryan took them out in his own private carriage, with but one or two exceptions. Not a bad idea.

About forty of our Baptist people went in a party to Sand Lake Friday, August 17. They report a very pleasant time, and recommend others to try it. They, or at least some of them, had a pleasant visit with Bro. Holmes of Adrian. Some think that when our new railroad is completed that we will go to Devil's Lake. Will it sound well to say, "A large company of Baptists will go to Devil's Lake next Thursday!"

A recent convert at Hudson said in the August convenant meeting that religion had done a great deal for her. As evidence of this she said that before her conversion it would have been impossible for her to get her work done up and get down to church by one o'clock in the afternoon. But now she could do it. This is practical. Religion in the heart makes even housework and business get out of the way, so we may meet with the children of God.

Bro. J. S. Holmes, the pastor of the Baptist church at Adrian, has been rusticating with his family at Sand Lake for a couple of weeks. He reports a good time and a very accommodating class of people at the lake. He returned home the Saturday before our pic-nic. It is supposed he rusticated for health, and yet he was not "well" enough to come and give us that promised address. There seems to be a discrepancy here. Bro. Holmes, please stand up and explain.

Bro. J. O. Heck paid a flying visit to Ann Arbor, week before last, to consult a physician there as to whether his heart trouble would be a barrier to his attending school at Kalamazoo. The doctor's opinion was satisfactory and he will go. He had an opportunity to see something of the city, the University, and the Baptist church. There can be but one opinion of the latter—beautiful! Its walls are built of broken "heard heads" or "nigger heads," as they are sometimes called, and are the finest specimen of that kind of work to be found in the city, where much of that kind of wall is to be seen. Some of our builders should try it.

Our public schools devote but six hours a day to study. This is so short a time that a wise supervision will not allow anything to intrude to divert the attention of teachers or pupils from their work. Agents of all character, whether good or bad, are shut out. Scarcely ever is a visitor invited "to make a few remarks to the children." Much less is the school ever called upon to deliberate and decide concerning the expenditure of money, the employment of teachers, or the election of officers. The pupil needs all his time for study; and, moreover, parents believe they are better qualified to judge what the child needs in the way of instruction, and how money may be expended most wisely for this purpose.

The minutes of our Lenawee associational meetings at Flat Rock are received. On account of scarcity of funds they are not as full as usual. The thirteen churches of the association were all represented. Total membership one year ago, 1,540; present membership, 1,578; increase during the year, 38. This is an increase of about 2½ per cent. It looks very small—it is small. We pay 7 per cent. on money. Cannot the Baptists of old Lenawee return to the Lord an increase of more, or of as much, as the farmer or merchant pays for his capital? The churches report $15,544.91 raised for various objects this last year, against $9,900.31 raised the previous year; 104 baptisms, against 67 the year before. We are not standing still, but we go slow—too slow by far.

Prof. Ira Waterman has been chosen Secretary of the county board of school examiners.

A. W. Slayton is in Northern Michigan and Mrs. A. W. Slayton is visiting friends in Toledo and Detroit.

Dr. Adam, of Clinton, has accepted an appointment in the homeopathic hospital at the State University.

Many are the improvements which are being made in and around the Lilley House since Mr. Passmore took possession.

Lovers of the beautiful should pay a visit to Spalding's green house and see the many improvements which have been recently made.

Clinton News: The "Cleveland Printing Ink Works" is the name of a new firm for the manufacture of printing ink of all kinds, of which Mr. E. Vandermark, of this place is a member, the firm's name being Estep, Van DeMark & Co.

Last fall, Mr. Ezra F. Blood had some friends visiting here from New York. On their return home they sent him one potato of the Late Rose variety. He cut it into twenty-one pieces, each piece containing one eye, and planted it. Yesterday he dug his Late Rose potato crop, and the yield was about three pecks by measure and exactly 43 pounds in weight.—Pass along the next seed potato.

Adrian Record: George Stacy of the Tecumseh HERALD, last spring came over to Adrian and wrote up the salvation army in a manner somewhat ungloved. Stacy was in Adrian a few evenings ago, and wandered near the praying band, when some enemy tipped a brother the wink. The result was a good, stout, fervent appeal that the Lord would convert the heart of the wicked editor from Tecumseh. Stacy slid quietly out of the crowd and took a chew of "Hero" around the corner.

The following letter was written by the author of the Lime Kiln Club to Mr. A. O. Miller:

DETROIT, June 6th, 1883.

Mr. A. O. Miller: Your make-up and representation of Bro. Gardner, last night, at the Detroit Opera House, was complete, and more than filled my expectation. Bro. Gardner and his Lime Kiln Club are a great success as rendered by you and your company, and to all who want a hearty laugh I say, by all means go and see the Lime Kiln Club at the Opera House to-night. With best wishes, I remain your friend.

C. B. LEWIS, (M Quad.)

—Grand chance to buy a Grain Drill. Calvin Slayton & Son before you buy and they will make it pay you.

—New Departure.—Having purchased the business and stock in trade formerly owned by Dr. E. Hause, I shall endeavor to continue the trade in a competent manner, and shall make a specialty of confectionery, teas, coffees, ice cream, by the dish or gallon. Oysters in their season.—Lunches at all hours.
Will. T. Eccles.

—Slayton & Son are selling a number of the Cassaday Sulky Plows now and it would do you good to see the smile on a farmers' face after he has used one an hour.

—If you want a Drill, see the Hoosier Champion and Rooler Grain Drill at Snedicor's.

—Do not be gulled by strange agents tramping through the country taking orders for crayon portraits(?) but give your orders to some good artist or agent whom you know to be reliable.

—No more poor bread made from Heck's all roll flour. Try it.
Heck Bros.

—The Improved Domestic with the new set of attachments beats them all. Call at Sparks' and see it.

—Wm. McCowen's crayon portraits are pronounced the finest that have ever been made in this vicinity.—Leave your orders at furniture store or with Mr. Burrows, at gem gallery.

—Natural looking and serviceable artificial teeth can be procured at Dr. B. F. Snyder's Dental Rooms.

—The Wilder Plow Sulky and Ellwood Sulky Plow, for sale by Snedicor.

—You can have your decayed and aching teeth extracted at Dr. B. F. Snyder's dental rooms, without pain, by taking vitalized air.

—Call at Sparks' and see the Improved Domestic. It is just too lovely for anything.

—Don't forget that Snedicor sells the best plows in Tecumseh. Call and see for yourself and try one.

—Spring Tooth Harrows at Snedicor's.

—Call at the yard and mill of the Tecumseh Lumber Co., and examine their stock.

—Leave your orders for Sash, Doors, blinds, mouldings, window frames, tanks, troughs, etc., with the Tecumseh Lumber Co. They will receive prompt attention.

—Grain Drills.—A very complete stock at Slayton & Son's. The one horse drill, for standing corn, Roller Grain Drills, Shoe Drills and Tooth Drills. Call and get prices.

A FARM OF ABOUT 90 ACRES

In good condition.

50 Acres Wheat in the Ground

In splendid condition.

Tools, Stock and everything complete all for sale, and immediate possession given. Full particulars and prices at the

HERALD OFFICE.

THE INDEPENDENT FARMER.

Let sailors sing of the windy deep,
Let soldiers praise their armor;
But in my heart this toast I'll keep—
The Independent Farmer.
When first the rose in robe of green,
Unfolds its crimson lining,
And round his homely porch is seen
The honeysuckle twining,
When banks of bloom their sweetness yield
(The bees that gather honey)
He drives the team across the field,
Where skies are soft and sunny.

The blackbird sticks behind his plow,
The quail pipes loud and clearly,
Yon orchard hides behind its boughs
The home he loved so dearly.
The gray old barn, whose doors unfold
His ample store, in measure
More rich than heaps of heaped gold,
A precious, blessed treasure;
But yonder in the porch there stands
His wife, the lovely charmer,
The sweetest rose on all his lands—
The Independent Farmer.

To him the spring comes a smiling day,
To him the summer blushes,
The autumn smiles with mellow ray,
His sleep the winter hushes;
He cares not how the world may move,
No doubts or fears confound him;
He smiles in calm content and love
On children gathered round him.
He trusts in God, and loves his wife,
Nor grief, nor ill may harm her,
He's nature's nobleman in life—
The Independent Farmer.

About Shaving.

It is safe to say that nine out of ten of the men one meets on the streets in our cities shave, or rather are shaved. Some shave the moustache, some the chin, and some the cheek. Indeed, one must go into mathematics, to the tables of permutations and combinations, to find how many varities of shaving are possible. Woman is accused of being the party who devotes her time to appearances and the frivolities of the mirror, but after all man does his share of it. The reason he escapes the charge is that he blandly sets down his devotions as being a matter of necessity.

And it is true that shaving is a very old custom, nor have we anything to say against it except that it is unnatural, and is, and should be acknowledged to be, a concession to the looking-glass and to vanity. But the point is that old as is the art it is singular thing how few know how to shave. Nearly all men shave in the "passive voice." This may be taken as the grammatical phrase or as an acknowledgment of the voice of the barber they have to endure. Each signification is true. And while nearly all men consent to refer their shaving to a few who make it a business, only a fraction of that few understand their art.

There is a financial blunder at the bottom of it that makes trouble all through. For, do what that a shave is a shave is a mistake. One man with a stiff beard and a full face will choose to have his whole expressive countenance clean shorn; another will have only his upper lip. To each it is a "shave," and each is charged alike. One may require thirty minutes' attention, the other ten minutes. The first will dull a razor, the second not affect its edge. To each it is ten cents. Now, a barber's working day, we will assume, is ten hours long. If he is occupied three-quarters of the time he must be busier than usually appears. This gives him seven hours' labor, and if he struck a day of half-hour faces, his whole receipts would be $1.40. If his luck gave him ten-minute cases he would take in $2.10. Even this would not pay were it not for the seductive side issues—the hair cuts and shampoos of the trade that bring in more per hour than the fundamental industry.

Now, as the price and the circumstances of shaving go, there is a constant hurry to finish a man, as shaving scarcely pays at the best, and, if he is one of the most absorbing subjects—tall shave and stiff beard—it is a loss to work upon him. To shave him carefully costs too much time and the edge of the razor. To skim over his face, cutting off sections of beard here and there, and leaving odd oases of hair along the deserts of the cheek, saves the razor but spoils the person who pays for the operation, and who should not be entirely forgotten. The scale of prices ought to be regulated by what one gets, and barbers ought to have the courage to charge for what they do.

This done, a revolution in the art would follow. Speed would not be the great aim. Attention could be given to the removal of the beard, which in olden times it was as important to remove as the father, and the man who went out of the barber shop would leave satisfied, instead of hoping that next time it might be better. We recommend these considerations to the trade without charge for advice. Shaving is a custom of civilization; scalping is a token of savagery; playing with soap bubbles is a game of childhood. It is now a matter of luck which of these operations falls to the lot of a person to-day.

Ages of Animals

The following article, like the item appears in the newspapers of the land about once every seven years, and is just starting on another run. We may have published it before, but it will do to read again.

A bear rarely exceeds twenty years; a dog lives twenty years; a fox fourteen or sixteen. Lions are long-lived. Pompey's lived to the age of seventy. The average age of cats is fifteen years. A Squirrel and hare seven or eight years; rabbits seven. Elephants have been known to live to the great age of seven hundred years. When Alexander the Great had conquered one Porus, King of India, he took a great elephant which had fought very valiantly for the king, named him Ajax, dedicated him to the sun and then let him go with the inscription "Alexander, the son of Jupiter, hath dedicated Ajax to the sun." This elephant was found with this inscription three hundred and fifty years after. Pigs have been known to live to the age of thirty years; the rhinoceros to twenty. A horse has been known to live to the age of sixty-two, but averages twenty-five to thirty. Camels sometimes live to the age of one hundred. Stags are long lived. Sheep seldom exceed the age of ten. Cows live about fifteen years. Cuvier considers it probable that whales sometimes live one thousand years. The dolphin and porpoise attain the age of thirty. An eagle died at Vienna at the age of one hundred and four years. Ravens frequently reach the age of one hundred. Swans have been known to live three hundred years. M. Mallerton has the skeleton of a swan that attained the age of two hundred. A tortoise has been known to live one hundred and seven.

An Elmira, N. Y., Lady,

Mrs. H. L. Clark, 304 E. Clinton st., declares: Burdock Blood Bitters are the medicine I admire. Best remedy for dyspepsia in the world. Keep house supplied with it.

How Wood Pulp is Made.

So much is said about the paper pulp which is extensively used in the manufacture of paper that a brief description of the process of making it will be entertaining. Any white soft wood may be used. The bark is taken off, the knots and dark and decayed places cut out. It is then put into a large caldron and boiled, which extracts all the glutinous matter and resin, and renders it soft. It is then put into a large stone grinder, the water pouring on it all the time. The grindstone wears off the fibres until they are finer than saw-dust, which float away in a receptacle. The water is drained off by means of a fine sieve, leaving the pulp, which consists of fine fuzz or splinters of wood. It is white, and requires no bleaching, but is ready to be mixed with rag pulp or anything else that has a strong fibre, and receive the proper constituents to be made into paste, after which it is run off into paper sheets, whereas rags have to be washed and bleached with chloride of lime, soda ash and alum, and such strong chemicals, to take out the color. Then they are picked to pieces and made into pulp. The process by which wood pulp is made is purely mechanical. It can be made cheaply, say at about one cent a pound.

A Remarkable Tribute.

Sidney Ourchundro, of Pittsburg, Pa., writes: "I have used Dr. Wm. Hall's Balsam for the Lungs many years, with the most gratifying results. The relieving influence of Hall's Balsam is wonderful. The pain and rack of the body, incidental to a tight cough, soon disappear by the use of a spoonful according to directions. My wife frequently sends for Halls Balsam instead of a physician, and health is speedily restored by its use."

Red Horse Powders are the surest cure for diseases in animals.

Dr. Green's Oxygenated Bitters

is the oldest and best remedy for dyspepsia, billiousness, malaria, indigestion, all disorders of the stomach, and all diseases indicating an impure condition of the blood, kidneys and liver.

When the breezes blow, wafted by a paper fan in the hands of lovely women, 'tis well to have the *air redolent* with the perfume of the carmine ink in which your business address is printed. This will make the market for decent fans very good.

Patronize every agent that shows you an advertising tablet, card, directory, dictionary or even an advertising Bible, if one is offered at a reasonable price. The man must make a living.

But don't think of advertising in a well-established, legitimate newspaper. Not for a moment. Your advertisement would be nicely printed and would find its way into all the thrifty households of the region, where the farmer, the mechanic, the tradesman in other lines, and into the families of the wealthy and refined, all who have articles to buy and money with which to buy them, and after the news of the day has been digested, it would be read and pondered, and next day people would come down to your store and patronize you, and keep coming in increasing numbers, and you might have to hire an extra clerk or two, move into a larger block and more favorable location and do a bigger business, but of course it would be more expensive—and bring greater profits.—*New Haven Register.*

Mr. Paddock, postmaster at Wolcott, N. Y., writes: "I can safely recommend Rheumatic Syrup to all who are suffering with indigestion and rheumatism, as one of the surest and best remedies ever offered to the public. I have taken many so-called remedies, but found no relief until I commenced the use of the Syrup, and after three weeks' use I had no pain, and could move around as well as ever. My difficulty was in my hips and back, and feared I had some kind of kidney affection, but I am now entirely free from it and as well as ever."

Not a Humbug.

Colonel Richard Forgham, of Lyons, N. Y., says that by the use of a few bottles of Rheumatic Syrup, he was completely cured of a severe attack of rheumatism, which confined him to his room for months. He also said that he had no faith in patent medicines, but has changed his mind since using Rheumatic Syrup.

Curious Experiment with Light.

If a piece of wood be placed in a decanter of water, and the focus of a large burning glass be thrown upon it, the wood will be completely charred, though the sides of the decanter through which the rays pass will not be cracked nor in any way affected nor the water perceptibly warmed. If the wood be taken out, and the rays be thrown on the water, neither the vessel nor its contents will be in the least affected; but if a piece of metal be put into the water it soon becomes too hot to be touched, and the water will presently boil. Though pure water alone, contained in a transparent vessel, cannot be heated, yet, if by a little ink it be made of a dark color or the vessel itself be blackened, the effect speedily takes place.

HUMAN BLOOD.—On the purity and vitality of the blood depend the vigor and health of the whole system. Disease of various kinds is often only the sign that nature is trying to remove the disturbing cause. A remedy that gives life and vigor to the blood, eradicates scrofula and other impurities from it, as Hood's Sarsaparilla undoubtedly does, must be the means of preventing many diseases that would occur without its use. Sold by dealers.

Potatoes any time of the year can be peeled nicely if boiled in salt and water and drained and then covered with a thick towel and left in the back of the range five minutes.

To retain the color of any vegetable, plunge it into cold water after boiling.

Cooks make the mistake of boiling anything too much. After reaching the boiling point meats should simmer. The toughest meat can be made tender by so doing.

It is always best to under season rather than to over season food.

When anything is accidentally made too salt it can be counteracted by adding a tablespoonful of vinegar and a tablespoonful of sugar.

Meat of any kind should not be washed, but wiped with a towel to preserve the juices and quality.

Bad Case of St. Vitus Dance.

Minister is the name of a town situated in Auglaize Co., Ohio. It is the residence of Mr. J. Brandewie, who writes: "Samaritan Nervine cured my son of a bad case of St. Vitus Dance." $1.50.

PARIS GREEN.—Great care should be observed in handling Paris Green. A case is recorded where a young man who was mixing the poison for the purpose of killing potato bugs, rubbed his sleeve across his sweaty forehead, and in a few minutes his face swelled so as to blind him for several hours, threatening to permanently destroy his eyesight.

Hatch's Universal Cough Syrup gives your kidneys and liver a jog to help relieve your lungs of a bad cough, or your child of croup. There can be no membraneous croup when Universal Cough Syrup is used in the first symptoms of the disease. No family with children can afford to be without it one day. 25 and 50 cents.

It is estimated that there are on the earth 1,000,000,000 inhabitants, of which number 91,821 die every day. Of every 1,000 persons, one rarely reaches the age of 100 years, and not more than one in a 100 will reach the age of 80. Tall men, it is said, live longer than short ones, and the married are longer lived than the single.

IMPORTANT

When you visit or leave New York City, save Baggage, Expressage and Carriage hire, and stop at the **Grand Union Hotel** opposite Grand Central Depot.

Elegant rooms, fitted up at a cost of one million dollars, reduced to $1 and upwards per day. European plan. Elevator. Restaurant supplied with the best. Horse cars, stages and elevated railroad to all depots. Families can live better for less money at the Grand Union Hotel than at any other first-class hotel in the city.

The law against concealed weapons does not apply to bicycles, although they are revolvers. They avoid carbridges, and never go off without handling. It takes a man effete to use them.

Be Careful of the Babies.

If your children are threatened with croup or any throat difficulty, apply a few drops of Thomas' Eclectric Oil. It is the best medicine for the little ones we know of.

SLAYTON & SON

Write for estimates.

Grave Robbers.

Of all classes of people the professional grave robbers are the most despised. He robs us of our dear friends for a few dollars. How different is this new grave robber, Dr. Bigelow's Positive Cure, which robs graves of thousands of consumptives. This unequalled remedy for coughs, colds and consumption, whooping cough, croup and all throat and lung diseases, subdues and conquers these troubles speedily, safely and thoroughly. Trial bottles free, of Baker & Hall.

That is the most perfect government in which an injury to one is the concern of all.

DR. J. W. KERMOTT'S

STRICTLY VEGETABLE. ACT WITHOUT PAIN.

MANDRAKE PILLS,

CURE Sick-Headache, Dyspepsia, Liver Complaint, Indigestion, Constipation, and PURIFY THE BLOOD.

NOTICE.—Without a particle of doubt these Pills are the most popular of any on the [illegible]. Having been before the public for a quarter of a century, and having always performed more than claimed for them, they merit the success they have attained. Price, 25c. [illegible] sale by all druggists.

DR. A. TRASK'S MAGNETIC OINTMENT.

The Great Healer of all Inflamed Injuries and Disorders.

It is constantly effecting the most wonderful cures, while the unparalleled demand with which it meets, stamps it at once as the greatest medicine of the age for outward application.

The most incredulous are convinced, and the most skeptical are compelled to believe in the power of this great remedy.

WHAT IT CURES.

All Sores, Cuts, Bruises, Sprains, Burns, Sore Throat, Lameness, Rheumatism, Piles, Inflammation of Lungs and Bowels, Bronchitis, Croup, Salt Rheum, Chilblains, Affection of the Spine, Erysipelas, Nervous Irritation, and all disorders attendant with Inflammation.

It never fails to restore the natural functions of the skin and equalize the circulation of the blood. By this means a controlling power is gained over the most malignant forms of disease. It penetrates to every portion of the human frame; every bone, muscle, vein, nerve and ligament is searched out and made sensible to its soothing and healing influence. Hence it copes readily with internal as well as external diseases.

Over 40 Years,

This Ointment has been used by the people throughout the United States, and our confidence in its qualities is such that as we have no space here to insert any of the numerous certificates of cures which we have from all parts of the country, we simply ask those readers of this notice who have ever used this Ointment, to frankly state their experience with it to inquiring friends. If but one in a hundred would do this we should be perfectly satisfied with the result. Full directions for use will be found on pamphlet around each bottle.

Price 25 and 40 cents per bottle. Sold by all dealers in medicine.

D. RANSOM, SON & CO., Prop's
Buffalo, New York.

A CURE GUARANTEED IN ALL CASES.

For Old and Young, Male and Female.

Magnetic Medicine: a Brain and Nerve Food: Positively cures Night Losses, Spermatorrhœa, Impotency, Nervous Debility, Leucorrhœa, Barrenness; and for all the Weaknesses of the Generative (AFTER) organs to either sex. It is an unfailing and positive cure. Tones up the debilitated system, arrests all involuntary discharges, removes mental gloom and despondency, and restores wonderful power to the weakened organs. With each order for twelve packages, accompanied with five dollars, we will send our Guarantee to refund the money if the treatment does not effect a cure. It is the Cheapest and Best Medicine in the market. Full particulars in Pamphlet, which we mail free to any address. Sold by all druggists, one package 50 cts.; Six for $2.50, or sent by mail on receipt of price by addressing the MAGNETIC MEDICINE CO., DETROIT, MICH. Guarantees issued in Tecumseh by Waldo & Doty.

COMPOUND OXYGEN NOT A DRUG

A NEW TREATMENT.

For Consumption, Asthma, Bronchitis, Dyspepsia, Catarrh, Headache, Debility, Rheumatism, Neuralgia, and all Chronic and Nervous Disorders.

A CARD.

We the undersigned, having received great and permanent benefit from the use of "COMPOUND OXYGEN," prepared and administered by Drs. STARKEY & PALEN, of Philadelphia, and being satisfied that it is a new discovery in medical science, and all that is claimed for it, consider it a duty which we owe to the many thousands who are suffering from chronic and so-called "incurable" diseases to do all that we can to make its virtues known, and to inspire the public with confidence.

We have personal knowledge of Drs. Starkey & Palen. They are educated, intelligent and conscientious physicians, who will not, we are sure, make any statement which they do not know or believe to be true, nor publish any testimonials or reports of cases which are not genuine.

WM. D. KELLEY,
Member of Congress from Philadelphia.

T. S. ARTHUR,
Editor and Publisher "Arthur's Home Magazine," Philadelphia.

V. L. CONRAD,
Editor "Lutheran Observer," Philadelphia.

PHILADELPHIA, PA., June 1, 1882.

☞ In order to meet a natural inquiry in regard to our professional and personal standing, and to give the public increased confidence in our statements, and in the genuineness of our testimonials and reports of cases, we print the above "CARD" from gentlemen well and widely known and of the highest personal character.

Our "Treatise on Compound Oxygen," containing a history of the discovery of and mode of action of this remarkable curative agent, and a large record of surprising cures in Consumption, Catarrh, Neuralgia, Bronchitis, Asthma, etc., and a wide range of chronic diseases, will be sent free. Address,

DRS. STARKEY & PALEN,
1109 and 1111 Girard St., Philada.

THE LOWEST PRICES for THE BEST WORK

PAYSON'S INDELIBLE INK is the BEST. No preparation. Used with any *clean* pen for marking any fabric. Popular for decorative work on linen. Received Centennial MEDAL & Diploma. Established 50 years. Sold by all druggists, Stationers & News Agt's.

AGENTS Wanted for handsome illustrated standard works of character; great variety; very low in price; selling fast; needed everywhere. Liberal terms. Wm. Garrett & Co., Chicago, Ill.

In The Pilot House.

"Yes, sir; this kind of work obliges a man to keep sober as a judge. Of all men in the world, steamboat pilots and railroad engineers should let liquor alone. For on their clearness of sight and coolness of head depends the safety of life and property."

Keeping his hand on the wheel as he said this, Mr. A. Brockman, of No. 29½ Silver street, Chicago, added: "Of course, some of 'em drink; but the sober ones have the best positions and the best pay. Yes, the work and exposure sometimes tells on us; but for my part, I find Parker's Tonic to be all the invigorant I need. I've got a bottle aboard here now, never go on a trip without it. When I haven't any appetite, or am in any way out of sorts, it sets me up in no time. If drinking men would use the Tonic, it would help 'em to break off. (No, that isn't a lighthouse; it's a star low down near the water.) As I was saying, the Tonic is new life bottled up. You see that flag-staff? Well, with a bottle of Parker's Tonic in the locker I can keep malaria as far from me as that, all the time. My wife has used it for three years for summer complaint and colic, and again invigorant, when she's tired out from overwork. She says the Tonic is a daisy. Good-bye! Don't break your neck going below."

This preparation which has been known as Parker's Ginger Tonic, will hereafter be advertised and sold simply under the name of Parker's Tonic. As unprincipled dealers are constantly deceiving their customers by substituting inferior articles under the name of ginger; and as ginger is really an unimportant ingredient, we drop the misleading word.

There is no change however in the preparation itself, and all bottles remaining in the hands of dealers, wrapped under the name of Parker's Ginger Tonic contain the genuine medicine if the fac simile signature or Discox & Co., is at the bottom of the outside wrapper.

SAMARITAN NEVER FAILS. NERVINE

"You claim too much for SAMARITAN NERVINE," says a skeptic. "How can one medicine be a specific for **Epilepsy, Dyspepsia, Alcoholism, Opium Eating, Rheumatism, Spermatorrhœa, or Seminal Weakness, and fifty other complaints?"** We claim it a *specific*, simply, because the virus of all diseases arises from the blood. Its Nervine, Resolvent, Alterative and Laxative properties meet all the conditions herein referred to. It's known *world wide* as

THE GREAT NERVE CONQUEROR

It quiets and composes the patient—not by the introduction of opiates and drastic cathartics, but by the restoration of activity to the stomach and nervous system, whereby the brain is relieved of morbid fancies, which are created by the causes above referred to.

To Clergymen, Lawyers, Literary men, Merchants, Bankers, Ladies and all those whose sedentary employment causes nervous prostration, irregularities of the blood, stomach, bowels or kidneys or who require a nerve tonic, appetizer or stimulant, SAMARITAN NERVINE is invaluable. Thousands proclaim it the most wonderful invigorant that ever sustained the sinking system. $1.50. **Sold by all Druggists.** (14)

A PICNIC DINNER.

"Pass the pork and beans, dear mother,
For I'm hungry as a hog.
True, I had a picnic dinner,
Sitting on an ancient log.
But Adolph was there, dear mother,
And I fain would have him think
I am of ethereal make-up,
For, mamma, he's got the chink;
So I only ate a morsel
Of a dainty frosted cake,
And a peanut and a raisin—
Gave all solid grub the shake,
Pile the provender around me,
For I'm famishing, by gum!
Ain't this ham and beans delicious,
Oh! yum! yum! yum! yum! yum! yum!"

Dr. Johnson's Marriage.

The artless manners and rustic prettiness of Lucy Porter had won Johnson's youthful heart, when she was on a visit to the Rev. John Hunter's, master of the free school, Lichfield, in Johnson's youthful days. The peculiar appearance, however, of Johnson, could not tempt the lady to a return of his passion; and at length she returned to her parents at Birmingham. Business required Johnson's presence in that neighborhood on the death of his father, and calling upon his former mistress there, he found her parent dying. With that affectionate friendship which particular situations always experienced from him, he passed all his leisure hours at Mr. Porter's, attended his sick bed, and a few months after his death, asked Mrs. Johnson's consent to his marriage with the widow.

Mrs. Porter has been represented as very fat, with a red face, and indifferent features, and in her speech and manners affected, and bordering on girlish levity; while Johnson, on his first introduction to her, exhibited an appearance yet more singular. He was then lean and lank, so that his immense structure of bones was hideously striking to the eye, while the scars occasioned by the scrofula were deeply visible. His hair, which was straight and stiff, he wore separated behind; and he often had, seemingly, convulsive starts and odd gestulations, which tended to excite at once surprise and ridicule. Mrs. Porter, however, was so much engaged by his conversation that she overlooked all these external disadvantages and expressed to her daughter: "This is the most sensible man that I ever saw in my life."

Johnson's mother, as might naturally be expected, expressed her surprise at a request so imprudent and extraordinary, both on account of her disparity of years and want of fortune.

"No, Sam," she said, "my willing consent you will never have to so preposterous a match. You are 25 and she is turned of 50. If she had any prudence, this request would never have been made to me. Where are your means of subsistence? Porter has died poor in consequence of his wife's expensive habits. You have great talents, but as yet have turned them into no profitable channel."

"Mother," replied Johnson, "I have told her the worst of me—that I am of mean extraction, that I have no money, and that I have had an uncle hanged. She replied that she valued no one more or less for his descent, that she had no more money than myself, and that though she had not had a relation hanged, she had fifty who deserved hanging."

After some little lapse of time, however, matters were brought to a conclusion, and Derby was fixed on as the place where the ceremony should be performed, on the 9th of July, 1736, for which place the bride and groom set out on horseback. The singular account of their journey to church on the nuptial morning is given by Boswell in the doctor's own words to him: "Sir, she had read the old romances, and had got into her head the fantastical notion that a woman of spirit should use her lover like a dog. So, sir, at first she told me that I rode too fast, and that she could not keep up with me, and when I rode a little slower she passed me and complained that I lagged behind. I was not to be made the slave of caprice, and I resolved to begin as I meant to end. I therefore pushed on briskly, till I was fairly out of her sight; the road lay between two hedges, so I was sure that she could not miss it, and I contrived that she should soon come up with me; when he did, I observed her to be in tears."

This, it must be allowed, was a singular beginning of connubial felicity; yet he proved a most affectionate and indulgent husband to the last moment of his life. He once told Topham Beaclery, with much gravity, "Sir, it was a love match on both sides;" and in his Prayers and Meditations we find very remarkable evidence that his regard and fondness for her never ceased, even after death.

"Out of the Current."

Like our shadows, our wishes lengthen as our sun declines.—[Young.

The best of prophets of the future is the past.—[Byron.

To live long it is necessary to live slowly.—[Cicero.

"A pound of care will not pay a pound of debt."

"Happily for little men, the giants have seldom any great wit."

"Self-inspection is the only means to preserve us from self-conceit."

What is the end of Fame? 'tis but to fill a certain portion of uncertain paper.—[Byron.

Thought is the property of him who can entertain it, and of him who can adequately place it.—[Emerson.

Learning hath gained most by those books by which the printers have lost.—[Thomas Fuller.

"Vice stings us even in our pleasures, but virtue consoles us even in our pains."

It is right to be contented with what we have, never with what we are.—[Mackintosh.

He that pryeth into every cloud may be stricken with a thunderbolt.—[Joseph Cook.

No books are so legible as the lives of men; no characters so plain as their moral conduct.

When a friend corrects a fault in you, he does you the greatest act of friendship.—[Golden Rule.

"A year of pleasure passes like a floating breeze, but a moment of misfortune seems an age of pain."

Pursue what you know to be attainable; make truth your object, and your studies will make you a wise man.

Bucklen's Arnica Salve.

The greatest medical wonder of the world. Warranted to speedily cure Burns, Bruises, Cuts, Ulcers, Salt Rheum, Fever Sores, Cancers, Piles; Chilblains, Corns, Tetter, Chapped Hands, and all skin eruptions, guaranteed to cure in every instance or money refunded. 25 cents per box. Sold by C. A. Wright & Co.

The Gulf Stream.

Among the wonders of physical geography, few are more interesting in their relation to this country than what is known as the Gulf Stream. This is an oceanic current of great extent, which takes its rise in the Gulf of Mexico, whence it derives its name. The peculiar formation and position of this gulf renders it a receptacle for the waters of the Atlantic, which sweep across the north-eastern coast of South America; and, on arriving in the gulf, they become warmed to a much higher temperature than is anywhere found in the surrounding ocean. The summer temperature of the waters in the Gulf is about eighty-eight degrees, while in the open Atlantic, in the same latitude, it is seventy-eight.

Thus warmed the waters pass out of the Gulf northward, in a deep strong current, through the coast of Florida on the one side, and the islands of Cuba and the Bahamas on the other. The steam progresses here with a velocity of five miles an hour. It rolls like a mighty river along the shore of North America, widening as it flows, until it nears the banks of Newfoundland, where it is turned aside, partly by the formation of the coast, which here projects boldly out, and partly by the encounter with strong and adverse currents from the North Atlantic. At the point where it is turned aside, it stretches almost across the Atlantic; the current itself, according to some, being about two hundred miles in width, and the warm waters of the stream extending in all more than twice that distance. In the latter part of its course it leaves behind it that remarkable drift of sea-weed known as the Mer de Sargasso.

Crossing the Atlantic eastward, towards the islands of the Azores, the main stream gradually becomes lost and its current spent; but a portion of it continues northward towards the British Islands. Long after the current itself is lost, the neighboring seas continue very sensibly affected by the warm waters which it has brought down. It was stated by Commander Chimmo, at a meeting of the Royal Geographical Society, that in one hour's sailing into or out of the current of the Gulf Stream, the temperature changes no less than from twenty to twenty-five degrees; and that a ship may be so placed that her bow and stern are floating in the water the heat hich differs greatly.-

Stream is well known to sailors as peculiarly the region of storms; and in their passage across the ocean they avoid it as much as possible for this reason. Whenever, from any cause, the current is of greater volume and force than usual, these storms are proportionately increased.

This leads us to notice a plausible theory which was stated to account for the particularly mild winter experienced in 1868-9, in combination with a series of violent gales. The frequent occurrence of earthquakes in the southern seas, recorded a few months before, gave rise, it was asserted, to a more than ordinary influx of waters from those seas towards the Mexican gulf. The volume of the Gulf Stream was consequently largely increased, and its effects were therefore felt more powerfully than usual upon our shores, both in the mildness of the season and the frequency of storms. We record this as a remarkable theory, put forward with confidence in some quarters; but it is only fair to say that it has been questioned by many of our scientific men.

A Life Saving Present.

Mr. M. E. Allison, Hutchinson, Kan.: Saved his life by a simple Trial Bottle of Dr. King's New Discovery, for Consumption, which caused him to procure a large bottle, that completely cured him, when Doctors, change of climate and everything else had failed. Asthma, Bronchitis, Hoarseness, Severe Coughs, and all Throat and Lung diseases, it is guaranteed to cure. Trial Bottles free. Large size $1.00.

Sold by C. A. Wright & Co.

HOW TO KEEP COOL.—In the torrid belt of South America they evidently know how to make the best of adverse circumstances, and keep cooler when the thermometer is up in the nineties than we do. Here is a simple reciepe which will cost nothing if it succeeds, and nothing worse than a cold if it fails. Before retiring at night take a cool bath, draw on the *robe de nuit* without drying the body, and go to bed. The evaporation of the water is said to make the body delightfully cool, and if, in addition to this, the bed is well sprinkled before retiring, the effect is said to be astonishing, and however great the humidity of the atmosphere, the plan is said by those who had have years of experience to be infallible.

No Grease for Him.

"When Greece her knees—Greece her knees—Greece her knees," stammered an embarrassed school boy, forgetting the next line of his recitation. "There is no occasion to grease anybody's knees," shouted his teacher. "Go and study your piece." Neither is there occasion to grease your hair. Parker's Hair Balsam is all the dressing you want. Restores the original gloss and color to gray or faded hair. Does not soil the linen; not a dye; good for the scalp; prevents falling out.

Death comes equally to us all, and makes us all equal when he comes. The ashes of an oak in a chimney are no epitaph of that, to tell me how high, or how large, it was; it tells me not what flocks it sheltered while it stood, nor what men it hurt when it fell. The dust of great persons' graves is speechless too; it says nothing, it distinguishes nothing. As soon the dust of a wretch whom thou wouldst not, as of a prince whom thou couldst not look upon, will trouble thine eyes if the wind blows it thither; and when a whirlwind hath blown the dust of the churchyard into the church, and the man sweeps out the dust of the church into the churchyard, who will undertake to sift those again, and to pronounce, "This is the patrician, this is the noble flower, and this the yeoman, this the plebeian bran."—[Donne.

Hood's Sarsaparilla is made of roots, herbs and barks. It gives tone to the stomach and makes the weak strong. Sold by druggists.

To preserve autumn leaves, spread and press them in a suitable dish, with alternate layers of fine sand thoroughly dry, and as hot as the hand can bear. When the sand has cooled they may be removed, smoothed under a hot iron, dipped for a moment in clear French spirit varnish, and allowed to dry in the air.

For bilious fevers and malarial disorders, use Ayer's Ague Cure. Taken according to directions, its success is guaranteed.

A Shrewd Reply.

Sir Walter Scott says that the alleged origin of the invention of cards produced one of the shrewdest replies he had ever heard given in evidence. It was made by the late Dr. Gregory, at Edinburgh, to a counsel of great eminence at the Scottish bar. The doctor's testimony went to prove the insanity of the party whose mental capacity was the point at issue. On a cross interrogation he admitted that the person played admirably at whist. "And do you seriously say, doctor," said the learned counsel, "that a person having a superior capacity for a game so difficult, and which requires, in a pre-eminent degree, memory, judgment, and combination, can be at the same time deranged in his understanding?" "I am no card player," said the doctor, with great address. "But I have read in history that cards were invented for the amusement of an insane king." The consequences of this reply were decisive.

Polishing the Wrong End.

Many men daily polish their boots who never give a thought to the condition of their hair, except to barrow it casually with brush and comb, or submit it to the paralozing attentions of the average barber. What hapens? Why, this: From neglect, mental anxiety, or any of a score of causes, the hair turns prematurely gray and begins to fall out. Paker's Hair Balsam will at once stop the latter process and restore the original color. An elegant dressing, free from grease.

Old Bourbon.

"Old Bourbon" is a name given to the whiskey made in Bourbon county, Ky., in times gone by, when there was but little made elsewhere. Then every well-to-do farmer converted all his surplus grain into whisky, which was mashed by hand and boiled in two little copper stills; clean water used, and all the grain selected with the greatest regard to soundness; consequently, when ripened by age, it was eagerly sought after, and acquired a world-wide reputation, and nearly all whiskies now are branded "Old Bourbon." There is no more of that kind made now. The great bulk of whisky is made of sweet or sour mash, or scalded with water. There cannot be much difference in the qualities of the same strength.

Griggs' Glycerine Salve.

The best on earth can truly be said of Griggs' Glycerine Salve, which is a sure cure for cuts, bruises, scalds, burns, wounds and all other sores. Will positively cure piles, tetter and all skin eruptions. Satisfaction guaranteed or money refunded. Only 25 cents. For sale by Baker & Hall.

ESTATE OF WILLIAM WARING.

STATE OF MICHIGAN, County of Lenawee, ss.

At a session of the Probate Court for the County of Lenawee, holden at the Probate Office in the city of Adrian on Friday, the 17th day of August, in the year one thousand eight hundred and eighty-three.

Present, Norman Geddes, Judge of Probate.

In the matter of the estate of William Waring, deceased.

On reading and filing the petition, duly verified, of Alva Waring praying that administration of said estate may be granted to Frederick E. Wood.

Thereupon it is ordered, That Monday the 17th day of September next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs-at-law of said deceased, and all other persons interested in said estate, are required to appear at a session of said Court, then to be holden at the Probate office, in the City of Adrian, and show cause if any there be, why the prayer of said petitioner should not be granted.

And it is further ordered, That said petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said County of Lenawee, for three successive weeks previous to said day of hearing.

THE "FISHING LINE."

TAKE THE

GRAND RAPIDS & INDIANA RAILROAD.

The only route to the Trout, Grayling and Black Bass Fisheries and the famous Summer, Health and Game Resorts and Lakes of

Northern Michigan.

The waters of Grand Traverse Region and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

Brook Trout abound in the streams, and the famous American Grayling is found only in these waters.

The Trout Season begins May 1st, and ends September 1st. The Grayling Season opens June 1st and ends November 1st.

Black Bass, Pike, Pickerel, and Muskalonge also abound in large numbers in the many lakes and lakelets of this territory. The sportsman can readily send trophies of his skill to his friends or "Club" at home, as ice for packing fish can be had at nearly all points.

Take Your Family with You. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing.

The Climate is peculiarly beneficial to those suffering with Hay Fever and Asthmatic affections.

New Hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw City, forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit, Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse, and all points in the Upper Peninsula of Michigan.

During the season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns, and Fishing Tackle carried free at owner's risk. It is our aim to make Sportsmen feel "At Home" on this route. For Tourist Guide, a handsomely illustrated book of 160 pages free, Time Cards, Folders and further information address

SPECIAL CORRESPONDENCE.

ADDISON ATOMS.

Jack Frost has put in pretty lively work in this section during the past few days. Corn and other crops have sustained material injury.

The village sick list is unusually lengthy at this writing notwithstanding the medical corps of the place has been strengthened by two M. D's.

Miss Mary Somers, of this place, opens school at the lakes this week.—She is experienced in the art of youngster yanking, and we predict a lively time for the juveniles of that ranch.

Rev. Mr. Whiteley of the M. E. church being absent to attend the conference, his pulpit was filled last Sabbath evening by Elder B. F. Bailey of the Baptist church, Rollin.—Come again.

Our village schools opened Monday of this week with fine prospects of doing a good terms work. Prof. Hutchinson appears to be the right man in the right place.

Smith's grist and flouring mills are receiving a new dress by way of siding, which will contribute no small item to the looks of the place.

Thiell's lumber yard is a welcome enterprise here and we trust may succeed.

SPRINGVILLE SNUFF.

The frost has injured corn badly, even through this section. Clover seed is thought to be considerably damaged also.

C. L. Vaughn has returned home from a pleasure trip to the White Mountains.

A. J. Monaghan has his first contract of painting completed in the finishing up of a couple of barns for Wm. White and they look splendid.

J. H. Smith moved two loads of goods to Tecumseh Tuesday, and will move the balance of his furniture the latter part of the week.

C. E. Jessup has bought out J. B. Stephenson's stock of groceries and the latter will retire from the business.

Elvin Ayres has sold his corner lot in the village, containing house and store, to Jackson Ayres for $1,750.

Humphrey Egan has (although unfinished) moved into his new house.

Rev. Mr. Wilson preached his farewell sermon to a large and appreciative audience on Sunday, the 9th, inst.

Carrie Rogers returned home from Detroit last Saturday.

The remnant of the Springville cornet band went down and played with the Franklin boys last Saturday evening, and report a splendid practice.

THE COUNTY FAIR.

The preparations for the coming fair of the Lenawee County Agricultural Society are now well in hand and it is safe to predict the best fair ever held in the county. The exhibition will open on Tuesday, the 25th inst., and close on Friday, the 28th, giving four entire days to the show.—Lawrence Park is the place selected and the grounds have been much improved since last year, so that there will be nothing wanting to promote the convenience of both exhibitors and visitors. The premium list is the fullest ever issued and covers not only all the usual departments but also includes some special features. Special prizes are also offered by individual firms. Arrangements have been perfected for a "merchants' display," which will afford the enterprising merchants of the county, who are so disposed, to display their goods for advertising purposes. Reduced railroad rates have been secured on both roads. On the Wabash line one and one-third fare will be charged for the round trip from Milan on the east to Montpelier on the west and all intermediate stations. The Lake Shore road grants the same reduction on both the main line and branches from and including the following places: Sylvania, Dundee, Fayette, Pittsford, Manchester and Monroe.

Among the special attractions may be mentioned the following:

Speeding and racing of horses will take place on every day of the fair.

On Thursday there will be a grand parade of the Knights Templar and Knights of Pythias organizations.

On Friday the Adrian Guard and the fire department will have a grand review.

Moreland Bros. & Crane offer five special prizes of their "Hero" plug for the biggest pumpkins. These pumpkins must be shown in their booth which will be set apart for that purpose. For the largest pumpkin a ten pound box of plug.

2nd largest pumpkin, 8 pound box.
3d " " 6 " "
4th " " 4 " "
5th " " 2 " "

M. E. Chittenden & Co. will repeat their baby experiment of last year, and it is expected that there will be a big lot of entries in the baby show.

THE GREAT SHOW.

Burr Robbins' American and German Allied Shows will give an exhibition here on Thursday, Sept. 20. Burr visited Tecumseh three years ago, and his show was largely patronized and gave the utmost satisfaction. New attractions have been added since then and the show is in every way first-class. The Detroit Post and Tribune says:

The Burr Robbins American and German Allied Shows gave two performances in Detroit Saturday. The street procession in the morning was equal to usual displays of that kind, but was scarcely complete enough to give the observer an adequate idea of the character of the organization. The performances themselves were very pleasant surprises. The circus came without any extended announcement, with modest claims and an almost absolute freedom from the bluster so common to amusements of the kind. So little had been claimed for it, in fact, that the persons who always greet circus announcements with an eager little flutter of anticipation turned away from the preliminary statements with disappointment. All this did not deter a large number of people from visiting the grounds afternoon and evening. It summarizes the whole performance to say that these people were amply repaid for their venture. The spread of canvas was large enough to promise plenty of room. The menagerie tent was found to be occupied by an excellent selection of animals, many of which are rarely seen in traveling exhibitions. There was not so many that one became confused in an attempt to see them all; on the other hand, there were not so few that one felt it scarcely worth while to look. Not the least interesting feature of the animal exhibit was the monstrous horse, Moloch, a powerfully developed colt of five years, from the north of France, so high in stature and large of limb that one doubted whether it was a horse or some as yet unknown quadruped of similar structure. There was also a hippopotamus, ungainly and ugly enough to be interesting. The ring performance was one of the best seen here in some time. It was superior not only in the variety and excellence of the acts, but in the rapidity and earnestness with which they succeed each other. The best thing about this circus, when all has been said, is its cleanliness and freedom from the tormenting huckster.

A MAGNIFICENT TESTIMONIAL.

From the Decatur, Ill., Daily Republican we clip the following which will explain itself. The Mr. Bresie spoken of is a son of Wm. Bresie, of this village. His Tecumseh friends will be glad to hear of his good luck:

Mr. W. R. Bresie, Assistant Superintendent of the Pacific Express Company, as is well known, has his office in opera block, and has immediate charge of all lines east of the Mississippi river. He located in Decatur on June 20th, but previous to that time he had his headquarters in St. Louis, where he was stationed for a period of three years, and where he filled the position of superintendent under Supt. Fuller, and had sole charge of the eastern division. There are about 175 express messengers east of Omaha and north of Texas in the employ of the Pacific company, and these messengers, as a mark of their regard and also as a fitting testimonial of their good wishes for Mr. Bresie, with whom they were more nearly associated in St. Louis, pooled their issues," and today presented him with a princely gift in the shape of a massive and elegant French Italian marble clock, with cathedral gong bell, and also a pair of bronze statuary representing knights in armor. The clock is surmounted by a bronze statue representing "History" with globe and library at his left, and the black and pink marble is polished until it shines. The group of statuary with the costly clock would ornament the most luxuriously furnished parlor, and genial Mr. Bresie, who is very popular with the company and the messengers, is as proud of the wholly unexpected gift as he would be of the gift of a section of Macon county land. He is very thankful to the thoughtful donors who have so kindly remembered him. Accompanying the gift was a neatly stamped presentation card in a plush frame, on a stand bracket, which was inscribed as follows: "Presented to W. R. Bresie by Messengers of the Pacific Express Co., Sept., 1883."

THE CIRCUIT COURT.

The September term of the Circuit Court began on Tuesday. The calendar is quite a large one. There are 14 criminal cases as follows:

Ralph J. Jewel, aiding escape of Thos. J. Navin; Edward Siebert, stealing horses; Frank Barnes, larceny from dwelling house in day time; Wm. Mitchell, burglary; Frederick Durheim, burglary; Frank Elliott, stealing from dwelling in day time; Avjral J. Cross, embezzlement; John Shoemaker, abduction; Samuel Crysler and Daniel A. Loomis, willfully injuring shade trees; Patrick Riley and John Kernan, keeping saloon open on Sunday; Michael Molloy, bastardy; Isaac C. Rumsey, incest; John Bench, disfiguring a man's ear; Fordyce E. Benjamin and Laura J. Mann, adultery.

There are 42 issues of fact, trial by jury; 13 issues of fact, trial by court.

There is one imparlance case.

There are 13 chancery cases of the first class and nineteen of the fourth class.

Do not fail to see the street parade next Thursday of the circus.

MICHIGAN STATE ITEMS.

Horse thieves at Plainwell and burglars at Otsego.

Jonesville is discussing the building of an opera house.

E. L. Mingus is the new editor of the Hunter Index.

Niles is to have a grand fireman's tournament, Sept. 26-28.

Over 1,200 scholars were enrolled in the Port Huron schools.

The Huron river affords water and power to six great paper mills.

Coal and iron have been discovered in Evart and Osceola counties.

The old mill at Kalkaska has new owners, and will soon open up again.

Olivet is being connected to the outside world by telephone.

The Lansing Journal hoists the old ticket Tilden & Hendricks.

Mrs. H. L. Brow[illegible], has escaped from the Ka[illegible]ylum.

The ladies' libra[illegible]ation of Adrian has 2,848 bo[illegible] a debt of $100.

Work has begun on the Chicago & West Michigan railroad extension to Baldwin.

Wm. McNett, of Freelands, was struck in the eye by a stick he was splitting, and his eye put out.

The Lutherans of Manchester will observe September 16 as "Mission" Sunday.

Wilberton will be the name of the new postoffice at Chidpewa Lake, near Evart.

The Grand Rapids and Indiana railroad will not run Sunday excursion trains.

Marcelona claims the largest broom handle factory in the world. It turns out over a million handles a day.

James Donnelly, an inmate of the City Prison at East Saginaw, was found dead in his bunk last week.

Wm. J. Maas, of Humboldt, is the first lad appointed to West Point from the new Eleventh Congressional District of Michigan.

Several brick buildings, including two hotels, are being erected at Newaygo to replace those destroyed by fire, April last.

Manistee lumber and shingle cutters are moving to curtail the cut of their products about one-third. Trying to force up prices.

A writer in the Frankfort Express says that the reckless use of the gill net is destroying the food fishes of Lake Michigan at a fearful rate.

A Charlotte dealer in frogs has shipped 3,000 of these toothsome birds to Chicago this season. He pays a cent apiece for them.

News has been received at Jackson that Dr. J. K. Richey, formerly of that place, recently shot his wife and attempted to kill himself.

The Advent college at Battle Creek just opened employs 11 teachers.—More will be added soon as the rooms are now over-crowded.

The school census of Kalamazoo shows the population of the village to be over 17,000, and the one school district in the place has 3,700 children.

The Medical Committee have nominated Dr. Nathan Baldwin, of Marshall, for lecturer in the chair of surgery, in the Homoeopathic College, University of Michigan.

The furniture factory now building at Newaygo will be completed and running by January next. It is being built by a stock company with $50,000 capital.

While Wm. Tripp was digging a well in Tittabawassee township, Saginaw county, a child rolled a stone down upon him, crushing his skull and perhaps fatally injuring him.

Ed. Bosworth, who has been employed in a Charlotte livery stable about a week, was sent into the country the other day with a team, and at last accounts man or team had not been heard from.

A boat and lot of camp equipage have been found strewed along the beach of Lake Superior, between Maple River and Ratchewanong Bay, supposed to have been the property of a hunting party who have perished.

Marshall people regard it as certain that the shops on the Michigan & Ohio railway will be located at that city and with commendable enterprise are endeavoring to induce manufacturing enterprises to steer that way also.

The W. C. T. U. of East Saginaw figure out that there are in that place over 12,000 people who never hear the gospel preached. They should pass the hat for more missionary contributions for work in Burmah Pootrah at once.

THE BEAUTIFUL CITY DETROIT.

The Attractions it Possesses and what may be Seen there by the Thousands who will be its guests during the State Fair and All Other Seasons.

[illegible]

the country as Stearns Drug Store. It is without question, one of the most elegantly appointed establishments of the kind in America. Aside from the richly carved showcases sparkling chandeliers, etc., the stock of articles to be found under this roof has an almost national reputation for its completeness, and in fact the firm prides themselves on being able to supply any article in the drug line that most dealers find difficult to procure. The [illegible] and best perfumery, [illegible] and toilet articles, rubber goods and [illegible] will be found here in profusion. Before the fire [illegible] now the home of [illegible] Journal, and the [illegible] of a prominent [illegible] [illegible] Among the various [illegible] [illegible] and gentlemen's [illegible] [illegible] Rat Portage lumber [illegible] [illegible] Mr. Stearns [illegible] [illegible] [illegible]

DIPHTHERIA!

THE PROSTRATION which follows Diphtheria, and the persistency with which it clings to the patient, are well known to all who have had any experience with this terrible disease.

The following letter shows how the restoring and invigorating properties of **Hood's Sarsaparilla** overcome it, and how by vitalizing and enriching the blood it neutralizes and eradicates the poisoned matter from it, bringing to the convalescent the color, life and vigor of robust health.

LOWELL, MASS.

MESSRS. C. I. HOOD & Co.: Gentlemen—My little girl had the diphtheria last April. The disease left her very weak, blood poor, with no appetite, and she could not seem to rally from its effects. HOOD'S SARSAPARILLA was recommended by a neighbor. After she had been taking it a few days we noticed a change for the better—she began to eat with a relish. It seemed to take out the poison the disease had left in her blood, the change being very noticeable in her face. She took it two months and fully regained her health, much to our delight. We now recommend HOOD'S SARSAPARILLA with a great deal of pleasure. Very truly yours,

J. R. SMITH,
19 Butterfield Street.

"That Extreme Tired Feeling."

"The first bottle has done my daughter a great deal of good; her food does not distress her now, nor does she suffer from *that extreme tired feeling* which she did before taking HOOD'S SARSAPARILLA."

Sold by all druggists. Price $1 a bottle or six bottles for $5. Prepared by C. I. HOOD & CO., Apothecaries, Lowell, Mass.

Hood's Tooth-Powder, Only 25 Cents.

K B

KING OF THE BLOOD.

The Most Thorough Purifier of the Blood Yet Discovered.

Cures all Humors, from a Common Eruption to the worst Scrofula.

It purifies the Blood.
It invigorates the Liver.
It regulates the Bowels.
It strengthens the stomach.
It gives vivacity in place of lassitude; cheerfulness in place of gloom, and robust vigor in place of debility.

Dyspepsia, Biliousness, Disordered Liver, Constipation, Nervous Affections, General Debility, in short all the numerous diseases and discomforts caused by impure blood are speedily conquered by this powerful corrector, the chief and sovereign of all ancient or modern medical discoveries—KING OF THE BLOOD.

Its name is its best description as it is a royal dispenser of the blessings of health and vanquishes the foes that lurk in the blood.

It banishes PIMPLES, SALT RHEUM, SCALY ERUPTIONS, ULCERS, SCALD HEAD, FEVER SORES, and all SCROFULOUS DISORDERS.

It checks CONSUMPTION in its early stages. It has frequently cured it when advanced.

It disperses TUMORS and CANCERS without the Surgeon's knife.

It cures DROPSY, general or partial.

It cures FEMALE WEAKNESS and DISEASE.

It reduces in a safe and effectual manner all swellings, external or internal.

It eradicates the effects of Venerial Disease and Mineral Poisons, and establishes a sound constitution.

Many certificates, much further information and full directions for using, will be found in the pamphlet, "Treatise on Diseases of the Blood;" in which each bottle is enclosed.

Price $1 per bottle containing 12 ounces, or to 50 doses. Sold by dealers in medicine.

If your druggist does not happen to have it on hand, request him to order a supply of it for you, as it will be cheaper than for you to order direct of us, and less trouble.

THE BEAUTIFUL CITY OF DETROIT.

Concluded.

WM. WRIGHT, 34 FORT ST. WEST.—In decorative art, Mr. Wm. Wright is authority in this section of the country at least, and consultations from residents of distant cities are of almost daily occurrence. So palpable has the fact of his superiority become that a great part of the residents of Detroit would not be satisfied unless this house had put its impress upon a part or all of their home decorations. It must not be concluded that because of excellence his charges are excessive, for this is not the case, it being the rule with him to make a fair charge whether one's expenditure be for either simplicity or luxuriance. Lovers of art in decorative matters will find much to please them in the exhibit of the firm in room K at the Art Loan; for many rare pieces in wooden mantels, art stained glass and art tiles are there displayed.

SASH, BLINDS AND DOORS.—With the quality and cheapness of E. P. Earl's sash, blinds and doors we have been long acquainted, as well as heard them spoken of. Mr. Earl, having served a regular apprenticeship at the business and carried on the same in New York State as well as in Michigan for the last forty years, is thoroughly familiar with the best qualities of French and American glass, and offers none but work that he can guarantee against shrinkage or any failure whatever. His sash are glazed with best brands of French or American glass, and finished in a smooth, neat, clean manner, and warranted safe home against breakage. Builders will find this the most convenient and cheapest way to buy their sash, and will be sure to have a good job done that will not shrink and blinds that will not get out of order. His prices are reduced. Send in your orders or bills for estimates to E. P. Earl, 13 Jefferson avenue, Detroit.

AN ARTICLE OF GREAT MERIT.—As our readers well know, the use of compressed yeast has superseded in the cities and villages the old-fashioned and troublesome methods of leavening bread. For two cents the housewife can now procure a package containing all the requisites and insuring all the effects of the time-honored hop or salt rising. These yeast packages are carefully prepared according to a well-tested formula, and offer certainty of result with economy of time and labor for the benefit of those who use them. The success of the "Compressed Yeast," manufactured by Fleischmann & Co., 23 Congress street east, has been due to its superior qualities. The "Compressed" is a general favorite, and local dealers cannot afford to be without it. The manufacturers, wishing to extend to the utmost their already large trade in our State, request us to invite all grocers and other dealers in our vicinity to call at their factory and examine into the claims of the "Compressed." The firm will be found courteous and liberal, and prepared to quote prices which will insure a handsome profit to our local dealers.

A FURNITURE PALACE.—The elegant establishment of Mills & Barker, occupying the two stores 188 and 190 Woodward avenue, will repay an inspection, to which all our readers are invited by the enterprising proprietors. The firm deal in every description of furniture and carpets, and their stock contains every requisite for house furnishing, from a cottage to a palace. In these days of novelty, a look over the latest things in household decoration is a rare treat. We are requested to state that the firm will offer special inducements to retail dealers from the country. Their prices are always very low, and when this extra inducement is added the sales should be very large during the approaching rush of visitors to Detroit. A call at their elegant stores will satisfy everybody that their goods are not excelled in the State. Retail dealers should note these facts, and we need not urge our merchants to buy where the best articles are offered at the lowest figures.

A NEW TOBACCO.—The many friends and [illegible] of The Globe Tobacco Company will [illegible] pleased to learn that they have recently [illegible] in the market a grade and style of cut [illegible] smoking tobacco which is sure to [illegible] a ready sale. It is handsomely packed in [illegible] quarter-pound packages which sell for [illegible] and by comparison it will be found [illegible] article of the kind ever offered to the [illegible] sale thus far has been truly wonderful. The old reliable "Globe" fine-cut [illegible] tobacco still holds its place among [illegible] on earth, and its sales show a steady [illegible] daily. When in the city, dealers are [illegible] by the firm to call at the factory, 31, [illegible] Atwater street east, make themselves [illegible] and if they wish look through the establishment.

A BOOK.—Who is there, in this section of [illegible] at least, who has not traded with or [illegible] the old established book store of J. [illegible] Woodward avenue? It is to be [illegible] that few who have had occasion to [illegible] in his line for Detroit have not [illegible] with him. Mr. Roy enjoys a [illegible] reputation [illegible] for he [illegible] all [illegible] knew has [illegible] in the [illegible] at the [illegible] in America. It should be [illegible] Mr. Roy makes a specialty of sch[illegible] and art books, and his stock [illegible] stock for the whole [illegible] trade [illegible]

[illegible] which is guaranteed by the manufacturers to be the best in the market. Both hand horse mowers are made by the Excelsior [illegible] pany. Visitors from the country will receive a hearty welcome from Mr. Penfield, and will find him a gentleman with whom it is a pleasure to transact business. His prices for first-class articles will be found comfortably with any in Detroit, and we are our readers that his figures are lower, for quality, than many other dealers ask for their goods.

MOORE, MOORE & CO.—The citizens of this point with pride to the splendid edifice which Edson, Moore & Co., transact their business, and feel that were they to give utterance to their thoughts all that might be spoken would only be in praise of a firm which has, by honorable career, its enterprise and liberality, done much to advance the business interests of the city. Jobbers of and wholesale dealers in dry goods may be found in every city, but it is doubtful if any one of them will possess more staunch and true friends than Edson, Moore & Co. The secret of this [illegible] friendship lies in the fact that in all things that may be beneficial to the city and [illegible] they pledge their aid, while in their dealings with customers they invariably endeavor to quote prices that will so far as they are concerned make Detroit the market for all the [illegible] are beautifully stocked with every description of dry goods and novelties, and presents a most interesting sight to one unaccustomed to seeing the interior of such an establishment. The firm will be pleased to receive the public at any time, and the assurance may safely be given that those who are unacquainted with the house will leave it after a visit with the firm conviction that its success and kind regard in which it is held are well earned.

WYER & VHAY.—Experience has proved that the best teaches in all undertakings—and every one profit by others' through investigation, alone—without loss of time or money is certainly the most certain of attaining success. Therefore we take pleasure in recording, through our journal—the entering firm name of Dwyer & Vhay, of Detroit. This house has been in business for the fifteen years, and from the start has shown a determination to make a success of [illegible] Oysters and Vegetables. They are located all over the City [illegible] largest grocery establishment of the city [illegible] goods for consumption. After [illegible] have carried large stocks of canned goods, fancy [illegible] &c. The retailer must find them a very satisfactory depot to get supplies from, and no doubt has to judge from the present large proportions of their business. After finishing fruits &c., in season they embrace in their [illegible] the best oysters to be had and it is the general verdict that those dealers give their patrons better satisfaction and are more sure of getting fresher stock than from any other house. This winter they intend to place before their customers a better class of oysters and better filled cans than has ever been offered in the market.

BLACK & OWEN WHOLESALE HARDWARE, No. 89 WOODBRIDGE STREET WEST.—Dealers about to visit the metropolis, or those who have not the time to spare to attend either the State Fair or Art Loan Exhibition may find it decidedly to their interest to learn more of a house which has by its enterprise and strict application of business principles obtained a position of decided prominence in the hardware market of the west. Messrs. Black & Owen carry full lines of all classes of goods necessary to complete the stocks of dealers and handle special lines not on the lists of any other establishment. Among them are Reed & Barton's celebrated hollow and flat silver plated ware. Atkins cross cut saws, and Barney & Berry's skates for which they are sole agents in Michigan.

THE RETAIL DRY GOODS HOUSE OF THE CITY.—Ladies who are about to visit Detroit if they would be surprised and charmed with the beauty of all that goes to make up adornment of person, would see the fabrics upon which fashion has set its seal and spend an hour pleasantly they need but visit the dry goods establishment of Taylor, Woolfenden & Co. at Nos. 165 & 167 Woodward Avenue. This house enjoys and merits the reputation of being foremost in newness of style, tasteful assortment and quality of goods offered. In silks there can not be a more exquisite or satisfactory showing no matter what the house or where located and the same may be said of all departments. The visitor may wander from one counter to another and visit every floor but cannot discover the slightest vulgarity of selection or incompleteness of assortment. It is this characteristic of the house that has won it its hosts of friends. Ladies who wish to secure the latest and handsomest goods of whatever kind they may be invariably look through the assortment at Taylor, Woolfenden & Co., before settling upon a purchase elsewhere. It cannot be a loss of time for any lady to visit the establishment and it is certain after an experience with the obliging clerks, and a knowledge of the prices at which goods are sold the firm will add one more to their hosts of friends throughout the state.

DUCHARME, FDETCHER & CO.—Any house that can point to as fair a record and as enviable a success as that of Ducharme, Fletcher & Co., wholesale dealers in hemlock, etc., must possess points of excellence to be deserving of the approbation of the public at large. Being one of the establishments of the kind in the city having a stock almost large enough to meet the matter of [illegible] any dealer to make up his assortment from. The firm enjoy [illegible] in all things equal to [illegible] covers a large portion of the eastern market and [illegible] new fields to the [illegible] representatives carefully [illegible] Fair and Art Loan [illegible] works of the house [illegible] may be secured [illegible]

[illegible] which, to [illegible] our space this week. In the line of [illegible] firm acknowledge no superior in the West [illegible] the immense assortment in [illegible] evidence of the most extensive and [illegible] selection. The prices asked are not the [illegible] attractive feature. The firm are [illegible] for the celebrated Whitney [illegible] ges, and are enabled to [illegible] all [illegible] this line. Be sure to visit Levy's [illegible]

THE AMERICAN EAGLE.—One of the [illegible] known brands of chewing tobacco in the [illegible] is the "American Eagle." It [illegible] where it is made, a walk of [illegible] blocks from Woodward avenue on Woodbridge street west will reward the sight-seer with [illegible] extensive establishment which cannot be surpassed by anything, even than the American Tobacco Factory. If [illegible] interested [illegible] show him the celebrated "American [illegible] National Leaguer," "Crown of [illegible] New Drop," "Fortune," "[illegible]" and other brands of Leaguer chewing tobacco, the "Uncle Sam Favorite," "[illegible]" "Buzzer Nickel," "[illegible]" [illegible] manufacture [illegible] in cellar to [illegible] with the most [illegible] the proprietors are [illegible] pleasure to meet and [illegible] by dealing with them. The [illegible] throughout the State are cordially invited when in the city.

JAS. P. DONALDSON & CO., 32 WOODWARD AVENUE, WHOLESALE DEALERS IN MILL, RAILWAY AND VESSEL SUPPLIES, CORDAGE, TWINES, ETC.—The address of a house dealing in the above lines of goods is often required by those wishing to make purchases. It may be said of J. P. Donaldson & Co., that no establishment of the kind in the West has more desirable patronage or a more honorable record. In all business transactions they are found worthy of confidence and [illegible] will probably be found a little behind of other dealers. They select their goods with judicious care and [illegible] [illegible]

[illegible] & CO.—This [illegible] every [illegible] hardware in the state of Michigan has a deal with or purchase of the jobbing house of [illegible] & Co., it is stated [illegible] ly that the newest there know the proprietors of the house and the position it holds in the hardware market of the country. For information of such as may choose this is one of the largest houses of the kind in the West that the building occupied and amount of stock are of immense proportions and this is not a mere [illegible] or business house to deal with in America. It is but justice to say that its career has been an honorable one throughout, and that will, then, once a patron, ever a patron. They seek new customers, and to this end they ask all dealers visiting the city to call upon them, look through the various lines of goods they handle, note their prices, and then judge if they cannot do as well here as they may have done elsewhere. Their immense stores are located at [illegible] 191 Woodbridge street west.

RATHBONE, SARD & CO.—Though Detroit may boast of being the largest western manufacturing stove center and pride itself upon its home institutions in this line, the branch established here ten years ago by Rathbone, Sard & Co., of Albany, N. Y., has assumed proportions that are truly wonderful. A look through the immense warerooms and offices on Woodbridge street west will convince the visitor that all the stoves sold from Detroit are not made here, in fact he is apt to come to the conclusion that Rathbone, Sard & Co., are powerful competitors for the trade. Mr. W. I. Kellogg the affable manager who has been connected with the house ever since it was established here will be pleased to enlighten those who are interested in stoves, in regard to the number sold from this point. It cannot be denied that the Rathbone, Sard & Co., stoves are in all respects equal to any others in the market, while it is claimed that they possess many special points of excellence. Those who visit the establishment while in the city will be given ample opportunity of judging the merits of different stoves that are shipped from this point and it is safe to say that those made by Rathbone, Sard & Co., will receive the fullest share of praise.

A VISIT TO THE STUDIO—Of W. H. Machen the celebrated artist (42 Moffat Building, opposite the City Hall), will not soon be forgotten. Mr. Machen's specialty is portraits, [illegible] pictures, and landscapes, and he exhibits many striking pictures of these classes. He also has had great success in sacred subjects for churches. His works are frequently to be met with in Detroit and at many other points adjacent to that city and remote from it. Everywhere are they admired for fidelity to nature and for evidence of painstaking detail. Mr. Machen extends a cordial invitation to all who visit the city to call at his studio, where he will take pleasure in showing the many fine productions to be found there. Those who may wish to buy or order of him will find his terms reasonable, and he will promptly carry out all instructions to the letter.

HALL'S VEGETABLE SICILIAN Hair Renewer.

The Best is the Cheapest.

Safety! Economy!! Certainty of Good Results!!!

Rheumatic SYRUP.

The Greatest Blood Purifier Known!

RHEUMATISM CURED.	SCROFULA CURED.	NEURALGIA CURED.
ROCHESTER, N.Y., Apr. 6, '83. Rheumatic Syrup Co.: Gents—I have been a great sufferer from Rheumatism for six years and hearing of the success of your Rheumatic Syrup I concluded to give it a trial in my own case, and I cheerfully say that I have been greatly benefited by its use. I can walk with entire freedom from pain and my general health is very much improved. It is a splendid remedy for the blood and debilitated system. E. CHESTER PARK, M.D.	PORT BYRON, N.Y., Feb. 20, '82. Rheumatic Syrup Co.: I had been doctoring for three years with different physicians, for scrofula, as some from neuralgia, and have not found anything equal to it. Rheumatic Syrup I recommended to my friends and neighbors. Mrs. WM. STRANG.	FAIRPORT, N.Y., March 12, '83. Rheumatic Syrup Co.: Gents—Since November, 1882, I have been a constant sufferer from neuralgia, and have not found no relief until I commenced taking your Rheumatic Syrup. After taking it a short time I found I was free from pain, and I have been free from it ever since. I think it the best blood purifier and nerve tonic I know of. W. B. CHASE.

Manufactured by RHEUMATIC SYRUP CO., 1 Plymouth Ave., Rochester, N. Y.

CASTORIA

for Infants and Children.

Castoria promotes Digestion and overcomes Flatulency, Constipation, Sour Stomach, Diarrhœa, and Feverishness. It insures health and natural sleep, without morphine.

"Castoria is so well adapted for children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M.D., 111 So. Oxford St., Brooklyn, N.Y.

What gives our Children rosy cheeks, What cures their fevers, makes them sleep? The Castoria.

When they were sick, we gave them Castoria. When they became Misses, they clung to Castoria. When they became Mothers, they gave Castoria.

[illegible] Castoria.

ANOTHER DIRECTORY CHAPTER.

Last Friday and Saturday were devoted to taking in a few more villages for our forthcoming directory. As soon after the morning meal as we could get ready, "Peeler and I" started out with Billy and the buggy down into Raisin, along by Comfort's mill, past the farms of the Boyds, the Richards, the Holdridges, Jerome Green's and Holloway's, to the bright little hamlet on the Wabash which bears the respected name of Holloway. This place is not only alive but it is having a healthy growth. Several new houses have been erected during the summer, and one very fine residence, that of Mr. Benj. Kelly, is rapidly approaching completion. While Peeler was taking the census, we interviewed the business men. Upon calling at George Hoxsie's foundry and machine shop, we were quite surprised to see the extent of their business. They manufacture traction and stationary engines, clay crushers, and general castings of various kinds. They are also proprietors of a new invention, called "Hoxie's Patent Valve Gear," which is undoubtedly a good thing, and which they expect will have an extensive sale. Several hands are now employed and their business is gradually increasing.

The firm of B. Kelly & Co., is on deck with a large stock of miscellaneous goods such as are generally kept on sale in a good country store. Mr. H. E. Wilson, one of the partners, runs the post office and acts as business manager. Mr. Kelly attends to the buying and shipping of cattle and Mr. Hoxsie takes charge of the retail department of the store. As soon and our vehicle reached Mr. Wilson's residence about the same time, we accepted an invitation to unhitch and take a bite, and found we had made a happy hit again. A good farmer's dinner was put where it would do the most good. Having examined a fine lot of geological specimens from California, we set out along the old "ridge" road for Ridgeway.

Ridgeway, although damaged somewhat by the business of Britton, is still a lively burg, and doesn't propose to be left behind by its eastern neighbor. It will soon have railroad facilities of its own, however, and then Britton will have to "look a leedle oud" or Ridgeway will outstrip her in the race yet. Peter Sharp, who has been postmaster from the time since the memory of the Ridgewayite runneth not to the contrary, still holds forth on the old corner, and waits upon customers with as much agility as he did twenty years ago. Clark & Son conduct the old store on the opposite corner, and seem to be fixtures also. S. P. Smith has a grocery store and H. Smith a tin shop. There are two shops where wagons are made and three blacksmith shops, all of which seem to be well patronized. But the man who is making the biggest ripple at present is G. P. Waring. He is erecting a fine house which will be, when finished, the most elegant private residence in that town, or in that section of the county. He conducts his undertaking business at Ridgeway, and owns an interest in the saw mill at Britton, so he has plenty of business on hand to keep him out of mischief.

Having finished Ridgeway, we proceeded to Britton. The business status of this lively little burg is much the same as when we interviewed the town last spring. Our old friend, Will Clark, is kept "humping himself" in the Wabash depot, where he has charge of both ticket, freight and telegraph departments. R. Covell has opened a new grocery on the west side and expects to get his share of the trade. Mr. Alva Parker is about moving his stock of goods to Tecumseh where he will occupy the old James corner next Jim Cole's meat market. Mr. Rauch, who runs the postoffice and general store has his hands full of business, and is evidently enjoying a good trade. John Britton, who has charge of the Wabash water tank engine, is kept busily employed, and he gives a portion of his time to the purchase of grain and stock. The M. & O. road has spoiled the stave factory, as the track ran directly through the middle of the shop. But Waring & Kniffin's saw mill and lumber yard is in full blast and gives employment to a large number of men. This establishment is justly entitled to the first place on the list among the business establishments of Britton.

Our next visit was at Pennington's Corners. This town, although possessing no railroad, nor any prospect of one just at present, has a goodly proportion of Yankee grit and does not propose to be left behind in the race. A call on W. P. Cotton found him in his store as usual, and Spencer Morgan is still selling goods and peddling out Uncle Sam's mail. Uncle George Burdette was found at home, enjoying the kitchen fire. He has given up his Ridgeway and Macon mail route as he found the work too hard for him. Milan Sage is to be found on his old stamping ground, and his entire establishment echoed with the hum of busy industry. He is now burning his second kiln of tile this season, and has a stock of green tile on hand for another burning. His sorghum mill will commence operations very soon. The saw-mill is kept running every day. Dinner time found us at Edwin Howell's where we partook of a good square meal, and had a pleasant visit with Sumner Collins, who is spending a few days vacation at home. Sumner is still pursuing his legal studies in Lothrop's law office at Detroit, and occasionally comes home to breathe the country air a day or two. So we dropped in at Edwin Howell's just at the right time.

THE MICHIGAN & OHIO RAILWAY.

The Evening News gives a brief description of our new railroad from which we gather the following information:

The new Michigan & Ohio railroad which has been in process of construction through this state for the past two years, is now rapidly approaching completion, and it is expected that trains will be running in about 50 days. The road is to extend from Toledo, O., to Grand Haven, Mich. Arrangements have been made by which the road gets to Grand Haven over an old route from Pine Lake, and from Dundee it gets to Toledo over the Toledo & Ann Arbor road.

The new route proper traverses Allegan, Kalamazoo, Barry, Calhoun, Jackson, Hillsdale, Lenawee and Monroe counties, with stations at Allegan, Richland, Augusta, Bedford, Battle Creek, Marshall, Homer, Pulaski, Hanover, Moscow, Jerome, Addison, Devil's Lake, Springville, Tipton, Tecumseh, Ridgeway, Britton and Dundee. It crosses the Michigan Central at Augusta and runs nearly parallel with it on the south side to Marshall; crosses the air line division of Michigan Central and Lansing branch of the Lake Shore at Homer; the Detroit & Hillsdale at Jerome; the Jackson division of the Lake Shore at Tecumseh; and the Wabash at Britton.

At Augusta, where the Central is crossed, a viaduct nearly half a mile long is built to get the proper grade, and at Jerome a subterranean passage is made under the Detroit and Hillsdale road, nearly a quarter of a mile long and at an average depth of 15 feet. There are also several large viaducts in Hillsdale and Lenawee counties. Iron is laid from Pine Lake to beyond Hanover, and from Britton to Tipton, and the road is already ballasted as far east as Homer. The unfinished gap in Hillsdale and Lenawee counties and from Britton to Dundee will be completed in less than 30 days, it is hoped. The scenery along the route in Hillsdale and Lenawee counties, where the road winds around on hill sides, and the country is dotted with small lakes lying below is very beautiful and picturesque.—The Devil's Lake station is within a few rods of the steamer landing of this popular southern Michigan summer resort. Especially in Hillsdale and Lenawee counties the road traverses a rich agricultural region very free from other railroads and its coming is already heralded by the brisk revival of business at several of the small towns along the line.

Up to the present writing the Traverse City Herald takes the belt on fish stories. Here is its latest:

"Monday last, at Carp lake, Rev. W. S. Crow and J. W. Milliken, were busily engaged among the bass and pickerel, when Mr. Milliken, being engaged with a trolling line carlessly laid his rod down in the boat, and a big bass improved the opportunity offered to secure a fine rod, reel and line, and grabbing the hook which hung over a few feet from the boat made off with it. Away went rod and all. Thus endeth the first chapter. Yesterday morning Mr. Crow was fishing near the same spot, hooked a fine bass, began reeling him in, and there was the identical fish that stole Mr. Milliken's rod two days before, for following the fish came a hundred feet of line and then the rod, and Mr. Crow brought all home and returned the stolen property to the right owner. Thus endeth the second chapter."

The Evening Journal has the following reminiscence:

When John S. Barry was Governor of the State of Michigan, there was about an acre of ground around the capitol building, upon which the grass had been allowed to go to seed every year. Gov. Barry took great pains to have the grass cut at the proper time, and, when properly cured, sold the hay and put the money in the State Treasury. There was only half a dollar in the State Treasury when Barry took the chair, and it was a bogus coin. When Barry was Governor, the capitol stood on the present site of the Detroit High School building. Ex-Controller Bridge says the amount of money received for the hay each year was $1.50.

Daniel Levely, of Hope, near Midland, has been carrying his head very level for some days past, having become over excited on religious matters. Having attempted to roast his baby as a sacrifice, he has been adjudged insane.

UTILIZING MILKWEED.—A writer in the Providence Journal predicts a useful future for the milkweed, which has heretofore been considered only a cumberer of the ground. Its seeds yield a finer oil than linseed, its gum can be used in place of India rubber, and from its floss a fabric resembling Irish poplin has been made; while the young shoots are used in the spring by some people instead of asparagus, which they resemble in flavor. Now, pertinently adds the writer, if uses can be discovered for the thistle and whiteweed, they may prove friends in disguise.

Not a partical of quinine nor any mineral substance is contained in Ayres' Ague Cure—but it does the business. Warranted.

COMMISSIONERS' NOTICE.

IN the matter of the estate of Ann Biddle, deceased

The undersigned, having been appointed by the Judge of Probate for the county of Lenawee, Michigan, commissioners to receive, examine and adjust all claims and demands against the estate of Ann Biddle, deceased, notice is hereby given that for that purpose we will meet at the late residence of deceased in the town of Macon, in said county, on the 12th day of October, 1883, and on the 7th day of March, 1884, at 10 o'clock in the forenoon of each of said days, and that six months from the 8th day of September, 1883, have been allowed by the said court for the creditors of said estate to present their said claims for examination and allowance.

Dated Sept. 12, 1883.

HERE WE ARE AGAIN.

The steady and continual work we gave the past season to our gigantic clearance sales left our Mammoth Outfitting Establishment in proper shape for the reception of our

Fall and Winter Stock!

To say that we were successful would not half tell the story. OUR TRADE ALMOST DOUBLED, our customers were more than pleased with the bargains we gave them, and we were highly gratified with the liberal patronage bestowed upon us, and this season we intended to strive hander than ever to merit the continuance of the same.

BOYS' & CHILDREN'S CLOTHING.

We have just opened up and put in stock all the new shapes and Styles of Little Folks' Clothing, among which may be found some pretty and attractive garments. Henceforth we shall carry a larger line of these goods than ever. Our trade in this Department has met with such a large increase that we can well afford to, and this increase of trade enables us to sell at

SMALLER MARGINS THAN EVER BEFORE.

With us increase of trade means a decrease of profit. Not only shall our prices be the lowest, but we will carry ten times as many goods as any other house in the city. Our Boys' and Children's department has become very popular, not only because it is fitted up with a view to accommodate our customers, but because the best makes, the prettiest styles and the most attractive assortment of this line of goods can always be found there.

Men's & Youths' Clothing!

We have selected the finest and most desirable goods for this department that were ever brought to the city; in fact the goods look so well as we open them up that we feel sure of selling them without much trouble. The reliable class of goods we handle, together with the uniformly low prices which are characteristic in our institution, are found to meet with public approbation. This department is crammed with new goods, ready for inspection and sale.

Gents' Fine Furnishings!

There is no more complete department of the kind in the state. We have just put in stock several cases of new goods, and are every day receiving fresh additions. It is filled to completion with all the latest styles in Gloves, Hosiery, Neckwear, Undershirts, Collars, Cuffs, Shirts, Handkerchiefs, Suspenders, &c., and everything at popular prices. We can guarantee to save you twenty-five cents on every dollar you spend with us in this department.

Everybody is invited to examine our Stock whether they wish to buy or not.

Physicians use them in their practice. Sold everywhere, or sent by mail for 25 cents in stamps. Send for pamphlet. T. S. JOHNSON & CO., Boston, Mass.

THE AMERICAN PEERLESS DICTIONARY AND Information FOR Everybody.

A BOOK THAT SHOULD BE IN EVERY HOUSE.

After years of labor, and the expenditure of a large sum of money to writers and compilers, we are now ready to offer THE MOST USEFUL BOOK IN THE WORLD! The press, teachers, and professional people throughout the country pronounce it to be the BOOK OF BOOKS. It contains upwards of 50,000 WORDS, with their definition and pronunciation, according to Webster and other recognized authorities; a large number of additional words and definitions in general use, NOT TO BE FOUND IN ANY OTHER DICTIONARY; a large collection of Words, Phrases, Proverbs and Quotations from the French, Latin and Modern Languages; a list of Abbreviations used in ART, SCIENCE AND LITERATURE. Population of Towns and Cities in the United States, and other interesting statistics taken from the census reports of 1880. Brief outlines of the Lives of all Presidents from Washington to Garfield inclusive, with a full account of the assassination of President Garfield, and the trial of Guiteau, the assassin. Rules for Spelling, Pronunciation, Abbreviations, Correct Pronunciation of Proper Names, Mythology, Table of Weights and Measures, Interest Laws by States, Rules for Computing Time, Postal Information, Facts about the Earth, Rules for Letter Writing, Forms for Business and Social Letters, Etiquette, Table showing the Population of the Principal Countries of the World, Table showing the Population of the Principal Cities of the World, Table of Coins, Table of Time Used by Different Nations, Table of Distances between Principal Points in the United States, Table of Distances between Principal Points in Europe, Table showing the Population of the States and Territories of the United States, Table of Presidential Electors, Table of Signs used in Business, Table of Signs used in Medicine, Table showing the Population of the Principal Towns and Cities in the United States, Table of Distances between Principal Points in the United States, Table of Distances between Principal Points in Europe, Table of Weights and Measures, Table of Coins, Table of Time Used by Different Nations, Table of Signs used in Business, Table of Signs used in Medicine, Table of Presidential Electors

SPECIAL NOTICES.

FOR SALE. My farm of seventy acres, situated northeast of the village of Tecumseh, about ¼ of a mile from the postoffice. Said farm is all improved and in good condition, with two houses and two barns. Also a large apple orchard containing 245 trees, and other small fruit. Will leave 21 acres of wheat in the ground.
RUFUS ADAMS.

STRAYED into my enclosure, one roan mare. Owner can obtain same by proving property and paying expenses. A. KNEFFIN.

NOTICE. Notice is hereby given that all persons are forbidden from drawing gravel from the bank owned by the town of Tecumseh on the farm of Michael Speltzer, except for highway purposes. Parties violating this notice will be dealt with according to law.
W. B. KEYSER,
Commissioner of Highways.
TECUMSEH, Sept. 10th, 1883.

FOR RENT. The undersigned would like to rent a farm of 100 or 200 acres, convenient to railroad, with privilege of buying with good buildings. Will pay cash rent but yearly in advance, if necessary. Address, stating amount of rent, terms and particulars,
JOHN SHEA, Climax Mich.

FOR SALE. A desirable lot exp rods on Chicago St., Tecumseh, Mich. Will be sold for $275 if taken before the 1st day of October next. E. HAUSE.
TECUMSEH, Sept. 6, 1883.

PIANO FOR SALE OR RENT. Apply at Mrs. Geo. S. Tiffany's, Chicago st.

SEED WHEAT for sale, of the Lounsberry & Morgan variety. Yielded nearly 33 bushels per acre on stubble ground this season. Been grown on my farm only two seasons. Cut and threshed at exactly the right time. Leave your orders early. S. C. STACY.

STRAWBERRY PLANTS FOR SALE. Choice plants of the Bidwell, Kentucky, Green Prolific and Wilson's Albany varieties. These plants were bought of professional growers and are warranted true to name.
S. C. STACY.

FOR SALE CHEAP. A good property on Railroad st., opposite Slayton's warehouse. Has a dwelling house thereon and a vacant lot for building purposes. Will be sold at a bargain. Enquire at the HERALD OFFICE.

EVANS' BUSINESS COLLEGE AND Institute of Rapid Writing, Adrian, Mich. Twenty years of success of this thorough actual Business Institute. Send for sample of our work.
U. R. Evans, Principal and Teacher.
John Dersham, Assistant Bookkeeper.
D. C. Hardy, Teacher of Shorthand Writing, and also Type Writing.
Adrian, Aug. 28, 1883. U. R. EVANS.

Mrs. C. A. Wright left for New York Monday to make quite an extended visit.

Mrs. Geo. L. Graves and two children, of Milwaukee, are visiting relatives and friends in Tecumseh for a few days.

At Co. C election last week to fill vacancies, F. B. Wood was elected captain, Jas. B. Kennedy 1st, and Thos. Kyle 2nd lieutenant.

Fishermen who have been on the Au Sable this year report that lumber operations and sportsmen are rapidly depleting the grayling in that stream.

Demorest's Illustrated Monthly Magazine continues to merit the high econiums passed upon its literary and artistic merit. The October number equals in interest its predecessors, and contains many well written and entertaining articles.

The Hudson Gazette is moved to talk thusly and we second the motion-

While you are talking, why need the people between Toledo and Coldwater go to Detroit for a good live and cheap daily, while the Adrian Times fills the bill so well as to city, county, state and world news? As to any political vagaries of the paper the Gazette will try to counteract these in this particular balliwick.—But the Times is sound on the tariff.

Milan Leader: Milan still keeps up that live, wide-awake appearance that has been ever apparent during the past three years. The erection of a new dry goods store, several dwellings and a church have been commenced within the past two weeks, besides the improvements of sidewalks and the addition of another street lamp. The large increase of travel has already made it apparent to our citizens that a new bridge here, wide enough for teams to pass, is very much needed.

We, the undersigned, agree to close our respective places of business at 7:30 o'clock each evening, from Monday, Oct. 1st, 1883, until April 1st, 1884, except Saturday evenings, and the week preceding Christmas:
W. & S. W. Anderson & Co.,
Gainsley & Co.,
Strong & McNair,
Kies Bros.,
George Heesen,
Whitenack, Bordine & Co.,
Swan & Satterthwaite Bros.,
Wm. McCowan,
A. W. Slayton.

The recent address of Charles Francis Adams, jr., has been widely misunderstood. He would not remove Latin and Greek, but would allow any pupil who studied Latin to take French and German, if he prefers, in the place of Greek. Professor Painter, of Roanoke College, Virginia, has published an address on "The Modern Languages *versus* the Ancient Languages." He expresses substantially the same views as were contained in the recent address of Mr. Adams. He says that the position which he has taken represents a rapidly growing sentiment in Roanoke College and probably also in other Southern Colleges.

The Morenci Observer gives the following interesting bit of history:—The first newspaper published in Morenci was issued 28 years ago last June, and was called "The Morenci Herald," S. A. Scofield editor and proprietor; and its circulation extended to 29 of the neighboring postoffices. The concern changed hands several times during the first five years, and the individuals who acquired fame as the editors and contributors were Scofield, S. B. Smith, J. Crabbs, Hogaboam, Carter, Thorp, with several minor lights whose names have been lost to history. After 1861 Morenci was without a newspaper until 1871.

THE TECUMSEH HERALD.

TECUMSEH, MICH., SEPT. 13, 1883.

LOCAL AND PERSONAL.

Dusty streets.

Jack Frost has come.

The circus is coming.

The fair season is upon us.

The excursion season has closed.

The pumpkin pie season will soon be upon us.

The home water melon crop is now in the market.

The Tri-State Fair is in session this week at Toledo.

Were your house plants frozen last Monday morning?

Mr. George Smith, of Toledo, was in Tecumseh Tuesday last.

Miss Fannie Tindall is visiting Mrs. Dora Powers for a few days.

Mrs. E. C. Smith, of Toledo, paid Tecumseh a flying visit Tuesday.

Be sure and read Mabley's new advertisement in this week's issue.

The Circuit Court for this county convened at Adrian last Tuesday.

The Tecumseh correspondent of the Clinton News is taking a vacation.

Try the HERALD for the balance of this year. Four months for 50 cents.

The last sensation wall paper at cost or less at Patterson's Drug Store.

October 1st another run, Saturdays, will be added to the Franklin mail route.

The circus engraving on our eighth page will be taken off the peg next week.

Another new daily journal is talked of at Detroit. Don't go too fast, gentlemen.

H. El Hand and wife, of Deerfield, were in Tecumseh Saturday and Sunday visiting their many friends.

A new time card went into effect on the Lake Shore last Sunday. There is no change on the Jackson Branch.

Mr. A. W. Smith, of Adrian, an old personal friend of Willis Merritt's, assisted in taking charge at his funeral.

The circus tent will be pitched on Hayden's cooper shop lot, which will make it easily accessible for everybody.

The Baptist church at Charlotte is to be dedicated this evening. Rev. C. E. Conley, of this place, preaches the sermon.

The last number of the Educational News has a very creditable report of the Teachers' Institute held in Tecumseh.

A. B. Cotton's old corner in Bidwell's block is a good location for another dry goods store. Who will occupy it?

Judge Geddes, County Clerk Hunter and a large number of Adrian attorneys attended the funeral of Willis Merritt last Monday.

The new postal notes are now in circulation. This method will be a very convenient one for transmitting small amounts of money.

Mrs. Spalding has lately received a large number of ornamental hanging baskets. Parties wishing goods of this kind would do well to give her a call at the green house.

The ladies of St. Peter's church will hold a church social at the residence of Mrs. J. W. Patterson, next Wednesday evening, Sept. 19. All are invited to attend the "Box" social.

Saturday of this week the Presbyterian S. S. will have an excursion to Manchester, leaving here on the morning freight and returning in the evening. Fare for round trip 25 cts.

Michael Wilson just returned from a visit to his son Truman H. who resides at Grayling, Crawford county, this state, and reports having had a good time and liking the country exceedingly well.

Dr. E. Test, formerly principal of Raisin Valley Seminary, is to have charge of the chemical laboratory of Earlham college the coming year in addition to his professorship in Richmond normal school.

A. O. Miller's troupe failed to put in an appearance at the Opera House last Monday evening. We understand that portion of the company were taken sick and they were obliged to cancel their engagements.

The last we saw Jehiel Davidson he had started for home with a pick over one shoulder and a law book under his arm. He has been appointed drain commissioner to fill the place of Frank Davidson resigned.

Chicago Exposition tickets are on sale at the depot, good going on Tuesdays of each week, up to and including Oct. 26th, and returning good until following Monday, at $4.75 round trip, including admittance to the Exposition.

The other day while up to Clinton we noticed much clothing and gents' furnishing goods in the show windows of J. E. McCollum's clothing store, dropped in and saw any amount of these goods in all the latest styles and known qualities. In fact "John Ed" has a splendid line of goods and is selling them at rock bottom prices. Any person will do well to call on him before purchasing their winter supply of clothing.

We will send the HERALD four months on a trial trip for fifty cents.

New wheat is coming into market quite freely now, the price ranging from $1,00 to $1,05 according to quality.

A large delegation from the Adrian bar and the Knight's Templar band attended Willis Merritts funeral last Monday.

Methodist ministers will soon be changing locations. We hope Mr. Hudson will be returned to Tecumseh another year.

The Lenawee county teachers association will meet in this village next Saturday. Several papers will be read and a large attendance is expected.

Bro. Clough, of the Brooklyn Exponent has been taking a trip to Sault St. Marie. He gave his readers last week an interesting account of his trip.

We have received a copy of the 6th annual book of the Michigan Sportsmen's Association. It contains much information of interest to the sporting fraternity.

A slight frost fell in this section last Sunday morning and quite a heavy one on Monday morning; Vines and flowers were badly bitten but corn was not damaged.

Grand Rapids has lately been infested with a ghost. The ghost has turned out to be a red headed woman and she has lost her switch. It is now at police headquarters awaiting identification.

An old rail-splitter in Indiana put the quietus upon a young man who chaffed him upon his bald head, in these words: "Young man, when my head gets as soft as yours, I can raise hair to sell."

Wm. C. Heck has built a new portico in front of his residence on Chicago street. Under his constant manipulations the old Mary Patchen corner has changed wonderfully during the past six months.

The State Fair will be held at Detroit next week from the 17th to the 21st inclusive. The signs of the times all indicate that it will be the best fair ever held in the state. Special rates on all the railroads.

There are five hundred car loads of silver dollars stored in the treasury vaults at Washington. There are a good many newspaper men out west who could use a portion of this surplus wealth to advantage.

The Ladies Floral Cabinet has put in its appearance for September. Each number seems to improve upon the preceding one. Any lady wishing a gem of a home magazine should send for a sample copy to No. 22 Vesey St., New York.

Heman J. Redfield, an old and prominent citizen of Monroe committed suicide last Sunday morning. He went into the country armed with a revolver and shot himself three times, once through the body and twice through the head.

Uncle John Schreder, of Ridgeway, was in town Tuesday and called on the HERALD boys. Uncle John is now nearly 95 years of age, has been a mason since before the Morgan times and has voted the democratic ticket since he became of age.

Number two of Dio Lewis's Monthly is at hand and it is no flattery to say that it already stands at the head of health publications in this country. Dr. Lewis throws his strong individuality into each number of the magazine and the result is seen in the interesting character of its contents.

Mr. Delos Phillips, of Kalamazoo, was in town Monday to perfect the necessary proof of Willis Merritt's death, to be used in the Knights of Honor. Mr. Merritt held a certificate of $2,000 in this order and the amount will be paid promptly as soon as the necessary evidence can be forwarded.

W. R. Wooden has made a permanent engagement with Nichols, Shepard & Co., of Battle Creek, to have charge of their collecting business and will move his family to that city. He came home last Monday to pack up his household goods for shipment. We regret to have him leave Tecumseh, but wish him abundant success in his new field of labor.

The first serious accident on the M. & O. railway occurred at Britton last Sunday, when John Hayes, foreman on this section, lost a limb. He tried to jump upon a construction train which was in motion, was thrown under the wheels and had one leg badly crushed. Drs. Woodward and Nelson amputated the limb and the patient is likely to recover. He is boarding at Wm. R. Wilson's, near Ridgeway, in whose family he will receive the best of care.

All persons interested in and expecting to read the C. L. S. C. course for '83 and '84 are invited to be present at a preliminary meeting to be held in Drs. House & Jones office on Friday evening, Sept. 14th, at 7:30 o'clock for the purpose of organizing, electing officers, etc. We expect that all of the class who read the Chautauqua course last year will continue the reading this year and we cordially invite others to join our circle.
R. B. HOUSE,
Sec'y Tecumseh C. L. S. C.

COUNTY CONDENSATIONS.

Deerfield wants more street lamps.

The city fathers of Morenci have had the weeds cut down in the village cemetery.

Wm. Smith, of Morenci, has been sent to Ionia for ninety days for stealing sheep.

The old Canada Southern road track is being repaired between Corbus and Grosvenor.

The Clinton band have deposed their leader because he refused to attend a Sunday school picnic.

Frank Bacon, of Wheatland, last week unearthed a nest of ten rattlesnakes, and killed them all.

A Clinton man has refused to let the pious young men of that village play ball upon his grounds on Sunday.

The venerable editor of the Hudson Gazette has bought a type writer and his chirography has improved marvellously of late.

The new bank at Addison is about to become a fact. The firm is Curtis & Bowen, both men of high standing in the community.

The Morenci milk man is about to quit the business. We expected it.—He is the same milk vender who never watered his milk.

Clinton News: The last number of the Scientific American has an article describing an improved plow jointer recently patented by our townsman, David Woodward.

The farmers are busy all over the county preparing their ground for wheat, and the hum and wizz of the engine and threshing machine is heard far and near.

The Observer received the first postal note sent through the Morenci office. The HERALD received the first one sent through the Tecumseh office—$1.50 for subscription.

Burr Robbins' elephant will travel all around the circumference of the county, taking in the outside towns and leaving out Adrian. But then Adrian had the benefit of Jumbo.

Morenci Observer: Oliver Todd, of Chesterfield, in connection with some Tecumseh parties, has organized a company for the manufacture of broom handles on a large scale at Summit City, Grand Traverse Co., in this state.

Pious people fish on Sunday at Morenci, and what is more, they catch fish. The Observer says:

Jerome Colvin now wears the belt; as during the quiet Sabbath hours of last Sunday he caught in the placid Bean a pickerel weighing 14 lbs. and four others weighing 5 lbs. each.

Morenci Observer: A Saturday evening scene was a lively tussle in an alley, between a man and woman, unhappily married, over the possession of their little child. A mediator finally separated them; the husband bore off in triumph the coveted offspring; and the poor wife grew lachrymose.

The Lenawee County bar held a meeting at Milliard & Weaver's office last Monday forenoon to take appropriate action on the death of Willis Merritt. A committee was appointed to draft resolutions and a vote was passed to attend the funeral ceremony in a body.

Blissfield Advance: The fire engine was taken out Tuesday evening for trial, when it was found that one of the flues leaked. Wednesday the boiler was examined, when it was found that rust had eaten a large hole through on of the flues. A new one was put in and the steamer is now ready for business.

Adrian Record: A contributor of "Baptist Items" in the Tecumseh HERALD, observes: "Some think that when our new railroad is completed that we will go to Devil's Lake. Will it sound well to say, "A large campany of Baptists will go to Devil's Lake next Thursday?" Yes, dear brother—perfectly proper. It is now well known that all that h—l lacks is water and good society, and the Baptists can be depended on to furnish both.

Jackson Patriot: The apple crop of Jackson county and Southern Michigan for three successive years has been a failure. In enquiring as to the cause of this of an intelligent farmer, he attributes it to the effect of cold weather, which had so affected the older trees that nearly all are decayed at the heart to an extent which renders them worthless. His theory that fruit raising here can be made permanent and certain only by continuous planting year after year of fresh, vigorous young trees, removing the old as soon as they cease bearing.

Blissfield Advance: A new feature is under consideration by the County Agricultural Society to hold a base ball tournament one day on the grounds, clubs being restricted to the county and players to reside therein. We believe such an attraction would prove a paying card, as the base ball mania is greatly on the boom. Many would attend the fair only to see the game who otherwise would not think of going. A small prize offered by the society would make it more interesting and secure the attendance of the best clubs. We would like to see such an arrangement perfected.

DEATH OF WILLIS MERRITT.

At the noon hour on Saturday last, Sept. 8th, the spirit of Willis Merritt left its frail tenement of clay and returned to the God who gave it.

The deceased was a native of this township. He was born on the old Merritt farm, west of the village, on the 10th day of March, 1854, being the youngest of five sons of the late John M. Merritt. His boyhood days were passed not unlike those of other farmer's boys. He obtained a good common school education and afterward entered the Tecumseh High School from which he graduated with credit in June, 1871. His ambition was to pass through the University course at Ann Arbor, but his father's death compelled him to relinquish his design, and he began the study of law in E. B. Wood's office in the summer of 1872. He entered the law department of the University in the fall of 1873, graduated therefrom in March '74, and was immediately admitted to the bar. After spending some time in the office of Stacy & Underwood, of Adrian, he opened an office in this village and practiced his profession here until his removal to Adrian in 1880. Mr. Merritt was a lawyer of good ability and soon gained a prominent place among the younger lawyers of the county. His active temperament and indomitable industry made him a prominent factor in many different organizations and gave him a hold politically upon the younger element of the community. He served as Circuit Court Commissioner for two terms, from 1876 to 1880. He was a zealous member and promoter of the High School Alumni Society of this village, and his influence was felt in all matters of a social and literary character in this community.

In 1877 he became a member of Co. C, in which organization he gained rapid promotion, serving as sergeant, second lieutenant, and first lieutenant, and in '79 he received from Governor Croswell the appointment of adjutant of the first regiment. In the campaign of 1882 he was secretary of the Republican county committee and to his efficient management was due in a great measure the success of that party in this county, when the tidal wave submerged it in so many localities. Soon after the election he received the appointment of secretary to the Judiciary committee of the National House of Representatives of which Congressman Willitts was chairman, and passed the session at Washington, performing the duties incident to that position.

Willis had never enjoyed very robust health, and some two years ago the insidious approach of pulmonary disease manifested itself. He fought against fate however with a brave heart, and it was partly with a view of improving his health that he obtained his situation at Washington.—Upon returning home last May he became worse, and soon after took a trip to Texas, hoping that the climate of the sunny south would break the spell, but he was again doomed to disappointment, and, as he said to a friend, he came back to die in his mother's home. From that date he failed rapidly until the final summons came on Saturday last.

The funeral obsequies were held on Monday afternoon at his mother's residence on Logan street. It was a delightful, balmy September day, and a large audience manifested their respect for the deceased. The casket was placed in the parlor, covered and surrounded with a profusion of floral emblems which were presented by Adrian and Tecumseh friends. The Adrian contribution was an elaborate piece representing the "Gates Ajar." A star and cresent was given by his Tecumseh associates, and a beautiful shield by the Tecumseh Guard. The services were conducted by Rev. G. W. Hudson, pastor of the M. E. church, the choir of the same church furnishing the vocal music. The ceremony was brief but most appropriate and affecting. At the close the procession formed in this order and escorted the hearse to the cemetery:

Adrian City Band.
Co. C, 1st Reg. M. S. T.
Hearse and Pall Bearers. These were six in number: A. W. Smith and A. Bennett, of Adrian; C. A. Slayton, Fred Rosacrans, T. D. McKinney and B. P. Anderson, of Tecumseh.
Members of the Bar.
Tecumseh Lodge Knights of Honor.
Family and relatives in carriages.
Young men on foot.
Citizens generally.

After a brief service at the cemetery the remains were placed in the receiving vault, whence they will be removed in a few days to their final resting place.

Death at any age is a solemn event. But when a man of fine abilities, lofty aspirations, and promising opportunities is stricken down in early manhood, the visitation of the dread angel seems doubly sorrowful. The deceased was widely known and possessed many warm hearted friends, which was attested by the large attendance at the funeral. To poor mortals below it seems a mystery that a life of so much promise should be blotted out so soon. Willis possessed the talent, the ambition, the industry to make him a citizen of marked influence in any community. Why has his career been so early closed? Providence alone can tell. But we know that the hand which has removed him from this earthly scene will deal kindly with him there. His mortal remains will sleep beneath the evergreens. His immortal spirit has crossed over the river to its eternal rest.

RULES AND REGULATIONS

Of the Lenawee County Board of School Examiners—Requirements for Teachers' Certificates.

THIRD GRADE.

Reading, Orthography, Penmanship, Arithmetic, Grammar, Geography, Civil Government, U. S. History, Theory and Practice of Teaching.

Candidates must have an average of 75 per cent., and must not fall below 60 in any branch.

SECOND GRADE.

All the branches for a third grade certificate, and Algebra and Physiology. Average standing 87 per cent., and must not fall below 80 per cent. in any branch. Candidates for second grade certificates must present to the Board of Examiners satisfactory evidence of having taught at least six months with ability and success.

FIRST GRADE.

All the branches required for a second grade certificate; also Natural Philosophy; Book-keeping, Plane Geometry, English and American Literature, and School Law. Average standing 95 per cent., and must not fall below 90 per cent. in any branch. Candidates for a first grade certificate must present to the Board of Examiners satisfactory evidence of having taught at least one year with ability and success.

RULES OF EXAMINATION.

1. All examinations begin at nine o'clock sharp.

2. Persons not completing their examination at the specified time must finish at the next regular examination during the same calendar year.

3. No persons shall be permitted to see the questions except such as intend to be examined, until the examination is over.

4. All conversation or communication, receiving or giving aid in any manner during examination is absolutely forbidden on penalty of forfeiting right to certificate.

5. The Board of Examiners in marking the standing of candidates will take into consideration the legibility and neatness of papers.

The program will consist of papers upon "Reading," by Mr. Wendell, of the West Side Hudson Schools, and upon "The Duties of School Inspectors," by Mr. C. F. Field, of Clinton.

Ample time will be allowed for the discussion of these papers, in which we trust many of the teachers, school inspectors and others interested in our school will take part.

The presence and assistance of all school officers throughout the county would add greatly to the efficiency of the association and is earnestly invited.

—No guess work. If you want as good flour as is made in the state, get Heck Bros. complete all roll flour.

—Grand chance to buy a Grain Drill. Call on Slayton & Son before you buy and they will make it pay you.

—Snedicor sells Drills cheaper than they were ever offered in Tecumseh before.

—If you want a Drill, see the Hoosier Champion and Rooler Grain Drill at Snedicor's.

—Do not be gulled by strange agents tramping through the country taking orders for crayon portraits(?) but give your orders to some good artist or agent whom you know to be reliable.

—Wm. McCowen's crayon portraits are pronounced the finest that have ever been made in this vicinity.—Leave your orders at furniture store or with Mr. Burrows, at gem gallery.

—Natural looking and serviceable artificial teeth can be procured at Dr. B. F. Snyder's Dental Rooms.

—The Wilder Plow Sulky and Elwood Sulky Plow, for sale by Snedicor.

—Call and see me before you buy a Spring Tooth Harrow if you want to save your money. Snedicor.

—You can have your decayed and aching teeth extracted at Dr. B. F. Snyder's dental rooms, without pain, by taking vitalized air.

—Don't forget that Snedicor sells the best plows in Tecumseh. Call and see for yourself and try one.

—Spring Tooth Harrows at Snedicor's.

—Call at the yard and mill of the Tecumseh Lumber Co., and examine their stock.

—Leave your orders for Sash, Doors, blinds, mouldings, window frames, tanks, troughs, etc., with the Tecumseh Lumber Co. They will receive prompt attention.

—Don't you forget that Snedicor has the Watertown Platform Spring Wagon, the cheapest and the best in town.

DIED.

SMALLIDGE.—At Tecumseh, Aug. 31st, 1883, of cholera infantum, Minnie, youngest daughter of William and Mary Smallidge, aged 19 mo.

[illegible]

Harmless for the most frail woman or weakest infant to take.

[illegible]

For years, and given up by physicians, Bright's and other kidney diseases, liver complaints, severe coughs and incipient consumption, have been cured.

Women gone nearly crazy

From agony of neuralgia, nervousness, wakefulness and various diseases peculiar to women.

People drawn out of shape from excruciating pangs of rheumatism.

Inflammatory and chronic or suffering from scrofula

[illegible]

Sick Headache, Costiveness, Dyspepsia, and indigestion, for these and all diseases arising from a disordered liver or stomach, Hop Bitters, proof of which is the testimony of thousands, stand unrivaled.

CATARRH

ELY'S CREAM BALM

has earned an enviable reputation where ever known, displacing all other preparations. An article of such merit and extensive sale should not be confounded with the cheap nostrum class.

CURES ROSE COLD

IS NOT A LIQUID OR SNUFF.

Apply to the finger and by nostrils, it will be absorbed, cleansing the head of catarrhal virus, causing healthy secretions. It allays inflammation, protects the membranal linings of the head from additional colds, completely heals the sores and restores the sense of taste and smell. Beneficial results are realized by a few applications.

A Thorough Treatment Will Cure.

Unequalled for cold in the HEAD, Headache and Hoarseness resulting from Catarrh. As a remedy for catarrh it is unequaled. By mail, prepaid, 50 cents per package; 3 packages $1.00. Sold by all druggists or sent by mail.

Value and Use of Bones.

Until the middle of the present century few of even the most intelligent farmers in the world knew of the value of bones for enriching land. A few had noticed the remarkable growth as well as the wonderful productiveness of grape vines planted over the skeleton of an animal, but it did not occur to these persons to collect bones, reduce them, and apply them to land planted to ordinary field and garden crops. The great value of bones consists in the amount of phosphorus they contain. This substance is essential to the growth of the most valuable food plants, which gradually but steadily remove it from the soil. It is most readily and cheaply restored to the soil by the use of bones. In addition to phosphorus, bones contain lime and considerably ammonia. Entire bones remain in the ground a long time before they are decomposed to such an extent that they are appropriated by plants. It is extremely difficult to pulverize them without the aid of powerful and expensive machinery. If they are first burned they may be pounded up very readily, but the action of fire drives off ammonia. This ammonia is valuable in promoting the growth of plants, and it is also of great use in hastening the decomposition of the bony structure. Bones may be rendered sufficiently soft to be easily reduced to manure by soaking them with fresh horse manure, and allowing them to remain in it for several weeks; by placing them in tight vessels and covering them with wood ashes occasionally moistened, or by boiling them in strong lye. The last is the quickest as well as the most satisfactory method of reducing them, if one has a kettle of the capacity of a barrel. Treated in either of these ways, they should be pulverized and mixed with fine earth or dried muck before they are applied to the land.

The "Roll Bengol Tagger."

Here we are back Johnny's observations on the "Roll Bengol Tagger," as communicated to the San Francisco *Argonaut*:

Once there was a man who had a tagger and the tagger it was a slo and the man took the money for to get in. The man had a big paper nailed onto the tagger's den, and the paper it said the paper did "The Roll Bengol Tagger, sometimes called the Monnuck of the Jungle. Hands off! No Touchee the Tagger!" The monnuck of the tagger it was always a layin down with its pose twee its poz, and the folks wich had paid for to get in they was mad cos it rendent wos and rose like dissent thunder. But the slo man he said, "That's ot, you when I get in the newage done, but this is the same as which the offle feller broke off." Once in a time he cut up the seven twenty and four hatches. Then the folks kind of stand back and took in a couple while the tagger dep. But one day the feller wot was drunk he took to fighting the tagger with the mast head of his skeller, wich stampeded the oddience wot, and the wummin folks they shot into the chairs and hollered like it were mice. But the drunk chap he kept a jabbing the monnuck of the jungle crewel. Pretty soon the monnuck it bellered offle and frigtod, but the feller kep pokin like he was dippin to a steam engin. Bimeby the monnuck it jumped onto its hine feets and shocked itself out of its skin and reared upon its feets and spit onto its hands and spoke up and sed: "I bedam if I can't just whole the peagreen stuffin' out of the jumped-to gabot wich has been a proddin this ere tagger!" And the oddience they was astonish.

Climate and Complexion.

There is a great diversity of opinion as to the differences of complexion to be observed among mankind. Roughly speaking, the hue of the skin varies with the latitude, the inferior races having their homes at a distance from the equator, the darker within or near the tropics. This fact would seem to point to the position of the sun with reference to those on whom he shines as the cause. But the question presents difficulties which this supposition does not aid in solving. At the same distance from the equator we find the fair Englishman the yellow Mongolian and the copper-colored Indian. To the north of the white Russian and Finn live the swarthy Lapp and Samoyed. North of the Caucasus are dark-skinned Tartars, south of it fair-complexioned Circassians. The aborigines in America vary less in color than the natives of the Old World. None of them are as fair as the Swede, none as black as the negro of Congo, and those living in Brazil on the equator are not the darkest. There are blacker men in Australia and New Guinea than in Borneo and Sumatra, though these islands are on the equator and those are not. The Shillooks of the upper Nile, who live about 10 degrees north latitude, are blacker than the Mandarins, who are six degrees farther south.

Cats have fared very differently in different countries. In Egypt in ancient times they were worshipped and in Turkey the people imagine Mohammed's pron[illegible] patiently let the animal have ever a place on his coat with distinguished consideration. In other lands the cat has not been regarded in France a witch [illegible] not [illegible] Marie Lenclos in [illegible] St. John [illegible] the cause of [illegible] Place de la Grève [illegible] of witchcraft [illegible] in the [illegible] burning [illegible] in the [illegible] Place de la Grève [illegible] in the [illegible] when [illegible] in the [illegible] of the [illegible] in the [illegible] of the [illegible] in the [illegible] of the

In The Pilot House.

"Yes, sir; this kind of work obliges a man to keep sober as a judge. Of all men in the world, steamboat pilots and railroad engineers should let liquor alone. For on their clearness of sight and coolness of head depends the safety of life and property."

Keeping his hand on the wheel as he said this, Mr. A. Brockman, of No. 29½ Silver street, Chicago, added: "Of course, some o' 'em drink, but the sober ones have the best positions and the best pay. Yes, the work and exposure sometimes tells on us; but for my part, I find Parker's Tonic to be all the invigorant I need. I've got a bottle aboard here now; never go on a trip without it. When I haven't any appetite, or am in any way out of sorts, it sets me up in no time. If drinking men would use the Tonic, it would help 'em to break off. (No, that isn't a lighthouse; it's a star low down near the water.) As I was saying, the Tonic is new life bottled up. You see that flag-staff? Well, with a bottle of Parker's Tonic in the locker I can keep malaria as far from me as that, all the time. My wife has used it for three years for summer complaint and colic, and as an invigorator, when she's tired out from overwork. She says the tonic is a daisy. Good-bye! Don't break your neck going below."

This preparation which has been known as Parker's Ginger Tonic, will hereafter be advertised and sold simply under the name of Parker's Tonic. As some indifferent dealers are endeavoring to induce their customers by substituting inferior articles under the name of ginger; and as ginger is really an unimportant ingredient, we drop the misleading word.

There is no change however in the preparation itself, and all bottles remaining in the hands of dealers, wrapped under the name of Parker's Ginger Tonic contain the genuine medicine if the fac simile signature of Hiscox & Co., is at the bottom of the outside wrapper.

American Young Men.

American history presents many remarkable instances of young men taking prominent and commanding stations at an age which would be thought very young in other countries. We present a few striking examples from the list of those who have passed off the stage of human action:

At the age of 29, Mr. Jefferson was an influential member of the Legislature of Virginia. At 30 he was a member of the Virginia Convention; at 32 a member of the Continental Congress, and at 33 he wrote the Declaration of Independence.

Alexander Hamilton was only 29 years of age when he was appointed a Lieutenant-Colonel in the army of the Revolution and Aid-de-Camp to Washington. At 25 he was a member of the Continental Congress; at 30 he was one of the ablest members of the convention which framed the constitution of the United States; at 32 he was Secretary of the Treasury, and organized that branch of the Government upon so complete and comprehensive a plan that no great change or improvement has since been made upon it.

John Jay, at 29 years old, was a member of the Continental Congress, and wrote an address to the people of Great Britain, which was justly regarded as one of the most eloquent productions of the times. At 32 he prepared the constitution of the State of New York, and in the same year was appointed Chief Justice of the state.

Washington was 27 years of age when he covered the retreat of the British troops at Braddock's defeat, and the same year was honored by an appointment as Commander-in-Chief of the Virginia forces.

Joseph Warren was 29 years of age when he delivered the memorable address on the 5th of March which aroused the spirit of patriotism and liberty in that section of the country, and at 34 he gloriously fell in the cause of freedom on Bunker Hill.

Fisher Ames, at the age of 27, had excited public attention by the ability he displayed in the discussion of questions of public interest. At the age of 30 his masterly speeches in defense of the constitution of the United States had exerted great influence, so that the youthful orator of 31 was elected to Congress from the Suffolk district over the Revolutionary hero Samuel Adams.

Joseph Story entered public life at the age of 26; he was elected to Congress from the Essex district when he was 29; was Speaker of the Massachusetts House of Representatives at 32, and the same year was appointed by President Madison a Judge of the Supreme Court of the United States.

De Witt Clinton entered public life at the age of 28; Henry Clay at 26; the most youthful signer of the Declaration of Independence was William Hooper, of North Carolina, whose age was 21. Of the other signers of the Declaration, Thomas Haywood, of South Carolina, was 30; Elbridge Gerry, Benjamin Rush, James Wilson and Matthew Thornton were 31; Arthur Middleton and Thomas Stone were 33.

It will be observed that we have confined our illustrations to persons under 35 years of age, and only alluded to those with national reputations.

Moorish Meals.

A Moorish breakfast consists of cas-cus-u a cake of baked granules, deftly made of flour, which eats crisp and sweet—milk butter, omlets, pigeons cooked in oil, sweet potatoes, forcemeat, and sweet tarts of honey butter and eggs. Tea, which is quite a "course" meal, is taken cross-legged on soft carpets spread on the floor around a handsome and costly tray with dwarf feet raising it a few inches from the floor, furnished with drinking glasses in place of china cups. The formidable meal, which is served by an upper man servant, exciter the European visitors' wonder and dismay. First the teapot—or kettle, if named after its shape—is filled with green tea, sugar, and water in such proportions as to make a thick sweet syrup, which is drunk without milk or cream. Then follows an infusion of tea and spearmint; yet another of tea and wormwood; yet another of tea and lemon verbena; and yet another of tea and citron. On good occasions a sixth is added of tea and ambergris. Nothing is eaten. The "weed" usually follows, but the Moor, though a smoker, is not an "inveterate." Dinner consists of various dishes of mutton, fish, and fowl, ingeniously and artistically served in mixtures of pomades, soups, spices, and cosmetics; so, at least, Englishmen declare who have had in courtesy to swallow the preparations. Knives, forks, and spoons are dispensed with, perhaps despised. Around a central dish gathers the company, as usual cross-legged on the floor. At "In the name of God," which is the brief grace pronounced by the master of the house, the slave removes the cover from the bowl; lifted hands are thrust into the smoking dish, and morsels of its contents, deftly rolled into convenient forms, are tossed dripping into the mouth with a neatness and precision truly wonderful. Exact portions are picked from fowl, and fish, and mutton-chop bone without delay or effort. Sharp nails are said to act as knives. After the course water and napkins are brought around. The wash over, another dish and another plunging of the paws into the savory mess. Incense is often burned during the dinner, which fills the apartment with delicate aroma. When a meal is served in the open court the ladies of the house are permitted to gaze on their lords from the open balcony which usually surrounds it.

Funerals in France.

There is one French custom we should like to see introduced into the United States, and become universal.

In France, when a funeral passes, every man raises his hat to salute it. The deceased person may have been a child, a pauper, or a beggar; it is no matter; the *cortege* is saluted by every man, whether he be prince, millionaire, or mendicant. It is a good and lovely custom.

Few things are more humiliating than to see a funeral trotting down Broadway, in New York, winding in and out among the vehicles and other obstructions, exciting no more remark or attention than if it were a procession of old hacks going to the repair shops. In New York, the rapid pace seems unavoidable, owing to the great distance to the cemeteries. Elsewhere, funerals at least move with a decent slowness, and the evident sorrow of the followers seems to plead to the passer-by for sympathetic recognition. It were a mark of civilization in us to bestow it upon them.

SCROFULA. A medicine that destroys the germs of Scrofula and has the power to root it out is appreciated by the afflicted. The remarkable cures of men, women and children as described by testimonials, prove Hoods Sarsaparilla a reliable medicine containing remedial agents which eradicate Scrofula from the blood. 100 doses $1. Sold by all dealers. C. I. Hood & Co., Lowell, Mass.

GOOD NIGHT.—How very commonplace is this expression, and yet what volumes it may speak for all future time! We never listen to it, in passing, that this thought does not force itself upon us, be the tones in which it is uttered ever so gay. The lapse of a few fatal hours or minutes may so surround and hedge it in with horror that of all the millions of words which a lifetime has recorded, these two little words alone shall be remembered: Good night! The little child has lisped it, as it passed, smiling to a brighter morn than ours; the lover, with his gay dreams of the nuptial morrow; the wife and mother, with the tangled threads of household cares still in her fingers; the father, with the appealing eye of childhood, all unanswered: Good night! The seal upon days passed, and days to come. What hand so rash as to rend aside the veil that covers the morrow?

BATTLE CREEK, Mich., Jan. 31, '80.

Gentlemen—Having been afflicted for a number of years with indigestion and general debility, by the advice of my doctor I used Hop Bitters, and must say they afforded me almost instant relief. I am glad to be able to testify in their behalf. Thos. G. Knox.

A good lady who after the death of her first husband married his brother, had a portrait of the former hanging in her dining room. One day a visitor remarking the painting, asked: "Is that a member of your family?" "Oh, that's my poor brother-in law," was the ingenious reply.

Hopeless Epilepsy Cured.

"The doctors pronounced my case to be one of hopeless epilepsy," says our correspondent, W. C. Browning, Attorney at Law, Judsonia, Ark., "and declared death to be my only relief. Samaritan Nervine has cured me." Get at druggists. $1.50.

As there is much beast and some devil in man, so is there some angel and some God in him.

Hatch's Universal Cough Syrup gives your kidneys and liver a jog to help relieve your lungs of a bad cough, or your child of croup. There can be no membraneous croup when Universal Cough Syrup is used in the first symtoms of the disease. No family with children can afford to be without it one day. 25 and 50 cents.

The man who ate his dinner with the fork of a river has been trying to spin a mountain top.

IMPORTANT

When you visit or leave New York City, save Baggage, Expressage and Carriage hire, and stop at the **Grand Union Hotel** opposite Grand Central Depot.

Elegant rooms, fitted up at a cost of one million dollars, reduced to $1 and upwards per day. European plan. Elevator. Restaurant supplied with the best. Horse cars, stages and elevated railroad to all depots. Families can live better for less money at the Grand Union Hotel than at any other first-class hotel in the city.

"TEABERRY" is very fine.
Makes your teeth as white as mine:
Try "Teaberry" and you will see
If it's not what 'tis said to be.

CONFIDENCE.

ZOPESA is a certain preventative of malarial troubles, as it keeps the liver active. It makes Billious fever impossible. On the same grounds it makes indigestion impossible and the blood pure.

It is want of judgment to allow prejudice to prevent one from trying this remedy. The writer has seen many such, who, being persuaded, were surprised and gratified at the results. Try 10-cent sample.

ESTATE OF JAMES McKINNEY.

STATE OF MICHIGAN, County of Lenawee—s.s. At a session of the Probate Court for the County of Lenawee, holden at the Probate office, in the city of Adrian, on Monday, the 31 day of September, in the year one thousand eight hundred and eighty-three.

Present, Norman Geddes, Judge of Probate.

In the matter of the estate of James McKinney, deceased.

On reading and filing the petition of James Kagan and John Boyd, executors of the last will and testament of said deceased, alleging that they have paid the debts of said deceased and the expenses of administration of said estate, that they incurred, and praying for the allowance of their first account as such executors.

Thereupon it is ordered, That Monday, the 1st day of October next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs-at-law of said deceased and all other persons interested in said estate, are required to appear at a session of said court then to be holden at the Probate office, in the city of Adrian, and show cause if any there be, why the prayer of said petitioner should not be granted.

And it is further ordered, That said petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said county of Lenawee, for three successive weeks previous to said day of hearing.

ESTATE OF WILLIAM WARING.

STATE OF MICHIGAN, County of Lenawee, s.s. At a session of the Probate Court for the County of Lenawee, holden at the Probate Office in the city of Adrian on Friday, the 17th day of August, in the year one thousand eight hundred and eighty-three.

Present Norman Geddes, Judge of Probate.

In the matter of the estate of William Waring, deceased.

On reading and filing the petition, duly verified, of Alva Waring praying that administration of said estate may be granted to Frederick B. Wood.

Thereupon it is ordered, That Monday, the 17th day of September next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs-at-law of said deceased, and all other persons interested in said estate, are required to appear at a session of said Court, then to be holden at the Probate office, in the City of Adrian, and show cause if any there be, why the prayer of said petitioner should not be granted.

And it is further ordered, That said petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said County of Lenawee for three successive weeks previous to said day of hearing.

A. H. BRIGGS, Probate Register. aug23

ESTATE OF IDA M. HASTINGS.

STATE OF MICHIGAN, County of Lenawee, ss. At a session of the Probate Court for the County of Lenawee, holden at the Probate office, in the city of Adrian on Wednesday, the 22d day of August, in the year one thousand eight hundred and eighty-three.

Present, Norman Geddes, Judge of Probate.

In the matter of the estate of Ida M. Hastings, (formerly Ida M. Odell) minor.

On reading and filing the petition, duly verified, of Edwin B. Wood, guardian of said minor, praying for license to invest the money in his hands belonging to said minor in certain real estate particularly described in said petition for reasons therein set forth.

Thereupon it is ordered, That Monday, the 17th day of September next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the next-of-kin of said minor and all other persons interested in said estate, are required to appear at a session of said court then to be holden at the Probate office, in the city of Adrian and show cause if any there be, why the prayer of said petitioner should not be granted.

And it is further ordered, that said petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said County of Lenawee, for three successive weeks previous to said day of hearing. (A True Copy.)

NORMAN GEDDES, Judge of Probate.

A. H. BRIGGS, Probate Register. aug23

CHANCERY SALE.

STATE OF MICHIGAN, The Circuit Court for the County of Lenawee in Chancery. William Hayden, Complainant [illegible]

[illegible]

Rheumatine!

An Internal Remedy and a Sure Cure for all kinds of

Rheumatic Complaints!

If you are suffering from

Kidney Complaints

Give Rheumatine a fair trial. You will never regret having done so.

Testimonial from Mr. Thomas H. Day, of No. 83, 23d street, Chicago, who has been for many years employed by the Wagner Sleeping Car Co. and is now conductor of one of their cars running between New York and Chicago.

J. N. SUTHERLAND, Manager Rheumatine Mfg Co., Niagara Falls.

CHICAGO, June 25, 1882.

Dear Sir—It gives me pleasure to inform you of the benefit your rheumatic cure "Rheumatine" has been to my daughter, who for the past few years has been a great sufferer from Rheumatism at times being quite helpless. She took three (3) bottles of your preparation, and I can bear testimony to its speedy action in affording her relief from pain and soreness. Thanks to Rheumatine her health is now quite restored.

Yours very truly, THOS. H. DAY.

See our change of Testimonials every week in Daily Papers.

MESSRS. SWIFT & DODDS.

Wholesale Agents for Detroit and Michigan.

SPECIAL CORRESPONDENCE.

CLINTON CULLINGS.

W. P. Silvers is on the sick list.

Miss Hessie Cupples, of Tecumseh, spent Sunday at Mrs. J. E. McCollum.

Mrs. Estess, of Cleveland, O., was the guest of Mrs. Ed. Van DeMark last Sunday.

The Van DeMark Bros., late of Jonesville, have opened a furniture store in the Reynolds building.

Members of the base ball club complain of the management of their funds. Treasurer's accounts don't balance, it seems.

Manuscripts left at the Clinton News office for publication are manipulated, read and reported all around town by a certain person here long before they appear in print. Such an amount of gall may take the place of good breeding for a spell, but at the same time will cause his name to appear in these columns as sure as he repeats the offense.

A good many have very important business to transact in Detroit, which calls them there this week.

S. Brown has made a great improvement in the looks of the Chandler lot by having about a dozen old locust trees cut down.

COUNCIL PROCEEDINGS.

VILLAGE OF TECUMSEH, Council Room, Sept. 17, 1883.

Regular session.

At this regular session council convened at the usual hour.

Present, Messrs. Mills, Bresie, Heesen, Smith, Sparks, Steinhoff and the Recorder.

Minutes of last regular session read and approved.

REPORTS OF COMMITTEES.

On Finance:

Report in writing, and recommend the payment of the following claims out of the contingent fund.

J. W. Cole, services as Marshall	$12 00
William Brown, labor on streets, 8 days	12 00
A. Packard, labor on streets, 3¾ days	2 25
William Nixon, for mowing East Park	2 50

And to be paid out of the cemetery fund:

John McConnell, labor in cemetery	$11 21

On motion the report was accepted and adopted, and orders directed to be drawn for the respective bills.

PETITIONS AND APPLICATIONS.

Of D. H. Zeluff, David McConnell and 9 others, asking that Maumee street be properly drained and the grade thereof raised.

Referred to committee on streets.

NEW BUSINESS.

A communication was presented by W. E. Gray in regard to the proper care of the fire engine, which was referred to the committees on Fire and Fire limits.

The committee on ordinances is instructed to present at next session of Council an amendment to the ordinance relative to the running at large of cattle, horses, &c., in the public streets, in which a sufficient penalty may attach for any violation thereof.

The following claims were presented and referred to Finance Committee:

Whitenack, Bordine & Co., Hardware, &c.	$46 72
Thomas Elliott, Blacksmithing, &c.	30 10

Council then adjourned.

P. S. McKINNON, Recorder.

The "Art Loan Record."

The Detroit Art Loan Association propose to publish during the two months of the exhibit, a daily quarto sheet of eight pages, to be known as The Detroit Art Loan Record. This will be no ephemeral affair, for in addition to careful, bright, original art teaching, with an art miscellany of much value, will be the publication each morning of one or more of the valuable descriptions of collections exhibited in the Loan with historic information on each. These take a wide range—from the mound builders of Peru and the currency of the ancients, to the best apron of Queen Elizabeth and the new Brussels lace shawl and fichu of the most stylish lady in Detroit; as well as notes on the paintings and statuary of the old masters and the modern school, etc. The editorial work will be done by a gentleman and lady of large experience. There will be a page of directory matter. Sold at one dime the single number, $5.00 for the whole issue, which will make a 416 paged volume, with index and title page. Advanced subscriptions are requested by the Subscription Department.

REAL ESTATE TRANSFERS.

Following are the real estate transfers in Lenawee county, for the week ending Sept. 15, 1883:

FRANKLIN.

Charles Burleson to David Lancaster. Land on sec 4 and 20 56-100. $4200

RIDGEWAY.

John Cheever to Edward C. Rauch. Land on sec. 4. $150.

TECUMSEH.

B. J. Bidwell to Henry L. Crane. Land in village. $250.

At Quincy the other day the Commercial house omnibus team ran away capsized the vehicle, smashed it, and got through the performance without hurting the driver or two passengers who were aboard at the time.

OUR NEW YORK LETTER.

NEW YORK, Sept. 15, 1883.

With the death of Hugh J. Hastings, the editor of the Commercial Advertiser, who expired unexpectedly on Wednesday evening, the death knell of personal journalism on the metropolitan press was sounded. Mr. Hastings during his long life and political career made many friends but also many enemies. A man of positive mind, strong convictions, thorough Irish combativeness and the ability to express himself tersely and without any undue flourishes strike the nail on the head, he soon made himself a power. He invested the Commercial with a unique air, which, though it might repel persons with convictions opposite to those expressed in it, at the same time attracted by its manner of "saying things." It was its editorial page which gave the Commercial its value and its influence. Its news pages are not worthy the name of a great metropolitan afternoon paper. They show bad or rather no editing, no enterprise and a deplorable lack of information on the part of the persons responsible for them. But all this was overlooked, in the vigor and terseness of the short editorial articles at which Mr. Hastings was an adept.

It is true that much of their sparkle depended upon the proof reader. Such a clever man and professional writer as Mr. Hastings was, his English at times was woefully bad, and the proof reader had to do the polishing. If he failed to do it well, there was a pandemonium in Mr. Hasting's room, in which he with his squeaking voice and command of what Texans call "cuss words" had the floor. He was very quick tempered, and a mistake, no matter how trivial, might at any moment be followed by instant dismissal. At the same time "he wore no frills," as the saying is. When not in one one of his irascible moods he was kindly and considerate to even the most abject "tramp printer." His hand was always ready to relieve distress, and he gave largely and in such a manner that his left hand knew not what his right did. His death will be regretted by many.

Another exponent of personal journalism passed away on Wednesday. This was Mr. Charles J. Foster, the editor of The Sportsman, and undoubtedly the best authority on thoroughbred horses and racing in this country. A man of strong convictions, he never hesitated to express them in good terse Anglo Saxon. His knowledge of books and the world at large was extensive, and his love for the thoroughbred horse was as keen as his knowledge of its history was wide and his appreciation of its good points was thorough. Mr. Belmont, the Messrs. Lorillard, Mr. Cassatt, and other wealthy gentlemen who went into racing and breeding, may attribute many of their successes to his knowledge and advice. He advised Mr. Belmont to breed the Ill Used, despite the opposition of other advisers to that stallion, and the Ill Used is now the most promising sire in the east. Mr. George L. Lorillard regrets to this day that he did not follow Mr. Foster's advice and buy Iroquois as a yearling. His brother Pierre got him instead, and his name will be forever associated with the first American winner of the classic Derby. Most of the horses on the farm of Mr. Cassatt, the former Vice President of the Pennsylvania road, were bought on Mr. Foster's advice, and although indifferent training and bad luck have thus far not brought on the success expected and deserved, the horses will yet show up well.

The shocking railroad disaster on the Long Island railroad, by which three persons lost their lives and between twenty and sixty persons were more or less badly injured, will probably call forth a thorough overhauling of the shamefully careless and indifferent manner in which the road is managed. There is no doubt that the Long Island Railroad is the worst conducted line in the country. The train in question was a race train, and of course thronged with people returning from the Sheepshead Bay races. It has often surprised me that accidents have not occurred before this. At the race track, after the sports, trains for three points come up for passengers—for Long Island City, for Flatbush and for Bay Ridge. Instead of having two trains for each of these points there is never more than one. Everybody rushes on in wild hurry and excitement, clothes are torn and limbs are bruised, and there are frequently so many cars that the engines can scarcely draw them. The road pays eminently well, and yet for fear of diminishing dividends the directors do not stop even at manslaughter.

Charles Delmonico, the last of the family of caterers, whose skill in providing for the wants of gastronomers has given them an international reputation, is very ill. Too close application to business has brought on an affection of the brain, which, though not serious at present, may develop fatally. The genial face and pleasant manners of "Charlie" will be missed by the habitues, although the throngs are not so great at the twenty-fourth street resort as they used to be.

MICHIGAN STATE ITEMS.

Calhoun county corn considerably cut.

No pancakes in Michigan this winter.

The plum crop in the Traverse Bay region is very light this season.

Henry C. Howd, an old and respected pioneer citizen of Ithaca, is dead.

Farwell reports "Frost bad; grangers sad."

A lodge of oddfellows has been established at Farwell.

C. W. Crimmins has taken charge of the New Haven public school.

The new bridge over the Kalamazoo river at Battle Creek will cost the city but $1,100.

Sophie Lyons' third trial is set down for this term of the Washtenaw circuit court.

The telephone tariff for private residences at Battle Creek has been reduced to $35 per year.

Hugg Island is a popular picnic place at Portland. The name of itself is very attracting to picknickers.

A Birmingham woman took paris green because her husband went to a dance without her. She still lives.

Eclectric light is once more to be shed abroad on the streets of Bay City.

John Eastman, recently injured in a lumber camp at St. Helens, has since died.

Messrs. Stanch & Booth, two printers, propose to start a daily paper at Ann Arbor.

Grand Ledge people are doing more building this year than in many years before.

Frank Yeats still holds the medal for being the best drilled man in the Port Huron company.

The Michigan methodist conference at Albion declared for prohibition with a decidedly don't you forget it air.

The Charlotte Universalists, owing to a lack of the requisite funds, have deferred the completion of their church until next season.

John G. Lee, of the Grand Haven News-Journal, is to be made a deputy oil inspector for Muskegon, Ottawa and Allegan counties.

Lebert De Werk, of Holland, Ottawa county, and his wife, aged respectively 80 and 70 years, died within a few hours of each other recently.

Charlotte has about ceased to cherish the hope that the Grand Trunk railway company will build a new depot at that place the present year.

Prof. Peters, of Illinois, has been engaged to fill the position recently occupied by Prof. C. W. Stone in the Battle Creek schools. Stone, it will be remembered, was killed at the Carlyon disaster.

A woman about 30 years of age and a girl of 17, both of whom belong to good social circles, have been arrested at Grand Rapids on charges of shoplifting. The girl hails from Southern Michigan, and has wealthy family friends.

Last spring an "agent" sold the farmers along the line of the Detroit, Lansing and Northern railway a large quantity of what he called "tree beans," getting $2 per quart for them. Now they would like to tree that agent.

A new method of binding shingles has been invented by Mr. Wm. S. Newson, of Manistee. It consists in the use of a wire of the same length as the common band, chisel pointed at each end and bent at an angle of about 20 degrees, and notched to prevent drawing out.

Judge Parrish has been giving the farmers of the Western Michigan farmers' club some very sensible, clear and interesting talks concerning the laws of interests to farmers especially. The talks were divested of all legal twaddle, were pointed, and conveyed the common sense import of these laws.

A few nights ago a Charlotte woman retired for the night and left the front door unlocked, awaiting the arrival of her husband, who entered in time to frighten away two men who had chloroformed her with the evident design of plundering the house. That door will be locked hereafter.

SECRET OF SUCCESS.

A youth, just launching out in trade,
Unto a wealthy merchant said:
"Pray tell me sir, what you profess
To be the secret of success."
The nabob's eyes with pleasure shone,
As he replied in earnest tone:
"The secret simply is, I think,
You'll find it sir in prudent ink."

A NIGHT ATTACK.

I had scarcely got out of boyhood when I left England to become the partner of an old schoolmate, Dick Meringale, as a sheep farmer in South America. We invested our joint and rather modest capital in a large league of land on the Parana, and erected on it a small house, built of sun-baked brick, which consisted of one tolerably large room, with a flat roof and parapet accessible from the inside by means of a ladder. Around it at a short distance we had dug a deep, dry ditch, crossed by a draw-bridge, intended as a protection against surprise from the Indians.

One day Dick appeared to me that he had been told that morning that the savages had crossed the river, and we must keep our wits about us. It was scarcely two hours after that two Gauchos put in an appearance. Their usually swarthy faces were livid with fear. They sprang from their horses, which covered with blood, sweat and foam, showed how sharply had been the ride, and rushed into the drawing-room. They told us as soon as they were allowed that our Indians were in hot pursuit, and would soon be on the spot, and brought us the news of the loss of the place, and then told us of the cruelties they had practised upon the women and children.

The moon retired, but the night was clear enough to enable us to see a man at ten paces. Suddenly a spark appeared. They had fired our hay-stack—brighter and brighter it became.

Grouped around the flame, and out of range, were our foes—their swarthy skins and snaky hair glistened in the fire-light and they brandished lances and screamed with delight at the destruction they had caused.

I looked at my companion's face. It was very pale.

"Look!" he said. "Here comes an embassador. Good heavens! Look!"

I turned with astonishment. A nearly naked Indian was advancing toward us and as an immunity from our shots he bore in his arms, helpless, a beautiful white girl. Her hands were bound behind her back, and masses of coal-black hair encircled a face showing deadly terror and horror in every feature, and drooped nearly to the ground over the savage's arm. Her dress torn from one white shoulder showed how hard had been the first ineffectual struggle against her captors.

As the savage crossed the ditch, Dick, with a deep groan, recognized her.

"It is Rosita, Don Ramon's daughter!" he broke out. "I love her. Alfred, and will save her or die with her. Listen!" he continued, hurriedly. "This rascal has come to make some proposal to us. Keep your eye on him; the moment you get a fair chance fire at him. If you kill her it is a better fate. When I hear the shot I will throw open the window, which I can do more easily than the door, and try for a rescue."

"For heaven's sake don't leave the room. Our only hope is in your being able to keep off the others, who will rush from the ditch."

He rushed down the ladder, leaving behind that cunningly adjusted above the parapet. The savage raised his voice and demanded in broken Spanish a surrender. He threatened us with tortures, and bade us look upon his captive, who, too, should suffer for us. He grasped her hair brutally and raised her head. With a sudden spring of pain and fright she threw herself from his arms and fell to the ground. His time and mine had come. As he stooped, my bullet laid him dead by the side of his intended victim. Dick made his rush from the window, and the Indians theirs from the ditch, as he had predicted, but as Rosita was rather nearer the house than the ditch, she managed to reach her first and was retreating with her in his arms. And now all depended upon me. My first shot aimed at the foremost of the assailants, missed him clean; and before I could seize another rifle he had made a vicious thrust at Dick, who, encumbered as he was, was quite helpless. The lance passed through Rosita's dress, luckily without injury to the wearer; and as the savage drew back for a cooler and surer thrust I had the inexpressible pleasure of lodging a bullet in his body, which closed his career. Then I heard a heavy fall in the room below. Dick had thrown his bundle clean through the open window, at the risk of breaking a limb, and turning, found himself engaged hand to hand with a dozen Indians. He sat his back against the wall, and drew his revolver with his right hand, receiving as he did so a spear thrust through his left arm; but his and my revolver dropped a man at every shot; so they drew off.

Dick managed with great effort to drag himself through the window, and then fainted away from the loss of blood and exhaustion; and, when I ran down the ladder to make fast the window again, I found him comfortably reclining with his head in Rosita's lap, the latter having been stunned by her unceremonious entry. But I could not stay to help her; my post was on the roof.

But, the fight was over. They dared not longer to encounter our deadly breech-loaders. They bore off, with them, five of the slain; six other corpses lay in front of the window, and two more were afterward found who had crawled into ditch, like wild animals, to die.

Rosita had been captured while walking in the grange, within near her father's house, a short time before we were attacked.

"You noble cabelleros," she said, "have preserved me from death and what is far worse. God will reward you, for I can never."

I think Dick, however, was of a different opinion; at all events he has always seemed remarkably satisfied with the reward he persuaded her to make him.

Years have passed since that eventful night. Dick and Rosita are living at Don Ramon's estancia, that old gentleman having departed this life shortly after the fray. I, too, am with them as a partner in the land, flocks and herds, of which we have a good quantity; and whenever the increasing stock of little Dicks and Rositas ask me as they invariably do of an evening, to tell them a story, I know that nothing less will content them than the one I have narrated.

Care of Children's Teeth.

[illegible]

"Look! look! the sun is shining, the birds are singing, the flowers are growing, and everything is happy and joyous, and why should I be miserable? Why, because my children have bad teeth, and I have the money to make them comfortable and healthy. Teeth are not to be trifled with, and children must suffer for the ignorance and carelessness of their parents. Unusually good teeth for a boy or girl are a fortune, and should be treated as such. A good set of teeth should last a lifetime, and there is no reason why they should not, if the first teeth are properly cared for. Many people suppose that the first set of teeth are of little importance, because they are to be followed by others. This is a great error. The first teeth are the foundation for those that follow, and if they are lost before the second set is complete, the adjacent teeth will lean toward the space left vacant, and the second set will be more or less crowded, disfigured, and liable to decay. Unusually good teeth for a boy or girl are a fortune, and should be treated as such. A good set of teeth should last a lifetime, and there is no reason why they should not, if the first teeth are properly cared for. Many people suppose that the first set of teeth are of little importance, because they are to be followed by others. This is a great error. The first teeth are the foundation for those that follow, and if they are lost before the second set is complete, the adjacent teeth will lean toward the space left vacant, and the second set will be more or less crowded, disfigured, and liable to decay. Now the boy has nothing to do but to keep his teeth as healthy and decayless as he can in the future. The danger of injury is warded to avoid the ill it produces trouble by the really good teeth he has. Then, that father's case. They learn to avoid the opposite extreme. His teeth are hopelessly discolored, and a few are habitually loose, but the useful tomato is no longer suspected as the cause. He had an opportunity to read some in a work on dentistry, and came to the conclusion that hard "scouring" of his teeth with gritty substances, when he was a young man, had worn away the hard enamel of his teeth so that the strong coffee he drank during his soldier life especially penetrated and permanently colored his teeth. I dislike to hear of scouring the teeth. When they have been neglected, this may be necessary to get them once clean. The dentist has peculiar tools for removing tartar crust, but the yellow deposit on children's teeth can be cleaned away as the dentist does it, by any one. Take finely powdered pumice stone and a little clean soft pine stick to rub them. Dip the pine stick into water and then in powdered pumice and rub the teeth gently. Afterward wash them with soap and water, using a tooth brush. It is well to use a little fine clean [illegible] occasionally for cleaning the teeth, but [illegible] of pure water will usually suffice for cleansing the teeth of persons of good dietetic habits. To make good teeth in the first place, beginning when we can, and allowing for "ancestry," the mother should eat plain and nutritious food, a varied diet well supplied with bone material, as the grains are when it is not bolted or sifted out, and lean meat. For young children milk should be freely used, and Graham oatmeal also.

HABITS OF DIFFERENT NATIONS.—However dress, food, manners, cooking, political conditions, may vary in other countries the beds differ as notably as any thing does. In eastern nations the best bed is often nothing but a carpet, carried about and spread in any convenient spot, and the tired native lies down in his clothes. We remember a child who used to be puzzled with those miracles of our Saviour, who in restoring an impotent man directed him to "take up his bed and walk"—his idea of a bed consisting in a four-post bedstead, with its mattress and feather-bed, blankets, sheets and pillows. But even in very cold countries the beds are closely allied to the Eastern carpet. In taking a furnished house in Russia, on inquiring for the servants' bedrooms and beds, it came out that the Russian servants and is the habit of lying anywhere—in the passages, on the floors, on the boats at the room doors, or even on the carpets in the sitting-rooms—generally as near as possible to the stove in the winter season. The emperor himself sleeps on a leather sofa in a sitting-room, lying down in a dressing-gown, but not removing his under clothing. But in Russia the houses are kept so warm by the stoves that much bed-covering is no more required in winter than during summer.

Swimming is advocated in San Francisco as a cure for the opium habit. A physician gives the history of a lady who, from taking morphine to alleviate the pains of a long protracted disease, had become a confirmed opium eater, and was suffering all the distressing symptoms of this terrible habit. The doctor ordered her to cross the bay every day, and take a swim in the Alameda baths, which she did, and in a few months was completely cured.

DEAR GRANDMOTHER.

Grandmother paces with stately tread
Forward and back through the quaint old room
Out of the firelight, dancing and red,
Into the gathering dusk and gloom;
Forward and back in her silken dress,
With its falling ruffles of frost-like lace,
A look of the deepest tenderness
In the faded lines of her fine old face.

Warm on her breast in his red night-gown
Lies a sturdy lad, looking up
With twinkling eyes that soon must drown
Over the little sleepy eyes.
Grandmother sings to him sweet and low
A lullaby song she learned long ago
In the days of her youth, when her heart was strong,
Ere death had touched her with cold lips and left her alone.
The large room is as dark as night
But shining out in the hallway bright
Is a lamp, whose rays, through the half-open door,
Fall on the sleeper's golden hair.
Softly she sings him the same sweet strain
Her fathers have sung to their children
And as the lad's eyelids grow heavy and fain
Grandmother's voice falls to a lower key
Over the dear little drowsy ones
The spirit of her pastime seems to pass
The little boy's breathing has grown deep
Brighter is the evening that she sees dim
And in after years from her home above
The light of her blessing will rest on him.

Christian Union.

Science in the Kitchen.

HOW FOOD CAN BE COOKED SO AS TO BE HEALTHFUL.

Within the past few years there has been a general awakening of the public to the fact that they are outraging all rules of health by their intemperate manner of eating and drinking, and numerous have been the reforms proposed, and scores of reformers have sprung up on every side, all anxious to contribute advice on so vital a subject. Among the latter there are none better known than Mrs. Alice B. Lewis, of the Food and Health Depot, Manchester, England, editress of several health journals and authoress of a number of works on food and health and inventor of a new system of cookery. Mrs. Lewis was recently visited by a reporter, and, in the expressive manner in which it should be prepared for the table was imparted.

"Food as well as clothing is the subject of health and its promotion by wholesome and clean food," she began, "and I have devoted my attention in this direction for many years. I feel and know the subject thoroughly, and I am the strongest hygienist in the world. I am a vegetarian, and I do not eat flesh, fish, fowl, game, or any thing that has been alive. I do not even eat eggs, and I do not use butter, cheese, milk, or any thing of the kind. I do not eat them, but I do not say they are not good for others. I do not say they are not healthy for others. I do not say they are not good for others. I do not say they are not healthy for others. I do not say they are not good for others. I do not say they are not healthy for others.

WE DO NOT CLAIM

that HOOD'S SARSAPARILLA will cure everything, but the fact that on the purity and vitality of the blood depend the vigor and health of the whole system, and that disease of various kinds is often only the sign that nature is trying to remove the disturbing cause, we are naturally led to the conclusion that a remedy that gives life and vigor to the blood, eradicates scrofula and other impurities from it, as HOOD'S SARSAPARILLA undoubtedly does, must be the means of preventing many diseases that would occur without its use; hence the field of its usefulness is quite an extended one, and we are warranted in recommending it for all derangements of the system which are caused by an unnatural state of the blood.

Why Suffer with Salt-Rheum?

MESSRS. C. I. HOOD & CO., Lowell, Mass.

Gentlemen—I was a great sufferer from Salt-Rheum on my limbs, for a dozen years previous to the summer of 1876, at which time I was cured by Hood's Sarsaparilla. The skin would become dry, chap, crack open, bleed and itch intensely, so that I could not help scratching, which of course made them worse. At the time I commenced taking Hood's Sarsaparilla (in the summer of 1876) they were so bad that they discharged, and I was obliged to keep them bandaged with linen cloths. The skin was drawn so tight by the heat of the disease that if I stooped over they would crack open and actually bring tears into my eyes. The first bottle benefited me so much that I continued taking it till I was cured. I used one box of Hood's Olive Ointment, to relieve the itching. Hoping many others may learn the value of Hood's Sarsaparilla and receive as much benefit as I have, I am,

Very truly yours,
MRS. S. S. MOODY,
No. 75 Broadway.

Lowell, Mass., Jan. 15, 1878.

Hood's Sarsaparilla

Is sold by druggists. Price $1, or six for $5. Prepared by C. I. HOOD & Co., Lowell, Mass.

K B

KING OF THE BLOOD.

The Most Thorough Purifier of the Blood Yet Discovered.

Cures all Humors, from a Common Eruption to the worst Scrofula.

It purifies the Blood.
It invigorates the Liver.
It regulates the Bowels.
It strengthens the stomach.
It gives vivacity in place of lassitude; cheerfulness in place of gloom, and robust vigor in place of debility.

Dyspepsia, Biliousness, Disordered Liver, Constipation, Nervous Affections, General Debility, in short all the numerous diseases and discomforts caused by impure blood are speedily conquered by this powerful corrector, the chief and sovereign of all ancient or modern medical discoveries—KING OF THE BLOOD.

Its name is its best description as it is a royal dispenser of the blessings of health and vanquishes the foes that lurk in the blood.

It banishes PIMPLES, SALT RHEUM, SCALY ERUPTIONS, ULCERS, SCALD HEAD, FEVER SORES, and all SCROFULOUS DISORDERS.

It checks CONSUMPTION in its early stages. It has frequently cured it when advanced.

It disperses TUMORS and CANCERS without the Surgeon's knife.

It cures DROPSY, general or partial.

It cures FEMALE WEAKNESS and DISEASE.

It reduces in a safe and effectual manner all swellings, external or internal.

It eradicates the effects of Venerial Disease and Mineral Poisons, and establishes a sound constitution.

Many certificates, much further information and full directions for using, will be found in the pamphlet, "Treatise on Diseases of the Blood," in which each bottle is enclosed.

Price $1 per bottle containing 12 ounces, or to 50 doses. Sold by dealers in medicine.

If your druggist does not happen to have it on hand, request him to order a supply of it for you, as it will be cheaper than for you to order direct of us, and less trouble.

Superior to All Others

Here, now, in favor of bicycles, it is said no man has ever been seen coming home drunk on one of them.

"There is my brick-bat cabinet," said a charming young lady, with great complacency, pointing to an ebony case of china-ware.

A temperance lecturer may present very strong arguments, but he cannot always make those who differ with him "take water."

A housekeeper gives a written description of how to "whip cream" for certain dainty dishes; but the quickest way is to let the cat lick it, if it must be whipped.

"If I have ever used any unkind words, Hannah," said Mr. Smiley, reflectively, "I take them all back." "Yes, I suppose you want to use them over again," was the not very soothing reply.

A young lady sent a poem entitled "I Cannot Make Him Smile," to a newspaper. The editor ventures to express the opinion that she would have succeeded had she sent him the poem.

"How do you like me now?" asked a belle of her spouse, as she sailed into the room with her long train sweeping behind her. "Well," said he, "to tell the truth it is impossible for me to like you any longer."

Somebody says that "The devil only came into the world after woman was placed here." If there had been only men in the world the devil would not have come into the crowd. He could have found better company at home.

They were playing the game they call euchre. She held both bowers and the king and two aces of other suit, but she was a novice at the game. A young man who was teaching her looked at her cards and warmly exclaimed: "What a lovely hand!" She looked him straight in the eye and murmured: "You may have it if you want it." All the rest of the evening he wondered if he was not the victim of a leap year proposal.

An English girl wants to know how long girls should be courted. Our opinion may not be worth much in such matters, but we think a long girl should be courted in the same manner as short girls are courted—with operas, carriage rides, confections, sitting up nights, and so on. If a young man can't court a long girl without carrying a step ladder when he goes to see her, he had better resign in favor of some one who can.

A boy with a business look in his eye recently entered a dry goods store on Monroe avenue and said his mother had sent him for sixty spools of No. 1 thread. "Don't you mean one spool of No. 60 thread?" inquired the clerk, after puzzling over the matter. "Maybe that's it," dubiously responded the boy. I guess you'd better go back home and find out." The boy departed, but returned in a moment with a satisfied look around his mouth, and explained: "Say, it won't make a bit of difference which way we have it, for mother said you've to charge it anyway."

HARI-KARI.—Hari-kari is a form of suicide performed in Japan by cutting open the abdomen by two crosswise cuts with a short sword. Nearly all Japanese officials carry on their person two swords; one long, to fight an enemy with, and the other short, to perform hari-kari with, if their own honor is at all damaged. It is a very common practice, as by so doing a man's honor is saved. Officials are often commanded to kill themselves by this method when by any act they have fallen into disgrace, and by so doing their children inherit all their property and their father's position, but not so if the suicide has taken place unbidden. Persons who have suffered unendurable affront, which cannot otherwise be satisfied, sometimes kill themselves in this way, and thus satisfy their revenge on the enemy.

It was on a Sound boat, and the mate was evidently annoyed about something. "Carry it forward," he roared. "Carry it forward, you lunk headed son of a sculpin, or I hope to gee whizzley gaul dusted to jude if I don't maul the dad slammed head off'n ye with a capstan bar, you hog-backed molligrubber, ye!" And the deck hand looked up in profound admiration, and said: "By George! cap, if I had your eulchur I wouldn't be a runnin' as mate for no man in these waters; I'd be a commandin a boat of my own."

Take away but the pomps of death, the disguises and solemn trappings, and the actings by candlelight, and proper and fantastic ceremonies, the minstrels and the noise-makers, the woman and the weepers, the swooning and the shrieking, the nurses and the physicians, the dark room and the ministers, the kindred and the watches, and then to die is easy, ready, and quitted from its troublesome circumstances. It is the same harmless thing that a poor shepherd suffered yesterday, or a maid-servant to-day; and at the same time in which you die, in that very night a thousand creatures die with you, some wise men and many fools; and the wisdom of the first will not quit him, and the folly of the latter does not make him unable to die.—Jeremy Taylor.

[illegible] that there is no single system [illegible] unique for writing, and that a [illegible] belonging to the educated classes [illegible] be taught much better and more [illegible] if, after being once enabled to make and recognize written letters, it were left alone and praised or chided not for its method, but for the result.

Let the boy hold the pen as he likes, and make his strokes as he likes,—hurry, of course, being discouraged—but insist that his copy shall be legible, clean and shall approach the good copy set before him, namely, a well written letter, not rubbishy text on a single line, written as nobody but a writing-master ever did or ever will write until the world's end. He will make a muddle at first, but he will soon make a passible imitation of his copy, and ultimately develop a characteristic and strong hand, which may be bad or good, but will not be either meaningless, undecided or illegible.

This hand will alter, of course, very greatly as he grows older. It may alter at 11, because it is at that age that the range of the eyes is fixed, and short-sight betrays itself; and it will alter at 17, because then the system of taking notes at lectures, which ruins most hands, will have cramped and temporarily spoiled the writing, but the character will form itself again, and will never be deficient in clearness or decision.

The idea that it is to be clear will have stamped itself, and confidence will not have been destroyed by worrying little rules about attitude, and angle, and slope, which the very irritation of the pupil ought to convince the teachers are, from some personal peculiarity, inapplicable. The lad will write, as he does anything else that he cares to do, as well as he can, and with a certain efficacy and speed. Almost every letter he gets will give him some assistance, and the master's remonstrances on his illegibility will be attended to, like any other caution given in the curriculum.—*London Spectator.*

A Girl's Romantic Dreams.

Mrs. Mary Kyle Dallas, in the *Ledger*, writes the humorous description of a school-girl's poetical ideal of a husband:

Should Rosalie, on her 16th birthday write a description of that future partner of life's joys and woes, it will be something like this:

"Tall, dark, romantic, melancholy; with melting eyes and a large chin with a dimple in it; fond of quoting Byron and Tennyson; always on his knees, vowing he will die if she does not smile upon him. By profession a corsair—though Rosalie does not exactly know what that may be—and with a price upon his head."

Twenty years after we find Rosalie long accustomed to being Mrs. John Boggs. Her husband is a small man, with red hair and a squint, and highly respectable. When he proposed he said:

"Now, Rosy, I like you. If you'll have me, I'll have you. Take me, or leave me;" and she took him.

MOTHERS DON'T KNOW.—How many children are punished for being uncouth, wilfull and indifferent to instructions or rewards, simply because they are out of health! An intelligent lady said of a child of this kind: "Mothers should know that if they would give the little ones moderate doses of Hop Bitters for two or three weeks, the children would be all a parent could desire."

A young college student was visiting his grandmother, and at the breakfast table he took an egg, and holding it up, asked her if she knew the scientific way of obtaining the contents without breaking the shell?

She replied that she did not.

"Well," said he, "you take the spheroidal body in you sinister hand, and with a convenient diminutive pointed instrument held in the dexter hand, puncture the apex; then in the same manner make an orifice in the base, place either extremity to your labials, and endeavor to draw in your breath; a vacuum is created, and the contents of the egg are discharged into your mouth."

"La!" said the old lady, "when I was a girl we used to make a pin-hole in each end, and suck 'em."

Good for Children too.

Dr. Foord's Tonic Cordial is a splendid medicine for children as well as adults. Read the following letter from a well-known citizen from Syracuse:

Wm. L. Palmer, Syracuse N. Y., says: "For two years past I have been acquainted with the use of Dr. Foord's Tonic Cordial for the cure of Billious Colic, Dysentery, and other diseases of children, and many a time I have seen it relieve them like a charm. They take it so well, and its effects are so decided, that I take pleasure in speaking of it in terms of the highest praise."

Myer's Extract of Rock Rose

Is the famous old New England Blood Medicine.

Mathew's Hair Dye

Produces a natural color on hair or whiskers. Does not crock.

Henry Carbolic Salve.

Is the best Salve for cuts, bruises, sores, ulcers, salt rheum, tetter, chapped hands, chilblains, corns, and all kinds of skin eruptions.

What a Coin Did.

A coin is in itself a history. There was once a lost city which owes its place to a coin. For over a thousand years no one knew where Pandosia was. History told us that at Pandosia King Pyrrhus collected those forces with which he overran Italy, and that he established a mint there; but no one could put their finger on Pandosia. Eight years ago a coin came under the sharp eyes of a numismatist. There were the letters Pandosia inscribed on it, but what was better, there was an emblem, indicative of a well-known river, the Crathis. Then everything was revealed with the same certainty as if the piece of money had been an atlas, and Pandosia the mythical city, was at once given its proper position in Bruttium. Now, a coin may be valuable for artistic merit, but when it elucidates a doubtful point in history or geography its worth is very much enhanced. This silver coin, which did not weigh more than a quarter of a dollar, because it cleared up a mystery of Pandosia, was worth to the British Museum $1,000, the price they paid for it.

NORTH WOLCOTT, N.Y., Jan. 25, 1883.
Rheumatic Syrup Co.:

It is with pleasure I write you in regard to your Rheumatic Syrup. I think it my duty to let the suffering people know what it has done for me. I have suffered greatly two years with rheumatism in my hips. I have tried many liniments but received no benefit from them. Being acquainted with a number who had been cured by the Rheumatic Syrup I gave it a trial, and I am cured after using but four bottles. I know the Syrup will cure any case of rheumatism, if taken as directed, as hundreds will testify in this immediate vicinity. I am gratefully yours, John P. Fowler,
Justice of the Peace.

Pimples, blotches, sores or scaly eruptions on any part of the body can be cured by the use of Rheumatic Syrup, which cleanses the system and blood of all impurities, and builds up the debilitated system and gives new life to the feeble and overworked sufferer.

Paper Clay.

In view of the rapid rise in the price of paper, and the complaints of the paper-makers with regard to the scarcity and increasing costliness of all sorts of paper stock, it is gratifying to see that one source of such raw material is not likely soon to fail us. Whatever may happen to rags, wood pulp, and the thousand other sorts of fibrous material supposed to enter into the composition of paper, the clay bank promises to be inexhaustible. True, the majority of people who pay a high price for paper have a prejudice against that material, but evidently the owners of the clay banks have not; for, in a prominent journal devoted to the paper trade, they boldly print a large cut of their "clay works," showing a long stretch of snowy bluff out of which a huge section has been cut, presumably to supply the needs of "first-class mills, East and West," to whose owners they refer for evidence of the excellence of their clay.—*Scientific American.*

Did you read how Josiah Pitkin, of Chelsea, Vt., was cured of a terrible sore leg by Hood's Sarsaparilla, the blood purifier?

No Grease for Him.

"When Greece her knees—Greece her knees—Greece her knees," stammered an embarrassed school boy, forgetting the next line of his recitation. "There is no occasion to grease anybody's knees," shouted his teacher. "Go and study your piece." Neither is there occasion to grease your hair. Parker's Hair Balsam is all the dressing you want. Restores the original gloss and color to gray or faded hair. Does not soil the linen; not a dye; good for the scalp; prevents falling out.

Fire by Friction.

South African savages get fire in the following manner: Some straw being laid on the ground as a bed, two sticks are laid on it a few inches apart to form a support for the third stick, which is laid across them, having a deep notch cut in it to receive the blunt point of the drilling stick; this is twirled like a chocolate muller between the palms of the hands, and when the twirler's hands reach the bottom they are dexterously shifted to the top again. A spark is got in the charred dust in about five minutes, and by carefully shielding it in a handful of the straw, it is soon fanned into a flame.

Wide Awake Druggists.

Are always alive to their business, and spare no pains to secure the best of every article in their line. They have secured the agency for the celebrated Dr. King's New Discovery for Consumption. The only certain cure known for Consumption, Coughs, Colds, Hoarseness, Asthma, Hay Fever, Bronchitis, or any affliction of the Throat and Lungs. Sold on a positive guarantee. Trial Bottles free. Regular size $1.00.

Sold by C. A. Wright & Co.

Wood ashes will decompose bones. Expose to the weather a barrel filled with alternate three-inch layers of broken bones and ashes for several months, and, on examination, the bones will be found to be reduced to a jelly-like substance, forming phosphate of potash, one of the most powerful as well as lasting fertilizing materials known, and one which, when exposed to the sun for a few days, may be easily reduced to powder—the very best condition for applying to the land. Do not hurry the operation, but save all the bones and let time and wood ashes convert them into a rich manure.

Is Fun Better than Physic?

Fun is excellent; a hearty laugh is known the whole world over to be a health promoter; but fun does not fill the bill when a man needs physic, on the other hand people take too much physic. They would be more healthy, live longer and enjoy life thoroughly if they used Dr. Jones' Red Clover Tonic, which cures all blood disorders, indigestion, kidney and liver troubles, removes pimples, and is a perfect tonic. Can be taken by the most delicate. Only 50c a bottle, of Baker & Hall.

There is nothing, no nothing, innocent or good that dies or is forgotten: let us hold to that faith or none. An infant, a prattling child, dying in its cradle will live again in the better thoughts of those who loved it, and play its part, through them, in the redeeming actions of the world, though its body be burnt to ashes, or drowned in the deepest sea. There is not an angel added to the host of heaven but does its blessed work on earth in those that loved it here. Forgotten! oh, if the good deeds of human creatures could be traced to their source, how beautiful would even death appear; for how much charity, mercy, and purified affection would be seen to have their growth in the dusty graves.—Dickens.

Positive Cure for Piles.

To the people of this county we would say we have been given the agency of Dr. Marchisi's Italian Pile Ointment—emphatically guaranteed to cure or money refunded—internal, external, blind, bleeding or itching piles. Price 50 cents a box. No cure, no pay. For sale by Waldo & Doty, druggists.

"Men may preach, and the world will listen; but profit comes by example. A parent inculcates gentleness in his children by many sound precepts; but they see him treat a dumb animal in a very harsh manner, and in consequence his instructions are worse than lost, for they are neither heeded nor suspected." His examples as a gentle and humane man would have been sufficient for his children without one word of command.

Daughters, Wives and Mothers.

We emphatically guarantee Dr. Marchisi's Catholicon a Female Remedy, to cure Female Diseases, such as Ovarian troubles, inflammation and ulceration, falling and displacement or bearing down feeling, irregularities, barrenness, change of life, leucorrhœa, besides many weaknesses springing from the above, like headache, bloating, spinal weakness, sleeplessness, nervous debility, palpitation of the heart, &c. No cure, no pay. For sale by druggists. Prices $1 and $1.50 per bottle. Send to Dr. M. B. Marchisi, Utica, N. Y., pamphlet free. For sale by Waldo & Doty.

"We are selling at the rate of three doz. bottles of Baker's Japanese Liniment a week." Pegg & Wilson, Druggists, Morenci, Mich.

An exquisite once drove up to the door of a country tavern, and addressed a small boy who came to the door, as follows:

"Adolescence, extricate my weary quadruped from the vehicle, stabulate him, tender him a sufficient quantity of nutritious aliment, and after a reasonable length of time has elapsed, and he has ceased transpiring, manipulating his coat meanwhile with a wisp of hay, allow him to quench his thirst with a modicum of *aqua pura*.

When the aurora of morn shall have illumined the Eastern horizon, and I am about to resume my peregrinations, I will amply recompense thee for thy hospitality."

The boy ran to the door, and bawled out, "Dad, dad, come out here: there's a Dutchman wants to see you."

"My Grandfather's Clock"

Was once a very popular song, but like many other sentimental tunes it doesn't wear well. Dr. Thomas' Eclectric Oil will wear; it will wear away all aches, sprains and pains, and repay its purchaser a hundred fold.

Tecumseh Sewing Machine Agency!

G. P. Sparks, Proprietor.

The DOMESTIC AND WHITE stand at the head.

If you want a machine, buy the best. Call and see me or send a postal before buying. I will make it to your interest to do so.

Best in the Market. Soft & Hard.

Rheumatic SYRUP.

The Greatest Blood Purifier Known!

RHEUMATISM CURED. SCROFULA CURED. NEURALGIA CURED.

ROCHESTER, N.Y., Apr. 6, '83. Rheumatic Syrup Co.: Gents—I have been a great sufferer from Rheumatism for four years with different doctors, six years and heard of the same physicians, for scrofula, as some thought, [illegible] and have [illegible] cess of Rheumatic Syrup I concluded it, but found no relief. Being [illegible] induced to give it a trial in my ill. I commenced taking your Syrup [illegible] own [illegible] and [illegible] Syrup. After taking it a short time [illegible] that I have had greatly improved [illegible] time, to my surprise [illegible] limited by its use. I can walk [illegible] without crutch or [illegible] freedom from pain for [illegible] weeks. I count my [illegible] remedy. I have ever heard of for [illegible] and my general health is very well [illegible]. As a blood purifier [illegible] the blood and for the [illegible] improved. It is a splendid tonic [illegible] it has no equal. [illegible] for the blood and debilitated system. E. C. DESOSER PARK, M.D.

POrt Byron, N.Y., Feb. 20, '83. Rheumatic Syrup Co.: I had been doctoring for three years with Rheumatism and Scrofula, and have [illegible] cured—Since November, 1882, [illegible] Rheumatic Syrup I have been [illegible] and have [illegible] cured me of Rheumatism and Scrofula. MRS. WM. SERANG.

FAIRPORT, N.Y., March 26, '83. Rheumatic Syrup Co.: [illegible] Syrup I have experienced [illegible] Rheumatism and neuralgia, [illegible] W. B. COATE.

Manufactured by RHEUMATIC SYRUP CO., 1 Plymouth Ave., Rochester, N. Y.

CASTORIA

for Infants and Children.

Castoria promotes Digestion and overcomes Flatulency, Constipation, Sour Stomach, Diarrhœa, and Feverishness. It insures health and natural sleep, without morphine.

"Castoria is so well adapted to Children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M.D., 82 Portland Ave., Brooklyn, N. Y.

What gives our Children rosy cheeks,
What cures their fevers, makes them sleep?
'Tis Castoria.

When babies fret and cry by turns
What cures the cross, kills their worms,
But Castoria.

What quickly cures Constipation,
Sour Stomach, Colic, kills wind,
But Castoria.

Farewell then to Morphine Syrups,
Castor Oil and Paregoric, and
Hail Castoria!

CENTAUR LINIMENT—an absolute cure for Rheumatism, Sprains, Burns, Galls, &c. The most Powerful and Penetrating Pain-relieving and Healing Remedy known to man.

TECUMSEH, MICH., SEPT. 30, 1882.

A LITTLE MORE DIRECTORY.

Last Thursday we took another start to wind up our outside canvass for the Directory. Our first halt was at Franklin Center. We found Jerry Tuttle as good natured as ever, still engaged in selling goods and licking postage stamps. Mrs. Pitcher keeps the old corner hotel, assisted by her son Frank, where we got a good substantial dinner. They have a house full of railroad boarders lately and always have good accommodations for transient customers. Dr. A. F. Jenkins is now located in the large house west of the hotel, and he is evidently prospering in his professional affairs. He has a good rule in all directions.—Having done the Center we set out southward and stopped a few moments to interview Dan Hanford, who is now living on the old Albert Hyde farm. His corn was touched some by Jack Frost's late visit, but he has the big barn full of hay and 1050 bushels of wheat in his granaries, so that he was feeling pretty good natured after all. He has a number of head of thorough-bred cattle in his pastures, and one splendid colt sired by Banker Rothschilds, which he purposes to keep for a fast stepper.—A few miles more through southern Franklin and Cambridge brought us to C. W. Greenleaf's. The big barn, which would hold four common barns, where the sheep shearing festivals are held, is the chief land mark in that section of Cambridge. Mr. G. had just got his wheat in, and expected soon to harvest his corn crop.—Four miles drive, directly south, brought us to Rome Center, where we halted at Wm. Teachout's, got a good supper, and put up for the night. The Teachout family are given to hospitable keeping. William, the landlord of the Rome Center hotel, is a relative of the landlord of the Exchange in this village. He has been running the house about two years and keeps an excellent hotel. People who have occasion to travel through the county should make their arrangements to stop over night at Teachout's. The village contains two general stores, a harness and blacksmith shop, besides the hotel. We are under obligations to Dr. G. W. Ross for assistance in gathering our statistics.

Starting out the next morning in a dense fog, a pleasant ride of six miles brought us to Geneva, on the South shore of Round Lake. There is only one store here, in which the post office is located which is kept by C. B. Crandall. The hotels at Devil's Lake one mile west are the principal attraction during the summer season but Geneva is a very pretty hamlet and has a beautiful location.

Our next stop was at Addison where we arrived in time for dinner and found good quarters at Terpenning's Exchange. The improvements at this house are still going on, and when completed the house will be substantially a new one. R. J. Eaton's new furniture store, on the west side, is nearly completed. When he gets moved in to his new quarters he will have one of the best stores and the best stocks in town. Nesmith has his new stock on hand, and his store is a nobby one. He received a bran new Detroit safe the day we were there. G. A. Smith is making extensive improvements to his mill property. In the afternoon we drove over in Wheatland to see Fred Curtis's big stock farm. We fortunately found him at leisure, and enjoyed an hour's friendly chat with him. The old homestead has absorbed several adjoining farms, until it now contains about 600 acres, and has on it 75 head of full-blooded short horns, besides the ordinary stock. One yearling was sold last week for $250.—Coming back to Addison we again turned our faces homewards and arrived just at sundown to the hospitable mansion on Silver Creek owned by Alvin C. Osborn. It didn't require much urging to induce us to stay over night, and we had no reason to regret it. After a bountiful breakfast on Saturday morning we again set out eastward over the old Chicago turnpike. Called a few moments at C. A. Blackmer's. He will hereafter run his Tecumseh and Cambridge stage four days each week, having added Saturday. The mail route has been increased by one day, which will go into effect October 1st. Halted a moment at F. A. Dewey's and made arrangements for a Pioneer meeting at Fairfield on the 3d of October. We then drove on to Allen Brothers where we enjoyed a good substantial farmer's dinner. Their very large peach orchard is not in bearing this year. We traveled thro' the orchard lengthways on an exploring expedition and found just three peaches. Next year, however, unless all signs fail, they will have a tremendous wheat crop. Two miles more brought us to John W. Monaghan's and George Dunn's where we took a breathing spell and thence to Charlie Aiken's, at the east end of Wampler's Lake. Charlie will keep open grove about two weeks more and then shut up shop. The season as a whole has been a good one for him. Neatly and hastily we drove to Dan Ayer's home, over in Norvell, where we had a good visit, seasoned with two big watermelons.

The Intensity of Arctic Cold.

The chronicler of Lieut. Schwatka's expedition in search of the remains of Sir John Franklin records some interesting facts regarding the great cold of Arctic regions. The lowest temperature met with by the company was 103 degrees below the freezing point, or seventy-one degrees below zero Fahrenheit, a degree of cold almost impossible to imagine by the people of more temperate climes. The effects of such intense cold upon the human system were not so marked in the case of the lieutenant and his companions as might be supposed, and even during the month in which the average temperature was sixty-five degrees below zero, the health of the party remained unimpaired. The men adapted themselves as much as possible to the habits of the natives, feeding largely upon blubber and fat meat, by which the vital heat was sustained. Plenty of game was found by the adventurers, who were able to secure with their repeating rifles enough reindeer at one time to last them for several days. The difficulty of approaching these animals was very great, for in the still cold air the step of a man upon the snow could be heard two miles away, and the grating of sledge runners resounded like the clothing of tempered steel. It was not an easy matter to keep guns in working order in this climate, for at sixty and seventy degrees below zero, strong oak and hickory would break like icicles, and all lubricants harden and interfere with the working of the locks. When the guns were brought into the warm atmosphere of the huts to be cleaned, they would at once become coated with moisture, and every part had to be carefully dried and wiped, lest the hunter, on stepping into the cold air again, would find a useless block of ice in his hands. A bottle of whisky which was in the stores was congealed to the consistency of thick syrup by the intense cold, and the cup from which one of the travelers essayed to drink, actually froze to his lips. The low temperature of this latitude permitted some of the Esquimaux to practice a terrible revenge upon some wolves which had attacked them. They set upright in the ice several keen knife-blades, and covered them with blood. These the wolves licked, slicing their tongues, but being prevented by the cold from feeling the wounds at the time, and their own warm blood tempted them to continue until their tongues were so scarified that death was inevitable.

Out-Door Air and Exercise.

The surest of all natural prophylactics is out-door exercise in the open air. Air is a part of our daily food, and by far the most important part. A man can live on seven pounds a week, and survive the warmest summer day with seven draughts of fresh air, but his supply of gaseous nourishment has to be renewed at least fourteen thousand times in the twenty-four hours. Every breath we draw is a draught of fresh oxygen, every emission of breath is an evacuation of gaseous excrements. The purity of our blood depends chiefly on the purity of the air we breathe, for in the laboratory of the lungs the atmospheric air is brought into contact at each respiration with the loads of the venous and arterial systems, which absorb it and circulate it through the whole body; in other words, if a man breathes the vitiated atmosphere of a factory all day and of a close bedroom all night, his life blood is tainted 14,000 times in the course of the twenty four with foul vapors, dust, and noxious exhalations. We need not wonder, then, that ill-ventilated dwellings aggravate the evils of so many diseases, nor that pure air should be almost a panacea.

Out-door life is both a remedy and a preventive of all known disorders of the respiratory organs; consumption, in all but the last stage of the *deliquium*, can be conquered by transferring the battle-ground from the sick-room to the wilderness of the next mountain range.

Asthma, catarrh and tubercular phthisis are unknown among the nomads of the intertropical deserts, as well as among the homeless hunters of our Northwestern Territories. Hunters and herders, who breathe the pure air of the South American pampas, subsist for years on a diet that would endanger the life of a city dweller in a single month. It has been repeatedly observed that individuals who attained to an extreme old age were generally poor peasants whose vocations required daily labor in the open air, though their habits differ in almost every other respect; also that the average duration of life in various countries of the Old World depends not so much on climatic peculiarities or their respective degree of culture as on the chief occupation of the inhabitants; the starved Hindoo outlives the well-fed Parsee merchant, the unkempt Bulgarian enjoys an average longevity of forty-two years to the West Austrian citizen's thirty-five.—*Dr. Felix L. Oswald.*

Travelers in Egypt are surprised at the large amount of ophthalmia and blindness prevalent among the inhabitants. Want of cleanliness is the cause. An Egyptian mother, under the influence of a widely prevalent superstition, does not wash her child's eyes until eight days after birth. By that time the organ is frequently ruined. The teachers in the American and British mission schools of Cairo say that Egyptian mothers become invariably angry when urged to wash the eyes of their newly-born infants, and can rarely be persuaded to comply with a request of the kind.

A remarkable discovery has been made by Mr. Alexander Adams. It is the existence of electric tides in telegraph circuits. By long-continued and careful observations he has determined distinct variations of strength in those earth currents, which are invariably present on all telegraphic wires, following the different diurnal positions of the moon with respect to the earth.

Our Foreign Population.

According to the census of 1880, there were at that time 6,677,369 persons of foreign birth in the United States. The number given by the census of 1870 was 5,567,229. We gained about eleven hundred thousand foreigners during the decade.

The place of birth of the population was given for the first time in the census of 1850. Let us, therefore, follow the progress of foreign immigration and our increase due to it since that time.

The last thirty years, indeed, have been the great years for immigration. During the whole period from 1790 to 1850 we received from abroad only about as many people as came over in the decade between 1850 and 1860. The immigration for the sixty years was in round numbers 2,700,000, and of the ten years it was 2,600,000. Between 1860 and 1870, the period of the civil war, there was a small falling off as compared with the decade just previous, and the total reached only about 2,500,000. Since 1879 however, immigration has been even more extensive than it was between 1850 and 1860, though from 1875 to 1879, when the country was struggling with long continued business depression, it was at a low ebb. The total for the decade was about 3,000,000.

We have, therefore, received since 1790 the great aggregate of over 10,750,000 foreign immigrants, and more than eight millions of them have landed on our shores since 1850, in the last thirty years. It is accordingly easy to account for the 7,667,360 foreign born inhabitants found in the country by the census of 1880.

When we remember that these eight millions of foreigners who have come to us since 1850 are more prolific than the old native population, and that emigration is not usually undertaken except during the most active years of maturity, we must attribute to them a large part of our natural increase in population. Of our fifty millions of inhabitants they and their descendants make up a fraction which we cannot yet determine from the census, but it is unquestionably a great one—above one-fifth, probably. These immigrants of thirty years have modified our national characteristics, affected our religious thought and practice, and changed many of our social customs.

And they will go on increasing, both by births and by new and still greater accessions from abroad. 1880 showed a larger aggregate immigration than we had before witnessed. If the prosperity upon which we have entered continues, we shall probably receive between 1880 and 1890 from four to five million settlers from abroad, and then at least one-third of the population of the United States will be composed of the foreign born and the descendants of the immigrants who landed here during the forty years from 1850 to 1890.—*N. Y. Sun.*

"Pure Mocha."

A DELUDED PUBLIC—THE KIND OF COFFEE WE DO NOT GET.

If the official returns of the coffee trade are to be trusted—and presumably they are not greatly in error—the coffee consuming public of this country has been for a long time past very much deluded. There are a multitude of people in this part of the world who are laboring under the belief that the beverage which they drink at breakfast, and, possibly after dinner, is Mocha coffee. Their grocer tells them that the article he sells is "pure Mocha," and they have no means of knowing that he is deceiving them, if, indeed, he has not been deceived himself. Some, with a peculiar fastidiousness, insist upon having a mixture, and want one-half or one-third of Mocha and the remainder of Java coffee—a request which the grocer seemingly complies with: that is, he takes the coffee from two separate compartments. Now, the last completed returns of the coffee production of the world are made up to the year 187[illegible]. In that year the estimated growth was [illegible]082,112,500 pounds of which Brazil produced 407,127,300 pounds, or nearly one-half. Next came the Dutch East Indian possessions, where the crop amounted to 20[illegible],[illegible]200 pounds; while Ceylon, South Africa and the West Indies furnished nearly [illegible] of the rest. Arabia, it is true, appears on the list, but its total growth, the Mocha district and the rest of the country combined, was only about 4,500,000 pounds—that is, not quite [illegible] of 1 per cent. of the growth of the world.

When it is considered that coffee is extensively used in Arabia, that Mocha comes within the possessions of Turkey, a country peopled with coffee-drinkers, and that we have no direct communication with Arabia, one may well hesitate [illegible] the current Mocha fiction [illegible]. It is highly probable that [illegible] of this article are brought [illegible] in the course of a year [illegible] would not furnish a day [illegible] inhabitants of this city [illegible] know the flavor of Mocha [illegible] can not be deceived, there [illegible] probably not one in a thousand [illegible] tasted it.—*N. Y. Times.*

Exterminating Vermin.

A correspondent of the American Agriculturist says, regarding the best means of exterminating vermin on poultry and hogs: Kerosene and lard are as essential in the poultry house as soap and water in the nursery, and I would as soon think of going without the latter as the former. I never see the sign of a louse unless we are careless and neglect the remedy, or rather the preventive. I do not wait until the chicks are ten or twelve days old, for by that time the mischief would be done; but I begin the fall before, and all through the winter, once in two or three weeks, rub the roosting poles with a mixture of lard and kerosene, half and half, and put it on the corners of the nest boxes. When I set a hen I use new, soft, clean hay, and on each corner of the box pour clear kerosene; it must not touch the eggs. If very late in the season, it will be best to repeat this a few days before hatching. I take the chicks out as fast as they are dry, and keep by the kitchen stove in a basket under a woolen blanket one or two days. Then each chick's head is rubbed with the anti-louse mixture, and any stray insect that may have lain in wait in some unguarded spot will never obtain a meal from that chick. Care must be taken not to put on too much, or it will run into the eyes.

EYE AND THE PHYSICIAN.—I had ridden to Edinburg, there to consult a doctor, having at last reduced my complexities to a single question: Is this disease curable by medicine, or is it chronic, incurable except by regimen, if even so? This question I earnestly put; got the response, "It is all tobacco, sir; give up tobacco." Gave it instantly and strictly up. Found, after long months, that I might as well have ridden sixty miles in the opposite direction, and poured my sorrows into the long haired ear of the first jackass I came upon as into this selected medical man's, whose name I will not mention.—*Carlyle's Reminiscences.*

"TEABERRY" is very fine.
Makes your teeth as white as mine;
Try "Teaberry" and you will see
If it's not what 'tis said to be.

CONFIDENCE.

ZOPESA is a certain preventative of malarial troubles, as it keeps the liver active. It makes Billious fever impossible. On the same grounds it makes indigestion impossible and the blood pure.

It is want of judgment to allow prejudice to prevent one from trying this remedy. The writer has seen many such, who, being persuaded, were surprised and gratified at the results. Try 10-cent sample.

Wholesale Agents, Detroit, Mich.

SCROFULA.

A remedy that can destroy the germs of scrofula, and when once settled has the power to root it out, must be appreciated by those afflicted. The remarkable cures of young children and the more wonderful cures of those of middle age and late in life, as illustrated by our printed testimonials, prove HOOD'S SARSAPARILLA to be a reliable remedy, containing remedial agents which do positively cure scrofula and eradicate it from the blood.

WARNER, N. H., Jan. 21, 1879.

MESSRS. C. I. HOOD & Co., Lowell, Mass.: Gentlemen—For ten years previous to the early part of 1877 I had been a constant sufferer from scrofulous ulcers or sores, which had finally reduced me to a helpless condition, as described in my letter to you in September of that year. The continued excellent health which enables me to keep house for my aged father and to enjoy life, keeps alive my intense personal interest in HOOD'S SARSAPARILLA, and I cannot refrain from expressing my gratitude for the permanent cure this wonderful medicine effected in my case nearly two years ago, while living in Lowell, when all my physicians gave me up as being in an incurable condition. One thing before I close: I have recommended your Sarsaparilla to hundreds, and I think more than a thousand cases, and my faith in its invincibility in curing scrofula has become absolute by the wonderful cures it has effected aside from my own. I trust you will not be slow in making the merits of HOOD'S SARSAPARILLA known everywhere, for it is a duty you owe to mankind. With best wishes I remain very truly yours,

SARAH C. WHITTIER.

HOOD'S SARSAPARILLA

Is a skilfully-prepared compound, concentrated extract, *by a process peculiarly our own*, of the best remedies of the vegetable kingdom known to medical science as alteratives, blood-purifiers, diuretics, and tonics.

Sold by all druggists. Price $1, or six for $5. C. I. HOOD & CO., Lowell, Mass.

THE AMERICAN PEERLESS DICTIONARY AND Information FOR Everybody.

A BOOK THAT SHOULD BE IN EVERY HOUSE.

OVER 50,000 WORDS. 542 PAGES.

After years of labor, and the expenditure of a large sum of money to writers and compilers, we are now ready to offer THE MOST USEFUL BOOK IN THE WORLD! The press, teachers, and professional people throughout the country pronounce it to be the BOOK OF BOOKS. It contains upwards of 50,000 WORDS, with their definition and pronunciation, according to Webster and other recognized authorities; a large number of additional words and definitions in general use, NOT TO BE FOUND IN ANY OTHER DICTIONARY; a large collection of Words, Phrases, Proverbs and Quotations from the Greek, Latin and Modern Languages; a list of Abbreviations used in ART, SCIENCE AND LITERATURE. Population of Towns and Cities in the United States, and other interesting statistics taken from the census reports of 1880. Insolvent, Assignment and Homestead Laws; American Wars; the Dominion of Canada; History of the United States from its discovery to the inauguration of Chester A. Arthur as President, and hundreds of other items of interest are to be found within the covers of this ENCYCLOPEDIA OF USEFUL KNOWLEDGE. It contains a mine of information for everybody. This book is handsomely bound in cloth, and embossed in GOLD, containing 542 PAGES PRETTILY ILLUSTRATED. We propose to send you one of these valuable books, by mail, all shipping charges prepaid, to any address, on receipt of only ONE DOLLAR, provided THIS ADVERTISEMENT ACCOMPANIES YOUR ORDER, and that you agree to exhibit it to your friends after receiving it. We further agree, that when you order you will send us the NAMES AND ADDRESSES OF FIVE PERSONS in your neighborhood, whom you think would be pleased to receive one of our mammoth Catalogues free, we will HANDSOMELY EMBOSS YOUR NAME IN GOLD ON THE COVER OF THE BOOK (as shown in engraving where John Smith's name is). No other reliable firm ever made so handsome an offer as the above. A more APPROPRIATE PRESENT could not be made to any friend, either lady or gentleman than this book. Order as soon as you can and avoid the great rush. IN ORDERING, STATE NAME YOU WISH ON COVER. What more appropriate present could you make a friend than this useful book, with their NAME ON THE COVER IN GOLD! AGENTS can make, in their own location, from $3 to $5 an evening, or $40 to $75 a week, if they devote their whole time to selling our goods. Send your name and address on a postal card for our confidential terms and 32-page Catalogue full of articles you want and can sell. DON'T ENGAGE ELSEWHERE UNTIL YOU HEAR FROM US. Address,

YOUR NAME EMBOSSED ON THE COVER IN GOLD FREE.

Our landlord, W. H. Passmore, drives a bran new rig now a-days, one of the best in town.

Mr. Charles Sabin of Chenago Co., N. Y., is visiting for a few days at the residence of C. C. Tefft.

Mrs. W. H. Waring arrived home from Peoria, Ill., last week, where she has been visiting for a few weeks.

AUCTION SALE.

T. C. Cummins will sell at auction on the 4-corners, Tecumseh, on Saturday, Sept. 22, 1883, at 2 o'clock, P. M., the following property: One platform wagon, 2 seats; 1 new single harness, 1 upsetting machine, 1 tire bender, 5 new bodies and gears, 3 two-seated buggies, 3 springs; open buggy, 2nd hand; buffalo robe, &c. Usual terms of sale. H. W. Stevens, Auctioneer.

Support Your Own County Fair.

This you can the most consistently do when its managers are doing all in their power to make the annual exhibition all it ought to be. This fair is the great popular home festival of the year—a holiday week for farmer, mechanic, merchant, all. It is not, to be sure, on as great a scale as the State exhibition; but it can be made nearly as interesting in its several departments: and then there are some decided advantages. It brings together the people of the several towns of a district under one government—and the acquaintances formed are pleasant and profitable; and the points gained as to methods in the various lines of industry are also of the greatest benefit. The knowledge acquired and the rivalry stimulated tells on the future of our own section; and when every county does its duty the State thrives and progresses. Come out then to the county fair, which begins on the 25th of September, with your cereals, your fruits, your stock, your manufactures, your inventions, works of art, etc. It is your fair—help make it a grand success.

FOUND FLOATING.

Toledo Telegram: About 8 o'clock last evening, the body of a man was found floating in the river, opposite Hepburn's boat house, where it had evidently been stirred up by the Waite. The matter was reported to Coroner Hohley, who had the body brought ashore and taken to Bennet & Schroeder's undertaking establishment, where an examination was made.

It was soon determined that the deceased was a stranger in the city, but there were no means of establishing his identity, or his place of residence, except a Lake Shore railroad ticket, from Tecumseh to Toledo and return. This was stamped at Tecumseh, September 8. The other articles on his person were cash $3.10, an empty pocketbook, a key-ring containing two keys, and a button hook. The description of the remains is as follows:

Rather a young man, perhaps 25 or 30 years old, well dressed, with sandy hair, sandy mustache and good teeth. Height 5 feet, 11 inches, and weight about 160 pounds. The dress consisted of black diagonal sack coat and vest, gray pantaloons, white shirt, low boots, red flannel undershirt, gray cotton socks, black nettle and red silk handkerchief.

There was no marks of violence upon the body, and no means of telling how long it had been in the water. Inquiry at the hotels showed that there had been several arrivals from Tecumseh within the last few days, but there was no further clue. The coroner will have to await further developments from a distance.

THE TECUMSEH HERALD.

TECUMSEH, MICH., SEPT. 20, 1883.

LOCAL AND PERSONAL.

S. W. Anderson is in New York buying goods.

The peach crop will be a total failure in this section.

A big crowd in town to-day to see Burr Robbins' circus.

The dry weather has ruined the Virginia pea nut crop.

Eaton's new furniture store at Addison is nearly completed.

Jack Frost cut off the home melon crop right behind the ear.

Yesterday was press day at the Art Loan exhibition in Detroit.

O. C. Kneale, of Fort Wayne, Ind., was in town a day or two the first of the week.

The Detroit Art Loan is now fairly launched and the attendance is daily increasing.

People have already commenced using the new two cent postage stamp at Deerfield.

R. P. Johnson, of Deerfield, has several thousand feet of black walnut logs on hand.

James Schermerhorn, of the Hudson Gazette, has returned from his Northern trip.

The Salvation Army has opened a new campaign at Adrian with torches and banners.

Several members of the Adrian bar attended the funeral of Peter R. Adams last Monday.

E. A. Tribou, of this village, was one of the extra jurymen summoned for the present term of court.

Rev. Geo. W. Hudson was attending conference last Sunday. He will be returned here another year.

We are happy to announce that Miss Eva Clement, our telephone operator is rapidly regaining her health.

A sneak thief entered the Morenci Observer office one Sunday night and pilfered several dollars worth of cards.

It is said that those corn fields in this vicinity which were well cultivated and free from weeds were not injured by the frost.

Miss Gettie Spalding, who has been spending the last few weeks in Chicago returned to her home in this village last Saturday.

Wm. E. Burton, of Deerfield, hung his vest on a nail in his new block.—He is now minus a vest and $28 which was stored in one of the pockets.

The State Fair is in session this week at Detroit. The opening days of the Fair have been a grand success. To-day and to-morrow will be the big days.

Capt. F. B. Wood is the way he writes his name now. Fred wears his honors gracefully, and we predict that he will make an excellent commanding officer.

L. F. Wheeler is now perfecting his arrangements to begin the fall campaign of his Illuminated Rambles. He will start out in a few days with his big stereopticon.

We acknowledge the receipt of a complimentary ticket to the Brooklyn fair which will be held next week, from Sept. 25th to 28th inclusive. We shall endeavor to use it.

The Morenci Observer now sets its local page "solid." The same number of colums will swallow up more copy it is true, but typographically the change does not strike our fancy.

Rev. C. E. Conley, Dea. J. W. Margeson, J. W. DePuy and Dr. B. F. Steinhoff are attending the great Christian Convention at Chicago this week. The convention is under the direction of Moody and Sankey.

L. C. Blood, wife and daughter, of Lansing, drove over last week, and returned home yesterday. He seems to prefer the "overland" route. The weather lately has been very propitious for horse and buggy traveling.

The Blissfield Advance is responsible for this sensible remark:

It is an error to suppose that only editors and reporters supply news worth reading. The skillful advertiser furnishes a good share of it, and if there are any readers who fail to look over the advertising columns of their paper, they miss a great deal of information that would prove valuable to them.

The Lenawee County Pioneer Society will hold its regular annual meeting in the village of Fairfield, on Wednesday, Oct. 3d, 1883. A paper will be read on the early history of that township. Persons who have resided in the state for twenty-five years are eligible to membership and are cordially invited to attend. Officers for the coming year will be chosen.

F. A. DEWEY, President.

The following program will be carried out by Macon Grange, Sept. 28, at 7:30 P. M. Open meeting.

Address—R. R. Hall.
Select Reading—Mrs. L. Osgood.
Song—Miss Josie Clarkson.
Select Reading—Mrs. E. Howell.
Quartette—Mrs. Joseph Osborn.
Recitation—W. Triplet.
Discussion on Tariff Question—M J. Martin, J. C. Mills, C. Mead, Isaac Mills, E. Howell, L. Osgood, D. Bailey and others.
Inst. Music—Miss Julia Easlick.

Bidwell's new block is a beauty, and no mistake.

Oh, yes, I do sell wall paper for cost. Come and see. James W. Patterson.

Heck Bros. got a letter yesterday from Anvers, France. They are trying to find somebody in town who can read it.

Miss Lotta Babcock has removed her dressmaking rooms to the rooms over H. Nyland's shoe store, where she is prepared to do all kinds of dressmaking, cutting and fitting.

Mrs. Loyal Beardsley, recently of Lafayette, Ind., has been visiting her Tecumseh friends during the past week. Mrs. Beardsley, whose maiden name was Louise Walker, was once a teacher in our schools and has a large circle of acquaintances here.

Berry Smith, of Coldwater, has been down to Mt. Morris, N. Y., and made a fuss about the irregular conduct of his wife, whom he found living with one E. Kindmark, a photographer, who formerly resided at Coldwater. Proceedings for divorce have been begun at Coldwater.

Mrs. Ure of the New York Millinery Store has returned from New York with a large stock of fall millinery, and will open the Tecumseh store October 1. Until then she will be pleased to have her Tecumseh friends call and look over the new stock in the Adrian store on Maumee St. near Opera House.

New York Star: "It is," she chattered, "just too awful, the kind of society a lady has to put up with in this place. My husband tells me there ain't nobody here what can trace their generology back no more than ten years. You see Mrs. —— sitting over there and putting on all them frills? Well, you wouldn't think it, to look at all her fine feathers, but her father is a horse-shoer," and then she ambled off to another part of the piazza, where half an hour later she was heard declaring that the professor's wife was married to "nothing but a school teacher." It subsequently transpired that this amiable critic and purveyor of news was herself the wife of a butcher. And this is the delightful way in which the Saratoga pot calls the kettle black when the kettle is not looking.

SUMMIT CITY.

This is a place in northern Michigan on the Traverse City branch of the Grand Rapids & Indiana R. R., six miles from Walton Junction. It is a very pleasant place. The timber is hard wood, mostly maple, beech, elm, basswood with some ash and wild cherry. The land is rolling and the soil is good with excellent water.—There is land within three miles of the depot at $9 per acre, on 3 years' time. There has been located within the last 30 days a wooden bowl factory, large saw mill, planing mill and broom handle factory. The mill will employ about 30 men and make 10,000 broom handles and 7,000 feet matched flooring per day. This firm is known as the Michigan Flooring and Handle Manufacturing Company. They have bought a site in the village of 96 acres for building purposes, such as yards for mill, logs, bolts and piling, besides they have some very fine locations for stores and residences. They are giving away lots to actual settlers that wish to locate and build at Suminit City. Some of the members of this company live in our own village. H. L. Stewart is president, A. W. Slayton, secretary, J. Gilchrist, director, and M. Bowerman, Jr., of Holloway, superintendent. While Dr. Stewart was at Summit City last week he had six applications for building lots. The place is booming and no mistake.

THE LADIES' LIBRARY ASSOCIATION.

The first installment of books has been purchased and labeled, the room has been carpeted, painted and papered, and the officers announce that they will hold their formal opening on Saturday next. Their location is a good one—the room at the head of the stairs in Union block, between Dr. House's office and Heesen's hall. There is an ante room for odds and ends. The East side of the principal room is taken up with shelving, and there are 650 volumes now on the shelves. The method adopted for drawing the books is this: Tickets will be sold by the librarian at fifty cents per quarter, or $1.50 per year, which will entitle the holder to draw books subject to the rules and regulations adopted by the association.—These rules are now in force:

1. This book may be kept 2 weeks.
2. Any one retaining a book more than two weeks shall pay a fine of 10 cents per week for each additional week.
3. Any person injuring or defacing this book shall be subject to a fine of not less than 50 cents, or not exceeding the value of the book.
4. Library will be open every Saturday from 3 to 6 P.M., from April until Oct., and from 2 to 5 P. M. from Oct. to April.
5. Any person not a member of the Association desiring a book, can learn the terms by applying to the librarian.

Visitors will not be allowed to handle the books. A full catalogue will be published and selections can be made by catalogue. The rooms will be open next Saturday afternoon.—All interested are invited to call and will be courteously received.

COUNTY CONDENSATIONS.

The late frosts played hob with the squash crop.

Blissfield fishermen are catching eels in the Raisin.

The Royal Templars of Clinton are in a flourishing condition.

Gilmore & Co's bank at Blissfield has been undergoing repairs.

The School Director of Clinton receives an annual salary of $25.

Wm. P. Silvers had a valuable horse killed by the cars last week.

Adrian has 2,507 school children, and estimates its population at about 13,000.

Delos Cutting, of Clinton, will exhibit a lot of honey and bee keepers supplies at the State Fair.

Mail route 24,106, Tecumseh to Cambridge will be changed from three to four trips a week after Oct. 1st.

1,044 telephone messages were received and transmitted by telephone in Adrian during the month of August.

Tom Applegate, of the Adrian Times, is giving "Yellowstone Park" lectures since his return from his recent trip.

District Manager Mason has raised the required bonus at Morenci and that town will soon have a telephone connection.

C. F. Field, of the Clinton News, is enjoying a few days' respite from work at Petoskev and the other resorts of Northern Michigan.

A little son of Wash Allen's, of Franklin, broke an arm last week. Dr. A. K. Jenkins, of Franklin, set the limb and the boy is getting on nicely.

The prohibitionists of Adrian have organized and elected the following officers: J. C. Rowley, president, L. R. Damon, Secretary, A. C. Forte, treasurer.

Jack Frost was rather eccentric in his movements last week. Some corn fields were utterly ruined while others in the same vicinity were left untouched.

Thos. H. Mosher, the veteran merchant and miller, of Springville, is putting new rollers into his mill. He proposes to make the patent flour the same as the other millers.

Gareis, the insane German, who killed Conly, the Blissfield baggagemaster, and was convicted of wilful murder, has to be kept handcuffed and in close confinement at Jackson.

The Michigan & Ohio discharged a large number of men and teams near Addison last week, the work of grading having got along to where it can be completed, ready for the ties and iron in a few days.

Lodge No. 206, of the order of Good Templars, situated at Blissfield has resolved to boycott the state fair and all other exhibitions where liquors are to be sold. The lodge furthermore requests all other temperance organizations to do the same.

Arthur H. Snow, formerly of Clinton, son of the late A. H. Snow, has been making an eastern trip and was in town last Monday. He went from here to Conneaut, Ohio, on business, whence he will return home. He is now practicing law at Winona, Minn.

Adrian Press: J. C. Winnie brought us in a cluster of hops from his father's yard just west of the city, and it was a splendid sample. Mr. Winnie expects about 5,000 pounds this season, and we believe has the only hop yard in the county. The first hop yard in Lenawee we helped set out in the town of Franklin more than thirty years ago, on the old farm—Mr. H. Bowen, Sr., now of this city, being the first person to introduce the "wegetable."

Adrian Times: The Chicago & West Michigan railroad company have about completed negotiations with Brown, Howard & Co., the owners, for the purchase of the Michigan & Ohio railroad. The Chicago & West Michigan is controlled by Boston capitalists, chief among whom are the Adams family, Charles Francis Adams and his son John Quincy Adams. The same persons are the principal owners of the Detroit, Lansing & Northern railroad. The Michigan & Ohio is being built by the same parties that constructed the "Nickel Plate."—Their business is to build railroads to sell.

Clinton News: Quite a good deal of interest was manifested on the streets Tuesday in the law suit which was held here that day at the Town Hall. A young man named Milton Poe brought suit against Mr. Willard Smith, of Cambridge. Mr. Smith is a well-to-do farmer and Poe worked for him. There being some difficulty in regard to the payment of Poe's wages the latter brought suit against his employer for wages due him. Constable Burroughs summoned a jury at the request of the defendant and the suit came off Tuesday afternoon before Justice Keyes. E. B. Norris, of Manchester, apptared for the plaintiff, and J. Reid Crowell, of Brooklyn, for the defendant. About 9 o'clock in the evening the jury brought in a judgment of $72 and costs for plaintiff. We understand that Mr. Smith will appeal the case to the circuit court.

ANOTHER PIONEER GONE.

On Saturday morning last Peter R. Adams, one of the oldest residents of this village, departed this life in the 78th year of his age. The deceased was born in the town of Tioga, in the county of Tioga, and State of Pennsylvania, on the 10th day of February, 1805, he commenced the study of law, in the office of John Baldwin, Esq., of Dansville, Livingston county, N. Y. He completed his legal studies in Wellsborough, in his native county, in the office of Ellis Lewis, Esq., and was admitted to practice in the courts of that State, in the year 1826. In May, 1830, he and his wife came to Detroit, Michigan. They remained there and at Ann Arbor a few weeks, and, on the 26th day of July, 1830, arrived at Tecumseh, which has ever since been his home. In Tecumseh, then the county seat, he began the practice of law, in Michigan, and continued it with much patronage, and reasonable financial success, until the fall of 1842. His health, from too close and unremitting attention to the labor of his profession, had become some impaired, and he deemed it necessary to engage in some other employment.—During these twelve years, besides his very arduous professional labors, he had discharged the duties of supervisor, prosecuting attorney, judge advocate, etc., and declined many important offices tendered him. He sold to P. Bills, Esq., [illegible] read in his office, his enti[illegible] onal business, and retired [illegible] one mile east of the village [illegible]mseh. On this farm he reside[illegible] until 1861, devoting his care and labor principally to the management of the farm. In 1850 he was elected a member of the Constitutional Constitution, and served in performing the duties of that office, at Lansing, during the summer of 1850. In 1865 the National Bank of Tecumseh was organized, and commenced business. He was elected president and one of the directors, which office he held until 1874, when the bank went into voluntary liquidation, and closed business. In 1866 he commenced the publication of the Raisin Valley Record, at Tecumseh.—It was a weekly newspaper, neutral but independent in politics, and an advocate of temperance and reform. He owned, conducted, and edited it for several years, and it received a liberal public patronage. In 1875 the People's Bank of P. R. Adams & Co., organized, and commenced business. He was president of the bank until it ceased, December 1st 1878. He was the father of three children, a son, Peter W., who resides in Delaware, Mrs. John D. Shull, of Lansing, and Mrs. W. C. Fitzsimmons, who died in 1878. His wife still lives to mourn his loss. His health has been somewhat infirm for the past few months but no more so than that of most men of his years. About four weeks ago he was taken ill and his symptoms aroused forebodings of end among his friends. His son, Waller Adams, was summoned from Delaware, and the family prepared for the worst. His robust constitution clung to life for many days after hope had departed, but at last the dread angel came.

The funeral was observed at the family residence last Monday afternoon, and a large concourse of citizens paid their respects to the deceased. The services and appointments were of the plainest character, symbolical of the strong man about to be carried to his tomb. His pastor, Rev. C. E. Conley, pronounced a brief and affecting service, and the sacred music was rendered by the Baptist choir. Six of our oldest residents and warm friends of the dead, acted as pall bearers: John J. Adam, Wm. Hayden, B. J. Bidwell, John W. Benedict, John Margeson and W. V. Wimple. A lengthy procession of relatives, old residents, and friends followed the remains to the grave, and business houses of the village were closed during the funeral obsequies.

Mr. Adams was a man of strong convictions, of strict integrity in financial matters, of economical habits, of tireless industry. By the exercise of these qualities he accumulated a handsome fortune and had long held a position among Tecumseh's most honored and respected citizens. He had fought the good fight. He has run his race. As the bending head of ripened grain falls beneath the husbandman's sickle, so with the weight of years and honors upon him he has been gathered to his fathers. The first night which he passed in Tecumseh, in 1830, he slept in the old "Bank's House." The same roof sheltered his body during its final illness and witnessed his eyelids close in death. The sentinel which welcomed him to this village fifty-three years ago, pronounced its dumb blessing upon the procession which conveyed his remains to the tomb.

At a meeting of the Lenawee County Bar the following resolutions were passed:

Our now deceased Brother, Hon. Peter R. Adams, came to this then Territory in 1830, with his family. His route from Tioga County, Pennsylvania, to this Territory was thro' an almost unbroken wilderness, past little villages just starting like spots of silver on the dark green, and along the borders of Lake Erie, whose waters were then seldom whitened by a sail, and whose single small steamer was scarcely seen by the traveler.

Our county when he came here had scarcely 1000 inhabitants, each with strong arm and brave heart was looking to a home in the future, as a reward of great toil and privations.

During his lifetime of 53 years spent here he has identified himself with the interests of our people and State.

He has faithfully performed the duties of the various offices to which he has been elected by the people as Supervisor, and various town and county offices. As a member of the State Legislature, and of the Constitutional Convention of 1850, he left the impress of his intellect upon the institutions of the County and State, and at the time of his death he was the oldest member as well as the oldest resident of the bar of Lenawee County.

We the members of the bar of this County have assembled to do honor to his memory.

He was faithful, honest and true in every public and private employment, of great intellect and careful culture, he was learned in the love of the great profession, which his industry and learning and fidelity ornamented and improved.

On moral and religious subjects he was ever in the lead as promoter and leader. An early advocate of the temperance cause, by his pen, his money and personal influence, and as the Editor and publisher of a paper devoted to the cause, he ever took an advanced position in the supression of intemperance. As a devoted christian his efforts in the cause of religion were determined and zealous. His death will be long felt and deplored in the community where he lived, and in the county and State, and by his aged wife, and his family and relatives surviving him.

A devoted husband, an affectionate father, a kind and zealous christian has left us.

Resolved, That we present our sympathies to his bereaved widow and family in their affliction, knowing well "that their and our loss has been his great gain." That a copy of this memorial be sent to his mourning family, signed by the Judge and Clerk of the Court, attested by the Seal of the Court. That they be presented to the Circuit Court of this county at its present session, with a request that they be recorded on the journal of the Court. That they be published in the newspapers of the County. That as a mark of respect to his memory the Lawyers of the County will attend his funeral in a body.

At a meeting of the stockholders of the Toledo & Milwaukee and Michigan & Ohio railroads held at Marshall last week, it was decided to merge the two companies in one to be known as the Michigan & Ohio railroad company. It is said that the consolidated lines will soon be in some way amalgamated with the Chicago & West Michigan road—a road that is developing a deal of energy of late.

Our friend Joe Smith has moved into town and has taken a position as salesman with the Tecumseh Lumber Company. We are glad to have Joe as a Tecumseh man, and the Lumber Co., has secured a valuable assistant.

Charles W. Fisk, champion bareback rider of the world joins Burr Robbins' circus next Monday. Mr. Robbins is only to sorry that he is not able to present him to his Tecumseh audience.

E. M. Gray has purchased two of the finest rifles made in this country, and has opened a shooting gallery in Bidwell's warehouse just south of Bidwell's block.

The ladies of Hudson give paper festivals.

—The busiest place in town is the new renovating establishment of David Jones.

—No guess work. If you want as good flour as is made in the state, get Heck Bros. complete all roll flour.

—If you want a Drill, see the Hoosier Champion and Rooler Grain Drill at Snedicor's.

—Natural looking and serviceable artificial teeth can be procured at Dr. B. F. Snyder's Dental Rooms.

—The Wilder Plow Sulky and Elwood Sulky Plow, for sale by Snedicor.

—You can have your decayed and aching teeth extracted at Dr. B. F. Snyder's dental rooms, without pain by taking vitalized air.

—Don't forget that Snedicor sells the best plows in Tecumseh. Call and see for yourself and try one.

—Spring Tooth Harrows at Snedicor's.

—Call at the yard and mill of the Tecumseh Lumber Co., and examine their stock.

—Leave your orders for Sash Doors, blinds, mouldings, window frames, tanks, troughs, etc., with the Tecumseh Lumber Co. They will receive prompt attention.

—Don't you forget that Snedicor has the Watertown Platform Spring Wagon, the cheapest and the best in town.

TECUMSEH, Mich., March 25, '83.

I have been troubled with a hard cough for many years, and have found nothing to help me until I tried Dr. Bigelow's positive cure, which has completely cured me.

WELCOME SHERMAN.

The medicine is manufactured by Griggs & Co., Ottawa, Ill., and sold by Baker & Hall, Tecumseh.

—One of the best blood purifiers ever made is "King of the Blood."—Sold by Druggists generally. Manufactured by D. Ransom Son & Co., Buffalo, N. Y.

AYER'S Ague Cure

IS WARRANTED to cure all forms of Fever and Ague, Intermittent Fever, Chill Fever, Remittent Fever, Fever and Ague, Bilious Fever, and Liver Complaint, caused by the malarious poison of marshes, even in the worst form. In some of the worst localities it has proved a remarkable specific. In consequence of its wonderful power to cure the most obstinate and dangerous cases of Intermittent Disease, we offer to the public a medicine which we believe to be the most perfect and powerful febrifuge that the skill of the chemist has been able to produce. Although we do not claim for it the power to cure all diseases incident to the human family, we do claim that there is no case of Intermittent Fever or Ague which it does not cure, if the patient has not been so reduced by other diseases that the vital forces are too feeble to rally under the influence of a febrifuge. Prepared from a long-tried formula, it may be confidently relied upon as a safe and sure remedy. Its extraordinary curative powers have been tested in the most severe and obstinate cases, and in every case the result has been such as to confirm the belief that it is the most reliable remedy for the disease that has been discovered. Its sugar coating renders it pleasant to the most delicate stomach, and it is the cheapest medicine, dose for dose, that can be purchased, as it is the most concentrated. Its effects are permanent, and it leaves the system in a healthy condition. Instead of the prostration and debility which follow the use of most medicines, it restores the patient to vigorous health. Its cures are permanent, and the patient does not relapse into worse health, as is too often the case when other febrifuges are used. Instead of shaking the patient for hours before the chill can be expected, a few doses of this medicine will prevent the chill for weeks, if not permanently. Its action upon the system is such that it may be taken by children or adults with perfect safety, when any febrifuge can be taken. Its action upon the liver is prompt and decisive, and it will cure Bilious Fever and Bilious Remittent Fever, when other febrifuges do not even relieve. Its action upon the bowels is gentle, and it does not cause constipation, as do most febrifuges. Its action upon the secretions is such that it is a most perfect and efficient aperient, and it may be taken by persons of the most delicate organization without fear of any disagreeable effect. Its action upon the skin is such that it cures Chronic Diarrhœa, even when other febrifuges do not even relieve. Its action upon the kidneys is such that it cures Chronic Diseases of the Kidneys, when other febrifuges do not even relieve. Its action upon the system is such that it cures Neuralgia, Rheumatism, Gout, Blindness, Neuralgic Headache, Periodic Headache, Dyspepsia, Sick Headache, Costiveness, Piles, Dropsy, Nervous Debility, Female Complaints, Loss of Appetite, Want of Energy, Want of Sleep, Want of Strength, Want of Vigor, Want of Ambition, Want of Flesh, Want of Color, Want of Life, and Want of Something to Make Them Feel Well. In The Pilot House.

"Yes, sir; this kind of work obliges a man to keep sober as a judge. Of all men in the world, steamboat pilots and railroad engineers should let liquor alone. For on their clearness of sight and coolness of head depends the safety of life and property."

Keeping his hand on the wheel as he said this, Mr. A. Brockman, of No. 293 Silver street, Chicago, added: "Of course, some of 'em drink; but the sober ones have the best positions and the best pay. Yes, the work and exposure sometimes tells on us; but for my part, I find Parker's Tonic to be all the invigorant I need. I've got a bottle aboard here now; never goes a trip without it. When I haven't any appetite, or am in any way out of sorts, it sets me up in no time. If drinking men would use the Tonic, it would help 'em to break off. (No, that isn't a lighthouse; it's a star low down near the water.) As I was saying, the Tonic is new life bottled up. You see that flag-staff? Well, with a bottle of Parker's Tonic in the locker I can keep my mast as far from me as that all the time. My wife has used it off and on for years for summer complaint and colic, and as a nutritious wine when she's tired out from overwork. She says the Tonic is a delicacy. Good-bye! Don't break your neck going down."

This preparation which has been known as Parker's Ginger Tonic, will hereafter be advertised and sold simply under the name of Parker's Tonic. As unprincipled dealers are constantly deceiving their customers by substituting inferior articles under the name of ginger, and as ginger is really an unimportant ingredient, we drop the misleading word.

There is no change however in the preparation itself, and all bottles remaining in the hands of dealers, wrapped under the name of Parker's Ginger Tonic contain the genuine medicine. If the fac-simile signature of Hostetter & Co. is at the bottom of the outside wrapper.

SAMARITAN NEVER FAILS. NERVINE THE GREAT NERVE CONQUEROR

The only known specific for Epileptic Fits, St. Vitus's Dance, Also for Spasms and Falling Sickness. A powerful nervine specific for Headache and Nervous Debility. Expelled by using Celebrated Elixir of Fever. Neutralizes germs of disease and sickness. Cures ugly blotches and stubborn blood sores. Cleanses blood, quickens sluggish circulation. How Tin Plates are Made.

The London *Iron Exchange* has an interesting history of the manufacture of tin plates from about the year 1600 up to the present time, from which we extract a description of the method now employed in the manufacture of this useful article.

The British have recently visited the Dyferyn Iron and Tin Plate Works at Swansea, situated on the river Tawe, with a view of informing themselves regarding the practical workings of this important industry. The same association met at Swansea 32 years ago, since which time great advances have been made in the processes of manufacture. From the 40 mills now running within a radius of three miles in the Swansea valley, about 20,000 boxes of finished tin plate are turned out weekly, or 1,000,000 boxes annually, which is estimated to be equal to about one-third of the entire export.

But how tin plates are made is information likely to interest most readers:

In the first place, says the writer, we have what is termed bar iron, several feet long, and about 7 inches wide, and from ¼ to ⅜ of an inch in thickness, rolled according to the plates required at so many pounds per foot. It is cut in what may be termed a jack-in-the-box or steam shear, say about 19 pounds to a piece which will eventually be rolled into 16 sheets of 20 inches long by 14 inches wide, 112 of such sheets forming a box, and weighing when tinned nearly 1 cwt.

This piece of iron is first placed in a reverberatory furnace, heated to redness, put through the chilled rolls, and rolled in what is termed thick, five times; reheated and rolled in singles twice; doubled, reheated and rolled three times; doubled, reheated and rolled twice; doubled, reheated and rolled in eighths, twice, until they are stretched out to the required thickness. The length of the bar exceeds by about one inch the width of the sheet to be made, so as to allow for the shearing process, and the bar is therefore rolled with its axis parallel to that of the rolls. Great attention is necessary in the construction and management of the mill furnaces, so that the heating of the bar and sheets for rolling may be effected with the utmost regularity, and without the formation of scale on the surface of the bars or sheets; for when scaling takes place from the draught in the furnaces being too keen or the heat raised too high, the quality of the iron is injured; the scale, if subsequently rolled into the iron, leaves a rough surface on the plates in the after process of separating and pickling. The plates are then sheared, and the rough edges taken off. The iron of 19 pounds to the sheet cuts up into 16 sheets which, being cut in half, leaves 8 sheets in a piece closely wedged. Girls with small iron hatchets open them. They are then termed black-plate. From one ton of bar iron about 16 cwt. of black-plate is made; the loss is termed shearings, and is worked up again in the forge timeries. The plates are next sent to be pickled, i. e., immersed in heated dilute sulphuric acid, known as oil of vitriol.

This process is done by aid of a patent, known as Hutchings' patent pickling machine. The plates are placed in a brass cradle or receptacle, lifted by hydraulic, then dropped down into a round wooden or lead tank containing the acid; the cradle is then made to revolve by means of steam power, to enable the liquid to rush between the sheets, which revolution is retained. They are lifted again by the hydraulic, and dropped into a tub, a little apart from the last, containing water only, the cradle revolving as in last tub, so that the water may rush between the sheets to cleanse or wash away all traces of the acid; when taken up again the plates are clean and bright as silver. They are next subjected to a bright red heat, which lasts from 12 to 24 hours, in closed iron annealing pots in a reverbatory furnace; they are well covered on the top to prevent the plates from being burnt; the heat is kept as high as it can be without softening them to such a degree as to cause them to stick fast together and prevent their separation when cold.

They next pass singly through cold rolls, three, four, or more times, as may be deemed requisite. These rolls are highly polished, and must be set in accurate order to give the plates a perfectly flat set and well-polished surface. Again they are annealed or softened at a lower temperature than the first, as their surfaces would be damaged by being in any degree stuck together. Pickled again as before excepting that the liquid is considerably weaker than previously, placed in cast iron troughs containing clean water renewed by a stream constantly flowing through, they are then taken in hand singly, and scoured if necessary with sand and hempen pads before being delivered to the tinman.

Now comes the last process. The sheets are iron only so far. They next reach the tin house, and are placed in a trough containing clean water, ready for the tinman, as he is termed, who then picks them up and puts them singly in a grease pan containing palm oil, to soak, and after being there for a short time the tinman places the sheets in a large iron pot containing molten tin, with a covering of palm oil. Here it unites with the tin, to which it has a strong affinity. When he has performed his part the plates are handed over to the next man, called a washman, who has a pot containing pure molten tin; after they have soaked in his pot a little, he raises them with a tongs on to the hob as he requires them, brushes the surface on both sides of each sheet, and after dipping them into another pot containing molten tin again, they are sent through rolls which work in a large pot containing palm oil and the speed at which the rolls move regulates the quantity of tin to be put on each sheet. They are afterward raised from the rolls (under which they have been passing) by a youth, called a raiser, handed to two young women, who rub them in bins or boxes containing bran, one after the other, which takes off the grease; another girl, called a duster, gives them a further polish with a skin duster, and takes them to the assorting room, where every plate passes inspection, and, if not up to the mark, is sent back for rectification. After passing through that ordeal they are counted and weighed by young women, made up into boxes according to the different sorts, handed to boxers and packers, who pack them in elm boxes, marked by branding irons as per order, and finally placed in the railway track to be forwarded to their various destinations. It may be a surprise to some to know that a tin plate passes through about thirty hands from the bar to the railway track, but is handled no less than 105 times. Such is a simple account of tin plate making.

Griggs' Glycerine Salve.

The best on earth can truly be said of Griggs' Glycerine Salve, which is a sure cure for cuts, bruises, scalds, burns, wounds and all other sores. Will positively cure piles, tetter and all skin eruptions. Satisfaction guaranteed or money refunded. Only 25 cents. For sale by Baker & Hall.

Beecher on Amusements.

All amusements ought to counteract a man's business. If his business is chiefly muscular, his amusements ought to be brain amusements. Men whose occupations are sucking dry their brains day by day should have amusements in just an opposite direction. For instance, how absurd it would be to advise a lawyer for recreation, after working hard all day in court, to play chess, and it would be equally as absurd to say a letter-carrier, who had been walking all day long, should take a walk after supper.

There are many men for whom there is no such amusement provided. Where can a clergyman go to amuse himself? Why, if I were to go out for amusements as many do, the reporters would go for me, and if I were to go to hear the "Pinafore," the fact would be known all over the country the next day.

Now, what provisions for amusements are made for lawyers and schoolmasters and merchants? Almost none. Our civilization makes but little provisions for the various wants of the classes, so far as wholesome amusement is concerned.

Walking is good for a man, provided he has anything to walk for. Next to that is riding, and I don't know but if we could fly this it would be better yet.

Horseback riding is a noble amusement. I think for a man to override a generous horse is brutal. I think for him to undertake him is stupid. And let me say that it is a great comfort to me when I open the Book of Revelations and read that there are horses in heaven. Well, if horses and dogs don't have any hereafter I don't know what will become of their owners.

Workingmen are entitled to amusements. They should be provided with concerts and reading rooms and amusements which would send them back to their daily work stronger in every respect. Any place with five thousand inhabitants that has not a reading room is not loyal to the true interests of the working people.

There are some amusements that are good for some men that would be bad for others. In every instance, even in his amusements, a man should cultivate the moral quality, for a man who should gain everything and lose his manhood, comes to be, in fact, nothing. It is the duty of every man to make his home the centre of amusement for his family.

When I was in Germany I went to a great garden. There I saw family after family—old and young—sitting under trees and listening to the music. They were drinking lager beer, which I think—yes, I think they could have left that out. But when I came home and saw fathers going to Washington and other places of amusement—leaving their families for a week at a time—I said I would rather have the German with his lager than the amusement-seeking American with his separation from his family.

I think that the churches and industrial clubs or guilds should see to it that the people are provided with the proper amusements.

Old Songs vs. New.

What has become of the excellent song writers of yore? Or, rather, since they are all "dead and turned to clay," as the poet expresses it, why has not the present generation furnished some equally as good? The songs originated now-a-days, as a general thing, are trash in comparison with those of ten, fifteen or twenty-five years ago. You doubt the assertion? Cite to me, if you please, a song written within the last ten years that will compare in pathos, purity and genuine good sentiment, with the one commencing:

"Be kind to thy father, for now he is old,
His locks intermingled with gray,
Has toiled years now feeble, once fearless and bold
Thy father is passing away."

Each verse, in honor respectively of father, mother, sister and brother, is replete with exalted sentiment, expressed in choice, but simple words, and I defy anybody who has ever enjoyed the blessings of kind parents, affectionate brothers or sisters, and the endearments of a pleasant home, to listen to the song unmoved, if given with expression and feeling. It is a fit companion for "Home, Sweet Home,"—even superior, in my opinion. Then there are "The Old Oaken Bucket," Wordsworth's gem, which deserves a better setting than the tune to which it is sung; "The Old Arm Chair" "The Queen of the May," "The Irish Emigrant's Lament," "Good News from Home," and a score of others, all affecting and elevating in tone and sentiment, and all of which have done as much good as so many oft-repeated sermons—perhaps more.

The War of the Rebellion called into existence some very good battle songs and others pertaining to camp life and experience, but since then there have been none written that have had, or will have, more than an ephemeral existence; and many of the so-called popular songs of the day are positively silly. Having a brief run at concert saloons and variety theatres, they gain their way for a short time to the parlors of the people, and then give way to some new thing equally absurd. Has the musical taste of the American public deteriorated within the last decade? It would seem so, and here is a good field for the song-missionary. Who will be the coming man—or woman—to stir the better part of our natures with new ballads worthy of being ranked alongside of those I have mentioned, in word and sentiment, and who the talented musician to give them a setting of notes, rests, etc., that will produce melody equal to "Come Where My Love Lies Dreaming," "The Mariner's Song," and others which were justly favorites "When you and I were young, Maggie"—in "Auld Lang Syne."—*H. E. Rounds.*

A Spoiled Sermon.

A Yarmouth (Me.) preacher while illustrating the need and efficacy of prayer, drew an illustration from his own experience. He was out on a lake in a boat, when by mischance he lost both oars. The wind was rising, night was coming on, and he was in imminent danger of being swamped and finding a watery grave. What could he do? Evidently nothing for himself, so he knelt down and prayed long and fervently for deliverance. He placed himself in the hands of the Lord, and so was saved. So he passed from one thing to another, and at last the sermon was finished. He raised his hands to pronounce the benediction. The audience, good with bowed heads waiting for the gracious words, when old Captain Sweetser, of North Yarmouth, a rugged old sea-dog, cried out: "Say, Mr. Preacher, I want you to tell me how you got ashore?" The audience was still no more, but broke into a roar, and it was fully five minutes before the minister could explain that a man saw him from the shore and put out in another boat and took him off. But the effect for good of one sermon was spoiled.

Not a particle of quinine nor any mineral substance is contained in Ayres' Ague Cure—but it does the business. Warranted.

SOFT BEDS.—Why should soft beds be considered unwholesome? Certainly they afford more comfort than hard ones. Hard beds should never be given to little children, and parents who suppose that such beds contribute to health by hardening and developing the constitutions are surely in error. Eminent physicians—both here and in England—concur in this opinion and state that hard beds have often proved injurious to the shape of infants. Birds and animals cover their offspring with the softest material they can obtain, and also make soft beds for them; why not do the same with our own young?

Another Life Saved.

J. C. Gray, of Dadeville, Ala., writes us: I have been using your Dr. Wm. Hall's Balsam for the Lungs, and I can say, of a truth, it is far superior to any other Lung preparation in the world. My mother was confined to her bed four weeks with a cough, and had every attention by as good physicians as there are in the country, and they all failed to effect a cure; but when I got a bottle of Wm. Hall's Balsam for the Lungs she began to mend right away. I can say in truth that it was the means of saving her life. I knew of five cases that Dr. Wm. Hall's Balsam has cured, and my mother is better now than she has been before for twenty years.

Henry's Carbolic Salve

Is the Best Salve for cuts, bruises, sores, ulcers, salt rheum, tetter, chapped hands, chilblains, corns and all kinds of skin eruptions, freckles and pimples. Get Henry's Carbolic Salve, as all others are counterfeits. Price 25cts.

GOOD NIGHT.—How very commonplace is this expression, and yet what volumes it may speak for all future time! We never listen to it, in passing, that this thought does not force itself upon us, be the tones in which it is uttered ever so gay. The lapse of a few fatal hours or minutes may so surround and hedge it in with horror that of all the millions of words which a lifetime has recorded, these two little words alone shall be remembered. Good night. The little child has lisped it, as it passed smiling to a brighter morn than ours; the lover, with his gay dreams of the nuptial morrow, the wife and mother, with the tangled threads of household cares still in her fingers; the father, with the appealing eye of childhood all unanswered: Good night! The seal upon days passed, and days to come. What hand so rash as to rend aside the veil that covers tomorrow?

BAYLIS CREEK, [illegible]
Gentlemen—Having been afflicted for a number of years with indigestion and general debility, by the advice of my doctor I used Hop Bitters, and must say they afforded me almost instant relief. I am glad to be able to testify in their behalf. Thos. G. Knox.

ESTATE OF JAMES McKINNEY.

STATE OF MICHIGAN, county of Lenawee—ss. At a session of the Probate Court for the County of Lenawee, holden at the Probate office, in the City of Adrian, on Monday, the 3d day of September, in the year one thousand eight hundred and eighty-three.

Present, Norman Geddes, Judge of Probate.

In the matter of the estate of James McKinney, deceased.

On reading and filing the petition of James Kinney and John Foy, executors of the last will and testament of said deceased, praying that they have paid the debts of said deceased and the expenses of administration of said estate, so far as are ascertained, and praying for the allowance of their final account as such executors.

Thereupon it is ordered, That Monday, the 1st day of October next, at ten o'clock in the forenoon be assigned for the hearing of said petition and that the heirs-at-law of said deceased and all other persons interested in said estate are required to appear at a session of said court then to be holden at the Probate office, in the city of Adrian, and show cause if any there be, why the prayer of said petitioner should not be granted.

And it is further ordered That said petitioner give notice to the persons interested in said estate of the pendency of said petition and the hearing thereof by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said county of Lenawee for three successive weeks previous to said day of hearing.

NORMAN GEDDES, Judge of Probate.
(A true copy.)
A. H. Briggs Probate Register. sept6

COMMISSIONERS' NOTICE.

IN the matter of the estate of Ann Biddle, deceased.

The undersigned, having been appointed by the Judge of Probate for the county of Lenawee, Michigan, commissioners to receive, examine and adjust all claims and demands against the estate of Ann Biddle, deceased, notice is hereby given that for that purpose we will meet at the late residence of deceased in the town of Macon, in said county, on the 12th day of October, 1883, and on the 7th day of March, 1884, at 10 o'clock in the forenoon of each of said days, and that six months from the 8th day of September, 1883, have been allowed by the said court for the creditors of said estate to present their said claims for examination and allowance.

Dated Sept. 17, 1883.

LEW S. CAMBURN,
MILAN SAGE,
sept13 Commissioners.

CHANCERY SALE.

STATE OF MICHIGAN, The Circuit Court for the County of Lenawee in Chancery.

William Hayden, Complainant,
vs.
Daniel O'Connor, Defendant.

In pursuance, and by virtue of a decree rendered by said court in the above entitled cause on the 18th day of June, 1883, I the subscriber, a Circuit Court Commissioner in and for said county will sell at public auction to the highest bidder on the 24th day of September 1883, at 10 o'clock in the forenoon, at the front door of Frean's opera house in the city of Adrian in said county, (that being the place of holding said court) the premises described in said decree to wit: All those certain pieces or parcels of land situate in the city of Adrian in the county of Lenawee and state of Michigan, and described as follows, viz: Lots one hundred and thirty-eight, (138) one hundred and thirty-nine (139) and two hundred and ninety-five (295) and two hundred and ninety-six (296) of the eastern addition of the city of Adrian, according to the recorded plat thereof.

Dated July 31, 1883.

FRANK R. PAYNE,
E. B. WOOD, Circuit Court Commissioner.
Solicitor for Complainant. aug9

THE "FISHING LINE."

TAKE THE
GRAND RAPIDS & INDIANA RAILROAD.

The only route to the Trout, Grayling and Black Bass Fisheries and the famous Summer, Health and Game Resorts and Lakes of

Northern Michigan.

The waters of Grand Traverse Region and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

Brook Trout abound in the streams, and the famous American Grayling is found only in these waters.

The Trout Season begins May 1st, and ends September 1st. The Grayling Season opens June 1st and ends November 1st.

Black Bass, Pike, Pickerel, and Muskalonge also abound in large numbers in the many lakes and lakelets of this territory. The sportsman can readily send trophies of his skill to his friends or "Club" at home, as ice for packing fish can be had at nearly all points.

Take Your Family with You. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing.

The climate is peculiarly beneficial to those suffering with Hay Fever and Asthmatic affections.

New Hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The connection of this line from Petoskey to Mackinaw city forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit, Mackinac & Marquette R. R. to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns, and Fishing Tackle carried free at owner's risk. It is our aim to make Sportsmen feel "At Home" on this route. For Tourist Guide, a handsomely illustrated book of 160 pages free, Time Cards, Folders and further information address

"The Trapper's Last Shot."

He was probably christened James, but is always Jim now, and, along with the greater part of his christened name, he has almost entirely lost his surname. If he had been a few shades lighter, he might have been Colored Jim, but black being the absorption of all colors, this name would not do him. So he is known wherever known at all as Nigger Jim. He is an expert trapper and hunter, but, rather singularly considering these gifts, a poor marksman. For years he lugged about a carried in his boat an ancient flint-lock shotgun, as deadly in its action that [illegible] loaded with only a charge [illegible] Jim and his skill but the boat's [illegible] and gave a roar that [illegible] the noble weapon fell forth a [illegible] and his skill but the boat's [illegible] Jim was too long [illegible] and stroke of his [illegible] of the craft [illegible] the boat without the [illegible] frequently lured from [illegible] whose income [illegible] at that hour of consulting or an [illegible] for owners possession of a [illegible] shot both wedded with a [illegible] through the [illegible] a tell-tale chicken [illegible] Jim

SPECIAL CORRESPONDENCE.

CLINTON CULLINGS.

Expected that the meat market will soon change hands.

P. C. Smith is doing a lively livery business these days.

Peter Mahon, a moulder in Dave. Woodward's foundry, was moulded over into a married man last Monday.

Sand Lake was well represented in Justice Brown's office Monday. Son vs. Father in assumpsit.

Only thirteen loads of wheat delivered here last week Thursday, ag'st one hundred and eleven the same day in Saline. Note this fact whoever says we have a wheat buyer here.

Miss Fullerton has taken the matter in hand and set about the work earnestly to see what can be done in reference to a lecture course here this winter. We sincerely hope that her efforts may prove effectual in getting the requisite amount pledged, and thereby secure the course of lectures.

SPRINGVILLE SNUFF.

Wheat all sown; cutting corn the main occupation.

J. B. Stephenson has purchased a house and lot in the village of Brooklyn, of A. M. Keeny, and moved to his new home on Tuesday last.

Frank Groger has returned from Dakota, and does not speak in a very flattering style of the territory.

Wm. Mullen started Wednesday for southern Illinois and will remain there during the winter.

Springville is expected to be quite well represented at Chicago next week.

Railroaders have secured their pay, settled all up and deserted us. A happy desertion.

Fred Groger has moved to the mill and Frank Avery will, we understand, soon move into the house recently vacated by J. B. Stephenson, so any one has to be knocking at the doors constantly in order to know who is the inhabitant.

HOLLOWAY HICKUPS.

B. Kelley has his new house ready for occupancy.

Mr. Sheldon Wilson and wife are visiting H. E. Wilson.

A new house is being enclosed by John Soper.

Quite a sensation at Holloway—a gas well. Last week as Dr. Begel was boring for a well he struck a gas vein which in escaping threw gravel and stones over 20 feet high. He proposes to pipe it and light his house with it, as it is a good illuminating gas.

Geo. Hoxsie is boring for a well to furnish his foundry boiler with water.

FLASHES BY C. T. LINE OPRS.

Iron is being laid in Franklin on the M. & O. railroad.

Mrs. Sarah Miller, of Lake Ridge, is visiting at Willis Smith's this week.

B. J. Slater, formerly a student on the C. T. line, has completed his studies at Toledo telegraph school.

E. G. Cook has bought the farm of J. H. Gaskill, of New Jersey, situated in Clinton.

Mr. Hillman and sister, of Livingston county, N. Y., have been visiting at R. W. Hillman's, Clinton, the past week.

Joseph Brooks, of Alpena, is in this vicinity buying stock to ship to that city.

Henry Wilson met with a bad misfortune in loosing his celebrated stock buck "Millionaire" last week.

W. B. Keyser is in attendance at the county fair acting as one of the Superintendents of the "Merchants' Display" department.

R. W. Hillman, of Clinton, is preparing to move to Ionia county next week.

Dr. Conklin was called by wire to attend Martin Whelan, in Franklin, late Monday night, also Dr. Jones to attend a child of Clarence Cook on Tuesday evening.

ILLUMINATION AT HOLLOWAY.

Dr. Begel's Gas Well—Everybody Happy in the Little Town.

Last Friday morning bright and early, Dr. C. E. Begel, of Holloway, prepared with tools and workmen to dig a 'brand new' well, that water might be obtained, that his good wife might freshly fill up the teakettle, etc. But the Doctor was doomed to disappointment. They dug down 14 feet, drilled 19 feet and struck not only water but a vein of good burning gas. At this time a two inch jet is burning showing a blaze for miles around, and the Doctor thinks sufficient gas can be obtained from the well to supply the village of Holloway, and more if necessary. What will happen to Holloway next?

The new species of potato bug, it is said, goes into the hill and then crawls up the inside of the stalk and kills it.

MICHIGAN STATE ITEMS.

Diptheria at Utica.

Tekonsha has 465 school children.

Fenton Seminary has 40 students.

East Saginaw is to have a city mission.

The Vassar woolen mills are taking high rank.

A movement is on foot to have Milan incorporated.

Mumps have the right of way in Buchanan at present.

Schoolcraft fair and races, Oct. 10th to 12th inclusive.

The East Saginaw unitarians are to build them a church.

Bay City is now connected with over 40 towns and cities by telephone.

The value of land in Fraser township, Bay county, has increased 50 per cent.

St. Clair is endeavoring to raise $10,000 to secure the return of the county seat.

The Wilson Creamery Company of Flint, has been reorganized, with a capital stock of $20,000.

A 226-pound bear has been killed near Flint, so that they are not quite out of the woods yet.

One Tekonsha clergyman claims to have preached over 50 funeral sermons within the past two years.

Cadillac is trying to raise the necessary money to build a county jail there.

Lumber operations will be done on a smaller scale than usual in Ogemaw county this season.

George Gibbs, a man 60 years old, is a tuition scholar in the Sturgis school. Never too old to learn.

Benton Harbor offers to give a bonus of $2,000 to any one who will locate a chair factory at that place.

Thousands of bushels of potatoes come into Sturgis daily and are sold at 30 cents per bushel, and finer potatoes never grew.

Michigan papers are advocating the use of English sparrows for food. Just watch the little cusses and see what they eat.

John Delaney, of Roscommon, adds another to the list of injured brakemen. He had his leg crushed last week.

Jacob M. Bowlby, of Ovid, has purchased the Ypsilantian, and proposes to make no changes in the opinion of the paper.

A floater was found at Bay City near Stone Island, last week. He had first cut his throat, and then jumped into the water.

Clarendon township, with only 100 inhabitants is trying to secure a town library. A new M. E. church is nearing completion.

The required amount, $2,000, has been raised in Milan to build a new Baptist church, and the contract has been let to Stephen W. Andrews.

A gang of wandering Arabs, reporting to have come from Jerusalem, were in Sturgis begging, last week.—They were dressed in their native costumes.

East Tawas is agitated over the marriage of a 12-year old girl to a married man. A justice of the peace did the work, but claims that the parties lied.

The Baptist Committee on the state of religion in the Michigan Association, reports progress in cities and towns, but inactivity in some country places.

The apple crop prospect in Tekonsha and vicinity grows more encouraging as the season advances, and fruit growers anticipate a crop equal to last year.

Peter Ronan's house and the Riverside Bottling Works were destroyed by lightning at Monroe, last week.—Loss, $4,500; insurance, $800. Mr. and Mrs. Ronan had a narrow escape.

The barn of John Leidy, of Leonidas township, St. Joseph county, together with a horse, harnesses, and 60 tons of hay, was destroyed by lightning last week. Loss, $2,000; only partially insured.

Spencer C. Drake has been elected Deputy Warden, vice Hinckley, resigned, at the Jackson prison. He has worked his way upward from a guard, and has been connected with the institution four years.

Manistee in an area about as large as Kalamazoo, including several little suburban lumber towns with distinct names, has 12,000 to 13,000 inhabitants. It is the wealthiest town of its size in Michigan, and most of the wealth is in the Congregational denomination. The richest Congregational church in Michigan is the First Church of Manistee.

OUR NEW YORK LETTER.

NEW YORK, Sept. 24, 1883.

The reduction in price from four to two cents which the Times inaugurated last Tuesday, came like a bomb shell into the newspaper world, and when on the following day the Tribune followed suit, and reduced its price from four to three cents everybody was amazed. "That means some off thy perch all you high priced papers," said the manager of another journal to me, when I asked him what effect this reduction would have. "The proprietors of the World claim that they are to be thanked for this revolution, but as the World was sold for two cents before the present management took hold of it, I do not see how they can find any feathers to plume themselves with. The direct cause is the cheapness of paper and the fierce business competition. So far as the Times is concerned, I think the step is suicidal. The Times is heavy, literary and erudite, and in politics fiercely Republican. As such it cannot very well appeal to a large, miscellaneous body of readers, and those that take it would just as soon pay four as two cents for it. The paper which they give is too big, the matter is too expensive to be sold profitably at such a figure. As regards the Tribune, their reduction came too late and was made so grudgingly that its effect was lost. In all such revolutions, whatever is worth doing, is worth doing quickly and decisively." "And what will be the upshot of this?" I asked. "The Evening Post and Commercial Advertiser will have to follow suit by reducing their prices from three to two cents. Cyrus W. Fields will then have to reduce the price of his paper, the Mail and Express to one cent to keep up with the procession. It strikes me that something of this kind will be done before the fall season fairly sets in."

"And where does James Gordon Bennett with his Herald and Telegram come in?" I asked. "One never knows what Bennett will do, but I know that years ago it was his ambition to put the Herald in the same category with the great London penny papers. Now, if the Herald should do anything of this kind, that would hurt the other papers, for even if it should lose at first, Bennett makes money enough to lose half a million a year for ten years in order to crowd out others. So far as the Telegram is concerned, it is only a question of a very short time when it will sell for two cents, and to tell you the truth, it is worth no more. Then the penny News will feel the effect.

The charges against Park Policeman McKay, which ended in his peremptory dismissal from the force, have developed a queer state of affairs at Central Park. The regulations require all visitors to leave by ten o'clock. This is a harsh regulation, for during the summer months thousands of poor people might obtain within its confines the recreation which they cannot obtain in crowded tenements. Of course respectable people obey the rule while shady customers do not regard it. Now the policeman steps in, and as long as the itchings of the palm of his hand are satisfied he does not mind what goes on. Residents in the vicinity of the Park say that almost every night orgies are carried on within its precincts which are shameful; that its beautiful grounds afford a rendezvous for disreputable persons of both sexes, and that the policemen demand and obtain a regular fixed tariff to allow the thing to go on. Quite naturally they became to regard everybody whom they find in the park after a certain hour as being what is technically known as "disorderly characters," and that is how this system of blackmail leaked out. A gentleman who was on his way home, with his wife took a short cut through the park. Policeman McKay arrested him, and then through friends intimated that the matter could be fixed for money. The charges were made, proven, not defended and thus the public at large is made acquainted with another way guardians of the peace have of enlarging their incomes. Said a well known lawyer to me the other day "It is wonderful how the present police system spoils men. I do not look at most of the ruffians who manage to get their appointments through political influence. But take the best of men, the nicest of fellows and put him among the associates he meets with on the Metropolitan Police force and he will be as bad as they are, cruel, heartless and ready to make a dollar whenever he can."

The fashionable world has been busy with fall openings this week. At most of the stores the display is larger than ever, and the sales are unusually heavy.

THE CHILDREN.

"I'm tired of this ceaseless worry"—thus the weary mother said;
"I rise up betimes in the morning, and I'm always the last to bed;
Yet my labors are never ended, and the children's frolic and strife
Seem sometimes to drive me crazy, and I'm tired of this wretched life."

I grieved for the weary mother, for her face was worn and wan,
And a rosy bride I'd seen her but scarce five summers gone;
But, when I looked at the children—so happy, so healthful and gay—
I spoke not a word of pity, but turned with a sob away.

For I minded how once my dwelling, now orderly, still and lone,
Re-echoed my children's voices, and the pattering of their feet,
As they scampered through hall and parlor, and in and out at the doors,
While dollies nestled my sofas, and picture-books strewed my floors.

And I thought the day they sickened, and their voices grew sad and weak,
As the fatal fever heightened, and wasted the burning cheek,
Till over the pale, pinched features, so changed from their winsome grace,
Crept the look—Oh, so hard to witness! of woe on a baby's face.

O God! thou doest all things wisely, and I question not thy decree
Perchance I had else forgotten that my treasures were lent to me.
But, ah! the benumbing anguish to list for the falling breath,
As the dear form chills and stiffens in the cold and chasm of death!

To-day through my lonely dwelling, so quiet, precise and neat,
Where the echoes are sadly silent, I wander with restless feet.
I find not the old confusion which once did sorely annoy
But I moan midst the drear precision for the sight of a broken toy!

Oh courage! ye weary mothers whose labors seem never o'er,
Ah! vapid and vain your being should your little ones need no more!
My children are gone forever; but all that a mortal might strive
Were bliss—but to me—could I clasp them safe, safe in my arms, alive!

—*M. A. Harmon.*

The "Rahzer."

ITS BEAUTIES IN THE HANDS OF THE AMERICANIZED AFRICAN.

A brawny man set out with a sledge-hammer fist is good enough weapon for a typical beef-eater of Britannia; a shillalah is the desideratum of a son of Erin, a poniard fits the belt of a swarthy Spaniard, the Italian is rarely found without his stiletto, the Turk without his cimeter, the American ruffian without a revolver, and the American Indian without his tomahawk, and the double-edged machette always swings in easy reach of the right hand of a greasy Mexican. Our kettle-colored race, the race most conspicuous in all southern and semi-southern climes, exhibit an originality, however, in the choice of a weapon. The negro chooses the razor, or, to borrow from his vernacular, the "rahzer." Because the farmer is handy with his scythe, we never heard of his turning the awkward instrument upon an antagonist, the carpenter does not arm himself for battle with a hand-saw, no more does the mason with his trowel. It would seem that their implements of industry could be converted into weapons of war with the same propriety that the indispensable of the tonsorial "profession" is converted. It is questionable, however, that an equal facility in wielding them could ever be acquired. The Americanized African takes up the "rahzer" as naturally and with the same ease as a baby takes in his primitive and foreordained rations. In the right hand of a negro the razor becomes one of the most formidable of weapons. He opens and swings the blade of the instrument until its back almost touches the back of the handle; clutches the handle near its junction with the blade with his index and middle fingers, then encircles with his other two fingers the handle and that part of the steel between the razor rivet and the keen edged blade; anchors his grasp with his thumb, and then with a chopping machine assails his enemy. At a single flourish a nose or an ear is secured, a ghastly seam is made in the face from the forehead to the chin, or by a dexterous twist a throat is "chopped" open from ear to ear. With his horrible weapon once adjusted, the wielder inspires terror, as do the bristling bayonets of a charging army, and with few exceptions the one who first adjusts may be said to "have the drop" on his foe. So general has become the use of the razor among the descendants of Ham that it is considered the weapon of the race. Its adoption obtains not only among the men, but among the colored women and children. "Close the doors of any of the churches in this city," said a prominent native of Cincinnati a few days since, a native who had investigated the subject, "close the doors and examine the pockets of every man, woman and child in the audience, and believe me, sir, on the person of seven out of every ten you examine you will find concealed a razor." The blood of any of them, if only tinged with the African, when once up, suggests this ill-shaped instrument. The black, the mulatto and the octoroon all have the same instinct. If worsted in a rough-and-tumble fight they are apt to be found, slipping to their breast or hip pockets and then woe to the too confident adversary! The wounds of the bullet and bowie are awful; the wounds of the "rahzer" are nasty, sickening to the surgeon and equally fatal. Of all concealed weapons none deserve to be more severely tabooed than the "rahzer."—*Cincinnati Enquirer.*

Home.

After all, when one comes to think of it, there are not many homes. There are, of course, innumerable places which go by the name of homes, called so for a want of better designation, or because everybody calls the place where he eats and sleeps home, but when you come down to real sober fact, homes are comparatively scarce.

A home is the refuge place from the storm, the fret and worry of life. It is a place where the husband comes home to a sanctuary, where smiles and loving words answer his smiles and greeting. It is a place where the wife reigns in her benignity and grace; no, it may be, the grace of outward beauty, or cultivation, but of true womanhood, where she receives honor and love even as she gave them both. It is a place, or should be a place, where children are happier than anywhere else in the world, because there are the choicest words, the brightest looks and the kindest acts. Such are not the majority of homes as we find them.

How does it happen that when you see a real home, a light, pleasant spot where everyone seems to be happy, where if husband and wife have misunderstandings, no one seems to know it, where laughter and smiles are perpetual guests, why does it strike one as peculiar and noticeable? Simply because there are so few of them.

Scientific Economy.

To purify muddy water: Agitate each quart of water with an ounce of phosphate of lime, and allow it to settle. This requires only a few minutes, and it will be found that most of the impurities are carried down to the bottom. The supernatant water is now filtered without any trouble through absorbent cotton. Ordinary cotton will answer as well, if previously moistened with alcohol and then washed with water. Of course, either of them must be pressed tightly into the neck of a funnel. By this means perfectly clear water can be obtained in about five minutes.

Some of the ways of distinguishing amber from copal are thus given in *La Nature*: "Copal is yellow, of a more or less deep tint, but uniform throughout, and has yellow points like sulphur on its surface. Amber in a fragment of 12 centimetres in length will show a variation of shade. Amber when rubbed will yield a strong aromatic odor; imitations will not. Amber may be bent after being smeared with tallow and heated; the imitations will not bend. Amber may be cut, sawed, rasped or polished, but cannot be cemented or soldered like copal. The density of amber is 1.09 to 1.11, that of copal is 1.04.

Mercadier has described a new and economical method of producing intermittent luminous signals by burning petroleum with oxygen. He has a lamp with a round wick, within which is a tube rising not quite up to the level of the top of the wick. This tube reaches a reservoir of oxygen; when the lamp is lighted and a properly adjusted jet of oxygen is permitted to reach it, it gives out a white flame the intensity of which approaches that of the hydrogen light. When the lamp is burned without oxygen it gives a smoky flame of little brilliancy, which will, however, rapidly increase in intensity, and soon reach a maximum when the oxygen is turned on.

Dr. Robert Munroe, in the Glasgow *Medical Journal*, reports a series of cases of phthisis and chronic bronchitis in which very decided and favorable results followed frequent inhalations of vapor of boiling water containing carbolic acid. Cases of fibrous phthisis and chronic bronchitis in which there was excessive expectoration were especially benefited thereby. An inhaler, though convenient, is not essential, a pitcher or jug holding, boiling water being all that is needed, and care must be taken to use it several times in the day and to inhale completely the rising vapor—not merely drawing it into the mouth. The editor of *New Remedies* states that he has had an experience with a similar use of the remedy, which enables him to indorse what Dr. Munroe says of its efficacy.

The Energetic Period.

The old suffer to-day. Not only is there in many communities a decline of respect for old age, a dislike of the slight self-sacrifice involved in patience with weakness and slowness, and deafness, and feebleness generally, but the old are placed at an unavoidable disadvantage. They lose more by abiding in the chimney corner, more enjoyment, more vivid society, more of the excitement derivable from change. Time was when we all lived, so to speak, in the chimney corner, and now it is only the old. No one now resides within bowshot of his birthplace. The old see the change more or less, and suffer; and if science does, as is alleged, give them a compensation in improved health and serenity, even if it be in part unconscious, science does work good. We fancy it does it in some degree—though science has accomplished so little, either for the deaf or bear-eyed—for it has done much for the rheumatic, much for the feeble digestions, and much, very much, for that tendency to a kind of ague which half a century since was so nearly a universal misfortune among the old; but the facts are not very clear. The invigoration of the old relieves most the sum of human suffering, but for the benefit of the world at large it is, we suspect, in mature age that more health and longer time are required. There is plenty of youthful energy in the world. Men are dashing over earth as they never did before, and for every enterprise, whether of danger or profit, volunteers are only too many—as many almost as conscripts. It is wisdom, not energy, that the supply fails, and it is from the better health of the experienced, which would imply energy longer continued into the time when experience ripens, that the world has most to hope. If the period of life between 45 and 60 could be stretched ten years the world would gain indefinitely, for its guides, the statesmen and the thinkers, would have time to utilize their knowledge in active effort. As it is, after 60 all but a select few die of despair or recede, and the helm passes away to new hands, controlled by minds which just as they become rich lose their energy or their hope, and the half of experience is wasted, while the remainder is applied under a feeling of all others most fatal to good work—that there is no time remaining. If science could but make 70 instead of 60 the end of the energetic period, it would accomplish far more for mankind than it ever will do by doubling their numbers, or increasing the rate of growth, as it would be increased, for example, if the mortality of children under 5 could be reduced one-half.

Hatch's Universal Cough Syrup gives your kidneys and liver a jog to help relieve your lungs of a bad cough, or your child of croup. There can be no membranous croup when Universal Cough Syrup is used in the first symptoms of the disease. No family with children can afford to be without it one day. 25 and 50 cents.

At home! These very words have more music to my ears than all the sweetest strains that ever syren sung. They bring us back to all we have loved, by ties that are never felt but through some simple associations. And in the earlier memories called up, our childish feelings come back once more to visit us, like better spirits as we walk amid the dreary desolation that years of care and uneasiness have spread around us. Wretched must he be who ne'er has felt such bliss; and thrice happy he, who, feeling it, knows that still there lives for him that same early home with all its love inmates, its every, dear and devoted object waiting his coming, and longing for his approach.—*Lever.*

IMPORTANT

When you visit or leave New York City, save Baggage, Expressage and Carriage hire, and stop at the **Grand Union Hotel** opposite Grand Central Depot.

Elegant rooms, fitted up at a cost of one million dollars, reduced to $1 and upwards per day. European plan. Elevator. Restaurant supplied with the best. Horse cars, stages and elevated railroad to all depots. Families can live better for less money at the Grand Union Hotel than at any other first-class hotel in the city.

Wooden Pegs.

HOW THEY ARE MADE—A VISIT TO A FACTORY IN VERMONT.

It was the privilege of the writer to visit the picturesque little town of Arlington, Vt., which at the time boasted a population of 2,500, three churches, five stores, two hotels, an extensive car works, sash and blind, and chair factory; also a "peg factory," which, by the courtesy of the foreman, Mr. L. E. White, (who has been employed there twenty-nine years,) he was shown through, and received valuable information. The timber used is black and yellow birch, which is cut into pieces four feet in length, varying in diameter from eight to fourteen inches. These logs are placed in a building in winter, and the frost extracted by steam. They are then run in on a tram railway to the circular saw department, and cut into slices or blanks of the thickness desired for the length of the pegs. These are sorted and the knots cut out, and are then passed on to a long bench which contains six machines composed of fluted rollers. The blocks are then run between these rollers, which crease both sides. They are then run through again to cross-crease, or mark out the size of the pegs. Then they go to the splitting machines, which are set with double knives, and cut the blocks into pegs. As they pass the last machine they are sorted, and all knots and discolored ones are removed as they are brushed off into large baskets. These machines are under the care of young women, who appeared much more happy and useful than do many of those who, thumping at their piano, would consider such employment menial. The next process is bleaching, which is accomplished by the fumes of brimstone, which is unhealthy (those who labor here shorten their lives.) They are then placed in large cylinders, which hold eleven barrels, and have 600 steam-pipes running through them, and revolve one and one-half times to the minute, drying two charges per day to each cylinder. They are then passed in large wooden casks or cylinders, which, revolving rapidly, polish them by the friction, the refuse falling through wire sieves or screen openings, after which they are again passed into a sifter, which separates all the single pegs and drops them into tubs, or boxes, leaving those which have not been separated in the machine. They are then put in barrels ready for market. The factory running on full time turns out 150 bushels, or fifty barrels per day. The sizes go from eight up to sixteen to an inch. The lengths go by eighths, two and one-half to twelve. Twenty-six hands are employed, half of them being women. The products of this mill are mostly shipped to Germany and France, and enter largely into the manufacture of toys and fancy goods as well as into the shoe manufactory. Thus the "genii of mechanism" converts, as by magic, the trees from the Vermont mountains into articles of use, which, floating off through the channels of commerce to far away countries, anon return to sparkle the eyes of happy children in toys in which these pegs have become important factors.—*New York Mail.*

The Ideal Oatmeal Porridge.

Clean, aromatic, coarse dry meal must be got from some shop where they know what is good in the way of oatmeal. The meal must be stored as carefully as tea in a covered dry jar, so that neither must, mice or beetles can defile it. The saucepan must be the pink of cleanliness, and must not have been used for anything other than milk and breadstuffs. Saucepans in which potatoes, greens or meats have been cooked are never pure enough for milk and breadstuffs. With such materials the making of delicious porridge is easy, but without them it is impossible. Bearing in mind the principles on which breadstuffs and milk are to be combined in food, we perceive that the meal must be cooked in water. Therefore, having clean boiling water in the saucepan, we take a small teacupful of meal (two or three ounces, for each pint of water in the saucepan. Draw the saucepan of boiling water off the fire and then sift in the meal through the fingers. The meal must be sifted into the water so as to be evenly spread over the surface, and to sink free from lumps. Then push the saucepan fully on the fire and boil briskly for a minute or two, so as to thoroughly mix the meal up with the water before it begins to thicken. Next boil slowly for three or four quarters of an hour, according to the coarseness of the meal. Care must be taken that the porridge is just kept on the move, and it must be stirred, if necessary, so as not to burn, and not get lumpy. Smoke and soot must be carefully kept from contaminating it. The porridge is now cooked so far that all the starchy granules are fully burst, and the meal is properly disintegrated. Now, pour out the porridge like a thin custard into a vegetable dish, and leave it to cool uncovered. If successful, the porridge on cooling will set or gelatinize; a brownish skin forms over the surface, and as this contracts the porridge separates all round from the dish at its edge. It becomes a soft, tremulous jelly, perfectly cooked sweet in flavor, uniform in consistence and free from contamination by dirty saucepans, by burning or by the defilement of soot or smoke. It should be eaten at the end of breakfast with cold milk, and it makes a most excellent supper.

A saucerful of such porridge put into a soup plate and a half pint mug of good rich new milk is, indeed, a lunch or a supper, or a finish to breakfast, fit for a king. It is a food on which any man can do anything of which he is capable in the way of labor, mental or physical. For growing children, and youths who are stunted in height or unsound in structure, this is exactly the food that is wanted. It is like brick and mortar for the growing frame of infants, school children and overgrown youths. For nursing mothers it is equally valuable, supplying them with the earthy phosphates and other materials out of which good milk is made, without drawing upon the mother's own structure, as is often exemplified by the rapid softening and decay of teeth in women who nurse their children largely upon meat and upon beer.—*English Mechanic.*

Griggs' Glycerine Salve.

The best on earth can truly be said of Griggs' Glycerine Salve, which is a sure cure for cuts, bruises, scalds, burns, wounds and all other sores. Will positively cure piles, tetter and all skin eruptions. Satisfaction guaranteed or money refunded. Only 25 cents. For sale by Baker & Hall.

That is the most perfect government in which an injury to one is the concern of all.

Ayer's Ague Cure stimulates the action of the liver, cleanses the blood of malarial poison, and rouses the system to renewed vigor. Warranted to cure fever and ague.

Early Sugar-Making in New Orleans.

George W. Cable continues his series of illustrated historical papers in The Century, with an entertaining description of "The End of Foreign Dominion in Louisiana," which includes the following account of the first success there in sugar making:

In 1791 the blacks of St. Domingo rose in rebellion. Refugees flew in every direction. A few found their way to Louisiana. They had been prosperous sugar makers, and presently the efforts that had ceased for twenty-five years came again to life. Two Spaniards, Mendez and Solis, in that year erected on the confines of New Orleans, the one a distillery and the other a battery of sugar kettles, and manufactured rum and syrup.

But the Creoles, every year less able than the year before to make rash experiments, struggled against the misfortunes that multiplied around the cultivation of indigo, until 1794 found them without hope.

At this juncture appeared Etienne de Bore. He was a man of fifty-four, a Creole of the Illinois district, but of a distinguished Norman family; he had lived in France from the age of four to thirty-two, had served with the king's mousquetaires, had married a lady whose estate was in Louisiana near New Orleans, and had returned with her to the province, and had become an indigo planter. The year 1794 found him face to face with ruin. His father-in-law, Destrehan, had in former years been one of the last to abandon sugar culture. His wife and friends warned him against the resolution he was taking; but he persisted in his determination to abandon indigo, and risk all that was left to him on the chance of a success which, if achieved, would insure deliverance and fortune to himself and the community. He bought a quantity of canes from Mendez and Solis, planted on the land where the seventh district (late Carrollton) now stands, and while his crop was growing erected a mill, and prepared himself for the momentous season of "grinding."

His fellow planters looked on with the liveliest—not always with the most hopeful—interest; and at length they gathered about him to see the issue of the experiment in which only he could be more deeply concerned than they. In the whole picturesque history of the Louisiana Creoles few scenes offer so striking a subject for a painter as that afforded in this episode. The dark sugar-house; the battery of huge caldrons, with their yellow juice boiling like a sea, half-hidden in clouds of steam; the half-clad, shining negroes swinging the gigantic utensils with which the seething food is dipped from kettle to kettle; here, grouped at the end of the battery, the Creole planters with anxious faces drawing around their central figure as closely as they can; and in the midst the old mousquetaire, dipping, from time to time, the thickening juice, repeating again and again his simple tests, until, in the moment of final trial, there is a look of suspense, and instantly after it the hands are dropped, heads are raised, the brow is wiped, and there is a long breath of relief—"it granulates."

The people were electrified. Etienne de Bore marketed $12,000 worth of superior sugar. The absence of interdictions that had stifled earlier trade enabled him to sell his product to advantage. The agriculture of the Delta was revolutionized; and, seven years afterwards, New Orleans was the market for 200,000 gallons of rum, 250,000 gallons of molasses, and 5,000,000 pounds of sugar. The town contained some twelve distilleries—probably not a subject for unmixed congratulation—and a sugar refinery which produced about 200,000 pounds of loaf sugar; while on the other hand the production of indigo had declined to a total of 3,000 pounds, and soon after ceased.

Bootblacks.

Youth's Companion.

A small boy is often robbed of his box and brushes," said the superintendent, "and when we know or believe him to be honest and industrious, we start him afresh. But some of them sell their kit to go to the theatre, or to see Jumbo, or anything else that's going, and then they'll try to beg money for a new kit. If you are ever asked again, tell the boy to bring you a note from me; if he deserves it, he'll get it."

"How many of those who began as newsboys or bootblacks have succeeded in life?"

"Hundreds! Why, the other day, a man stopped me in the street and asked me if I recollected him. Of course I didn't, but he soon recalled himself to my mind. He had been under my care, and he told me that he was now owner of a factory in Newark, employing two bookkeepers and sixty workmen.

"Another man visited me lately who had been picked up, wandering about the Bowery, and had been brought to the lodging house. His parents were dead. He is now proprietor and editor of a paper in Warsaw, Indiana.

"There are aldermen in this city who began life under our care, but some of them are ashamed to have it known. They ought to be proud of it.

"Many of the little bootblacks work for the big ones, who sit majestically on stoops, or in doorways, looking on; and the big boy feeds the little one, giving him 6 cents for his lodging, and pockets the rest of the day's earnings. It's a wonderful how faithful the little ones are, too. I suppose they're afraid of getting thrashed."

The Blind Man and the Color of Milk.

Chinese Tales.

There was once a man who had been blind from his birth. Naturally enough he did not know what the color of milk was, so he asked another man: "What is the color of milk?"

"The color of milk," said the other man, "is white, like a cowris shell."

"Well," said the blind man, "has this color of milk the sound of a cowris shell?"

"Not at all," said the other man.

"Then what does a cowris look like?"

"Like rice."

"Is the color of milk soft and tender, like rice? And what is rice like, anyhow?"

"Like snow."

"Is rice cold, like snow? And what is snow like, anyhow?"

"Snow is white, like a stork."

Now, although the man that had been blind from his birth heard all these comparisons, he could never tell what the real color of milk was.

The Coronation of the Czar.

Chicago Times.

A London cable says that the preparations at Moscow for the coronation of the czar are proceeding upon a fabulous scale of magnificence: "Eleven miles of tables are being constructed for the banquet on the plain, and eighty-five circular counters for the distribution to the moujiks of 900,000 pies. Rubinstein is to write a march and direct an orchestra of one thousand musicians and eight hundred choristers. Sixteen enormous vats, to hold free beer, are being built in the public places, and an English company is covering the Kremlin with electric lights." The nihilists will incur the undying hatred of the free-lunch fiends if they do anything to interfere with this liberal programme.

The Irony of Fate.

"What are you going to do after you leave college?" asked the friend of a senior, whose day of graduation was at hand. "Well," replied the senior, "I don't quite know as yet, but I think I shall take orders." This was two years ago; and now, as the quondam senior rides about in a cart as a retail grocer's third assistant deputy, and notes in a book the wants of customers, and then comes around again later in the day and delivers them, he smiles grimly as he thinks that the irony of fate is occasionally expressed in puns.

Josh Billings is Right.

A reputation once broken may possibly be repaired, but, as Josh Billings remarks, "the world will always keep its eyes on the spot where the krack was."

A MARVELOUS STORY

TOLD IN TWO LETTERS.

FROM THE SON: "28 Cedar St., New York, Oct. 28, 1882.

"*Gentlemen:* My father resides at Glover, Vt. He has been a great sufferer from Scrofula, and the inclosed letter will tell you what a marvelous effect

Ayer's Sarsaparilla

has had in his case. I think his blood must have contained the humor for at least ten years; but it did not show, except in the form of a scrofulous sore on the wrist, until about five years ago. From a few spots which appeared at that time, it gradually spread so as to cover his entire body. I assure you he was terribly afflicted, and an object of pity, when he began using your medicine. Now, there are few men of his age who enjoy as good health as he has. I could easily name fifty persons who would testify to the facts in his case.

Yours truly, W. M. PHILLIPS."

FROM THE FATHER: "It is both a pleasure and a duty for me to state to you the benefit I have derived from the use of

Ayer's Sarsaparilla.

Six months ago I was completely covered with a terrible humor and scrofulous sores. The humor caused an incessant and intolerable itching, and the skin cracked so as to cause the Blood to flow in many places whenever I moved. My sufferings were great, and my life a burden. I commenced the use of the SARSAPARILLA in April last, and have used it regularly since that time. My condition began to improve at once. The sores have all healed, and I feel perfectly well in every respect—being now able to do a good day's work, although 73 years of age. Many inquire what has wrought such a cure in my case, and I tell them, as I have here tried to tell you, AYER'S SARSAPARILLA." Glover, Vt., Oct. 21, 1882.

Yours gratefully,
HIRAM PHILLIPS."

AYER'S SARSAPARILLA cures **Scrofula and all Scrofulous Complaints, Erysipelas, Eczema, Ringworm, Blotches, Sores, Boils, Tumors, and Eruptions of the Skin.** It clears the blood of all impurities, aids digestion, stimulates the action of the bowels, and thus restores vitality and strengthens the whole system.

How Watch Cases are Made.

In buying a silver watch case great care should be taken to secure one that is solid silver throughout. The cap of most cheap silver cases is made of a composition known as albata, which is a very poor substitute for silver, as it turns black in a short time. The backs of such cases are made much thinner than those of an all silver case, being robbed in order to make the cap thicker and get in as much as possible of the cheap metal. Another important point in a silver case is the joints or hinges, which should be made of gold. Those of most cheap cases are made of silver, which is not a suitable metal for that purpose. In a brief period it warps, bends and spreads apart, allowing the backs to become loose upon the case and admitting the dust and dirt that accummulate in the pocket. The Keystone Silver Watch Cases are only made with silver caps and gold joints.

ST. LOUIS, MO., Feb. 17, 1883.

In our long and varied experience in handling watches, we cannot but acknowledge and give our testimony that the Keystone Solid Silver Watch Cases are the best made to our knowledge. Having no soldering they remain homogeneous, *harder* and *stiffer* than they would be were they heated for soldering, and have more resisting power against pressure than any other cases in the market. MERMOD & JACCARD JEWELRY CO.

Send 2 cent stamp to Keystone Watch Case Factories, Philadelphia, Pa., for handsome Illustrated Pamphlet showing how James Boss' and Keystone Watch Cases are made. 8

Rheumatine!

An Internal Remedy and a Sure Cure for all kinds of

Rheumatic Complaints!

If you are suffering from

Kidney Complaints

Give Rheumatine a fair trial. You will never regret having done so.

Testimonial from Mr. Thomas H. Day, of No. 83, 23d street, Chicago, who has been for many years employed by the Wagner Sleeping Car Co. and is now conductor of one of their cars running between New York and Chicago.

J. N. SUTHERLAND,
Manager Rheumatine Mfg Co.,
Niagara Falls.

CHICAGO, JUNE 25, 1882.

Dear Sir—It gives me pleasure to inform you of the benefit your rheumatic cure "Rheumatine" has been to my daughter, who for the past few years has been a great sufferer from Rheumatism at times being quite helpless. She took three (3) bottles of your preparation, and I can bear testimony to its speedy action in affording her relief from pain and soreness. Thanks to Rheumatine her health is now quite restored.

Yours very truly,
THOS. H. DAY.

HOOD'S SARSAPARILLA

Is designed to meet the wants of a large portion of our people who are either too poor to employ a physician, or are too far removed to easily call one, and a still larger class who are not sick enough to require medical advice, and yet are out of sorts and need a medicine to build them up, give them an appetite, purify their blood, and oil up the machinery of their bodies so it will do its duty willingly. No other article takes hold of the system and hits exactly the spot like

HOOD'S SARSAPARILLA

It works like magic, reaching every part of the human body through the blood, giving to all renewed life and energy.

My friend, you need not take our word. Ask your neighbor, who has just taken one bottle. He will tell you that "It's the best dollar I ever invested."

LEBANON, N. H., Feb. 19, 1879.

MESSRS. C. I. HOOD & CO.: Dear Sirs—Although greatly prejudiced against patent medicines in general, I was induced, from the excellent reports I had heard of your Sarsaparilla, to try a bottle, last December, for dyspepsia and general prostration, and I have received very gratifying results from its use. I am now using the second bottle, and consider it a very valuable remedy for indigestion and its attendant troubles.

Yours truly,
F. C. CHURCHILL,
(Firm of Carter & Churchill.)

☞ A gentleman who has been suffering from the *Debility* and *Languor* peculiar to this season, says: "HOOD'S SARSAPARILLA is putting new life right into me. I have gained ten pounds since I began to take it." Has taken two bottles.

Gained 10 Pounds

HOOD'S SARSAPARILLA is sold by all druggists. Price $1 per bottle; six for $5. Prepared by C. I. HOOD & CO., Lowell, Mass.

B

KING OF THE BLOOD.

The Most Thorough Purifier of the Blood Yet Discovered.

Cures all Humors, from a Common Eruption to the worst Scrofula.

It purifies the Blood.
It invigorates the Liver.
It regulates the Bowels.
It strengthens the stomach.
It gives vivacity in place of lassitude; cheerfulness in place of gloom, and robust vigor in place of debility.

Dyspepsia, Biliousness, Disordered Liver, Constipation, Nervous Affections, General Debility, in short all the numerous diseases and discomforts caused by impure blood are speedily conquered by this powerful corrector, the chief and sovereign of all ancient or modern medical discoveries—KING OF THE BLOOD.

Its name is its best description as it is a royal dispenser of the blessings of health and vanquishes the foes that lurk in the blood.

It banishes PIMPLES, SALT RHEUM, SCALY ERUPTIONS, ULCERS, SCALD HEAD, FEVER SORES, and all SCROFULOUS DISORDERS.

It checks CONSUMPTION in its early stages. It has frequently cured it when advanced.

It disperses TUMORS and CANCERS without the Surgeon's knife.

It cures DROPSY, general or partial.

It cures FEMALE WEAKNESS and DISEASE.

It reduces in a safe and effectual manner all swellings, external or internal.

It eradicates the effects of Venerial Disease and Mineral Poisons, and establishes a sound constitution.

Many certificates, much further information and full directions for using, will be found in the pamphlet, "Treatise on Diseases of the Blood;" in which each bottle is enclosed.

Price $1 per bottle containing 12 ounces, or to 50 doses. Sold by dealers in medicine.

If your druggist does not happen to have it on hand, request him to order a supply of it for you, as it will be cheaper than for you to order direct of us, and less trouble.

CIVIL-SERVICE REFORM

Mental Panic Among the Letter Carriers.

Trying to Bridge the Gulf Between Mathematics and Mail Delivery

Peck's Sun.

One of the city papers published a list of questions that are to be propounded to applicants, a few days ago, and the reading of the questions has struck terror to the hearts of some of the letter carriers. Half a dozen of them were seated at a round table at the rooms of the Young Men's Benevolent Two-for-Bye-cents association, a few evenings since, entertaining one of The Sun's angels, unawares, when the matter of civil-service reform came up. One of the letter carriers who has been on the force for ten years, and never missed a letter, said:

"Listen to this boys: 'The ownership of a vessel was divided as follows: A owned 3-32, B 7-8 as much as A, C 4 times as much as B, D 1-6 as much as C, and E all the rest. What was the share of each?' Now that is one of the questions we have got to answer before we can be accepted as letter carriers. By jingo, I don't know any more about a vessel than a Hindoo. I might take a slate and pencil and figure until Cheyenne froze over, and I couldn't tell how much was the share of each one of those vessel owners. My idea would be for the owners to play a game of seven-up to see who had the whole craft. A school boy that is studying vulgar fractions might figure it out and beat me out of my position, but what would he know about delivering letters directed in the Norwegian language, with pale ink. You can't fool me on any letter that belongs in my district. I can find every man, woman and child, and when they move out of the district I know where they go, and they get their letters before they get the carpets down, but that dividing a schooner up into sixteenths is ahead of my time. Well, if they put a vessel sharp into my place I can take in washing."

"Here, boys, take off your hats, and snug up close together," said a letter carrier, the elbow of whose gray pants had been torn out by a west side dog as he was coming out of a yard, "while I read you this conundrum: 'A goldsmith melts together 12 ounces of gold 22 karats fine, 90 ounces 20 karats fine, and 24 ounces 14 karats fine. He sold it at the rate of $16 per ounce of pure gold (24 karats fine). What was its fineness, and what was the amount received?' There's one that will make you sick. What has a letter carrier to do with melting gold and mixing it up. I don't believe there is a jeweler in this town that could figure that out. If the question was, 'If a letter carrier receives $60 a month, half of it in greenbacks and half in bobtail silver dollars, and pays three assessments for campaign expenses, and has to buy a gray uniform, and is sick a week and is docked, how much will he have left to buy liver and codfish,' I could figure it down to an aispice in my head, and never touch a slate and pencil. But this fourteen carat and twenty-two carat gold business, melted up in a tin dipper, knocks the stuffing out of me, and when the civil-service reform asks me to whack up on that riddle they can hire a jewelry auctioneer to take my place and get out of door yards ahead of dogs, and I will post him on where the folks in my district live, and I will get a job mauling mules on a street car. You hear me!"

"O, you fellows haven't got any heads for mathematics," said a little fellow with his letter sack slung over his shoulder. "Those two questions you have read are easy enough, but let your intellect take a side-hold with this Muldoon that I am going to read to you: 'What is the value of 500 sheets of copper weighing 20 ounces avedupois per square foot, measuring 48 inches long by 15 inches wide, and worth $150 per ton of 2,240 pounds?' Eh! How is that for a letter carrier to carry in his sack? Is there a junk-dealer present that can wheel his hand-cart, with cow-bells on, into this august assemblage, and pick the meats out of that? By the great bald-headed Elijah, when it gets so an honored and respected employe of this government has got to figure his brain away on old copper boilers, and sheet zinc, and lose his place because he never has bought old junk, that lets me out, and I will go and tell the postmaster he can get another rag man in my place, and I will apply for the position of he-chambermaid in a livery stable."

Joaquin Miller on Longfellow.

Cleveland Herald.

A correspondent relates the following incident of an occasion when he was sent to interview Joaquin Miller as to his opinions of Longfellow's "Morituri Salutamus," just after its publication. Miller said:

"My opinion of Longfellow's last poem! Good God, boy! I wouldn't if I could. The idea of a man of my age, position and ability sitting in judgment upon Longfellow—one of the grand old gods! It's impossible. Why, my dear fellow, I have no education, no culture. I am not a man to judge of literary work. I read no books. I have no books. Here are my tools," and he took a dozen sheets of paper from his pocket and a quill pen. "And here is my workshop," and he pointed through the open window. "I love Longfellow too well to attempt to criticise him. When I was in London I assisted in founding a Longfellow club. We used to meet every Sunday evening, and after reading a chapter in the bible, spend the rest of the time reading Longfellow. In that way we got through 'Hiawatha' and read 'Evangeline' twice. But about this new poem—what did you say it was?" "'Morituri Salutamus.'" "I haven't read it."

The Finishing Touch.

"J. H. H." in San Francisco Chronicle.

When Sardou was writing the Bons Villageois he intended one role for Pradeau, then the best low comedian of the French stage. But in the middle of the fourth act he "ran up against a stump," so to speak, and was for a long time unable to finish his work. The play at this point was in the very midst of a most pathetic scene, and if the comedian was permitted full sway not only would the dramatic effect be destroyed but the audience would be badly treated. M. Sardou was worrying over this act one morning when Pradeau himself entered. He looked more joyous than ever, and his great big mouth was wide open to let escape the smiles which grinned all over him. He had just come from the conservatoire, where his son had won a prize on some sort of an instrument. While he was telling Sardou of it his face and bearing assumed a paternal tenderness so strange and touching that the dramatist interrupted him with, "Ah, here is a coup de theatre for the fourth act;" and he at once set to work to create a scene where only tears and loving words should be seen and heard from one always gay, and who should now make the audience cry instead of laugh. The actor, without knowing it, had suggested the finishing touch to the author's work.

A Polite Peddler.

"What d'ye leave that door wide open for?" exclaimed the gentleman in the office to the intruding peddler. "Oi thought, surr," was the quick reply, "that ye might want to kick me down staire, and Oi wanted to make it convenient for ye, surr." The gentleman was so taken aback that he bought two apples for 5 cents, passing off a bad quarter in the transaction.

A Yankee's Job.

An American has been over and viewed the "leaning tower of Pisa," advertises in a local paper, after returning home that he will contract to straighten the old tower and fix her up as good as new for $600,000.

Laramie Boomerang: Subscribers who find a cross-bones and skull with crest of metallic casket drawn in blood on the wrapper of their paper will know that their subscription has expired and something has got to be done about it.

It makes every humanitarian sad to see invalids seek such relief as is given them by the use of bitters, kidney medicines, and other nostrums. The first few doses may make them feel better on account of its stupefying ingredients, combined with some strong cathartic and diuretic that are used in its composition, but they eventually grow worse. The only cure for weakness, nervousness, debility, aches, pains, rheumatism, sores, urinary and digestive troubles, is to make the blood rich, red and pure, by using Dr. Guysott's Yellow Dock and Sarsaparilla, a remedy widely indorsed by physicians who have examined into its composition and effect.

Rum and the Morgue.

By far the strongest temperance lecture of the season is the statement made by the keeper of the Morgue, that four-fifths of the five thousand bodies that reach the dead-house every year are sent there by drunkenness. The jolly fellows who make fun of the anti-liquor agitation, as they stand at bars and drink good old whisky—for, of course, no other kind is sold—know only the beginning of what rum can do; but the rough, pine boxes, filled with what once was clear-headed, bright-eyed humanity, are just as directly the work of drink as bar room fun is. There may be cities in the world where man can drink spirits without injury to body and brain, but New York is not one of them. In a city where everybody, from the millionaire to the day laborer, is being continually impelled to doing more work than he can finish, whatever increases physical or mental excitement is a positive curse. The Morgue's occupants do not all come from the lower classes, who drink bad rum; scions of honorable stock have been found there too often, for alcohol is as merciless a leveler as death itself.

Nervous, dyspeptic individuals, whose distress of mind and body make life miserable, if your sufferings have been prolonged and increased by the use of bitters and pretended cures of kidney and liver diseases, throw all such nostrums aside, and find health, strength and vigor in that simple remedy known as Dr. Guysott's Yellow Dock and Sarsaparilla. It purifies the blood, strengthens the urinary and digestive organs, and infuses new life into all parts of the body. No other remedy equals it. Have your druggist get it for you.

In London no liquor can be procured after 12 o'clock at night. Every bar, big or little, is closed, and this law is not evaded, for the risk is too great. A man's license would be taken from him immediately, and without remedy. Persons are not licensed to sell liquor in England. It is the premises that are licensed. The board having it in charge license one public house in a district, basing it upon the supposed necessity, and those premises hold this license till deprived by violation of law. If you desire to sell liquor, you cannot go and rent a room and open your bar, you are compelled to buy the lease of a place which carries the license with it. Consequently a licensed place is a valuable piece of property. Sunday is an especially drought day in London. All the bars are closed till 1 o'clock P. M., and are then opened but an hour. Then they are closed till 6, and are permitted to keep open till 11. And let it be remembered that law in England is law. You can't laugh at it as you do in America. There is no evasion of this law attempted. The places are required to be closed, and they are closed. There are no side-doors. There is no selling on the sly—they are closed.

If your lungs are weak, if a cold causes you quick distress, you will breath easier, you will cough less, you will strengthen the pulmonary organs, you will feel better every way if you will occassionally use Dr. Wistar' Balsam of Wild Cherry. Ask your druggist for it.

Prof. W. Matthew Williams says: "I have taught many to swim, and my first lesson is on balancing the body. The easiest formula for attaining this power is to keep the hands down and look at the sky, while the chest is expanded as much as possible by throwing the shoulders well back, in military attitude. Any man or woman of specific gravity who can do this can float and breathe, but to do it, simple as it is, requires practice or training—physical training of the muscles, and cerebral training in order to acquire that command of all the faculties without which there can be no treading of water or other device for keeping the mouth and nostrils in the air."

Testimony From the Press.

To those afflicted with lung trouble, hear what V. W. Wilson, of the Ottowa (Ill.) Times says: "After being disabled for three months with a cough, and lung trouble, often spitting up blood, can testify that I am cured permanently by the use of Dr. Bigelow's Positive Cure." A free trial bottle can be had at Baker and Hall's.

Bucklan's Arnica Salve.

The greatest medical wonder of the world. Warranted to speedily cure Burns, Bruises, Cuts, Ulcers, Salt Rheum, Fever Sores, Cancers, Piles; Chilblains, Corns, Tetter, Chapped Hands, and all skin eruptions, guaranteed to cure in every instance or money refunded. 25 cents per box.

Sold by C. A. Wright & Co.

The Mahogany Tree.

Full-grown, the mahogany tree is one of the monarchs of tropical America. Its vast trunk and massive arms, rising to a lofty height and spreading with graceful sweep over immense spaces, covered with beautiful foliage; bright, glossy, light and airy, clinging so long to the spray as to make it almost an evergreen, present a rare combination of loveliness and grandeur. The leaves are very small, delicate and polished like those of the laurel. The flowers are small and white or greenish yellow. The mahogany lumbermen, having selected a tree, surround it with a platform about twelve feet above the ground, and cut it above the platform. Some dozen or fifteen feet of the largest part of the trunk are thus lost; yet a single log not unfrequently weighs from six or seven to fifteen tons and sometimes measures as much as seventeen feet in length and four and a half to five feet in diameter, one tree furnishing two, three or four such logs. Some trees have yielded 12,000 superficial feet.

After a sea diet, to prevent boils and eruptions, and assist acclimation, use Ayer's Sarsaparilla.

A Baptist Minister's Experience.

"I am a Baptist minister, and before I thought of being a clergyman I graduated in medicine, but left a lucrative practice for my present profession, forty years ago. I was for many years a sufferer from quinsy. Thomas Eclectric Oil cured me. I was also troubled with hoarseness and Thomas' Eclectric Oil always relieved me. My wife and child had diphtheria, and Thomas' Eclectric Oil cured them, and if taken in time it will cure seven times out of ten. I am confident it is a cure for the most obstinate cold or cough, and if any one will take a small teaspoon and half fill it with Oil, and then place the end of the spoon in one nostril and draw the Oil out of the spoon into the head, by sniffing as hard as they can, until the Oil falls over into the throat, and practice it twice a week, I don't care how offensive their heads may be, it will clean it out and cure their catarrh. For deafness and earache, it has done wonders to my certain knowledge. It is the only medicine dubbed patent medicine that I ever felt like recommending, and I am very anxious to see it in every place, for I tell you I would not be without it in my house for any consideration. I am now suffering with a pain like rheumatism in my right limb, and nothing relieves me like Thomas' Eclectric Oil." Dr. E. F. Crane, Corry, Pa.

One can not always be amiable. Not every man and possibly every woman, is a saint. It is a good rule for the husband and wife to take turns in getting mad.

Bury your sorrow. The place for sad and disgusting things is under the ground. A cut finger is not benefited by pulling off the plaster and exposing it to everybody's eye.

Fight your own battles. Hoe your own row. Ask no favors of any one, and you'll succeed five thousand times better than one who is always asking favors.

Well Rewarded.

A liberal reward will be paid to any party who will produce a case of liver, kidney or stomach complaint that Electric Bitters will not speedily cure. Bring them along, it will cost you nothing for the medicine if it fails to cure you, and you will be well rewarded for your trouble besides. All blood diseases, billiousness, jaundice, constipation, and general debility are quickly cured. Satisfaction guaranteed or money refunded. Price only 50 cts per bottle.

Sold by C. A. Wright & Co.

At last a modest but enterprising gentleman has invented a bicycle for the ladies. It is built just like the masculine affair, we believe, except the saddle is a kind of a bench like, with a square hole in the middle for the fair rider to—ha—hang both—ha—you just sit on this seat and hang both—er—ha—you reach down to the treadle with both of them, you know. Pshaw! the man that will make a bicycle like that ought to be compelled to describe it himself, that's what.—Burlington Hawkeye.

Thirteen Years' Dyspepsia.

"I suffered with dyspepsia for 13 years," writes John Albright, Esq., of Columbus, O., Samaritan Nervine cured me." As it always cures such disorders. At druggists.

A clergyman remarked the other day, "Alas, how times change! In the Old Testament days it was considered a miracle for an ass to speak, and now it seems as though nothing short of a miracle would keep one quiet."

"Just one," murmured he involuntarily, drawing closer to the lips that smiled upon him, while his own quivered in an agony of expectant anticipation. "So I notice," replied she, coolly glancing at the clock, and time for you to pull up your coat collar and shut the door from the outside." He went.

Try Baker's Japanese Liniment.

No Grease for Him.

"When Greece her knees—Greece her knees—Greece her knees," stammered an embarrassed school boy, forgetting the next line of his recitation. "There is no occasion to grease anybody's knees," shouted his teacher. "Go and study your piece." Neither is there occasion to grease your hair. Parker's Hair Balsam is all the dressing you want. Restores the original gloss and color to gray or faded hair. Does not soil the linen; not a dye; good for the scalp; prevents falling out.

TOLEDO (O.) BUSINESS COLLEGE

And English Training School. Thoroughly equipped in all its departments. Mathematics a specialty. The College was never in a more flourishing condition. No vacation. Circulars and specimens of penmanship sent free. M. H. DAVIS, B.A., Prin.

Is Fun Better than Physic?

Fun is excellent; a hearty laugh is known the whole world over to be a health promoter; but fun does not fill the bill when a man needs physic, on the other hand people take too much physic. They would be more healthy, live longer and enjoy life thoroughly if they used Dr. Jones' Red Clover Tonic, which cures all blood disorders, indigestion, kidney and liver troubles, removes pimples, and is a perfect tonic. Can be taken by the most delicate. Only 50c a bottle, of Baker & Hall.

Daughters, Wives and Mothers.

We emphatically guarantee Dr. Marchisi's Catholicon a Female Remedy, to cure Female Diseases, such as Ovarian troubles, inflamation and ulceration, falling and displacement or bearing down feeling, irregularities, barrenness, change of life, leucorrhœa, besides many weaknesses springing from the above, like headache, bloating, spinal weakness, sleeplessness, nervous debility, palpitation of the heart, &c. No cure, no pay. For sale by druggists. Prices $1 and $1.50 per bottle. Send to Dr. J. B. Marchisi, Utica, N. Y., pamphlet free. For sale by Waldo & Doty.

Positive Cure for Piles.

To the people of this county we would say we have been given the agency of Dr. Marchisi's Italian Pile Ointment—emphatically guaranteed to cure or money refunded—internal, external, blind, bleeding or itching piles. Price 50 cents a box. No cure, no pay. For sale by Waldo & Doty, druggists.

A PAPER FOR THE TIMES.

The CHICAGO DAILY NEWS is the pioneer of cheap journalism in the West. It was founded Dec. 20, 1875, as an evening paper with editions at noon, 3 and 5 o'clock. A complete newspaper,—complete in the one essential feature of American journalism, i. e., presenting all the news,—sold on the street at any price less than the conventional nickel, was an innovation in western journalism, and, like all new enterprises, the "cheap paper" had to contend with long established custom and even prejudice before securing the recognition it sought and deserved. At the end of the first year, 1876, it had achieved a daily sale ranging from 8,000 to 10,000 copies. From this time forward its progress was beyond all precedent in American journalism. In 1877 its average daily circulation was 22,037 copies; in 1878, 33,314 copies; in 1879, 45,131 copies; in 1880, 54,801 copies. On the morning of March 21, 1881, the CHICAGO MORNING NEWS made its first appearance. In September following, the sixth month of its publication, its circulation amounted to 490,919 copies, or a daily average of 16,846 copies,—a circulation never before attained by any daily paper in the United States, within a corresponding time.

The CHICAGO DAILY NEWS, therefore, as now published, consists of MORNING, NOON, and EVENING ISSUES, known respectively as the MORNING NEWS, NOON NEWS, and EVENING NEWS. The average combined circulation of the three issues of the DAILY NEWS now exceeds 90,000 copies each day. To appreciate the exceptional extent of this vast circulation it is only necessary to state that it is over three times the circulation of *any other daily paper in Chicago or the West*, while its circulation *in the city of Chicago* is GREATER than ALL other Chicago daily papers COMBINED. Being an independent paper, the organ of no party, sect, or class, it is the one universally read Chicago paper. The subscription price of the DAILY NEWS, either MORNING or EVENING issue, is $6.00 per year, or $2.00 for four months, postage included.

On July 2, 1878, the DAILY NEWS purchased the CHICAGO EVENING POST, consolidated its daily issue with the DAILY NEWS, and continued its weekly issue under the name of the CHICAGO WEEKLY NEWS. The WEEKLY NEWS under its present name and management is therefore less than five years old, though as a consecutive weekly publication it is now in its twentieth year. The CHICAGO WEEKLY NEWS takes a corresponding field among weekly newspapers so that occupied by the DAILY NEWS among dailies. It gives the news of the world in condensed yet complete form. Its Chicago market quotations are especially complete and trustworthy. That the CHICAGO WEEKLY NEWS has been correct in its judgment of the requirements of a large class of readers of the weekly press is best evidenced by the extent of its circulation, which aggregated in the month immediately preceding the date of this writing, 202,053 copies, or a weekly average of 50,513 copies. The subscription price of the WEEKLY NEWS is but SEVENTY-FIVE CENTS per year, postage included.

The phenomenal success of the CHICAGO NEWS in both its DAILY and WEEKLY ISSUES has been achieved by observing that fundamental principle of offering the best article of its kind in the market at the lowest cost to the purchaser. The CHICAGO NEWS is cheap only in price. The character of its news service is unsurpassed. It is a member of the Western Associated Press, and in addition to the unrivalled news service furnished by this Association, it enjoys the exceptional advantage of its own special telegraphic wire from Chicago to Washington and New York on the East and to Milwaukee and St. Paul on the North. Giving all the news through reportorial and telegraphic failities unsurpassed by those of any other Chicago paper, it commends itself to all classes in the community, to rich and poor alike, in that it offers an absolutely complete record of the news of the day in concise form, without the needless verbiage and amplification which render so many metropolitan journals "a weariness to the flesh," while its price brings it within the reach of all classes. It is a paper for the times.

CASTORIA

for Infants and Children.

Castoria promotes Digestion and overcomes Flatulency, Constipation, Sour Stomach, Diarrhœa, and Feverishness. It insures health and **natural** sleep, without **morphine.**

"Castoria is so well adapted to Children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D., 82 Portland Ave., Brooklyn, N. Y.

What gives our Children rosy cheeks,
What cures their fevers, makes them sleep:
'Tis Castoria.

When babies fret and cry by turns,
What cures their colic, kills their worms,
But Castoria.

What quickly cures Constipation,
Sour Stomach, Colds, Indigestion,
But Castoria.

Farewell then to Morphine Syrups,
Castor Oil and Paregoric, and
Hail Castoria!

CENTAUR LINIMENT—an absolute cure for Rheumatism, Sprains, Burns, Galls, &c. The most Powerful and Penetrating Pain-relieving and Healing Remedy known to man.

PARSONS' PURGATIVE PILLS

MAKE NEW RICH BLOOD,

And will completely change the blood in the entire system in three months. Any person who will take 1 Pill each night from 1 to 12 weeks, may be restored to sound health, if such a thing be possible. An English Veterinary Surgeon and Chemist, now traveling in this country, says that most of the Horse and Cattle Powders sold here are worthless trash. He says that Sheridan's Condition Powders are absolutely pure and immensely valuable. Nothing on earth will make hens lay like Sheridan's Condition Powders. Dose, 1 teaspoonful to 1 pint food. Sold everywhere, or sent by mail for 8 letter-stamps. I. S. JOHNSON & CO., BOSTON, MASS.

MAKE HENS LAY

Rheumatic SYRUP.

The Greatest Blood Purifier Known!

RHEUMATISM CURED. SCROFULA CURED. NEURALGIA CURED.

ROCHESTER, N.Y., Apr. 6, '8. Rheumatic Syrup Co.: Gents: I have been a great sufferer from Rheumatism for four years with different kinds of Scrofula, as some from childhood, and have tried six years and hundreds of the sarsaparillas, for scrofula, as some from childhood, and have tried yesterday Rheumatic Syrup I concluded to give it a trial in my ill. I commenced taking your medicine, and I cheerfully say Syrup. After taking it a short time I found that I have been greatly benefited, to my surprise it began to have relief, no pain since using it. I feel fitted by its use. I can walk help me. Continuing its use a fourth bottle, I think it the best with entire freedom from pain, few weeks. I found myself as remedy I have ever heard of for and my general health is very well as ever. As a blood purifying the blood and for the much improved. It is a splendid remedy for the blood and debilitated system. E. CHESTER PARK, M.D.

FORT BYRON, N.Y., Feb. 2, '8. Rheumatic Syrup Co.: Gents: Since November, 1877, I have been doctoring for three years with different kinds of Scrofula, as some from childhood, and have tried yesterday Rheumatic Syrup I concluded to give it a trial in my ill. I commenced taking your medicine, and I cheerfully say Syrup. After taking it a short time I found that I have been greatly benefited, to my surprise it began to have relief, no pain since using it. I feel fitted by its use. I can walk help me. Continuing its use a fourth bottle, I think it the best with entire freedom from pain, few weeks. I found myself as remedy I have ever heard of for and my general health is very well as ever. As a blood purifying the blood and for the much improved. It is a splendid remedy for the blood and debilitated system. MRS. WM. STRANG.

PALMYRA, N.Y., March 2, '8. Rheumatic Syrup Co.: Gents: I have been a great sufferer from Rheumatism for four years with different kinds of Scrofula, as some from childhood, and have tried yesterday Rheumatic Syrup I concluded to give it a trial in my ill. I commenced taking your medicine, and I cheerfully say Syrup. After taking it a short time I found that I have been greatly benefited, to my surprise it began to have relief, no pain since using it. I feel fitted by its use. I can walk help me. Continuing its use a fourth bottle, I think it the best with entire freedom from pain, few weeks. I found myself as remedy I have ever heard of for and my general health is very well as ever. As a blood purifying the blood and for the much improved. It is a splendid remedy for the blood and debilitated system. W. B. CHASE.

ENTERED AT THE POSTOFFICE AT TECUMSEH, MICHIGAN, AS SECOND CLASS MATTER.

TECUMSEH, MICH., SEPT. 27, 1883.

Our "boss" has gone away this week. Hay fever struck him and away he started for Petoskey. We expect him home Saturday. He has written several letters, but all so filled with fish stories that we dare not risk the reputation of the paper by using any of the matter for publication. We would respectfully warn the readers of the paper to look out for him for a week or so after he gets home as the following extract from one of his letters will plainly show. Dated Traverse City, Monday, 11:59 P.M.:—"Dear Boys: This is the country for hay fever patients, fun and good looking girls. I saw O. P. Bills at Mackinac Island, and you just ought to see him. He will weigh 200 lbs. and has a fresh new crop of hair all over the top of his late bald head." This is as far as we dare go on this chapter, as his mind began to wander a little, and he begins to speak about some different kinds of mineral water. "Astonishing how many good looking ladies stray up so far north." What an effect they seem to have on his sosedate-at-home-friend Bills, &c. "I met A. J. Sinclair, of Adrian, at Petoskey, and you wouldn't know him up here. Some way he seems to be a changed man, all he talks about is church fairs and horse races. He and I went fishing the other day—" but here we have to break off again. We had no idea that just a plain ordinary printer could get up such a fish story as the "boss" gave us on one side of that sheet of note paper, but probably Bills and Sinclair put him up to it. But in conclusion he says: "Boys, after all old Lenawee Co. beats the world, and I almost envy you at home in that little village of Tecumseh, with nothing to do but get out the old HERALD and a few other little items of work that are just as a little pastime for you." If it hadn't been for this last clause we don't know as we should have consented to have made any of his private correspondence public, but when he has such a kind brotherly feeling for us, is there any excuse for our not trying to do all in our power to reciprocate in every way possible?

The Grand Salvation army of America seems to fare a little rough for some reason. Some bad boy of Adrian throws stones and puts out the lights with which, in the darkness they try to show their painted banners. At Hillsdale the city marshall does not seem to take to their particular mode of praising God, and insists that parades and disturbances of all sorts shall be stopped. A branch of this concern also went down to Blissfield, but we have heard nothing of them since they left Adrian, and conclude they have either passed over Blissfield's beautiful river or have been knocked out of time by the Blissfield ball nine. In either case something has happened that their delegation has been lost. But we have a plan which if adopted by this Grand Salvation Army of America, would no doubt save them their ranks and serve to furnish them with good material at a very cheap figure. For some days past there has been working in the M. & O. gravel bank at this place a band of about 75 Italians, who resemble in looks, appearance and actions the members of the Salvation Army more than any one else we can compare them to. Both factions could be of great service to each other. The Italians could teach the old members of the Salvation Army how to live on dry bread and macaroni, while the Salvation natives could teach the hard working men the art of sponging their way through the world without labor, and the fundamental principles of both parties—dirt and unwholesomeness—could be pursued and all be happy. So if our sister city of Hillsdale will pack up her boarders, we will pack up ours, and send each faction to Adrian, preparatory to a grand test for the new water works of the latter place.

Notwithstanding the attempt in some cities to bring discredit on the new postal note, they will grow in favor with the people. In no other way can small sums be sent from one place to another, at so slight a cost.—For transmission through the mail, it is as handy as fractional currency used to be. The people will like it.

Bad Grammar.

It is said that people living in the country universally use bad grammar. Now, we are not going to fly into a rage and contradict this statement, if we do belong to the country and take a big measure of pride in all that concerns her. We are not going to gnash our teeth and tear our hair and declare that we talk as well as anybody, and that whoever says we don't, the truth is not in him. Indeed, when we remember how entangled we have often been amopt predicates and subjects, relative ronouns, participal and possessive adjectives, adverbial phrases, modifying adjuncts, co-ordinative conjunctions, and simple declarative and compound and complex sentences, we are ready to confess that it is all true—the half has not been told. Country people don't know how to talk, and what is more, don't want to know. But if we can't be grammatical may be it would be best to be as grammatical, as we can. There is no hope to reform the old sinners; we have walked in our ungrammatical ways till any departure therefrom would be like an expulsion from Paradise; but let the children be taught to talk. A former school teacher, now a mother, looks back and regrets that she did not teach the law of language more effectively. She acknowledges having taught the text-book with great faithfulness, for she loved the study, but she allowed the errors of her pupils to go uncorrected. She was afraid of wounding their feelings, and did not realize that to speak correctly is the most important end to be obtained in the study. Now that she is a mother, she would be glad for her children to have more thorough conversational drills at school than she herself enforced when in the capacity of a teacher. It is even thus, when it is too late, we see the error of our ways. If teachers could see the importance of enforcing the correct construction of sentences in youth, they could do much toward correcting the bad grammar of country children which they acquire from the rough-and-tumble language of home, and be potent agents in the purification of the spoken English language. If the study of grammar is irksome to them, and they cannot comprehend the rules and application as readily as a mature mind, they can be taught the practical part, and a more thorough understanding of the whys and wherefores will be unfolded to them in the ripening years to come.

Host and Guest in England.

The universal deference paid to a man's right to himself in England makes social duties as well as social pleasures far less onerous than they are with us. In America the relation of host and guest is a double slavery. The host has the comfort and amusement of his guest so painfully at heart that he often becomes his officious slave for the time being, while the guest, unable to refuse his host's continual and pressing offers of indiscriminate kindness, becomes in turn the slave to his host's notions of amusement. He either has blindly to follow out his host's programme, or has to rack his own brain to furnish the latter with opportunities to show him attention. The typical American entertainer cannot leave his guest alone; with the very best and most friendly intentions in the world, he begins by imploring him to "make himself thoroughly at home," and immediately proceeds to make his house as little like home as lies within human power. "What would you like to do today?" or "Would not you like to, etc., etc., to day?" are the standard breakfast-table questions.

In England hosts let their guests do just what they please. Go to spend a week at an Englishman's house and you may be sure that your host will not put himself out for you in the least, unless you expressly desire it. Everything in the house goes on as usual, just as if you were not there. But, per contra, the house and all that is in it are practically yours while you stay within its walls. Your host puts his servants, his wine-cellar, his larder, often his horses and his game preserves absolutely at your disposal. You are at liberty to act, and are expected to act, precisely as if you were in your own house. You can order a sandwich, a bowl of broth, a glass of wine or spirits whenever you please; you can announce your intention of going off shooting the very morning after your arrival, and guns and dogs are waiting for you. It is the commonest occurrence for men, arriving in the afternoon at a friend's house, to send their dress suits down to the laundress to be pressed just before dinner. In England guests are not only told to "make themselves at home," but are actually allowed to do so.

Saved by an Elephant.

An old "showman" tells the following exciting story of his experience when connected with a well-known menagerie during an engagement at Smithland Kentucky. "After the exhibition was over," he says, "I passed into the menagerie to talk to the watchman. From some cause he was absent from his post, and I walked across the amphitheater toward my old friend the elephant to give him an apple, for we were the best of friends. He was one of the largest elephants I ever saw, and was as good-natured as he was large.

I was about half across the ring when I heard a growl, and looking around, saw to my horror one of the lions out of his cage and approaching me in a crouching manner, ready for a spring.

I thought of a thousand things in a moment, and among them I must have regretted perpetrating so many old worn-out jokes at the performance that night. I had sufficient presence of mind to realize my dangerous situation and to know that it required the utmost caution to extricate yself from it.

One hasty motion on my part and I uld be in the jaws of the monster. I that my only hope was the elephant. could reach him, but he was chained the foot and could not reach me.

Nearer and nearer came the lion, waving his tail in a manner that meant business. If I turned my back, he would spring; if I took my eyes from him, I was lost.

It was a terrible moment. I glided backwards swiftly as I dared. I had another fear. I feared stumbling backwards, and knew if I did fall, I would never rise, but that where I fell I would make a meal for that lion.

As I neared the elephant I saw that the lion understood my movements and, fearing he, would be balked of his prey, he prepared to bring the matter to a crisis. I then saw that I had but one hope, to rush with all my speed to the elephant.

I think I must have jumped twenty feet when I turned, and I know the lion jumped thirty, but he just missed me.

How I completed the race I do not know. I only knew that the elephant's trunk was around my waist and he was lifting me up on his head. I only knew I was saved.

DIPHTHERIA!

THE PROSTRATION which follows Diphtheria, and the persistency with which it clings to the patient, are well known to all who have had any experience with this terrible disease.

The following letter shows how the restoring and invigorating properties of

Hood's Sarsaparilla

overcome it, and how by vitalizing and enriching the blood it neutralizes and eradicates the poisoned matter from it, bringing to the convalescent the color, life and vigor of robust health.

LOWELL, MASS.

MESSRS. C. I. HOOD & CO.: Gentlemen—My little girl had the diphtheria last April. The disease left her very weak, blood poor, with no appetite, and she could not seem to rally from its effects. HOOD'S SARSAPARILLA was recommended by a neighbor. After she had been taking it a few days we noticed a change for the better—she began to eat with a relish. It seemed to take out the poison the disease had left in her blood, the change being very noticeable in her face. She took it two months and truly regained her health, much to our delight. We now recommend HOOD'S SARSAPARILLA with a great deal of pleasure. Very truly yours,
J. R. SMITH,
19 Butterfield Street.

"That Extreme Tired Feeling."

"The first bottle has done my daughter a great deal of good; her food does not distress her now, nor does she suffer from *that extreme tired feeling* which she did before taking HOOD'S SARSAPARILLA."

Sold by all druggists. Price $1 a bottle or six bottles for $5. Prepared by C. I. HOOD & CO., Apothecaries, Lowell, Mass.

Hood's Tooth-Powder, Only 25 Cents.

THE AMERICAN PEERLESS DICTIONARY AND Information FOR Everybody.

A BOOK THAT SHOULD BE IN EVERY HOUSE.

After years of labor, and the expenditure of a large sum of money to writers and compilers, we are now ready to offer THE MOST USEFUL BOOK IN THE WORLD! The press, teachers, and professional people throughout the country pronounce it to be the BOOK OF BOOKS. It contains upwards of 50,000 WORDS, with their definition and pronunciation, according to Webster and other recognised authorities; a large number of additional words and definitions in general use, NOT TO BE FOUND IN ANY OTHER DICTIONARY; a large collection of Words, Phrases, Proverbs and Quotations from the Greek, Latin and Modern Languages; a list of Abbreviations used in ART, SCIENCE AND LITERATURE. Population of Towns and Cities in the United States, and other interesting statistics taken from the census reports of 1880. Insolvent, Assignment and Homestead Laws; American Wars; the Dominion of Canada; History of the United States from its discovery to the inauguration of Chester A. Arthur as President, and hundreds of other items of interest are to be found within the covers of this ENCYCLOPEDIA OF USEFUL KNOWLEDGE. It contains a mine of information for everybody. This book is handsomely bound in cloth, and embossed in GOLD, containing 542 PAGES PROFUSELY ILLUSTRATED. We propose to send you one of these valuable books, by mail, all shipping charges prepaid, to any address, on receipt of only ONE DOLLAR, provided THIS ADVERTISEMENT ACCOMPANIES YOUR ORDER, and that you agree to exhibit it to your friends after receiving it. We further agree, that when you order you will send us the NAMES AND ADDRESSES OF FIVE PERSONS in your neighborhood, whom you think would be pleased to receive one of our mammoth Catalogues free, we will HANDSOMELY EMBOSS YOUR NAME IN GOLD ON THE COVER OF THE BOOK (as shown in engraving where John Smith's name is). No other syllable firm ever made such a offer as the above. A more APPROPRIATE PRESENT could not be made to any friend, either lady or gentleman than this book. Order as soon as you can and avoid the great rush. IN ORDERING, STATE NAME YOU WISH ON COVER. What more appropriate present could you make a friend than this useful book, with their NAME ON THE COVER IN GOLD? AGENTS can make, in their own location, from $5 to $10 an evening, or $60 to $70 a week, if they devote their whole time to selling our goods. Send your name and address on a postal card for our confidential Agent's Circular and Large Catalogue full of articles you want and can sell. DON'T ENGAGE ELSEWHERE UNTIL YOU HEAR FROM US. Address,

H. C. WILKINSON & CO., Publishers, 105 & 107 Fulton St., New York.

SPECIAL NOTICES.

Chilly nights.

Hickory nuts will not be plenty.

Notice the advertisement of Jas. A. Eaton & Co., of Adrian and see what this firm does in the way of bargains in dry goods.

The ladies of St. Peter's church will give a social at the residence of Mrs. Corey, on Logan st., next Wednesday evening, Oct. 3. All are invited.

We are very sorry to hear that Mrs. Jerry Root is very sick, but to-day she is reported better, and strong hopes are entertained of her speedy recovery.

Card of Thanks.

We wish to return our thanks to those of our friends who have so kindly assisted us in our recent afflictions.

MRS. N. R. MERRITT,
E. H. MERRITT.

TECUMSEH, Sept. 25th, 1883.

Resolutions adopted by Tecumseh Lodge 870, Knights of Honor in regard to the death of Willis Merritt:

Death has a second time invaded the ranks of our Lodge, removing our esteemed brother, Willis Merritt, its first Past Dictator, and always active in the promotion of its welfare. He was our first representative to the Grand Lodge, of which he was elected Grand Vice Dictator in 1881 and Grand Director in 1882. He was chosen by the Grand Lodge to represent it in the Supreme Lodge at Baltimore in 1882 and again at Galveston in 1883

Prompt and efficient in the performance of every trust committed to him he speedily won the confidence and high regard of every member of the order.

In his death we have to mourn the loss of a trusted counselor in our Lodge, the leadership of a competent citizen and the genial presence of an accomplished member of the social circle.

Resolved, That we tender our sympathies to the widowed Mother and other kindred of our deceased brother, and that a copy of this memorial be spread upon the records of our Lodge, and published in the Tecumseh Herald and Knights of Honor Reporter.

JACQUINE or PASTE AND DIAMONDS.

On Thursday evening Oct. 18th, our citizens will have the pleasure of witnessing the play of Jacquine, or Paste and Diamonds, at the Tecumseh Opera House, by the Mattie Vickers Combination. We clip the following from the Grand Rapids Leader of the 22nd. inst:

Those who stayed away from Powers opera house last night missed, as was predicted by THE LEADER, one of the most pleasing entertainments of the season. Those who were present will certainly verify this assertion, if their enthusiasm during the progress of the play be the standard of their sentiments. The play, in itself, is rather above the level of the mediocre merit fo most "specialty" pieces. It is, in fact, the string used in tying up the flowers which go to round out the boquet of Miss Mattie Vickers' versatile talents and many graces. Occasionally room is afforded for the presentation of a really fine bit of acting on the part of Mr. Chas. Rogers, who as "Dick Vinton," a bill poster, earned the hearty good will of the audience by his singularly unaffected style, versatile imitations, and very even characterization. J. W. McConnell, as "George Craver," also made a good impression. Geo. W. Pike gave a lively conception of a theatrical manager, Jas. W. Keene did the tramp character effectively, while Miss Thornton and Miss Roberts looked and dressed their parts well. The interest of the play, however, centres on Miss Mattie Vickers, whose sprightly and artistic acting last evening more than confirmed the good impressions previously made unon Grand Grapids theatre-goers. Miss Vickers is naturally an actress—a born soubretta—full of life and vim, dash and audacity. She is full of form and fair of feature, possesses intelligence, discrimination and wonderful vitality. Her acting is a fine sample of the Maggie Mitchell school, and yet has strong traits of originality. She is rather bright than pretty, and it is upon the spirit of her delineation and her charms of manner, rather than upon eyes, mouth, chin, nose or hair, or altogether, that she depends for favorable impressions. She sings sweetly, powerfully, and with expression, and is a beautiful dancer, and an accomplished dialectician. In her character specialties, and notably after Modjeska as Camille, and as the German flower girl, she created a profoundly favorable impression. The piece, while letting much fall upon the shoulders of the star, is yet replete with humorous situations, dramatic effects, and stirring contretemps, and concludes with the conventional joyful denouement.

THE TECUMSEH HERALD.

TECUMSEH, MICH., SEPT. 27, 1883.

LOCAL AND PERSONAL.

Shed your straw hat.

Fall seeding is nearly done.

The fed houses in the village are nearly empty.

Washtenaw county has an are of 720 square miles.

The wood market is beginning to show faint signs of life.

The M. & O. depot at Battle Creek is now ready for occupancy.

When regular trains will be running on the M. & O. is still a mystery.

The job department of the HERALD is turning out lots of work these days.

There was fifteen tons of celery shipped from Kalamazoo last Friday.

Many of the maple leaves are turning to crimson and gold, a reminder that coal bins and wood piles should be replenished.

George Sutfin left Tecumseh last Monday, accompanied by officer Jim Cole, for a five months visit in a State institution at Ionia.

Jackson Patriot: One of the largest peach orchards of this county, containing eighteen hundred trees, will yield this season, not to exceed half a peck of peaches.

E. V. DePuy and wife to-morrow go to Rochester, N. Y. Vance is to attend the New York State Fair where he will introduce Hite's Heat Fender and Fruit Dryer combined.

Those who like to trip the light fantastic toe should remember the Dedication party of Co. C, at their new armory on Friday eve., Oct. 5th. A grand good time to all who attend.

An exchange appropriately remarks that it is pretty safe for farmers to conclude that when a dealer ceases to advertise he does not ask for their custom. He is either out of goods or does not care to sell.

It is surprising to see so many people that attend a circus merely to take the children and let them see the animals. It generally takes about four grown people to accompany one child. Queer, isn't it?

Vennor says: "The autumn will be wet, mild and open. No snow at end of year. A rather severe October, but open weather afterward. January, 1884, wet and open. Usual warmth for winter of 1884. No ice, or hardly any."

Get married, young man, and be quick about it too. Don't wait for the millenium, hoping that the girls would turn to angels before you would trust yourself to one of them. A pretty thing you would be along side of an angel, wouldn't you.

During the month of August, 1,025 messages were received and transmitted over the state telephone at the central office in Ann Arbor. During the same time the Adrian office handled 1044 messages and the Tecumseh office 630.

N. W. Ayer & Son's American newspaper annual for 1883 has been received. It is a neatly gotten up compendium of facts relating to the newspapers of the country, and gives a very full and complete record. It is probably one of the best authorities published on the subject.

H. Lighthall, proprietor and manufacturer of the Starr Wind Mill, at Chelsea, has just sold a fine wind mill to John Fisher, between Tecumseh and Clinton. Any parties wishing wind mills would do well to examine this mill or one of the many others put up in this section by this company before purchasing.

The state fair closed last Friday. It was both in point of exhibition and of receipts, one of the most successful ever held by the society. The receipts were more than $6,000 in excess of those of last year In the prize drill Friday the Detroit City Grays took the first prize, the Jackson Guard, an independent company, second, the Detroit Light Guard third, Co. G, M. S. T., of Jackson, fourth, and the Detroit Cadets the fifth prize.

Lavern Wheeler will open his second season at the opera house on Tuesday evening next, when he will give by special request, his "Ramble through Ireland and England." Mr. Wheeler has added a number of Irish and English views to his collection since opening here last fall, and his new comic pictures will "collar the constable." Many of his comic pictures are of his own design, and his illumination of popular songs are sure to "take."

John R. Clark has returned from a six weeks temperance campaign in New York. A temperance circuit has been organized, including several towns in Western New York, and camp meeting enclosures built at each town. Each meeting is held from six to seven days, including a Sabbath, and three services are held each day. Several speakers are in attendance at each meeting. It is called the "St. John Circuit," and comprises nineteen camps. The grounds are leased for five years. Mr. Clark will remain at home but a few days. He will return to Western New York in October, and will lecture in the city of Brooklyn during the whole of November.

The James block is getting a new roof.

Quite a number of our citizens are attending the Chicago Exposition this week.

Rev. N. A. Saxton, of Manchester, is in town to-day to attend the funeral of Deacon A. McNeil.

B. Mincer has no partners or agents and all persons claiming to be such are frands and are deceiving the people.

Tuesday evening Mr. & Mrs. Ed. Hough entertained a few of their friends very pleasantly at their home on Chicago st.

A force of men on the M. & O. are at work tearing up the iron rails and relaying the same with steel, between Monteith and Allegan.

All kinds of weather during the past week, from nearly as warm as we have had during the past season to "pretty cool I thank you."

The catalogues for the Library Ass'n of Tecumseh are now printed, and the rooms will be open every Saturday from 3 to 6 o'clock P.M., for the drawing of books.

The fare from Indianopolis to Chicago is now 5 CENTS, and each passenger is entitled to a chromo. The distance is a little over two hundred miles. This is the lowest rate ever known for the same number of miles.

Last evening Mrs. Dunn gave a very pleasant tea party to a few friends and relatives in honor of Mrs. Reynolds, of California, and Mrs. Graves, of Milwaukee. Each guest was furnished with a pretty button-hole bouquet.

We understand that the dance to be given by Co. C, M. S. T., Friday evening Oct. 5, will be a grand affair. The Monroe brass, as well as string band will be in attendance and discourse music on the street in the afternoon.

In the appropriate column is announced the death of Mrs. E. H. Merritt, of Big Rapids, formerly of this village. Mrs. Merritt had scores of friends who will deeply regret to see such notice, besides her many near relatives living in Tecumseh.

A few days ago D. Ulrich, of Freedom, was out hunting when his gun exploded filling his face with powder. The stock of the gun remained in his hands but the barrel could not be found, and he thinks himself fortunate in escaping what might have been a serious injury.

Manchester is having a lively time trying to settle upon a site for its new town hall. Some of the members of the council seriously object to the site selected by the building committee and they may object so vigorously that the plan of building the hall will have to be given up.

Miss Garlic, who has been a guest of Mrs. Geo. S. Tiffany for several weeks, left for her home in Canada, yesterday morning, many regretting friends bidding her adieu. Mr. & Mrs. Tiffany accompanied her as far as Detroit, where they will visit friends and the Art Loan for a few days.

This week we make the announcement of the first entertainment to be held in our Opera House this season. Rumor reports a good entertainment, and we trust it may be so. We see no reason why the Tecumseh Hall Association should not bring some good attractions here the coming winter.

The third edition of Michigan and its Resources has reached our table more full and complete in its descriptive detail of Michigan and its resources than either of the other two editions that preceded it. Send for a copy if you want to see it. Address, Commissioner of Immigration, Detroit Michigan.

Mr. and Mrs. Alva Raymond, of Tecumseh came out on Saturday last to visit D. C. Waite, a relative who resides about three miler south of the city, in the township of Summit. Mr. Raymond noticed that his wife acted rather strangely coming over on the train, but thought little of it at the time. Soon after their arrival at Mr. Waite's, however, she had a severe stroke of paralysis, and now lies in a critical condition there, with the chances against her recovery. She is attended by Dr. C. H. Lewis, and on Monday her family physician from Tecumseh, was in council.—Jackon Patriot, 26.

Dr. R. B. House was called in attendance last Monday and now reports her condition somewhat better.

Marshal Statesman: Chief Engineer J. A. Latcha, of the M. & O. was in the city a short time last night and talked over matters of business with his chief assistant, Wm. H. Boeh. We understand from Mr. Boeh that as the owners of land on the proposed site for the depot near the hoe factory will not dispose of it at reasonable figures, a series of condemnation suits will soon be commenced and the actual value of the property ascertained. If not too high the company will purchase at the figures, and commence the erection of the depot and freight house. The site spoken of is chosen in reference to the northern road crossing at this point rather than to natural advantages, for over $4,000 will have to be expended in grading. The necessity for delay was deprecated by Mr. Latcha, as the company is as anxious as anybody to have the matter settled.

Mrs. C. S. Patterson is enjoying a visit among friends in New York city.

Mrs. Chas. Kilburn is now visiting friends in Yates Co., New York, and Charlie is now a "widder."

Miss Emma Smith returned to her home in this village on Saturday last, having spent the past three months with eastern friends.

The annual pew renting at the M. E. church will occur next Wednesday, Oct. 3d, from 2:30 until 6 o'clock P.M. The Ladies Aid Society will serve tea at 6 o'clock in the basement.

We chronicle the death of Deacon A. McNeil, which occurred at his residence in this village at an early hour yesterday morning. Mr. McNeil has been a life long member of the Universalist church, and an honest man who has toiled early and late for his God and his family. His funeral is at 2 o'clock this P.M.

Another crank producing puzzle has been invented, which is called "the sixty-four puzzle." The puzzle consists of sixty-four blocks, eight on a side, numbering from one to sixty-four, and when correctly arranged the figures on the blocks will add 260 horizontally, perpendicularly or diagonally. The blocks are black and white alternately and can be used as a checker board.

Fred L. Eccles, who has occupied the position of office clerk in our employ for some time past, started yesterday for Deadwood, Dakota, in company with his sister, Mrs. Bullock. He will accept a position with Starr & Bullock, of Deadwood. Fred is a good accountant and a faithful employee, and although we dislike to have him leave us, wish him all success in his far west home.

The Cleveland Herald's corrosponden at Kelly's Island, reports that the grape crop of all the islands this year will be the nearest a failure thay have had since 1865. The catawba grape is estimated at not to exceed 250 pounds to the acre, or say less than one-tenth of a crop. Concord, next in importance, will be a little over half a crop. Deleware comes next, with an average crop.

Andrews Bazar for October, just received, is a striking example of what push and a knowledge of the people's needs will do. This number is the third published under the new management and shows a great improvement over previous issues. The illustration on the first page is equal to any published in the highest priced paper of its class. The ladies of America will always be well dressed if they take this sterling fashion journal as a guide. Its low subseription price, only $1 a year, is bound to make it popular. Every subscriber is entitled to a choice from a list of valuable premiums, 67 in number. Sample copies 10c. Send for it. The American Bazar Co., 202 Broadway, N. Y.

Mr. Barney McAuley, who appears in his great and popular play, "A Messenger from Jarvis Section," at Adrian to-night, is no new candidate for histrionic honors, but an actor who, by hard study and innate talent, has won a front rank in his profession. The play itself has proven a very popular one, the character of Uncle Dan'l allowing free scope for the display of Mr. McAuley's special talent. In this connection, we quote from the N. Y. Tribune: "Mr. McAuley is an actor of large experience—entirely sincere in spirit and straightforward and effective in his professional methods. He invests the play with a personal force and interest, so that the spectator comes away with a pleasing remembrance of downright manliness, humorous craft, many homelike attributes and associations, and considerable theatrical ingenuity."

Adrian Record: Captain Shorter, of Salvation Army fame, is now holding forth in jail at Hillsdale. He organized an army at that place, and created such a furore that the marshall notified him last Wednesday morning "that if he came out on the street with his mob again he should arrest him." Shorter replied that "there were not devils enough this side of h—l to put him in jail," and came out again that night. The marshal was prepared, and when the army were holding forth on the street corner, "he went for them." Shorter knelt down and began to pray, and for three quarters of an hour kept the marshal waiting. As soon as he arose he was ordered to come along, but he refused, and then began one of the most disgraceful rows ever seen in Hillsdale. Shorter's backers made an assault on the marshall in force, and he was struck with clubs, canes, bricks and anything that came handy, but he hung to his prisoner until help arrived, and finally bore him triumphantly to jail, and it was a hard looking army he left behind him; scarcely one but what had a bloody nose, black eye, or cracked skull to show for his share in the battle. The women fought like wild-cats, and had to be handled pretty roughly before they would subside. The army is now in a state of quiescence awaiting the release of the valient Captain, and healing up their sore heads, preparatory to another tussel with the devil. It is evident that Hillsdale people do not believe in the Salvation Army.

COUNTY CONDENSATIONS.

Autumn days.

Scarlet fever at Morenci.

Fair this week at Adrian.

A big dry goods store is to be opened at Adrian soon.

The Morenci fair commences on Tuesday, Oct. 2d.

Sigler, of Adrian, took the first premium at the Toledo fair on grapes.

Hiram Osgood of Medina tried to bleed himself to death one day last week.

C. F. Cleveland, of Adrian, will act as oil inspector for the present in place of Capt. Howlett, deceased.

After Oct. 1st, Morenci people must get their meat on Saturday or go without their cutlets and chops on Sunday.

Henry Rhinemiller, of Fairfield, was dragging in the field, when his team ran away, jerking him upon the drag and cutting his face badly.

The Adrian Times says the colored posters advestising the Lenawee county fair are the worst typographical enormities ever seen in that city. To all of which we say amen.

The other night some unregenerated rascal threw a stone and hit one of the Salvation soldiers, at Adrian. "Blessed are they which are persecuted for rightousness' sake."

Morenci Observer: Now that the corn crop is regarded as an almost entire failure, several of our dealers will import the cereal for home use, and a large business may be expected in that line.

Morenci Observer: Miss Honey is the name of the new lady clerk at Crabb's store. With Honey and Combs in the concern the establishment is fairly entitled to appellation of the "bee hive store."

Deerfield Record: Blissfield went to Tecumseh, on Wednesday, and downed them at base ball by a score of 8 to 7. Blissfield is more elated over the result than when their gold mine or gas well was first discovered.

Clinton's royal templars deserve a passing notice at least. The society owes nobody, and has a treasury that is by no means empty. The instance of a society being thus situated is so seldom, that when one learns the fact it is worth mentioning.

Clinton News: As Wm. P. Silvers was sitting at the dinner table last Saturday, he was suddenly taken with a stroke of paralysis. The limbs and lower part of the body became insensible of feeling, and he has been entirely helpless ever since.

The last we saw of Jehiel Davidson, he had started for home with a pick over his shoulder, and a law book under his arm. He has been appointed drain commissioner to fill the place of Frank Davidson resigned.—Tecumseh HERALD.

Two to one that "pick" was a croquet mallet.—Adrian Press.

Deerfield Record: Supervisor Munson informs us that a larger acreage of wheat is being sown this fall, than any previous season. It is a sure and profitable crop for the farmers. Deerfield township will soon be classed among the prominent wheat growing towns of the county.

A young lady of Hudson writing to a lady friend of Ypsilanti, utters the following: Beware the boy with eyes of moonlight blue, a pancake hat—hair *a la mode* frontal scoop, for he flirteth like a piece of neither raiment in the wind, and 'masheth' like a prematurely decomposed squash.

The Brooklyn Exponent says that some workmen from a section of the M. & O. road in Cambridge got into a quarrel with some country lads of that village, and a challenge was given for the gang to meet the boys next Saturday evening at the same place, and a big row was probable. Brook needs a few "hoss marines."

Two attempts were lately made to throw Lake Shore trains from the track near Ottawa Lake. Detectives Kavanagh of Toledo and Whitmore of Adrian have traced the deed to a boy named Barney Archer, aged 15 or 16 years old. He appears to be of rather unsound mind, but he ought not to be allowed the opportunity to further practice such deviltry.

Blissfield Advance: A couple of paint swindlers have been at work in the east part of the county. Thos. C. Swift signed a paper, which he supposed was a centract to have his barn painted for $12. It turned out that the paper read $208. Swift compromised by giving two notes of $75 each, but making up his mind that he had been swindled notified the sheriff. One of the rascles was arrested and is now in jail.

Hudson Gazette: The Advance will have it that, with the absence of two regular players, the Blissfield ballists beat the Hudson Chaffs, which were really a combination club from Hudson, Hillsdale, Jonesville and Adrian. Well, now if the Blissfield boys did all that (minus two of their best players) they can afford to be a little modest and lenient. It is no ordinary matter to thus vanquish four towns in one game! Our Blissfield friends may be assured that there is humiliation enough all along the line without having the thing flung up very much.

LITTLE BOY DROWNED.

A sad affair occurred at Clinton yesterday afternoon by which Charlie Palmer, a little son of John Palmer, was drowned. The little brothers, the oldest about 5 and the youngest about 2½ years old, went down to the river to fish for minnows. The little fellow, Charlie, waded out in the water, became dizzy and floated into the current. His brothers took no notice of him after he waded in and was in fact not old enough to realize any danger, and as in other play they were engaged, little realized that their brother was drowning almost before their very eyes.

Their father drove past, took the two little boys in and enquired for Charlie, but they answered "they guessed he had gone home." When at home Mr. Palmer found the boy missing and after some enquiry again returned to the river, but before he arrived, Geo. Haggart had found his body floating just below the west river bridge.

Such an accident shocks a whole community, and in such cases blame can be attached to no one. Three stout, hearty, little fellows, without one thought or care, busy as only a little child can be, with play, and joy, and laughter, but the next hour the scene is changed. One little cold, white form, and two pairs of little tear stained eyes, two young minds which in their innocence can hardly comprehend what has happened to cause such an awful change. The family weep, with nothing to comfort them, the remaining little ones are dumb with fear, and never understand why their little brother and play fellow is taken away from them. There is a stillness and feeling spread over the whole community, and 'tis hard to think "Thy will be done."

Parties who are bothered about getting sufficient water from their wells, should consult the Starr Wind Mill Co., of Chelsea, and examine their two inch tubular well.

Kensington Painting.

I would say to the many ladies who wish to learn this art that I shall close my class her this week. Any one wanting lessons please call on me before Saturday at Mrs. Yawger's, Chicago st. Terms $3.00.

CARRIE E. ROSE.

—The Detroit Diamond Fanning Mill, the best in the market only $25. Slayton & Son.

—No guess work. If you want as good flour as is made in the state, get Heck Bros. complete all roll flour.

—Call on Slayton & Son for good cooking apples. Cheap.

—Natural looking and serviceable artificial teeth can be procured at Dr. B. F. Snyder's Dental Rooms.

—You can have your decayed and aching teeth extracted at Dr. B. F. Snyder's dental rooms, without pain, by taking vitalized air.

—Spring Tooth Harrows at Snedicor's.

—Call at the yard and mill of the Tecumseh Lumber Co., and examine their stock.

—Leave your orders for Sash, Doors, blinds, mouldings, window frames, tanks, troughs, etc., with the Tecumseh Lumber Co. They will receive prompt attention.

OBITUARY.

Entered into rest after painful suffering at her home in Big Rapids at 6:30 A.M., September 22d inst, Mrs. Catharine Elizabeth Merritt, beloved wife of Edward H. Merritt. During her last illness, besides her husband, her sisters, Mrs. Rice and Mrs. Seaman were with her. She died in full possession of her faculties, and with a calm and hopeful assurance of a blessed immortality in the life of the world to come. With great patience and resignation she endured the afflictions which she well knew were working out for her a far more exceeding and eternal weight of glory. Mrs. Merritt was well known here, having been born and educated in this village. In her 19th year she was married to Mr. Merritt, her now sorrowing and bereaved husband. Here they made their home and were surrounded with many loving friends. In June, 1881 they removed to Big Rapids, where having suffered from a severe cold, received an alarming attack of hemorrhage of the lungs, Aug. 20, 1882, and although it did not prove fatal, soon unmistakable symptoms of the dread disease, consumption, manifested themselves, and on Saturday last terminated her life. On Monday her body, accompanied by weeping relatives was brought here for burial, and on Tuesday last at 2 P.M. a large concourse of friends assembled at the residence of her husband's mother, Mrs. N R. Merritt, to attend the funeral and to follow her earthly remains to their last resting place.

The appointed service for the burial of the dead was read by her former pastor, the Rev. J. Phelps, who had admitted her by holy babtism into the family of Christ's flock, had presented her to the Bishop as a candidate for the rite of confirmation, and had received her into the Communion of the Church, who now committed her body to the earth, awaiting that great day "when the earth and the sea shall give up their dead, and the bodies of those who sleep in Him shall be changed and made like unto His own eternal and glorious body, according to the mighty working where by He is able to subdue all things unto Himself."

"I heard a voice from Heaven saying unto me, write, from henceforth blessed are the dead who die in the Lord, for they rest from their labors."

AYER'S Ague Cure

IS WARRANTED to cure all cases of malarial disease, such as Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint. In case of failure, after due trial, dealers are authorized, by our circular, dated July 1st, 1882, to refund the money.

Dr. J. C. Ayer & Co., Lowell, Mass.

(Continued.)

CHAPTER II.

wonderful and mysterious curative power is developed which is so varied in its operations that no disease or ill health can possibly exist or resist its power, and yet it is

Harmless for the most frail woman, weakest invalid or smallest child to use.

"Almost dead or nearly dying."

For years, and given up by physicians of Brights and other kidney diseases, liver complaints, severe coughs called consumption, have been cured. Women gone nearly crazy.

From agony of neuralgia, nervousness, wakefulness and various diseases peculiar to women.

People drawn out of shape from excruciating pangs of rheumatism.

Inflammatory and chronic or suffering from scrofula.

Dyspepsia.

Sick-headache, nervous prostration, dyspepsia, indigestion, costiveness, almost all diseases treated.

Nature's help is

Have been cured by Hop Bitters, proof of which can be given, there is not a town in the known world.

CATARRH

HAY-FEVER

ELY'S CREAM BALM has gained an enviable reputation where ever known, displacing all other preparations. An article of unlimited merit.

CURES ROSE COLD IN HEAD QUICKLY. NOT A LIQUID OR SNUFF.

Apply by the finger into the nostrils. Will be absorbed, diffused throughout the head, and reach the diseased membrane in a few days. Relief is instantaneous. It allays inflammation, protects the membranal lININGS of the head from additional colds, completely heals the sores and restores the sense of taste and smell. Beneficial results are realized by a few applications.

A Thorough Treatment Will Cure.

Unequaled for COLD IN THE HEAD, Headache and Deafness, or any kind of mucous membranal irritation. Send for circular. By mail, prepaid, 50 cents a package; 4 stamps received. Sold by all wholesale and retail druggists.

HERALD OFFICE.

POPULAR SONGS.

Origin and Authorship of Some of the Most Famous.

Cincinnati Enquirer.

"The Old Oaken Bucket" was written by Woodworth in New York city during the hot summer of 1817. He came into the house and drank a glass of water, and then said, "How much more refreshing it would be to take a good long drink from the old oaken bucket that used to hang in my father's well!" His wife heard the remark, and suggested that it was a happy thought for a poem. He sat down and wrote the song as we have it. "Woodman, Spare That Tree," was the result of an incident that happened to George P. Morris. A friend's mother had owned a little place in the country which she was obliged, from poverty, to sell. On the property grew a large oak which had been planted by his grandfather. The purchaser of the house and land proposed to cut down the tree, and Morris' friend paid him $10 for a bond that the oak should be spared. Morris heard the story, saw the tree and wrote the song. "Old Dog Tray," of which 125,000 copies were sold in the first eighteen months after its publication, was written by Foster on a piece of brown wrapping paper, in the back room of a grocery store, where he was fond of lounging. Poor Foster's last days were extremely unhappy. He lived in New York, personally a stranger, but known to every one through his songs.

Foster's "Old Folks at Home" was the best song he ever wrote. Over 400,000 copies were sold by the firm that first published it, and the author is said to have received $15,000 for his share of the sale. The idea of writing negro melodies occurred to Foster from seeing what pleasure was given by the crude absurdities presented in his time by the minstrels. He thought he could do better. "Kathleen Mavourneen" was sold by Crouch, the author, for $25, and brought the publishers as many thousands. Crouch was hopelessly improvident, and in his latter days became a tramp. When Mad. Titiens was in this country a number of years ago she sung "Kathleen Mavourneen," in New York, when a dirty tramp introduced himself as Crouch, was recognized, and thanked her for singing the song so well. "Bonnie Doon" was the only English song that the Emperor Napoleon liked. He detested all the music of Britain, and at St Helena said that it was the only tolerable composition the English had ever produced. "I'll Hang My Harp on a Willow Tree," is said to have been the composition of a young English nobleman who had fallen hopelessly in love with the Princess Victoria. When she succeeded to the throne he gave up in despair and wrote this famous ballad. "Annie Laurie" is 200 years old, and was the production of a man named Douglass to celebrate the praise of a girl named Laurie. The lady afterward, with true feminine inconstancy, deserted the man who made her famous and married another man named Ferguson.

The Mining Prospector.

The genuine prospector, a man of medium height, a rather lightly, but firmly knit frame, age anywhere between 25 and 35, a fine face, gentle but firm, bronzed with exposure to many a fierce storm, stamped with that unmistakable expression impressed on the features of those who, day after day, stand face to face with danger and death, a face that a girl in distress will turn to without hesitation; that a rowdy will turn from with fear and hatred. His first movement betrays the frontiersman. A rapid piercing glance around the park; neither human foe nor edible game being in sight, his next glance is to the sky. Apparently satisfied with the inspection, his first care is to attend to his jack, or "burro," to use the mountain phrase; then, having picketed the burro with a drag on the end of his rope which will effectually prevent his straying from that park, he turns to his fire, blows it into a blaze, puts on his coffee pot to boil, and then to his toilet. Three inches of comb, two square inches of looking glass, a coarse towel, a piece of yellow soap, a tooth brush and the toilet table is furnished. Now follow him to the dressing room; a dozen steps down the creek takes him to where a little dam has formed a crystal pool. Down on the moss covered rocks goes the broad, white hat, the collar of the blue flannel shirt is rolled back disclosing the neck and chest of an athlete. Oh how cold, how refreshing, how invigorating that water is fresh from the snow wave. The toilet finished, breakfast is the next consideration. The coffee having boiled is placed on one side to settle, the bacon fried, the batter for a pile of "slap-jacks" beaten up, the fries one of the abominations, thrown up into the air and catching it on the reversed side with the precision of an old timer, and now he plunges into the tent and emerges with a "shack box," or in English, "mess chest," from the innermost recesses of which he dives, and from conglomerate one of cartridges, buckskin thongs, steel traps, needles and thread, sailor's palm, mineral specimens, three or four letters, a series de Library book very worn and dirty, a pair of Mexican spurs, odds and ends of strings etc., produces a small canvas sack of salt, dole of sugar, half a gallon can of syrup, and breakfast is ready and the table is set. To dispatch the meal takes but a little while. Short as the time is, however, it is not wasted, for observe the upturned face, the eager searching glance, peak after peak is scanned, formation, color noted, until apparently satisfied with the inspection. The meal is finished, plate and cup washed and put away; the morning pipe is lit and smoked while he goes through his pockets to see if his outfit is complete, matches, compass, knife, magnifying glass, all safe. Catching up the burro and picketing him on fresh grass, finishes the morning chores and he is ready for the day's work.

An Iron Watch.

S A Lattimore in The Continent.

At a recent fair held in Worcestershire, Messrs Crowther Brothers & Co. exhibited a watch, in perfect running order, constructed wholly of iron. The object of this curiosity was to illustrate the malleability of iron and its consequent adaptation to a wide variety of novel uses, especially as an advantageous substitute for glass in a number of domestic articles. Such articles when made of thin iron plate possess the two desirable properties of strength and lightness, while elegance of form is far more easily attained. Such articles may be easily electro plated with silver, gold, nickel, platinum, or adorned with all the beauty of the enameler's art.

Rest, Sleep, Worry and Work.

Philadelphia Press.

Over-work will shorten life at any period. Children should be brought up to play, not to work. Work should begin only when all the faculties, mental and physical, are developed. Brain-work will kill more quickly than manual labor. Three hours of brain work are equal to seven hours of manual labor, in the consumption of vital tissues. Men should work six days and rest one. Sleep is necessary to all persons. We can scarcely sleep too much. Young people should sleep seven or eight hours in every twenty four. Children should sleep as long as they want to, ten hours at least. Worry kills more people than work.

Nearly a Terrible Loss.

It was at the shore, and a gentleman was chatting on his cottage porch with two or three guests. His pretty daughter came up from the beach, just out of the surf. "O papa!" she exclaimed. "Only think, I was nearly drowned!" Papa, pathetically to his friends, "Gentlemen' do you hear that? I have spent more than five thousand dollars on that girl's education, and to day she was nearly drowned."

Yaller Developments.

Sandersville (Ga.) Mercury.

An old lady from one of the rural districts astonished a clerk in one of the stores by inquiring if he had any "yaller developments sich as they did up letters in."

LET US SMILE

A Good Healthy Smile Legal Tender Anywhere.

It is the Medicine That We all Like to Take.

Peck's Sun.

A paper called The Golden Rule, has an article on smiles which contains the following:

"The world is suffering for smiling faces. The age is too intense in the business direction, too flippant in the social lines, too sarcastic in its political tendency, too aimless in its religious life, too heartless in its literature. The world needs more smiles and fewer frowns, more sunshine and less lightning. It costs nothing to allow a smile to play restfully upon the features when trading or voting, when talking or reading. It pays infinitely more than it costs in friendship, in finance, in individual growth. We can win more people by a smile than we can scare by a frown, just as the sunshine grows more trees than the lightning shatters.

No paragraph ever contained more truth than the above. A good, healthy smile, one that comes naturally, without being sent for, or coaxed, one that seems to bubble up among the dimples like the water at the bottom of a spring, showing pearly teeth like the little pebbles thrown up by the water of the spring, a smile that goes rippling along the face like the aforesaid water among the daisies and water cress, on its way to the sea, is worth more to the world than a gold mine. Who is there in the world who has not been made better by a smile? A smile is a legal tender anywhere, and a person who smiles naturally, is as safe from harm as it is possible to be. Men who grow tired of their homes, sick of the world, and ready to give up the battle, can be strengthened and made ready for the fight of another day by a smile, if it comes without being sent for. One man, with a good natured smile, can go into a crowd of grumbling, growling, business men, who think the country is all going to the dogs, and change the whole atmosphere in ten seconds. A man with a good smile can stop a fight between angry men, when policemen would fail. The smile of a good woman, when she comes upon a party of gossipers of her own sex, will change the subject in a moment, and make them ashamed of themselves. Sometimes we think it would pay a city to hire more smiling faces and less policemen to keep the peace. With a hundred good, natural smilers walking around, going into places where men were liable to get in a hot box, with a pleasant word where it would do the most good, there would be very few rows. Of course it would be necessary for our smiler to be able to back his smile with muscle, so if an unruly person did not take kindly to the smile, and knocked it around under the smiler's ear with a chair or a bung starter, the smiler could wipe the floor with the wretch. There would be times when a smile would fail to do its work, as there are times now when a smile fails to accomplish all that it desires to, but take it on the whole the smile would be better than the club or the revolver. There are some men who are continually and constitutionally devoid of smiles, who would be sick if they should accidentally smile, and such men should be compelled to pass two hours a day in the presence of good, single handed smilers, and learn to be happy. If there is anything in the world that has more power than a smile, when it is shot off from the right kind of a gun, we have never seen it. The smile of a girl will draw a young man from his mother, and from bad company. It will teach him to be a man, and he will, if he loves the girl, do nothing that would chase the smile away. The smile of a mother can conquer the wayward child, and compel it to come into camp to be spanked or caressed. The smile of a teacher can do more with a pupil than a bundle of hazel brush. A good, old-fashioned, natural, unaffected smile costs nothing, wears out no costly machinery, but rather oils it and makes it run smooth, and it is a medicine that we all like to take, and it leaves no bad taste in the mouth. Blessed if we wouldn't like to see one this very minute, as fine as it is and sleepy as we are, as the clock tolls the wee small hours and the compositors yawn and say this is copy enough for to-night.

The Value of the Texas Mustang.

The Rev. W. H. H. Murray writes enthusiastically to the Boston Herald that Texas is just the place for horse-breeding, and that the tough little mustangs are the right stock to take hold of for improvement. He declares that they trace their origin back to a "race of equine kings and queens," and I have only deteriorated under hard usage. "I have seen these little sixteen-hand horses," he says, "travel eighty miles with a 180-pound man up, under a Southern sun, in a ride across the country, without roadways, from sun to sun, and that, too, on little grain, perhaps nothing but the grass they get from the prairie at night. Many of them pace—pace like the wind—pace so fast that they play with you on the prairie, though you have a blooded mount that can run like a greyhound. Others trot—trot naturally—with stifles out and perfect knee action, and will do nothing but trot, however hard pressed. I have raced through the prairie grasses and flowers at the rump of a mustang stallion fifteen and a half hands high, and blood-bay in color, with a tail as black as night and that would sweep the ground a foot, and been unable to break him from his trot or range up to his side, although my mount was a three-quarter bred mare of 1,0[illegible] pounds weight, that took to the chase with her eyes blazing and ears laid back in a way that plainly told her rider that she felt a good deal as he did." Mr. Murray advises a cross from a thoroughbred stallion, believing that it would increase the size without losing toughness, and produce the best saddle horses as well as trotters.

Florida not for Consumptives.

Popular Science Monthly

It is not necessary to cite authorities to show that the prime need of a consumptive is that he shall be a great deal out-of-doors, that he shall breathe pure air, that he shall exercise, that his entire physical organization shall be invigorated. Is the climate of Florida fitted to do this? I answer, No. The climate is simply and delightfully soothing. Being so—being moist and relaxing—it will cause tuberculous deposits to disintegrate rapidly. Expectoration will be increased, and there will be no rally of the system to oppose this new call upon the strength, instead of exercising freely and expanding his lungs as he should the consumptive invalid will sit listlessly on the piazzas of the hotels, awaiting his fate. Hundreds are seen, wherever you go, so doing. Seldom do you see one attempting to exercise and, if one is seen, he is moving in that sluggish and apathetic manner so characteristic of everyone living there.

MOTHERS DON'T KNOW.—How many children are punished for being uncouth, wilfull and indifferent to instructions or rewards, simply because they are out of health! An intelligent lady said of a child of this kind: "Mothers should know that if they would give the little ones moderate doses of Hop Bitters for two or three weeks, the children would be all a parent could desire."

Make an oat of this, said the hen to her brood, as they gathered in their little crops.—[Burlington (N. J.) Enterprise. "Why don't you eat some yourself?" asked one of the chickens. "Me," replied the hen; "I'm going on another lay."—[Louisville Courier Journal.

Pure blood helps to make a clear conscience. Hood's Sarsaparilla purifies the blood. Enough said. Send us a big bottle.

Hay Fever.

For twenty years I was a sufferer from Catarrh of the head and throat in a very aggravated form, and during the summer months with hay fever. I procured a bottle of Ely's Cream Balm and after a few applications received decided benefit—was cured before the bottle was used. Have no return of the complaint. Charlotte Parker, Waverly, N. Y.

One and one-half bottles of Ely's Cream Balm entirely cured me of hay fever of ten years' standing. Have had no trace of it for two years. Albert A. Perry, Smithboro N. Y.

Since boyhood I have been troubled with catarrh and hay fever, and have been unable to obtain permanent relief until I used Ely's Cream Balm. It has cured me. E. L. Clickener, New Brunswick, N. J., Price 50cts.

ZOA-PHORA

Is a Sovereign Remedy for all Complaints peculiar to

WOMEN.

Mishawaka, Ind., Dec. [illegible] 1882.

DR. PENGELLY:

Dear Sir—Overwork has done for me as it does for many. I decided to try nursing women. I add my testimony to the value of Zoa-Phora. For three years I suffered greatly with Prolapsus. I felt obliged to use a supporter during all that time, painful, weary years; but, thanks to your medicine, I wear it no more. I laid it off after using one and a half bottles. I am not well, but I work all the time, and am better than I ever expected to be. You may use my letter, and if any one wishes to write me for more information, give them my full address. Mrs. [illegible]

JERSEYVILLE, Ill., April 5, 1882.

DR. PENGELLY:

Dear Sir:—I am more than pleased with the effect of your Zoa-Phora in our daughter's case. I am surprised to see how she has improved. She is gaining in weight and color, and I think feels better than she ever did; her nerves are steady, and the distress in her chest is entirely gone. I firmly believe that Zoa-Phora is all that has saved her life. I am willing you should use my letter, for I am not afraid to tell what a wonderful cure your medicine is. Yours respectfully,

MRS. SARAH E. NICHOLS.

N. B.—This was a case of suppression.

From Mrs. John Spitler,

No. 28 Wilt St, Fort Wayne, Ind.

I have suffered for sixteen years with spasmodic pain in my head and general nervous debility. Recently I had a severe attack of pain in my head, followed by weakness and nervous exhaustion. I thought I should die. My husband said we would test Zoa-Phora thoroughly. He gave it to me according to directions for severe cases, and in less than two hours I had complete relief. I advise all ladies who suffer from nervous or sick headache, or any form of female weakness, to use Zoa-Phora. There is no medicine to compare with it.

May 15, 1882.

Our Pamphlet on Diseases of Women and Children, SENT GRATIS. Every woman above 15 years of age, especially Mothers should read it.

DR. A. TRASK'S MAGNETIC OINTMENT.

The Great Healer of all Inflamed Injuries and Disorders.

It is constantly effecting the most wonderful cures, while the unparalleled demand with which it meets, stamps it at once as the greatest medicine of the age for outward application.

The most incredulous are convinced, and the most skeptical are compelled to believe in the power of this great remedy.

WHAT IT CURES.

All Sores, Cuts, Bruises, Sprains, Burns, Sore Throat, Lameness, Rheumatism, Piles, Inflammation of Lungs and Bowels, Bronchitis, Croup, Salt Rheum, Chilblains, Affection of the Spine, Erysipelas, Nervous Irritation, and all disorders attendant with Inflammation.

It never fails to restore the natural functions of the skin and equalize the circulation of the blood. By this means a controlling power is gained over the most malignant forms of disease. It penetrates to every portion of the human frame; every bone, muscle, vein, nerve and ligament is searched out and made sensible to its soothing and healing influence. Hence it copes readily with internal as well as external diseases.

Over 40 Years,

This Ointment has been used by the people throughout the United States, and our confidence in its qualities is such that we have no space here to insert any of the numerous certificates of cures which we have from all parts of the country, we simply ask those readers of this notice who have ever used this Ointment, to frankly state their experience with it to inquiring friends. If but one in a hundred would do this we should be perfectly satisfied with the result. Full directions for use will be found on pamphlet around each bottle.

Price 25 and 40 cents per bottle. Sold by all dealers in medicine.

D. RANSOM, SON & CO., Prop's
Buffalo, New York.

A CURE GUARANTEED IN ALL CASES.

For Old and Young, Male and Female,

PRESENT POWER.

To-Morrow a Long Way Off When Help is Wanted To-Day.

Comfort is never in a hurry. Pain and distress are in hot haste. It is to the "friend in need"—the friend who does something now—that the old adage pays the compliment of being "a friend indeed." That they do not keep the sufferer in suspense is the salient excellence of Benson's Capcine Porous Plasters. The plasters of other days—whether porous or otherwise—said—"Wait until to-morrow; We can promise nothing on the spur of the moment." But pain unrelieved, like hope deferred, maketh the heart sick. Benson's plasters act on application. They permeate, soothe, warm and heal, containing as they do, chemical and medicinal agents of the highest efficiency. Their motto is now and the word, CAPCINE cut in the middle of each plaster. Price 25 cents.

Seabury & Johnson, Chemists, New York.

COMPOUND OXYGEN NOT A DRUG

A NEW TREATMENT.

For Consumption, Asthma, Bronchitis, Dyspepsia, Catarrh, Headache, Debility, Rheumatism, Neuralgia, and all Chronic and Nervous Disorders.

A CARD:

We the undersigned, having received great and permanent benefit from the use of "COMPOUND OXYGEN," prepared and administered by Drs. STARKEY & PALEN, of Philadelphia, and being satisfied that it is a new discovery in medical science, and all that is claimed for it, consider it a duty which we owe to the many thousands who are suffering from chronic and so-called "incurable" diseases to do all that we can to make its virtues known, and to inspire the public with confidence.

We have personal knowledge of Drs. Starkey & Palen. They are educated, intelligent and conscientious physicians, who will not, we are sure, make any statement which they do not know or believe to be true, nor publish any testimonials or reports of cases which are not genuine.

WM. D. KELLEY,
Member of Congress from Philadelphia.

T. S. ARTHUR,
Editor and Publisher "Arthur's Home Magazine," Philadelphia.

V. L. CONRAD,
Editor "Lutheran Observer," Philadelphia.

PHILADELPHIA, PA., June 1, 1882.

"In order to meet a natural inquiry in regard to our professional and personal standing, and to give the public increased confidence in our statements, and in the genuineness of our testimonials and reports of cases, we print the above "CARD" from gentlemen well and widely known, and of the highest personal character.

Our "Treatise on Compound Oxygen," containing a history of the discovery of and mode of action of this remarkable curative agent, and a large record of surprising cures in Consumption, Catarrh, Neuralgia, Bronchitis, Asthma, etc., and a wide range of chronic diseases, will be sent free. Address,

DRS. STARKEY & PALEN,

In The Pilot House.

"Yes, sir; this kind of work obliges a man to keep sober as a judge. Of all men in the world, steamboat pilots and railroad engineers should let liquor alone. For on their clearness of sight and coolness of head depends the safety of life and property."

Keeping his hand on the wheel as he said this, Mr. A. Brockman, of No. 29½ Silver street, Chicago, added: "Of course, some of 'em drink; but the sober ones have the best positions and the best pay. Yes, the work and exposure sometimes tells on me but for my part, I find Parker's Tonic to be all the invigorant I need. I've got a bottle aboard here now; never go on a trip without it. When I haven't any appetite, or am in any way out of sorts, it sets me up in no time. If drinking men would use the Tonic, it would help 'em to break off. (No, that isn't a lighthouse; it's a star low down near the water.) As I was saying, the Tonic is new like bottled up. You see that flag-staff? Well, with a bottle of Parker's Tonic in the locker I can keep malaria as far from me as that, all the time. My wife has used it for three years for summer complaint and colic, and as an invigorant, when she's tired out from overwork. She says the tonic is a daisy. Good-bye! Don't break your neck going below."

This preparation which has been known as Parker's Ginger Tonic, will hereafter be advertised and sold simply under the name of Parker's Tonic. As unprincipled dealers are constantly deceiving their customers by substituting inferior articles under the name of ginger; and as ginger is really an unimportant ingredient, we drop the misleading word.

There is no change however in the preparation itself, and all bottles remaining in the hands of dealers, wrapped under the name of Parker's Ginger Tonic contain the genuine medicine if the fac simile signature of Hiscox & Co., is at the bottom of the outside wrapper.

The only known specific for Epileptic Fits. Also for Spasms and Falling Sickness. Nervous Weakness it instantly relieves and cures. Cleanses blood and quickens sluggish circulation. Neutralizes germs of disease and saves sickness. Cures

A SKEPTIC SAID

ugly blotches and stubborn blood sores. Eliminates Boils, Carbuncles and Scalds. Permanently and promptly cures paralysis. Yes, it is a charming and healthful Aperient. Kills Scrofula and Kings Evil, twin brothers. Changes bad breath to good, removing the cause. Route billious tendencies and makes clear complexion. Equalled by none in the delirium of fever. A charming resolvent and a matchless laxative. It drives Sick Headache like the wind. Contains no drastic cathartic or opiates. Relieves

SAMARITAN NERVINE

THE GREAT

NERVE CONQUEROR

the brain of morbid fancies. Promptly cures Rheumatism, by routing it. Restores life-giving properties to the blood. Is guaranteed to cure all nervous disorders. Reliable when all opiates fail. Refreshes the mind and invigorates the body. Cures dyspepsia or money refunded.

NEVER FAILS

Diseases of the blood own it a conqueror. Endorsed in writing by over fifty thousand leading citizens, clergymen and physicians in U. S. and Europe.

For sale by all leading druggists. $1.50. (13)

The Dr. S. A. Richmond Med Co. St. Joseph, Mo.

THINK OF IT NOW!

Although much is said about the importance of a blood-purifying medicine, it may be possible that the subject has never seriously claimed your attention. *Think of it now!*

Almost every person has some form of scrofulous poison latent in his veins. When this develops in **Scrofulous Sores, Ulcers, or Eruptions**, or in the form of **Rheumatism, or Organic Diseases**, the suffering that ensues is terrible. Hence the gratitude of those who discover, as thousands yearly do, that

Ayer's Sarsaparilla

will thoroughly eradicate this evil from the system.

As well expect life without air as health without pure blood. Cleanse the blood with AYER'S SARSAPARILLA.

LOUISIANA.

The Sale by France to the United States.

George W. Cable in The Century.

In congress debate narrowed down to the question whether New Orleans and the Floridas should be bought or simply swept down upon and taken. But the executive department was already negotiating; and, about the time of Laussat's landing in Louisiana, Messrs Livingston and Monroe were commissioned to treat with France for a cession of New Orleans and the Floridas, "or as much thereof as the actual proprietor can be prevailed on to part with."

Bonaparte easily saw the larger, but unconfessed wish of the United States. Louisiana, always light to get and heavy to hold, was slipping even from his grasp. He was about to rush into war with the English. "They have," he exclaimed passionately to his ministers, "twenty ships of war in the gulf of Mexico. * * * I have not a moment to lose in putting it (this new acquisition) out of their reach. They (the American commissioners) only ask of me one town in Louisiana; but I already consider the colony is entirely lost." And a little later, walking in the garden of St. Cloud, he added to Marbois—whom he trusted rather than Talleyrand—"Well! you have charge of the treasury; let them give you one hundred million francs, pay their own claims, and take the whole country." When the minister said something about the rights of the colonists, "Send your maxims to the London market," retorted the first consul.

The price finally agreed upon was eighty million francs, out of which the twenty million francs of American citizens' claims due by France were to be paid, and Louisiana was bought.

On the 30th of November, 1806, with troops drawn in line on the Place d'Armes, and with discharges of artillery, Salcedo, fitly typifying, in his infirm old age the decaying kingdom which he represented, delivered to Laussat, in the hall of the cabildo, the keys of New Orleans; while Casa Calva, splendid in accomplishments, titles and appearance, declared the people of Louisiana absolved from their allegiance to Spain. From the flag-staff in the square the Spanish colors descended, the French took their place, and the dominion of Spain in Louisiana was at an end.

On Monday, the 20th of the following December, with similar ceremonies, Laussat turned the province and the keys of its port over to Commissioners Claiborne and Wilkinson. The French tricolor, which had floated over the Place d'Armes for but twenty days, gave place to the stars and stripes, and New Orleans was an American town.

Coming Celebration of the Oldest Town in the United States.

The citizens of Santa Fe, N. M., are preparing to celebrate, in July, what they call their "tertiomillennial," or, in other words, the 333d anniversary of the settlement of the town. The first European who ever went through the region now occupied by New Mexico was Cabeza de Baca, who was wrecked on the coast of Texas in 1531. He gave so brilliant an account of the country that in 1541 Coronado organized the first expedition to the territory, and, as nearly as can now be ascertained, in 1550 Santa Fe was settled. The celebration of this important event in the history of the southwest is to occupy the whole month of July. Two permanent exhibition halls are to contain the main features of the occasion. In one there will be a collection of historical and archæological curiosities. The territory is full of the remains of ruined towns and of ancient stone implements. There are nineteen pueblo villages in existence. In these the people, the manners and the customs are precisely such as they were 200 years ago. These pueblo people are descendants of the aborigines of the country, a part of them being the Zuni Indians, recently brought prominently before the country. There will be, in the second place, a large collection of Spanish antiquities, representing the second civilization which went into the country. The third civilization, the American, will also be represented from its earliest times down to the present. The other permanent building will contain a display of the resources of the territory. In this department the minerals, gold, silver, copper, lead and coal, both bituminous and anthracite, will be the chief exhibits. New Mexico has the only anthracite coal beds in the southwest. A number of special entertainments will be given on the different days of the exhibition, beginning with an elaborate opening ceremonial, in which it is hoped that Rev. Dr. R. S. Storrs will deliver the address. After that there will be a pageant representing the entry of the Spaniards into this city. One day will be given up to an exhibition of the games and dances of the pueblos. Another day will be occupied with an excursion to the cave dwellings, which are not far from Santa Fe. Still another day will be utilized for an exhibition of the cattle and sheep. The month of July has been chosen for the celebration because it is the pleasantest month in the year. Santa Fe is 7,000 feet above the level of the sea, and never has any hot weather. August and September are the rainy months. In the winter the weather is cold, but clear.

Oh! The Pathos of It.

San Francisco Chronicle.

The Chinese brass band played from midnight Tuesday till 5 o'clock yesterday afternoon. The music was uninterrupted and some of the inhabitants of the neighborhood hastily packed their carpet-bags and moved temporarily away. A young Chinese instrumentalist in a green jacket played the cymbals. They were about twelve feet in circumference, and he leaned to one side as he balanced them over his right shoulder. Anon he held them at arms' length apart and brought them together with the noise of a dynamite explosion; a Celestial with a short pigtail beat the brass drum, which was the size and shape of a beer keg and stood on end. A brass sauce pan suspended from a mantel-piece was thumped in a lively manner by a nimble Celestial. When the sauce-pan, the brass beer-keg and the exaggerated cymbals were clashed together in one harmonious whole, it sounded as though a dozen czar's palaces had been suddenly fired into space by tons of dynamite.

The Celestials sitting in the room bent forward and listened as intently as if it were an angel chorus. One old man dissolved in tears, took out his handkerchief and said to the reporter in English: "It is pathetic; very pathetic."

Himself, not His Lawyer.

Atlanta Constitution.

Our correspondent at Milledgeville, writing to me, says: "A negro tenant of the gentleman to whom the Hon. Mark Johnston proposed to give a postoffice in his recent canvass for the legislature, asked Hon. Fleming DuBignon to draw a contract between himself and landlord, offering for said 'draw' fifty cents, whereupon Mr. DuBignon indignantly remarked 'Do you take me for a fifty-cents lawyer? No, sir, Mars' Judge, but I takes myself to a fifty-cents nigger.'"

The Blessed Giving.

Manchester Mirror.

This is the beautiful and beneficent season when by giving to the minister who preaches for "$400" in money and a donation" your clothes that don't fit you, your butter that is a little off color, and your tea that doesn't suit your taste, you can satisfy your conscience and go to bed murmuring "It is more blessed to give than to receive."

Kaiser Wilhelm Gorges Himself.

Music and Drama.

What a life that of the Kaiser William has been. Born in 1797, he was a boy at the period of Prussia's deepest degradation; at the age of

Good for Children too.

Dr. Foord's Tonic Cordial is a splendid medicine for children as well as adults. Read the following letter from a well-known citizen from Syracuse:

Wm. L. Palmer, Syracuse N. Y., says: "For two years past I have been acquainted with the use of Dr. Foord's Tonic Cordial for the cure of Billious Colic, Dysentery, and other diseases of children, and many a time I have seen it relieve them like a charm. They take it so well, and its effects are so decided, that I take pleasure in speaking of it in terms of the highest praise."

Myer's Extract of Rock Rose

Is the famous old New England Blood Medicine.

Mathew's Hair Dye.

Produces a natural color on hair or whiskers. Does not crock.

Henry Carbolic Salve.

Is the best Salve for cuts, bruises, sores, ulcers, salt rheum, tetter, chapped hands, chilblains, corns, and all kinds of skin eruptions.

The Heart's Secrets.

It is well that no spectators are permitted to catch a glimpse of our heart's secrets; that the door is never opened to let any one enter to view our unseen ghosts. If we have our songs in the night, our midnight vigils, we care not the world should witness our disappointments and mishaps. "Deep in each heart's undreamed, unsought recesses, lie buried many a fond idol, many a treasure. Our spectres stand before us in their dead form, and we touch their icy hands, press kisses on their cold lips; they are constantly sauntering out from their graves; we sigh and weep because we cannot clasp their lividg presence within our arms. It is better that the world should not know our heart's secrets; its bitter scorn and its cold pity would bestow little sympathy; it would neither condole nor solace us under merciless disappointment and withered hopes. We mingle in the whirling throng of human beings, we cross the broad ocean, we travel through foreign countries. Who reads the heart's secrets? They may be guessed, conjectured, suspected, but they are not voluntarily exposed. We prefer to shut them up within the recesses of our bosoms, far out of sight.

Catarrh.

The remarkable results in a disease so universal and with such a variety of characteristics as Catarrh, prove how effectually Hood's Sarsaparilla, acting through the blood, reaches every part of the human system. A medicine, like everything else, can be fairly judged only by its results. We point with pride to the glorious record Hood's Sarsaparilla has entered upon the hearts of thousands of people it has cured of catarrh.

There are times in the history of men and nations when they stand so near the veil that separates mortals from the immortals, time from eternity, and men from their God, that they can almost hear the beatings, and feel the pulsations, of the heart of the Infinite.—*James A. Garfield.*

Excited Thousands.

All over the land are going into ecstacy over Dr. King's New Discovery for Consumption, Their unlooked for recovery by the untimely use of this great life Saving remedy, causes them to go nearly wild in its praise. It is guaranteed to positively cure Severe Coughs, Colds, Asthma, Hay Fever, Bronchitis, Hoarseness, Loss of Voice, or any affection of the Throat and Lungs. Trial Bottles free. Large size $1.00.

Sold by C. A. Wright & Co.

Very few men acquire wealth in such a manner as to receive substantial pleasure from it. Just as long as there is the enthusiasm of the chase, they enjoy it, but when they begin to look around and think of settling down, they find that that part by which joys enters is dead within them.

NORTH WOLCOTT, N.Y., Jan. 25, 1883. Rheumatic Syrup Co.:

It is with pleasure I write you in regard to your Rheumatic Syrup. I think it my duty to let the suffering public know what it has done for me. I have suffered greatly two years with rheumatism in my hip. I have tried many liniments but received no benefit from them. Being acquainted with a number who had been cured by the Rheumatic Syrup I gave it a trial, and I am cured after using but four bottles. I know the Syrup will cure any case of rheumatism, if taken as directed, as hundreds will testify in this immediate vicinity. I am gratefully yours, John P. Fowler, Justice of the Peace.

Pimples, blotches, sores or scaly eruptions on any part of the body can be cured by the use of Rheumatic Syrup, which cleanses the system and blood of all impurities, and builds up the debilitated system and gives new life to the feeble and overworked sufferer.

DR. B. MINCER,

Scientific Optician!

I have devoted 25 years wholly to a study of the eye, and how to aid vision properly, and I make a specialty of fitting glasses to the eyes that have been injured by cheap, inferior glasses. I manufacture every kind of glasses, and guarantee satisfaction. Read what prominent physicians of Adrian say:

Having for some time past used glasses to improve my sight, without satisfactorily gaining my object, I called on Mr. Mincer, optician, of Detroit, who readily adapted glasses to my eyes, with which I am so well pleased, that I cheerfully speak in his favor. His method of examining and his application in selecting glasses to fit the eye can only be acquired by a knowledge of the useful organ to which must be added extensive experience. He has also adapted glasses to Mrs. Baker's eyes with which she is well pleased. I recommend him to all who need glasses adapted to their wants; poor glasses are an abomination. V. A. BAKER, M.D.

ADRIAN, Nov. 18, 1882.

I have used spectacles bought of Mr. B. Mincer for the past three months and find them superior to any I have ever used, and can cheerfully recommend him to anyone in need of glasses, and the benefit of his experience in the science of optics to adjust proper lenses. DANIEL TODD, M.D.

I have investigated the work of Mr. B. Mincer, optician. I have reason to believe that he understands his profession, and adjusts excellent glasses on scientific principles. C. RYND, M.D.

REMEMBER!

I will visit every town in the county during the month.

Is it not preferable to have our treasures so placed that when we die we can go to them? Beware how you labor for that which perisheth, lest you become fascinated, so deeply absorbed as to beggar your soul for eternity.

BATTLE CREEK, Mich., Jan. 31, '80.

Gentleman—Having been afflicted for a number of years with indigestion and general debility, by the advice of my doctor I used Hop Bitters, and must say they afforded me almost instant relief. I am glad to be able to testify in their behalf. Thos. G. Knox.

ESTATE OF PETER R. ADAMS.

STATE OF MICHIGAN, County of Lenawee, ss.

At a session of the Probate Court, for the County of Lenawee, holden at the Probate office, in the city of Adrian, on Wednesday, the 19th day of September, in the year one thousand eight hundred and eighty-three.

Present Norman Geddes, Judge of Probate.

In the matter of the estate of Peter R. Adams, deceased.

On reading and filing the petition, duly verified, of Peter W. Adams, praying for the probate of an instrument now on file in this court, purporting to be the last will and testament of said deceased, and codicils thereto, and that administration of said estate may be granted to Marcus A. O. Packard, John Margeson, Solomon Crane and Gideon D. Perry, the executors in said will named.

Thereupon it is Ordered, That Monday, the 15th day of October next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs-at-law of said deceased, and all other persons interested in said estate, are required to appear at a session of said Court, then to be holden at the Probate office, in the City of Adrian, and show cause, if any there be, why the prayer of said Petitioner should not be granted.

And it is further ordered, That said Petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said County of Lenawee for three successive weeks, previous to said day of hearing.

NORMAN GEDDES, Judge of Probate.

(A True Copy.)

A. H. BRIGGS, Probate Register. sep20

DRAIN COMMISSIONER'S NOTICE.

NOTICE is hereby given that I Justus Lowe, township drain commissioner of the township of Ridgeway in the county of Lenawee, will, on the 29th day of September, at the house of Norman Ackley, in said township, at ten o'clock in the forenoon, meet parties for the purpose of letting contracts for the construction of a drain in said township known as the 'Ackley Drain' in Ridgeway, commencing 20 feet north of quarter post, between Sections Nos. 11 and 14 t. 6, s. 5 e, thence running east parallel with section line between sections Nos. 11 and 12 162 1-25 rods to the East side of Highway on section line between sections Nos. 11 and 12, thence s. 86° e. 17 15-25 rods, thence east 16 feet south and parallel with section line between sections No. 12 and 13, 209 5-25 rods to the Wahaw Prairie drain, being 409 5-25 rods in length, width to be 8 feet to section line, between sections 11 to 12, from thence ten feet wide to terminus.—

And that I will then and there proceed to let contracts for the construction of the same by sections as I have apportioned and divided the same, and that such contracts will be let to the persons who will do the work according to the specifications thereof made by me, and now remaining in my office, for the least sum of money, and who will give adequate security for the performance of the same within such time as shall be specified in such contracts respectively, the undersigned reserving the right to reject any and all bids. Notice is also hereby given that at the time and place of said letting of contracts, the assessment of benefits made by me will be subject to review.

Dated this 18th day of September, A.D., 1883.

JUSTUS LOWE, Township Drain Commissioner for the Township of Ridgeway. sep20

ESTATE OF JAMES McKINNEY.

STATE OF MICHIGAN, County of Lenawee—ss.

At a session of the Probate Court for the County of Lenawee, holden at the Probate office, in the city of Adrian, on Monday, the 3d day of September, in the year one thousand eight hundred and eighty-three.

Present, Norman Geddes, Judge of Probate.

In the matter of the estate of James McKinney, deceased.

On reading and filing the petition of James Kingan and John Boyd, executors of the last will and testament of said deceased, alleging, that they have paid the debts of said deceased and the expenses of administration of said estate thus far incurred, and praying for the allowance of their first account as such executors.

Thereupon it is ordered, That Monday, the 1st day of October next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs-at-law of said deceased, and all other persons interested in said estate, are required to appear at a session of said court then to be holden at the Probate office, in the city of Adrian, and show cause if any there be, why the prayer of said petitioner should not be granted.

And it is further ordered, That said petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said county of Lenawee, for three successive weeks previous to said day of hearing.

NORMAN GEDDES, Judge of Probate.

(A true copy.)

A. H. BRIGGS, Probate Register. sep6

COMMISSIONERS' NOTICE.

IN the matter of the estate of Ann Biddle, deceased.

The undersigned, having been appointed by the Judge of Probate for the county of Lenawee, Michigan, commissioners to receive, examine and adjust all claims and demands against the estate of Ann Biddle, deceased, notice is hereby given that for that purpose we will meet at the late residence of deceased in the town of Macon, in said county, on the 12th day of October, 1883, and on the 7th day of March, 1884, at 10 o'clock in the forenoon of each of said days, and that six months from the 8th day of September, 1883, have been allowed by the said court for the creditors of said estate to present their said claims for examination and allowance.

Dated Sept 12, 1883.

LEWIS CAMBURN, MILAN SAGE, Commissioners.

CHICAGO.

THE "FISHING LINE."

TAKE THE

GRAND RAPIDS & INDIANA RAILROAD.

The only route to the Trout, Grayling and Black Bass Fisheries and the famous Summer, Health and Game Resorts and Lakes of

Northern Michigan.

The waters of Grand Traverse Region and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

Brook Trout abound in the streams, and the famous American Grayling is found only in these waters.

The Trout Season begins May 1st, and ends September 1st. The Grayling Season opens June 1st and ends November 1st.

Black Bass, Pike, Pickerel, and Muskalonge also abound in large numbers in the many lakes and lakelets of this territory. The sportsman can readily send trophies of his skill to his friends or "Club" at home, as ice for packing fish can be had at nearly all points.

Take Your Family with You. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing.

The Climate is peculiarly beneficial to those suffering with Hay Fever and Asthmatic affections.

New Hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The connection of this line from Petoskey to Mackinaw city forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit, Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns, and Fishing Tackle carried free at owner's risk. It is our aim to make Sportsmen feel "At Home" on this route. For Tourist Guide, a handsomely illustrated book of 160 pages free, Time Cards, Folders and further information address

HERALD OFFICE.

HERE WE ARE AGAIN.

The steady and continual work we gave the past season to our gigantic clearance sales left our Mammoth Outfitting Establishment in proper shape for the reception of our

Fall and Winter Stock!

To say that we were successful would not half tell the story. OUR TRADE ALMOST DOUBLED, our customers were more than pleased with the bargains we gave them, and we were highly gratified with the liberal patronage bestowed upon us, and this season we intended to strive harder than ever to merit the continuance of the same.

BOYS' & CHILDREN'S CLOTHING.

We have just opened up and put in stock all the new shapes and Styles of Little Folks' Clothing, among which may be found some pretty and attractive garments. Henceforth we shall carry a larger line of these goods than ever. Our trade in this Department has met with such a large increase that we can well afford to, and this increase of trade enables us to sell at

SMALLER MARGINS THAN EVER BEFORE.

With us increase of trade means a decrease of profit. Not only shall our prices be the lowest, but we will carry ten times as many goods as any other house in the city. Our Boys' and Children's department has become very popular, not only because it is fitted up with a view to accommodate our customers, but because the best makes, the prettiest styles and the most attractive assortment of this line of goods can always be found there.

Men's & Youths' Clothing!

We have selected the finest and most desirable goods for this department that were ever brought to the city; in fact the goods look so well as we open them up that we feel sure of selling them without much trouble. The reliable class of goods we handle, together with the uniformly low prices which are characteristic in our institution, are found to meet with public approbation. This department is crammed with new goods, ready for inspection and sale.

Gents' Fine Furnishings!

There is no more complete department of the kind in the state. We have just put in stock several cases of new goods, and are every day receiving fresh additions. It is filled to completion with all the latest styles in Gloves, Hosiery, Neckwear, Undershirts, Collars, Cuffs, Shirts, Handkerchiefs, Suspenders, &c., and everything at popular prices. We can guarantee to save you twenty-five cents on every dollar you spend with us in this department.

Everybody is invited to examine our Stock whether they wish to buy or not.

MICHIGAN STATE ITEMS.

East Saginaw has a Heroic coach.

Liquor is causing considerable trouble at Clio.

The new school house at Dansingburg will cost $4,000.

Ripe strawberries of the second crop have appeared at Lansing.

The Presbyterian synod for Michigan meets at Ann Arbor, Oct. 10.

Gas works are being erected at Big Rapids.

Nearly 400 students have matriculated at the University.

There were four weddings in three days at Buchanan last week.

The ministers of East Saginaw and Saginaw City have formed a ministerial association.

A house on the farm of Mrs. Dr. C. Saranac, burned a few nights incendiarism suspected.

A. Darley, formerly a well known South Bend editor, is now a member of the Jackson Citizen staff.

The Norwegian church on Grand ave. makes five for Muskegon this year.

The coal combination at Port Huron has been obliged to lower its rates 50 cents per ton.

Two men, 97 and 94 years old, graced the Pioneer picnic at Galesburg with their presence.

The Norman patent buggy wheel will be manufactured in Lansing by a stock company.

The Lansing Iron Works sold $1,800 worth of saw mill machinery at the State Fair.

Miner's flouring mill at Tompkins Center burned last week; loss $5,000: insured for one-half.

John S. Dixon has platted a 15-acre addition to the village of Charlevoix, and sold 20 out of 52 lots.

Jonesville is thriving between its cotton mills, carriage factories and its shipments of paving stones.

Sanford Brown, a very prominent politician, died at Newaygo, last week, of cerebro spinal meningitis.

The Adrian canning works have put up from 8,000 to 10 000 cans of tomatoes per day, notwithstanding the frost.

Cassopolis is going to have a new opera house, a telephone exchange, and will soon be lighted by street lamps.

From three to ten deer are shipped from along the line of the Detroit, Mackinac & Marquette railroad every day.

Mrs. Postmar, of Grand Rapids, who has eight fatherless children, will sue the Grand Rapids & Indiana railroad for $5,000 damages.

The Life-Saving Service decides that the use of oil in calming rough water is of no service where the sea is breaking on the shore.

George A. Lacroft has been appointed by the Governor agent of the State Board of Corrections and Charities for the new county of Arenac.

The Charlotte well is down 415 feet, the depth called for by the contract, and water stands within 13 feet of the surface.

Contrary to expectation, the apple crop in the vicinity of Buchanan shows up fairly well, and is being liberally marketed at 50 cents per bushel.

The Howard City sportsmen killed a fine pelican a few days ago near that place. It measured nine feet from tip to tip and had its pouch full of frogs.

The young ladies' chewing gum club of Lapeer has disbanded. Their jaws became caught on the dead center and they were obliged to give up or starve.

The stone culvert west of Imlay City, which is being built by the Chicago & Grand Trunk railroad, is nearing completion, costing in the neighborhood of $10,000.

An attempt to break jail at Corunna was discovered last week. A long iron bar, used as a door fastening had been cut off with a case knife and was being used to pry off the bars in the corridor when the act was discovered.

Mac Walker, the Port Huron water works man, has put in a set of his works at Plainwell, and they are squirting beautifully. He has also completed a plant at Fremont Center and has several more worlds to conquer.

The congregational authorities at St. Clair have under consideration the increasing of the seating capacity of their church. The regular attendance of a large number of Somerville pupils makes the change the more necessary.

How to Beautify a Home

Almost everybody knows what a relief to the eyes a little spray of greenery in the winter. The wealthy can indulge in expensive conservatories, but those of moderate circumstances, even the very poor, can secure a pretty object at a small expense by following the direction. To begin with, an acorn, which any urchin can procure in the woods, and a pickle jar, which any housekeeper can supply. Procure a fine healthy acorn, and crochet around it a little network cap. Take off the cup first, and leave a long of the cotton to hang the acorn point downward in the glass. The glass must have so much water in it that the tip of the acorn scarcely touches; keep it in a dark closet until it has sprouted, and then put it in the light. A chestnut thus kept in water will sprout the same way. A sweet potato will grow luxuriantly, and may be trained around walls and pictures. A carrot grown in sand is, if well managed, a highly ornamental object. A good, fine and healthy root must be selected, cut off quite evenly the top of the carrot, and place it on top of a pot full of sand, so that the leaves look as if they spring from it. Moisten it well and keep it in the dark until it has begun to sprout, be careful to keep it damp, and move it into the light directly the leaves appear. If the cultivation is successful, an ornament pretty enough for any room will be the result, and which will have to the unacquainted the appearance of a pot of ferns. Another experiment may be made with a turnip, which must be as sound as possible. Clean the outside, taking care not to injure the part from whence the leaves spring. Cut a piece of the bottom and scoop out the inside, so that you have a a hollow cap; fasten string or wire to it, so that it can be hung up. Fill the cavity and keep it filled with water. In a short time the leaves will begin to sprout, and will curl up around the ball of the turnip, forming a pretty little hanging basket. Children can be made to interest themselves in such experiments, which will be found an easy method of inculating taste and refinement; besides, each and all point out their own botanical lesson, and much is to be learned by careful and patient observation and experiment.

Practical Proverbs.

I wouldn't gin a cent for de man who quotes old proverbs an' adopts second-han' mottoes," began Brother Gardner, of the Detroit Limeklin Club, as the crunching of harvest apples suddenly ceased. "Dis am an aige fur ebery man to hold his own plow, an' who am content to let some one else hold it must be satisfied wid cobs in place of co'n. Ef I was so poo' an' low-down dat I had to pick rags, I would have my own maxims an' mottoes. Instead of sayin' 'Doan' put off till to-morrow what kin be dun to-day,' I would have it: 'Now, ole man, you git right up 'n dust, an' sling mo' rags dis week dan any odder chap kin in a month.' 'De odder day I met Comeback Jones. You know he am 'bout sixty y'ars old, an' 'bout as hard up as a woodchuck in a b'ar's grip. I axed de ole man how he was keepin' up wid de purcheshun, an' he replied, "Wall, ize mighty hard up; but dey say it am a long lane dat has no turn." Jist fink of an ole man rid one No. 13 in de grave waitin' fur a turn in de lane to bring him heaps to eat an' lots to w'ar?—All frew life he has carried dat second-han' sayin' wid him, an' am yet a believer in it. Why didn't he have one of his own? If he had said forty years ago: "Doan' foller any lane, but cut across-lots," de wolf wouldn't be arter him to-day. A man who lies de will to make a motto hes de pluck to make it a success. Buckle down to bizness' am a better motto dan any book kin give ye. Let me, in closin', quote some of de mottoes an maxims belongin' to members of dis club:

Sir Isaac Walpole—'Doan' drap fifteen cents in reachin' fur a dollar.'

Waydown Bebee—'When ye can't dig frew a wall climb ober it.'

Giveadam Jones—'Git dar,' if it takes a leg.

Pickles Smith—'Ye can't swim a ribber by sittin' on a bank.'

Samuel Shin—'Sot yer alarm-clock fur six in de mornin'.'

Trustee Pullback—'If de road am up hill, stiffen yer back-bone a little mo'.'

Kyan Johnson—'De man who w'ars his hat on his ear shows de empty side of his head.'

Brutus Jackson—'Hoe co'n wid yer hans and arms 'stead of yer mouf.'

Elder Toots—'Take a job at fust sight, but doan' trade hosses till ye fink it ober.'"

Struggling Lives.

You, reader, who are blessed with a comfortable home—who are well fed and warmly clad and sheltered—you can hardly realize to what straits and make-shifts many a poor mortal is reduced to live honestly, or even live at all. Women there are, delicate, cultured, refined, and all unused to physical labor—women nursed often in the lap of luxury, but thrown suddenly and helplessly upon the world by some social or domestic volcano that engulfed home and friends and left them stranded and alone to struggle with the hard conditions of cruel and relentless poverty. We have seen them thinly and poorly clad, with pinched faces from lack of nourishing food, boarding themselves in cheerless and isolated rooms, and eking out a bare pittance honestly earned with needle or pen—patient, often, and hopeful in their sad and lonely lot. Let their more fortunate sisters, born to affluence and comfort, with every luxury within their reach, imagine themselves suddenly reduced to such extremities, and can they wonder that many a tempted one is led into a gilded life of sin? Truly, society is out of joint, and there is need for a larger measure of charity in the world. We wonder if the favored ones of earth are aware that there is but little virtue in the goodness of one who has never been sorely tempted.

Give hens constant access to lime in some form. Hens must have the raw material in order to manufacture shells; they cannot make them out of nothing.

Guinea fowls will keep all bugs and insects of every description off garden vines. They will not scratch like other fowls, or harm the most delicate plant.

How they Meet and Part.

A gentleman lately took down verbatim the conversation of two fashionable ladies during a morning call—viz: "How do you do, dear?" "Pretty well, thank, you." (They kiss.) "How have you been this age?" "Pretty well. How have you been?" "Very well, thank you." "Pleasant to-day." "Yes, very bright, but had a shower yesterday." "All your family quite well?" "Quite well, thanks. How is yours?" "Oh, very well, thank you." "Have you seen Mary B. lately?" "No, but I have seen Susan C." "You don't say so! Is she quite well?" "Yes, very well, I believe." (Rising.) "Must you go?" "Yes, *indeed;* I have *seven* calls to make." "*Do* call again soon." "Thank you; but you don't come near me once in an age." "Oh, you shouldn't say so, dear; I'm sure I'm very good." "Good bye." "Good bye, dear."—*Exchange.*

"Gale Forest" gives the following pat reply to the above:

"Yes! and after writing that the gentleman discovered the strain upon his mental faculties had been so severe, he went out to "brace up." Just as he reached his destination, met a friend from out of town, when the following conversation was overheard and taken down by the writer, as an example for women, of men's "wit and wisdom." "Hello! old fellow, how are you?" (They shake.) "First rate, how are you?" "Tip-top!" "When dy'e get in?" "Just now." "Have something?" (significantly.) "Well—yes, don't care-if do." (They step into a saloon, after cautiously looking around to make sure no outsiders are about, to see they are breaking their pledge—pause—they emerge, innocently wiping their mouths, before putting into them their lighted cigars, and being "primed," resume:) "How's yer folks?" "All well how's yours?" "All flourishing now; youngest boy had diphtheria, but all right now." "Crops good up your way?" "Well, yes, pretty fair." "How do politics look?" "Bad—very bad—all democrats up our way; big democratic majority. (Takes out his watch.) "Thunder! ten minutes to 12,—must be off—got to see a man at 12." "Can't you come up to the house and take dinner?" "No, guess not to-day—got several pressing business engagements. Good-bye." "Good-bye." They again wring hands, and then rush away from each other as if fearing they might have to stand another treat.

Where Did Potatoes Come From?

Nobody knows precisely where the potato came from originally. It has been found, apparently indigenous, in many parts of the world. Mr. Darwin, for instance, found it wild in the Chonos Archipelago. Sir W. J. Hooker says that it is common at Valparaiso, where it grows abundantly in the sandy hills near the sea. In Peru and other parts of South America it appears to be at home; and it is a noteworthy fact that Mr. Darwin should have noted it both in the humid forests of the Chonos Archipelago and among the Central Chilian mountains, where sometimes rain does not fall for six months at a stretch. It was to the colonists whom Sir Walter Raleigh sent out in Elizabeth's reign that we are indebted for our potatoes.

Herriot, who went out with these colonists, and who wrote an account of his travels, makes what may, perhaps, be regarded as the earliest mention of this vegetable. Under the heading of "Roots" he mentions what he calls the "openawk." "These roots," he says, "are round, some large as a walnut, others much larger. They grow on damp soils, many hanging together as if fixed on ropes. They are good food, either boiled or roasted."

At the beginning of the seventeenth century this root was planted, as a curious exotic, in the garden of the nobility, but it was long ere it came into general use. Many held them to be poisonous, and it would seem not altogether unreasonably so either. The potato is closely related to the deadly-nightshade and the mandrake, and from its stems and leaves may be extracted a very powerful narcotic. In England prejudice against it was for a long time very strong, especially among the poor.

How Chickens Get Out of Shells

Take an egg out of a nest on which a hen has had her full time, carefully holding it to the ear; turning it around you will find the exact spot which the little fellow is picking on the inside of the shell; this he will do until the inside shell is perforated, and then the shell is forced outward as a small scale, leaving a hole. Now, if you will take one of the eggs in this condition from under the hen, remove it to the house or other suitable place, put it in a box or nest, keeping it warm and moist, as near the temperature of the hen as possible (which may be done by laying it between two bottles of warm water upon some cotton or wool,) and lay a glass over the box or nest, then you can sit or stand, as most convenient, and witness the true *modus operandi.* Now watch the little fellow work his way into the world, and you will be amused and instructed as I have often been. After he has got his opening, he commences a nibbling motion with the point of the upper bill on the outside of the shell, always working to the right (if you have the large end of the egg from you, and the hole upward,) until he has worked his way almost around, say with one-half of an inch of an in a perfect circle; he then forces the cap or butt end of the shell off, and then has a chance to straighten his neck, and thereby loosening his legs somewhat, and so, by their help forcing the body from the shell.—*American Farm Journal.*

Cost of Bringing up a Boy.

A clergyman who has been discoursing about boys has devoted considerable attention to the cost of these somewhat necessary individuals, and he estimates the expense of bringing a good boy, with all the advantages of city life, to the age of fifteen, at about $5,000. These figures are about doubled by the time the boy is of age, if he goes through college. A bad boy, arrived at the age mentioned, costs fully as much, even if he has not been to college, and the computation, as the reverend gentleman suggests, does not include the value of the mother's tears and father's gray hairs. Most men who have brought up boys will agree that the estimate is not too high.

SAVING MOTHER.

The farmer sat in his easy chair
Between the fire and the lamplight's glare
His face was ruddy and full and fair,
His three small boys in the chimney nook
Conned the lines of a picture book;
His wife, the pride of his home and heart,
Baked the biscuit and made the tart,
Laid the table and steeped the tea—
Deftly, swiftly, silently;
Tired and weary, weak and faint,
She bore her trials without complaint
Like many another household saint—
Content all selfish bliss above,
In the patient ministry of love.

At last, between the clouds of smoke
That wreathed his lips, the farmer spoke:
"There's taxes to raise and interest to pay
And if cherry should come a rainy day
I'm will be mighty handy. I'm sound to say
I have heard tell pin by. For folks must die
And their funeral bills are grave stones to buy—
Enough to stump a man, pretty high;
Besides, there's Edward and Dick and Joe
To be provided for when we go.
So, if I were you, I tell you what I'd do
I'd be savin' of wood as ever I could—
Extra fires don't do any good
I'd be savin' of soap an' savin' of the
And run apes and candles once in a
I'd rather be sparing of coffee an' tea
For sugar is high,
All all to buy,
And cider is good enough drink for me
[illegible]
And look out sharp lest the money slips
[illegible] half knows.

I'd tell the best of my cheese an' honey,
An' eggs is as good high' but as the money;
An' as to the carpet you wanted new—
I guess [illegible]
And as for the washer an' sewin' machine.
Them sinews to quite agree to so freaky mean
You'd better get rid of [illegible] clean.
What do they know 'bout women's work,
Do they calculate women was made to shirk?"

Dick and Edward and little Joe
Sat in the corner in a row.
They saw the patient mother go
On ceaseless errands to and fro
They saw that her form was bent and [illegible]
Her temples gray, her cheeks sunk in.
They saw the quiver of lip and chin—
And then, with a wrath he could not smother,
Outspoke the youngest, fearless brother:

"Yer a right ter savin' wood an' lie
An' tea an' sugar all the while,
But you NEVER talk of SAVIN' MOTHER!"

MEDICAL ADVICE.

Take the open air, the more you take the better;
Follow nature's laws to the very letter;
Let the physic go to the bay of Biscay;
Let alone the gin, the brandy and the whisky.

Freely exercise, keep your spirits cheerful;
Let no dreams of sickness make you ever fearful.
Eat the simplest food, drink the pure cold water;
Then you will be well, or at least you ought to.

THE SETTLER'S STRATEGEM.

BY CLINTON MONTAGUE.

Mark Stanton was one of those hardy pioneers who, in the early settlement of the country, moved from the more thickly settled seaboard and pitched his cabin in the valley at the Saco, far away from the seats of civilization. His nearest neighbor lived at a distance of two miles, near the western border of Lovewell's Pond. A wife and one child accompanied him into the wilderness.

The Indians at this period were peculiarly troublesome. Paugus indeed was dead—the great Sagamore whose name had been a source of terror for years, to even distant settlements; but the remnant of his tribe still made their home upon the broad meadow of the Saco and among the adjacent hills. Unable to make any large or connected attacks upon the invading whites, the red men contented themselves with pillage and theft and other annoyances. Against these numerous depredations the settlers had no adequate means of defense, and if they found their fowls, swine or cows missing, they had to submit to the loss as best they might.

Stanton had been a victim to these depredations on several occasions, but had attempted no retaliation. The chief leaders of the savages in these plundering inroads were two braves noted for their strength and ferocity, named Mattampa and Kalarna. On more than one occasion these warriors had even burned cabins and scalped the owners, and the settler deemed himself fortunate that no such injuries had been offered him.

One September day Mark found it necessary to visit his neighbor Drover's to obtain a few supplies that they stood in need of. So kissing the four-year-old daughter, and bidding his wife to guard carefully against any attack of the Indians, the settler took his rifle and departed for the settlement.

His stay was protracted to a later hour than he had anticipated, and it was nearly sundown when he set out on his return. He hurried his steps almost to a run as he thought of the anxiety that would be his wife's at his prolonged absence. Yet in his haste he neglected not to use both eyes and ears; for the settler was a true hunter, and had more than once saved his life by his craft and forest lore.

When about half the intervening distance had been passed, Stanton heard a noise that made him pause. It sounded like the cry of a child, and it was not far from his path. He listened in suspense and again heard the cry repeated. This time he recognized the voice as that of his own child, his darling Annie, whom he had last seen in her mother's arms at home. The cry was one of entreaty, of terror, too, and Stanton's heart beat loudly at the thought of the girl's danger.

He guessed instinctively what had happened. The Indians had visited his home during his absence and accomplished their fell purpose. As soon as the first shock of horror was passed he was nerved to action. Bending his ear to the ground he plainly heard the pit-pat of footsteps, but he was surprised to discover that there was but a single savage.

Quickly, but cautiously, he crept through the bushes, and finally got a glimpse of the red man at a little distance, hurrying through the deep wood. The Indian was tall and powerful, and he bore the light form under his arms as though it had been a mere feather's weight. The little thing had ceased to struggle, for one of the great red hands was pressed hard over her mouth, and she seemed nearly exhausted.

It took Mark Stanton but a moment to conclude what to do. He did not dare to rush upon the savage and attempt to beat him down, for he knew that if the red man was alarmed before he reached him the life of the child would be sacrificed. On the other hand, if he trusted to his rifle, there was a bare possibility that the girl might be injured, but it was far the better course. Hurrying cautiously forward until he reached a favorable point, he raised his trusty weapon to his shoulder. Leveling it full at the center of the red man's head, he took a careful aim and pulled the trigger. The next moment a sharp report rang through the forest.

Without waiting for the smoke to clear away, Stanton rushed forward and found the savage just gasping in his death struggle, while little Annie lay screaming by his side. He soon pacified the child, who he found was uninjured. Then he reloaded his rifle and made a hasty examination of the fallen Indian. The settler did not recognize him, but from his dress and ornaments he judged he was a warrior of some note.

Leaving him where he had fallen, Stanton took his child in his arms and wended his way homeward. It was quite dusk when he reached there, and he found his wife waiting for him nearly crazed with grief. The mother's strength returned when she saw her child, and after the congratulations of the hour, Mrs. Stanton told her story.

She had left Annie sleeping in her bed and went out to milk the cow. When she returned the child was missing. She had immediately begun a search, but without avail, and was fast approaching hysterics when her husband returned. She now urged im immediate flight to the Pond, and Stanton promised to accede to her wishes as soon as their ripening crops were harvested.

The following morning the settler went to the place where he had left the dead Indian, with the intention of burying him; but he found that the body had been carried away. There were heavy tracks about the spot, and Stanton readily conjectured that some of the warrior's friends had effected the removal. With this conclusion he retraced his steps, determined to keep his eyes open and his rifle ready.

The second morning afterwards as Mark Stanton stepped from his cabin he saw something lying upon the door-stone. He stooped and picked it up, and saw that it was an arrow, with the skin of a rattlesnake around about it. He knew what the fatal signal meant at once. The man who left that snake-bound shaft at his door had sworn to kill him.

The settler was a brave man, but this stern significant token affected him as the presence of the avenger himself would have not. At first he thought he would not tell his wife, but on reflection, he concluded it would be better to let her into the secret. It would be better for her and better for him, for a constant watch must now be maintained.

Mrs. Stanton's first impulse, as soon as she understood what her husband told her, was to hasten to the settlement.

"That would hardly be a safe undertaking," returned the settler; "for my enemy may be even now watching near the cot, and were we to start out I might get a bullet through my body."

The young wife was sorely frightened, but she saw the reasonableness of her husband's statement and she urged her point no further. All that day they kept within doors, and during the night Stanton did not relinquish his watch. But no signs of Indians were visable.

On opening the door in the morning, however, the settler saw another arrow laying near the door-step. To this one a roll of birch bark was attached. Carrying it into the house, he unrolled the bark and found it embellished with a rude drawing. It was not difficult to make out what was intended to be conveyed.

In one corner of the segment was the picture of a dead Indian, and from the hieroglyphics underneath, Stanton gathered the fact that it was meant for Mattampa, one of the noted braves of the Pequaket tribe. Beyond him was another brave, with drawn bow in his hand and arrow speeding from it. Under this one was the name of Kalarna. The third figure represented a white man with an arrow piercing his bosom.

The settler's anxiety was not materially decreased by the knowledge that his foeman was one of these distinguished braves. He knew he had to deal with one of the most crafty and relentless savages of that region, and he knew enough of the Indian's character to know that he would not swerve from his revengeful plan until he had performed the deed or fallen in the conflict.

"What shall we do? What shall we do?" cried Mrs Stanton, shielding Annie in her arms. "We may be surrounded by enemies at this moment."

"That is not probable," said her husband. "Kalarna is too much of a brave to suffer that. I have slain his brother, and he alone will seek revenge. He has given me fair warning, and now he will hang around my path till he accomplishes his fell purpose, unless I can contrive to circumvent him. He thinks he has put me on the rack, and his next step will be to put a rifle ball through my heart. But he will work in the dark."

"Could I not go to the settlement and inform them of your danger?" asked the heroic wife, brave now that she knew what the danger was that was to be met.

Stanton shook his head dubiously. "You would not be permitted to do that," he answered. "Besides, I would not have you undergo such a risk."

The situation was truly a perplexing one. The stout settler was imprisoned in his own cabin as surely as though he had been within the walls of a dungeon. The avenger was already on his track, and might be even then hidden in the green wood. He felt confident that, should he step one foot out of doors his body would be the mark for a bullet.

In the middle of the afternoon Mrs. Stanton opened the back door and went out to get a pail of water. The spring was situated a few rods from the cabin, near a thicket of trees and bushes. As she stooped to dip the water she saw the painted visage of an Indian glaring at her through some sassafras bushes. Though trembling with fear she did not betray a sign that she had observed him and bore her pail in with seeming carelessness into the house. Once within she sat down pale and trembling.

"I have seen an Indian," said she, in reply to her husband's questioning. "He is hid in the clump of white woods by the spring. Oh, you will be killed! Mark, you will be killed!"

Stanton stepped to one of the small loopholes between the logs and looked sharply out. The bushes in question were not over ten rods from the door. He could see no Indian there, but he knew it was a place where an Indian might hide, and he did not doubt his wife's eyesight. Kalarna was probably there waiting for his appearance.

The settler's craft did not desert him. He felt easier to know that his enemy was near him, for he could make his plans accordingly. He knew his enemy's position and that knowledge placed him, as it were, on something like an equality with him.

"Mary," said he to his wife, "I am going to kill that Indian."

"What are you going to do?" she cried in agony of pain and suspense. "The moment your step a foot outside the door you will be shot."

"Of course, if I go out I am subject to be killed. But suppose something should go out that only looked like me, what then?" he asked.

"What do you mean, Mark?" and Mrs. Stanton gazed into her husband's face as if to comprehend his meaning.

"I mean that we will send out a man of straw to draw the enemie's fire. After that it will be my turn at the rifle. Now do you understand?"

The wife said she thought she did.

"Then let us go to work as quickly as possible, before the Indian changes his lurking place."

Stanton's plan was clear enough, and they proceeded to speedily carry it into execution. The settler doffed his clothes, which they stuffed with bedding. A proper looking head was fashioned from a pillow, on one side of which was tacked a piece of pearskin to represent hair. Upon this was placed a hat, and when all was completed it formed as respectable a looking effigy as could be gotten up, indeed, so excellent was the likeness that the good wife declared that, had she seen it for the first time in the woods, she should not have known it from her husband.

In order to perfectly carry out the settler's plan a broom handle was fixed to the effigy, under the right arm, so that it could be held in an upright position. Mrs. Stanton then practiced upon it until she could move it about as if it had life.

When all was ready the settler took his station at the loophole which looked towards the cover of the Indian. He had already his rifle in readiness, and as soon as the muzzle of the piece was in its place, and he was sure of his aim, he gave the signal to his wife.

She opened the door very slowly, and carefully lifted the image out over the threshold upon the stone, holding it there steadily. At the same moment Stanton saw a human head lifted cautiously above the white wood bushes. The eagle features and the painted countenance told that it was an Indian brave. The settler instantly covered the right eye of the red man with the sight of his rifle.

The redskin discharged his rifle at the same instant with the white man, so that both reports were simultaneous. A loud death yell told the result of the settler's shot, and Stanton saw his red foeman leap into the air and fall to the ground. The Indian's aim had been no less certain, for on examining the effigy they found a bullet hole just where the heart would have lain in a human bosom.

After awhile Mark Stanton went out to the white wood bushes. He found the vengeful Kalarna stone dead. A bullet had passed into his right eye through the brain. The red man had fought his last battle.

He buried the dead body at a distance, and removed as well as he could all traces of the conflict, then for two or three days kept a careful watch. But he was not molested. The attempt upon his life had been planned by Kalarna alone, and the death of the redoubtable warrior was not traced to his hands.

The sturdy pioneer lived there many years and prospered. Grandchildren grew up around him, to whom the adventures of their grandsire were as interesting as fairy tales. But there was one story they never heard without a tremor, and that was the hunter's strategem when he slew the famous Pequaket.

How to Secure Health.

It is strange any one will suffer from derangement brought on by impure blood when Scovill's Sarsaparilla and Stillingia or Blood and Liver Syrup will restore health to the physical organization. It is a strengthening syrup, pleasant to take and the best blood purifier ever discovered, curing scrofula, syphilis, disorders, weakness of the kidneys, erysipelas, malaria, nervous disorders, debility, bilious complaints and diseases of the blood, liver, kidneys, stomach, skin, etc.

Baker's Pain Panacea cures pain in man and beast. For use externally and internally.

Dr. Roger's Vegetable Worm Syrup instantly destroys Worms and removes the secretions which cause them.

Townsley's Toothache Anodyne cures instantly.

What Common Sense Does.

Common sense is symmetry of mind, character, and of purpose in the individual combined. It represents man in completeness, harmony, and equipoise. It clothes him with dignity, invests him with power, and stamps him with superiority. It is not genius, for that is often erratic; or cunning, in its sinuous course; nor art, with its decline into trickery. Common sense is the embodiment of true manhood. It confers a patent of royalty, though birth be plebian, and exalts men from their lowliest spheres to the highest stations. Not by sudden freaks of fortune or a train of adventitious circumstances are they thus dignified; but step by step, through obstacle and hindrance, they gain it by force of character and the right use of will power. Common sense is a tremendous force in this lower world. Its power is felt and acknowledged [illegible] all the manifestations of genius, business, finance, and commerce. In fact it is the [illegible] has the true philosophy of life. It is the self that has saved itself, [illegible] and the impetus that has propelled the race onward in all progress and civilization.

Humor in the Stomach.

Much of the distress and sickness attributed to dyspepsia, chronic diarrhoea and other causes is occasioned by humor in the stomach. Several cases with all the characteristics of these complaints, have been cured by Hood's Sarsaparilla. Other cures effected by this medicine are so wonderful that the simplest statements of them affords the best proof that it combines rare curative agents, and when once used secures the confidence of the people.

Astronomy is a beautiful science. We are told that if a railway was to run from the earth to the nearest fixed star, and the fare was one penny for every hundred miles, and if you were to take a mass of gold to the ticket-office equal to twice the national debt—or $3,800,000,000—it would not be sufficient to pay for a ticket to the nearest fixed star aforesaid. If this be the case, it matters very little to us whether such a railway is ever constructed. It would be discouraging to go to the ticket-office with a mass of gold equal to $3,800,000,000, and be informed that the fare was $5,678,032,000. If the ticket agent wouldn't trust until we got back, we'd be compelled to forego the trip.—*Norristown Herald.*

Ayer's Sarsaparilla, purifying pure and [illegible] invigorates and mind in [illegible] health.

Why Woolen Fabrics Shrink.

The fibers of wool and certain kinds of hairs are toothed or jagged at the edges, the teeth, or imbrications, pointing upward—that is, from the root to the point. When subjected, therefore, to compression or friction, these fibers, being free to move only in one direction by reason of these asperities of surface, have a great tendency to unite and lock together. This explains the peculiar capability possessed by wool of felting, and also the shrinking of fabrics of wool. In the latter case, the excessive rubbing to which they are subjected causes a matting or binding together of the ultimate fibres, which causes shrinkage; and this is intensified by changing the goods from hot to cold water, which is usually practiced, as the contraction of the fibres which this causes is itself a felting process. For washing woolen articles, it is recommended to place them in warm water, never in cold; and if changed from one water to another, they should go from hot to hotter. They should be cleansed with as little and as gentle friction as possible. The fibers of cotton and linen are straight and smooth, and possess none of the surface roughness that characterize the structure of wool, hence they do not shrink in washing.

It makes every humanitarian sad to see invalids seek such relief as is given them by the use of bitters, kidney medicines, and other nostrums. The first few doses may make them feel better on account of its stupefying ingredients, combined with some strong cathartic and diuretic that are used in its composition, but they eventually grow worse. The only cure for weakness, nervousness, debility, aches, pains, rheumatism, sores, urinary and digestive troubles, is to make the blood rich, red and pure, by using Dr. Guysott's Yellow Dock and Sarsaparilla, a remedy widely indorsed by physicians who have examined into its composition and effect.

On one occasion while the English naturalist Gould was wandering along the banks of the Thames with a party of friends, a rare laugh was created at his expense. He had climbed a tree for the purpose of exploring the contents of a nest. On suddenly looking down at a hollow formed by two branches of the tree, and which at the time contained a pool of water, he exclaimed: "As I'm a living man, if there is not a large owl here in this hole, looking straight at me." The excitement was intense, but was instantly turned to a shout of merriment, when the naturalist on putting down his hand to seize the supposed owl, discovered that it was simply the reflection of his own image in the water.

Nervous, dyspeptic individuals, whose distress of mind and body make life miserable, if your sufferings have been prolonged and increased by the use of bitters and pretended cures of kidney and liver diseases, throw all such nostrums aside, and find health, strength and vigor in that simple remedy known as Dr. Guysott's Yellow Dock and Sarsaparilla. It purifies the blood, strengthens the urinary and digestive organs, and infuses new life into all parts of the body. No other remedy equals it. Have your druggist get it for you.

Long visits, long [illegible] long exhortations, and [illegible] profit those who h[illegible] Life is short. Time is sho[illegible] are precious. Learn to condense [illegible] and intensify. We can bear things are dull if they are only short. We [illegible] endure many an ache and ill if it is [illegible] soon, while even pleasures grow insipid, and pain intolerable, if they be protracted beyond the limits of reason and convenience. Learn to be short. Lop off branches; stick to the main facts in your case. If you pray, ask for what you would receive, and get through; if you speak, tell your message and hold your peace; boil down two words into one, and three into two. Always learn to be short.

If your lungs are weak, if a cold causes you quick distress, you will breath easier, you will cough less, you will strengthen the pulmonary organs, you will feel better every way if you will occassionally use Dr. Wistar' Balsam of Wild Cherry. Ask your druggist for it.

A distinguished scholar and writer recently said: "I flounder in a sea of scraps." In these days, when the papers contain so many fine sentiments, beautiful descriptions, touching incidents, items of importance, and matters of permanent interest, culled from all departments of life, there is scarcely a day in which something does not strike the eye which the reader wishes to preserve, in order to remember and perhaps to use. One of the first things a bright boy or girl should make is a scrap-book, of things which interest most. If you have no book, put your selections in different envelopes, according to subjects. The newspaper is a circulating library, with little of everything in it, and a little for everybody. Make sure of your part of it as you read.

Time to Stop it.

It's too bad, Sir or Madam, but don't get frightened. Your hair is falling off—that's certain. A glance in the mirror, or an investigating committee of fingers tell the dismal story. We won't discuss the possible cause. It is enough that Parker's Hair Balsam used now will prevent further destruction. Is your hair somewhat gray, too and crisp? Alas, yes. The Balsam will give back the original color, softness and gloss. Not a dye, not oily, elegantly perfumed, a perfect dressing.

The highest elements of character, of power and dignity are within reach of the lowest and the poorest.

Instead of being content to live so as to escape blame, the Christian is required to live so as to prove a means of blessing.

The government of a nation demands a certain harmony like music, and certain proportions like architecture.

How to Get Sick.—Expose yourself day and night, eat between meals, take no exercise, work too hard without rest; doctor all the time, take all the vile nostrums advertised, and then you will know what to know.

How to Get Well.—Which is answered in three words—Take Hop Bitters.

Paper can be made quite transparent by spreading over it with a feather a very thin layer of resin dissolved in alcohol, applied to both sides.

A FEW HINTS

FOR THE USE OF

AYER'S PILLS

DOSE.—*To move the bowels gently, 2 to 4 Pills; thoroughly, 4 to 6 Pills. Experience will decide the proper dose in each case.*

For **Constipation**, or **Costiveness**, no remedy is so effective as AYER'S PILLS. They insure regular daily action, and restore the bowels to a healthy condition.

For **Indigestion**, or **Dyspepsia**, AYER'S PILLS are invaluable, and a sure cure.

Heart-burn, Loss of Appetite, Foul Stomach, Flatulency, Dizziness, Headache, Dumbness, Nausea, are all relieved and cured by AYER'S PILLS.

In **Liver Complaint, Bilious Disorders, and Jaundice**, AYER'S PILLS should be given in doses large enough to excite the liver and bowels, and remove **constipation**. As a cleansing medicine in the Spring, these PILLS are unequalled.

Worms, caused by a morbid condition of the bowels, are expelled by these PILLS.

Eruptions, Skin Diseases, and Piles, the result of Indigestion or Constipation, are cured by the use of AYER'S PILLS.

For **Colds**, take AYER'S PILLS to open the pores, remove inflammatory secretions, and allay the fever.

For **Diarrhœa and Dysentery**, caused by sudden colds, indigestible food, etc., AYER'S PILLS are the true remedy.

Rheumatism, Gout, Neuralgia, and Sciatica, often result from digestive derangement, or colds, and disappear on removing the cause by the use of AYER'S PILLS.

Tumors, Dropsy, Kidney Complaints, and other disorders caused by debility or obstruction, are cured by AYER'S PILLS.

Suppression, and Painful Menstruation, have a safe and ready remedy in

AYER'S PILLS.

Full directions, in various languages, accompany each package.

How Watch Cases are Made.

Most persons have an ambition to carry a gold watch case, and yet few people know how a watch case is made, or the vast difference in the quality of them. In a SOLID GOLD WATCH CASE, aside from the necessary thickness for engraving and polishing, a large proportion of the metal is needed only to stiffen and hold the engraved portions in place, and supply strength. The surplus is not only needless, but undesirable, because gold is a soft metal and cannot furnish the stiffness, strength and elasticity necessary to make the case permanently strong and close-fitting. The *perfect* watch case must combine gold with some metal that will supply that in which the gold is deficient. This has been accomplished by the *James Boss Gold Watch Case* which saves the WASTE of *needless* gold, and INCREASES the SOLIDITY and STRENGTH of the case, and at the same time reduces the cost ONE HALF.

Send 3 cent stamp to Keystone Watch Case Factories, Philadelphia, Pa., for handsome Illustrated Pamphlet showing how James Boss' and Keystone Watch Cases are made.

Rheumatine!

An Internal Remedy and a Sure Cure for all kinds of

Rheumatic Complaints!

If you are suffering from

Kidney Complaints

Give Rheumatine a fair trial. You will never regret having done so.

Testimonial from Mr. Thomas H. Day, of No. 33, 23d street, Chicago, who has been for many years employed by the Wagner Sleeping Car Co. and is now conductor of one of their cars running between New York and Chicago.

J. N. SUTHERLAND,
Manager Rheumatine Mfg Co.,
Niagara Falls.

CHICAGO, June 25, 188[illegible]

Dear Sir—It gives me pleasure to inform you of the benefit your rheumatic cure "Rheumatine" has been to my daughter, who for the past few years has been a great sufferer from Rheumatism at times being quite helpless. She took three (3) bottles of your preparation, and I can bear testimony to its speedy action in affording her relief from pain and soreness. Thanks to Rheumatine her health is now quite restored.

Yours very truly,
THOS. H. DAY.

See our change of Testimonials every week in Daily Papers.

SAMARITAN NERVINE

NEVER FAILS.

"You claim too much for SAMARITAN NERVINE," says a sceptic. "How can one medicine be a specific for Epilepsy, Dyspepsia, Alcoholism, Opium Eating, Rheumatism, Spermatorrhœa, or Seminal Weakness, and 100 other complaints?" We claim it is specific, simply, because the root of all diseases arises from the blood. Its Nervine, Resolvent, Alterative and Laxative properties meet all the conditions herein referred to. It's known wherever used as

THE GREAT

NERVE CONQUEROR

It quiets and composes the patient—not by the introduction of opiates and drastic cathartics, but by the restoration of activity to the stomach and nervous system, whereby the brain is relieved of morbid fancies, which are created by the causes above referred to.

To Clergymen, Lawyers, Literary men, Merchants, Bankers, ladies and all those whose sedentary employment causes nervous prostration, irregularities of the blood, stomach, bowels or kidneys or who require a nerve tonic, appetizer or stimulant, SAMARITAN NERVINE is invaluable. Thousands proclaim it the most wonderful invigorant that ever sustained the sinking system. $1.50. Sold by all Druggists. (14)

The Dr. S. A. Richmond Med. Co., Propr's., St. Joseph, Mo.

K. B

KING OF THE BLOOD.

The Most Thorough Purifier of the Blood Yet Discovered.

Cures all Humors, from a Common Eruption to the worst Scrofula.

It purifies the Blood.
It invigorates the Liver.
It regulates the Bowels.
It strengthens the stomach.
It gives vivacity in place of lassitude; cheerfulness in place of gloom, and robust vigor in place of debility.

Dyspepsia, Biliousness, Disordered Liver, Constipation, Nervous Affections, General Debility, in short all the numerous diseases and discomforts caused by impure blood are speedily conquered by this powerful corrector, the chief and Sovereign of all ancient or modern medical discoveries—KING OF THE BLOOD.

Its name is its best description as it is a royal dispenser of the blessings of health and vanquishes the foes that lurk in the blood.

It banishes PIMPLES, SALT RHEUM, SCALY ERUPTIONS, ULCERS, SCALD HEAD, FEVER SORES, and all SCROFULOUS DISORDERS.

It checks CONSUMPTION in its early stages. It has frequently cured it when advanced.

It disperses TUMORS and CANCERS without the Surgeon's knife.

It cures DROPSY, general or partial.

It cures FEMALE WEAKNESS and DISEASE.

It reduces in a safe and effectual manner all swellings, external or internal.

It eradicates the effects of Venerial Disease and Mineral Poisons, and establishes a sound constitution.

Many certificates, much further information and full directions for using, will be found in the pamphlet, "Treatise on Diseases of the Blood," in which each bottle is enclosed.

Price $1 per bottle containing 12 ounces, or in 50 doses. Sold by dealers in medicine.

If your druggist does not happen to have it on hand, request him to order a supply of it for you, as it will be cheaper than for you to order direct of us, and less trouble.

Some Physical Fruits of Idleness.

The mind should be always occupied; it is strengthened and preserved in a healthy state by work; whereas it decays or becomes impoverished by disease; or what is even worse, since it is impossible to keep the brain absolutely at rest, its powers should be profitably employed, or they react on the system, and give rise to the numberless ailments, physical, mental, and moral, known as hysteria. This term almost implies that I am thinking of the female sex; certainly it is to women especially that the want of occupation applies. Young men are forced to get their living whether they like it or not; but a large number of young ladies in a family have absolutely nothing to do. Those brought up in the country have this advantage, that they may always make work for themselves; the village children may be otherwise taught and cared for; bringing not only a blessing upon them, but a healthy body and mind to the benefactor. In town the condition of middle-class girls is to me pitiable. They are too genteel to follow any occupation; they are often too many in a family to assist in domestic duties; they have returned home with some very poor accomplishments; their knowledge of French and German is not sufficient to allow them to converse in those languages; with music just enough to indulge in doleful song or play badly on the piano. They dawdle through the day in a listless way, and fall victims to a thousand little ailments which the doctor is supposed to put right by physic. And the most curious thing is that, should the instincts of the girl force her to put some of her energies into use, she is likely as not to be thwarted by her mother. I am a daily witness to this; and, when young ladies are brought to me for advice, the invariable story is that they are overtaxing their strength; the maternal instinct being so perverted that it has become with many the belief that every movement means fatigue, and absolute rest is the way to ensure health. It is against this very erroneous view that I am now preaching. These mothers do not come to the doctor for advice, but come to dictate to him; and they say, "I want you, doctor, to insist on my daughter not playing the organ at church, for it is too much for her; or having the children's class once a week, for she is always ill after it; but order her to have her breakfast in bed, and a glass of port wine about 11 o'clock." It is this fanciful care on the part of parents which is so injurious for the very energy of young people would command them to occupy themselves. I do not know that girls are worse than boys in respect of idleness; for probably the latter would not work unless obliged, and even for them an occupation is good quite apart from that at which earn their daily bread.

The Leading-Strings Fallacy.

From the moment a child is born, he is treated on the principle that all his instincts are essentially wrong, that nature must be thwarted and counteracted in every possible way. He is strapped up in a contrivance that he would be glad to exchange for a straight-jacket, kept for hours in a position that prevents him from moving any limb of his body. His first attempts at locomotion are checked; he is put in leading-strings, he is carefully guarded from the out-door world, from the air that would invigorate his lungs; from the sports that would develop his muscles. Hence, the peevishness, awkwardness, and sickliness of our young aristocrats. Poor people have no time to imitate the absurdities of their wealthy neighbors, and their children profit by what the model nurse would undoubtedly call neglect. Indian babies are still better off. They are fed on bull-beef, and kicked around like young dogs; but they are not swaddled, they are not cradled, and not dosed with paregoric; they crawl around naked, and soon learn to keep out of the way; they are happy, they never cry. If we would treat our youngsters in the same way, only substituting kisses and bread for kicks and beef, they would be as happy as kids in a clover field, and moreover they would afterward be hardier and stronger. Every week the newspapers tell us about ladies tumbling down stairs and breaking both arms; boys falling from a fence and fracturing their collar-bones. From what height would a young Comanche have to fall to break such bones—not to mention South-sea Island children and young monkeys? The bones of an infant are plastic; letting it tumble and roll about would harden the bony tissue; guarding it like a piece of brittle crockery makes its limbs as fragile as glass. Christian mothers reproach themselves with neglecting their duty to their children if they do not constantly interfere with their movements, but they forget that in points of physical education Nature herself is such an excellent teacher that the apparent neglect is really a transfer of the pupil to a more efficient school.

Sun-Spot Suppositions.

Enthusiasts who make a special study of sun-spots and attendant phenomena believe that the corner-stone of a new science is being laid by discoveries pointing to an intimate connection between solar and terrestrial meteorology. Just what the connection is they are not yet able to clearly define, although electricity is suspected of being the agent through which the effects are manifested upon our planet. It is known that the gaseous envelope of the sun is affected by eruptions of such prodigious magnitude as to be utterly beyond our power of conception, these disturbances appearing to us in the form of rapidly changing spots and protuberances. The eras of the spots—or sun-storms—occur at remarkably regular intervals, a complete cycle of the various stages of activity from maximum to minimum, and again to maximum being performed in about eleven years—the so-called "sun-spot period." The sun-spot physicists claim a coincidence of the periods of maximum spots and years of great atmospheric and physical disturbance in the earth. The year 1881 was one of great solar disturbances, while it was marked by violent storms and earthquakes upon our globe. Further than this, these scientists claim to have recently detected by simultaneous observation minor atmospheric changes as the result of corresponding movements in the sun. Many difficulties attend these observations, but the Astronomer Royal for Scotland and others believe that the state of the sun will some day become an important factor in weather forecasts and like calculations.

Bucklan's Arnica Salve.

The greatest medical wonder of the world. Warranted to speedily cure Burns, Bruises, Cuts, Ulcers, Salt Rheum, Fever Sores, Cancers, Piles; Chilblains, Corns, Tetter, Chapped Hands, and all skin eruptions, guaranteed to cure in every instance or money refunded. 25 cents per box. Sold by C. A. Wright & Co.

A City of Perfumes.

A writer in *All the Year Round* says: The Tunisian Arabs have a passion for flowers, and as soon as their spring commences, even the poorest and raggedest may be seen with delicately scented blossom stuck above his ear, the stalk resting amid the folds of his turban and the flower projecting over his dark cheek. I have been told by those who have thirty years' knowledge of these people, that they will almost go without bread to buy flowers. And there is something in the sight of a gaunt, toil-worn Arab, whose sole garment may consist of a piece of coarse sacking and a ragged old turban, with a bunch of delicate spring blossoms drooping their cool freshness against his swarthy cheek, which stirs a strange mingling of sympathy and pity and admiration.

The perfumes distilled at Tunis have been famous from time immemorial, and I really think the Tunisians are right when they declare that their roses are sweeter than all others. There is one very large, rather pale rose, in particular, from which the famous attar is extracted, which exhales an odor so powerful and yet so delicate that it seems a figure of speech to speak of the "odors of Paradise," and one can understand that the Mohammedan's heaven would hardly be complete without it. But at Tunis it is not only the rose which is made to yield up its sweet breath, to be afterwards imprisoned in cunning little caskets and sparkling crystal flasks enriched with gilding, suggesting to the wandering fancy of the Arabian Nights' haunted traveler (and who is there who is not continually haunted by that wonderful book from the moment he finds himself among Oriental scenes?) the imprisoned spirit of some fairy, in eternal subjection to the powerful genii man. The odors of the violets, jasmine, the orange flower, and many others are extracted with equal skill, and in the bazaars mingle their scents with the perfume of sandal-wood and other sweet smelling woods, whose names I do not know, and with that of the curious most odoriferous dark substance which the natives call amber.

If you go to buy perfumes, the vendor will perhaps offer you a little ivory box (Arabian Nights again!) or porcelain vase containing a scented unguent for the hair, or may be a string of beads to hang around your neck, apparently thinking it of small consequence in what way you perfume your person so that the desired odor is conveyed to the senses. In Arab households incense and sandal-wood are frequently burned on charcoal braizers. The Arabian women of the higher class are extravagantly fond of highly scented earrings, bracelets, etc., and a lady told me that on being introduced into the apartment of a newly married wife she saw suspended on the wall a magnificent kind of necklace, almost as large as a collar of the Order of the Golden Fleece, formed of scented woods and amber, enriched with plates and beads of pure gold, finely worked. This ornament perfumed the whole apartment, and my friend was informed that in well-to-do households it was always to be found in the chamber of the newest wife.

Useful Recipes.

Rye Breakfast Cakes.—Two cups of rye meal, one-half cup of sweet milk, one teaspoonful of soda, and a little salt. Bake at once in gem pans.

Lemon Butter for Tarts.—Lemon butter is excellent for tarts. It is made as follows: One pound pulverized white sugar, whites of six eggs and yolks of two, three lemons, including grated rind and the juice. Cook twenty minutes over a slow fire, stirring all the while.

Parsley Sauce.—Wash a bunch of parsley in cold water, then boil it for six or seven minutes in salt and water; drain it, cut the leaves from the stalk and chop them fine. Have ready some melted butter and stir in the parsley; allow two small tablespoonfuls of leaves to one-half pint of butter. Serve with fish and with boiled fowls.

Baked Apple Pudding.—Six apples well stewed, quarter of a pound of butter, half of it stirred into the apples while hot; add sugar to taste; when cold add six eggs well beaten to the apples. Pound and sift six crackers, butter your dish and put in a layer of cracker and a layer of the prepared apple, and thus until you have filled your dish; let the cracker be the upper layer and put the remainder of your butter in small bits upon it. Bake half an hour.

Sauce Tartare.—Mix the following ingredients with a pint of good mayonnaise, and keep the sauce cool until wanted for use: One teaspoonful of chopped shallot or white onion, one tablespoonful each of finely chopped capers, parsley, and pickled gherkins; in the spring and summer add one tablespoonful of chopped green tarragon; in the winter substitute the sprig of tarragon which is always placed in the bottles containing capers, and which, of course, must be finely chopped.

Beef à la Mode.—Take ten or twelve pounds of beef, (rump,) and lard the meat through with ten long pieces of fat bacon; then put it into a long earthen pan with a calf's foot, four onions, two carrots, (if large cut in slices,) a bunch of parsley, two bay leaves, two sprigs of thyme, two cloves stuck into one of the onions, half a teaspoonful of pepper, one of salt, four wine-glasses of sherry, four wine-glasses of water, and a pound of steaked bacon cut in squares; put a cover over the pan, and make it air-tight with a paste of flour and water around the edges; place it in a moderate oven for four hours; then take it out of the pan and dress it upon a dish with vegetables; pass the gravy through a hair sieve and pour it over the meat and serve. This dish is the best eaten cold, when it should not be taken from the pan or the pan opened until nearly so.

Daughters, Wives and Mothers.

We emphatically guarantee Dr. Marchisi's Catholicon a Female Remedy, to cure Female Diseases, such as Ovarian troubles, inflamation and ulceration, falling and displacement or bearing down feeling, irregularities, barrenness, change of life, leucorrhœa, besides many weaknesses springing from the above, like headache, bloating, spinal weakness, sleeplessness, nervous debility, palpitation of the heart, &c. No cure, no pay. For sale by druggists. Prices $1 and $1.50 per bottle. Send to Dr. J. B. Marchisi, Utica, N. Y., pamphlet free. For sale by Waldo & Doty.

Positive Cure for Piles.

To the people of this county we would say we have been given the agency of Dr. Marchisi's Italian Pile Ointment—emphatically guaranteed to cure or money refunded—internal, external, blind, bleeding or itching piles. Price 50 cents a box. No cure, no pay. For sale by Waldo & Doty, druggists.

Read for a Purpose.

It is a mistake to suppose that the more a person reads the wiser he will grow, as a matter of course. I know a young girl of perhaps fourteen, who is a devourer of books of the story sort, such as fill most of our Sunday-school libraries. Every spare minute she gives to the business, and travels through the volumes at a most rapid pace. But it seems exactly like pouring water through a sieve. Not a valuable idea stays in the mind. The whole attention is absorbed in finding out "how the story turns out," with no reference whatever to its teachings. Daniel Webster, when a boy, obtained more information from a farmer's almanac than she would from whole shelves full of Books read in that manner.

Indeed such reading weakens the mind instead of strengthening it. Nor does it soften the heart toward real suffering to have the feelings touched and even greatly moved by fictitious sorrows. Even high admiration of self-denial and moral heroism in a favorite character leads to no corresponding action in the readers' life. Rather all demands upon her sympathy and self-denial make her only peevish and irritable. Have you never seen an absorbed reader of fiction weeping over a pathetic tale, but indignant when a weary mother called her off to attend to neglected duties. How angrily the thread of ever-day work was taken up, and how little her presence contributed to lighten the home cares! Any reading that has such an effect on the mind is an evil of a decided character and of most serious magnitude. A well-written story which has a decided point to it is a relaxation for both mind and body; but stories of perverted moral sentiment, where black is invariably painted white, and *vice versa*, are only pernicious, destroying both soul and body.

Read for a purpose, and make the points of the book your own. If a story is read for recreation, let it be a good one in the truest sense, and do not make such reading the sole literary food. When we have found an author who sets our own minds at work in a laudable direction, we have opened a good mine. There are some writers who stop us, in effect, in every half page or less, with new trains of thought which their words have awakened; and better still, they set us to doing as well as thinking. Cultivate such helpful friends and you will then secure the noblest end of reading, and will have paved the way for high improvement. After the habit is once well formed of reading for a high and noble purpose, it will be found a source of enjoyment never dreamed of in the old days when reading was only an amusement.

How Does He Sleep?

One of the most important things to know about any man upon whom you are going to place any dependence, is how he sleeps. Sleeplessness may sometimes be involuntary. There may have been some shock to the man's nerves which has made him insomnolent; but sleeplessness is more frequently voluntary. Men choose to push their studies or their work into those hours when they should sleep. It does not matter for what cause any man may do this, the mere fact of not sleeping spoils his case. He may spend his nights in the theater, in the study, or in the "protrated meeting." It will make no difference; the result to the body will be the same. The sleep was not had, and for that the man must pay.

One man may do with a little less sleep than another; but, as a general rule, if you want a clerk, a lieutenant, a lawyer, a physician, a legislator, a judge, a president or a pastor, do not trust your interests to any man that does not take eight good, solid hours of sleep out of every twenty-four. Whatever may be his reason for it, if he does not give himself that, he will snap sometime just when you want him to be strong.

The intellectual and moral connections of sleeping have, I think, not been sufficiently appreciated. Men and boys have been praised for "burning the midnight oil." Now this "midnight oil" is a delusion and a snare. The student who is fast asleep at eleven o'clock every night and wid awake every morning at seven o'clock is going to surpass another student of the same intellectual ability who goes to bed after twelve and rises before five. In sleep, the plate on which the picture is to be taken is receiving its chemical preparation, and it is plain that that which is the best prepared will take the best picture.

Men who are the fastest asleep when they are asleep, are the widest awake when they are awake.

Great workers must be great resters.

Every man who has clerks in his employ ought to know what their sleeping habits are. The young man who is up till two, three and four o'clock in the morning, and must put in his appearance at the bank or store by nine or ten o'clock and work all day, cannot repeat this process many days without a certain shakiness coming into his system, which he will endeavor to steady by some delusive stimulus. It is this way that many a young man begins his course to ruin. He need not necessarily have been in bad company. He has lost his sleep, and losing sleep is losing strength and grace.—*Rev. De. Deems.*

Writing for the Press.

There are thousands of young folks who long to write for the papers and get well paid for it. From the first they think they ought to receive three or four dollars a column, valuing their attempts by the labor expended upon them rather than by their capacity for pleasing the public. Now to get handsomely paid one must write handsomely; to write handsomely one must know what the public knows, or would like to know, and be able to tell it in such a style that the public will be eager to hear it. There are thousands who long to write, but have no special aptitude or preparation or resource for writing, just as there are thousands who long to be rich, but cannot compass their desires in that direction, and thousands who long to be beautiful, and vainly exhaust fashion, corsets and all that in the attempt. Meantime, those who are bound to succeed at writing, and "have it in them" to succeed, will keep on steadily and quietly at their books and pens, climbing up slowly, it may be, but steadily, to place and pay, first deserving success and then attaining it—just as men grow rich by small accretions at first and larger accretions afterward. There is an immense reading public, and there must be an immense army of writers to supply the demand. As education and intelligence advance, the demands on writers for higher grades of literary work and newspaper work, will advance, and the more difficult it will be to fill the highest place of honor and emolument in the world whereof the pen is the power. But the lists are open to all, and some must surely succeed. Why not you as well as another?

CASTORIA

for Infants and Children.

Castoria promotes Digestion and overcomes Flatulency, Constipation, Sour Stomach, Diarrhœa, and Feverishness. It insures health and natural sleep, without morphine.

"Castoria is so well adapted to Children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D., 82 Portland Ave., Brooklyn, N. Y.

What gives our Children rosy cheeks,
What cures their fevers, makes them sleep;
'Tis Castoria.

When babies fret and cry by turns,
What cures their colic, kills their worms,
But Castoria.

What quickly cures Constipation,
Sour Stomach, Colds, Indigestion,
But Castoria.

Farewell then to Morphine Syrups,
Castor Oil and Paregoric, and
Hail Castoria!

CENTAUR LINIMENT—an absolute cure for Rheumatism, Sprains, Burns, Galls, &c. The most Powerful and Penetrating Pain-relieving and Healing Remedy known to man.

PARSONS' PURGATIVE PILLS

MAKE NEW RICH BLOOD.

And will completely change the blood in the entire system in three months. Any person who will take 1 Pill each night from 1 to 12 weeks, may be restored to sound health, if such a thing be possible. For curing Female Complaints these Pills have no equal. Physicians use them in their practice. Sold everywhere, or sent by mail for eight letter-stamps. Send for circular. I. S. JOHNSON & CO., BOSTON, MASS.

DIPHTHERIA

CROUP, ASTHMA, BRONCHITIS, JOHNSON'S ANODYNE LINIMENT will instantaneously relieve these terrible diseases, and will positively cure nine-cases out of ten. Information that will save many lives sent free by mail. Don't delay a moment. Prevention is better than cure.

JOHNSON'S ANODYNE LINIMENT (*For Internal and External Use.*) CURES Neuralgia, Influenza, Sore Lungs, Bleeding at the Lungs, Chronic Hoarseness, Hacking Cough, Whooping Cough, Chronic Rheumatism, Chronic Diarrhœa, Chronic Dysentery, Cholera Morbus, Kidney Troubles, Diseases of the Spine and Lame Back. Sold everywhere. Send for pamphlet to I. S. JOHNSON & CO., BOSTON, MASS.

MAKE HENS LAY

An English Veterinary Surgeon and Chemist, now traveling in this country, says that most of the Horse and Cattle Powders sold here are worthless trash. He says that Sheridan's Condition Powders are absolutely pure and immensely valuable. Nothing on earth will make hens lay like Sheridan's Condition Powders. Dose, 1 teaspoonful to 1 pint food. Sold everywhere, or sent by mail for 8 letter-stamps. I. S. JOHNSON & CO., BOSTON, MASS.

Rheumatic SYRUP.

The Greatest Blood Purifier Known!

RHEUMATISM CURED.

ROCHESTER, N.Y., Apr. 6, '83. Rheumatic Syrup Co.: Gents—I have been a great sufferer from Rheumatism for six years and hearing of the success of Rheumatic Syrup I concluded to give it a trial in my own case, and I cheerfully say that I have been greatly benefitted by its use. I can walk with entire freedom from pain, and my general health is very much improved. It is a splendid remedy for the debilitated system.
E. CHESTER PARK, M.D.

SCROFULA CURED.

PORT BYRON, N.Y., Feb. 20, '83. Rheumatic Syrup Co.: I had been doctoring for three or four years with different physicians, for scrofula, as some called it, but found no relief until I commenced taking your Syrup. After taking it a short time, to my surprise it began to have effect on my case, and in a few weeks, I found myself as well as ever. As a blood purifier I think it has no equal.
MRS. WM. STRANG.

NEURALGIA CURED.

FAIRPORT, N.Y., March 12, '83. Rheumatic Syrup Co.: Gents—Since November, 1882, I have been a constant sufferer from neuralgia, and have not known what it was to be free from pain until I commenced the use of Rheumatic Syrup. I had tried nearly every remedy I have ever heard of for the cure of rheumatism and neuralgia.

ENTERED AT THE POSTOFFICE AT TECUMSEH, MICHIGAN, AS SECOND CLASS MATTER.

TECUMSEH MICH. OCT. 4. 1883.

VACATION RAMBLES.

A WEEK'S TRIP AMONG THE RESORTS OF NORTHERN MICHIGAN.

The First Two Days Out. From Tecumseh to Mackinac Island.

All work and no play makes Jack a dull boy. This adage is quite very worthy of a trial. Jack sets type, measures calico, dispenses law and justice, converts sinners, runs a railroad, or edits a city daily, hands and collects subscriptions for a country newspaper. Whatever Jack's employment may be he needs a play spell occasionally. A resolve once made generally finds some method of accomplishment and having resolved to take a brief respite from work the question "Where shall we go"—is the most difficult one to answer. Long Branch, Newport and Saratoga are *par excellence*, the most fashionable resorts, where the aristocracy congregate, the Islands of Lake Erie present many attractions, the expositions at Cincinnati, Chicago and Louisville afford an excellent opportunity for a man to spend his money and see the sights. Fun and hay fever were the two causes which decided the question in the present instance. The desire to absorb a little fun and dispel an attack of hay fever turned the scale in favor of Northern Michigan. But even when away on a pleasure trip the average editor finds it necessary to take notes of his wanderings and thus furnish copy for the typos of the office. Discarding the clumsy editorial "we" and adopting the good old-fashioned egotistical big "I", I will endeavor to give the readers of the HERALD a few pencil sketches of what I saw and did during my ten days absence from home.

Having brushed up my prog hat, and having stuffed the big grip sack with a few changes of linen, a waterproof coat, some extra lead pencils, a batch of copy paper, an old hat, a life preserver, a fire escape, a bottle of hartshorn and a tooth brush I left "the boys" behind me on Wednesday, Sept. 19th, at ten o'clock A. M., and drove to Adrian. Taking the noon train at that place I had a delightful ride over the hills and dales of Hillsdale, Branch and St. Joe, and across the beautiful prairie farms in the vicinity of White Pigeon, Three Rivers and Schoolcraft to Kalamazoo. And right here I would remark that for safety and comfort to the passenger no road is superior to the old Lake Shore and Michigan Southern. It has all the modern improvements in the construction of its coaches, and a faithful corps of employees, tested by long experience. Kalamazoo is called "The Big Village." It is noted for its celery and its spring tooth harrows, its shaded streets and fast horses, its insane asylum and pretty girls. This season's celery crop is valued at the modest little sum of two hundred thousand dollars. The celery export for this year would provide the White house with salad for the balance of the present century, and would season enough church festival soup to float the whole state of Michigan in. The Reed family have recently succeeded in their big patent suit, which adjudged all other spring tooth harrows to be infringements on their patents. The Reeds can now read their title clear to a colossal fortune, and their factory, within ten years, will be one of the largest in the western states. My brief stop in Kalamazoo, from five to seven o'clock P. M., was well improved. I visited the Telegraph and Gazette printing offices. The former establishment is conducted by the Kalamazoo Publishing Company, and has a large job office and bindery connected therewith. It has grown beyond its advertising-for-grub and taking wood-on-subscription days, and is evidently enjoying a large and lucrative business. It publishes an evening daily. The Gazette office prints a morning paper edited by Andrew Jackson Shakespeare. Brother Shakespeare wears his cognomen with becoming modesty and dignity, and runs one of the best dailies in that section of the state. A good supper at the American hotel fitted me for a night's ride on the rail. Taking a sleeper on the Grand Rapids and Indiana railroad I soon crossed the bridge into the land of nod, and arrived at Mackinaw City the next morning, where I passed the day.

Mackinaw City is the jumping off place at the northernmost point of the lower peninsula. Here is an item for our school pupils. Mackinaw the name of the city is spelled with the last syllable, *naw*, while the third syllable of Mackinac, the name of the island, is *nac*. I failed to learn the reason for this difference although dilligent inquiry was made at the hotel bars and of all the jack drivers and constables. The city now has two railroads, the Mich. Central and G. R. & I., and is destined to become a prominent point as a summer resort. Women obtain their rights here. The best hotel—the Mercer House—is managed by a woman, and another enterprising female runs a grocery store and restaurant. It is needless to say that the fashionable travel all centers at the Mercer House. I put up there. A northeast storm struck the city the day before, and the weather clerk was holding it back on the day of my visit. A western gale at Mackinaw must be felt to be appreciated. The wind rolls down the straits like a cyclone over a Kansas prairie, and its temperature would lead one to think it had been bottled up for several days at Alaska. But the Mercer House was prepared for the emergency. A huge fire was burning in the office, and with blazing pine knots which make the office a comfortable loafing place. Pine knots are plenty in that section. They are as cheap and abundant as gas in a newspaper office or dirt in the Salvation Army's headquarters. It was a model day for rusticating. One could go out, take a stroll on the beach and freeze for an hour, then return to the Mercer House and indulge in a chat about the weather with the pretty proprietress to thaw out. I thawed out four times during that one afternoon. Upon the city map of Mackinaw "the fort" has a commanding position on the point which juts out into Lake Michigan. I took a tramp of two miles around "the fort." The only signs of a fort discernable with the naked eye were two telegraph poles and a chicken shed. These however were in a good state of preservation, and with a liberal item in the river and harbor appropriation "the fort" can be kept in proper repair. It is said that there was an actual fort on this site several hundred years ago, before the recollection of the oldest inhabitant and the city authorities, with commendable enterprise, are bound to erect a modern fort on that point at some future day. Mackinac island has a fort—why shouldn't Mackinaw city have a fort also? After a two mile tramp I concluded that fort-hunting was not my forte, so I turned my attention to gathering pebbles on the beach. Gathering pebbles is an innocent and economical pastime. There are no hackmen to pay or steamboat tickets to buy or liquor bills to liquidate. One can gather relics to send home by the handful, or bushel, or barrel, and have the satisfaction of knowing that they were gathered by his own industry and didn't cost a cent. Having filled both overcoat pockets I clambered upon a pile of drift wood to watch the wild surf beat against the battlements of "the fort," when an extra gust of wind lifted my stove-pipe hat and carried it down the straits toward Cheboygan at a rate which would make St. Julien's eyes turn green with envy. The landlord—excuse me—the landlady had warned me not to venture out with a stovepipe hat on. Like most tourists, however, I believe there is no school like that of experience, and hence decided to test the matter myself. Well, I tested it. A big pine stump half a mile east caught the hat. Having recovered my head gear I returned to the hotel to thaw out again.

One of the sights of Mackinaw City is the Signal Service Station. This is the name in nautical parlance. Translated into plain English it means a weather-shop. Here two robust young men manufacture weather to order. They are experts in the business. Their office is located on the second floor of a two story frame building fronting towards the North pole. Almost any kind of weather can be turned out of this shop on twenty four hours notice. Northwestern gales, arctic waves, Texas northers, Dakota blizzards, Nebraska cyclones and Canada hailstorms are put up in this office with neatness and dispatch, properly labeled and warranted true to name. I paid a visit to this Signal Service Station. I found the door ajar, and cautiously entered the room. There were thirteen thermometers hung on the wall ranging in size from six inches to four feet in length; a telescope stood on a tripod in one corner; a huge barometer hung in one window; large colored diagrams of cyclonds and whirlwinds adorned the walls, a profile view of the fort was suspended behind the stove; an oil portrait of Vennor hung over the business desk. On a large table, which stood near the center of the room, were the latest daily papers, a kit of surveyor's drafting instruments, a copy of the Police Gazette, a chequer board, a box of sardines and a eucher deck. Two arm chairs stood near the table, in each of which was a big pillow, minus the covering. In an inner room was a bed, upon which lay the two disciples of Vennor clasped in the embrace of Morpheus. They were either finishing their previous night's nap or taking an early start on the following one. I didn't stop to enquire which. The wind whistled without and the sleepers snored within.—A stuffed owl looked down upon me from a wall mantel and seemed to say "Too-hoo, too-hoo, begone with you." It was a solemn scene. I silently took in the situation, took in a stray pen knife which some one had dropped on the floor and took myself down stairs. I hope to find the young men in when I call again.

At eight o'clock that evening I shook the pebble stones of Mackinaw from my feet and set sail for Mackinac. A ride of an hour on the "Algoman" brought me to the island. Upon stepping off the gang plank I met a spruce darkey porter, who asked for my satchel. I gave it to him as did another well-dressed gentleman by my side, and we followed the porter to the St. Cloud Hotel. My companion registered first. I then learned that he was a wealthy planter from South Carolina and the name preceding his on the register was O. P. Bills of Tecumseh. Well, I soon found Mr. Bills and we chatted sleepy heads not much. What we did the next day I shall reserve for another letter. S. C. S.

WE DO NOT CLAIM

that HOOD'S SARSAPARILLA will cure everything, but the fact that on the purity and vitality of the blood depend the vigor and health of the whole system, and that disease of various kinds is often only the sign that nature is trying to remove the disturbing cause, we are naturally led to the conclusion that a remedy that gives life and vigor to the blood, eradicates scrofula and other impurities from it, as HOOD'S SARSAPARILLA undoubtedly does, must be the means of preventing many diseases that would occur without its use; hence the field of its usefulness is quite an extended one, and we are warranted in recommending it for all derangements of the system which are caused by an unnatural state of the blood.

Why Suffer with Salt-Rheum?

MESSRS. C. I. HOOD & Co., Lowell, Mass.

Gentlemen—I was a great sufferer from Salt-Rheum on my limbs, for a dozen years previous to the summer of 1876, at which time I was cured by Hood's Sarsaparilla. The skin would become dry, chap, crack open, bleed and itch intensely, so that I could not help scratching, which of course made them worse. At the time I commenced taking Hood's Sarsaparilla (in the summer of 1876) they were so bad that they discharged, and I was obliged to keep them bandaged with linen cloths. The skin was drawn so tight by the heat of the disease that if I stooped over they would crack open and actually bring tears into my eyes. The first bottle benefited me so much that I continued taking it till I was cured. I used one box of Hood's Olive Ointment, to relieve the itching. Hoping many others may learn the value of Hood's Sarsaparilla and receive as much benefit as I have, I am,

Very truly yours,
MRS. S. S. MOODY,
No. 75 Broadway.

Lowell, Mass., Jan. 15, 1878.

Hood's Sarsaparilla

Is sold by druggists. Price $1, or six for $5. Prepared by C. I. HOOD & Co., Lowell, Mass.

WORTH SENDING FOR!

Dr. J. H. SCHENCK has just published a book on

DISEASES OF THE LUNGS AND HOW TO CURE THEM

which is offered FREE, postpaid, to all applicants. It contains *valuable information* for all who suppose themselves affected with, or liable to any disease of the throat or lungs. Mention this paper. Address Dr. J. H. SCHENCK & SON, Philadelphia, Pa. (*State if you wish English or German Book.*)

Half Out of His Head.

"Blessed be the man," said Don Quixote's weary squire, "who invented sleep." Sancho's gratitude is ours, but what if one cannot for any reason enjoy that excellent invention? "Nervousness in me had become a disease," writes Mr. William Coleman, the well known wholesale druggist of Buffalo, N. Y.

"I could not sleep, and my nights were either passed in that sort of restlessness which nearly crazes a man, or in a kind of stupor haunted by tormenting dreams. Having taken Parker's Tonic for other troubles, I tried it also for this. The result both surprised and delighted me. My nerves were toned to concert pitch, and, like Cæsar's fat men, I fell into the ranks of those who sleep o' nights. I should add that the Tonic speedily did away with the condition of general debility and dyspepsia occasioned by my previous sleeplessness, and gave me strength and perfect digestion. In brief the use of the Tonic thoroughly reestablished my health. I have used Parker's Tonic with entire success for seasickness and for the bowel disorders incident to ocean voyages."

This preparation which has been known as Parker's Ginger Tonic, will hereafter be advertised and sold simply under the name of Parker's Tonic—omitting the word "ginger." Bisco & Co. are indebted to make this change by the action of unprincipled dealers who have for years deceived their customers by substituting inferior preparations under the name of ginger. We drop the misleading word all the more willingly, as ginger is an unimportant flavoring ingredient in our Tonic.

There is no change however in the preparation itself, and all bottles remaining in the hands of dealers, wrapped under the name of Parker's Ginger Tonic contain the genuine medicine if the fac simile signature of Bisco & Co., is at the bottom of the outside wrapper.

Did She Die?

"No!

"She lingered and suffered along, pining away all the time for years."

"The doctors doing her no good;"

"And at last was cured by this Hop Bitters the papers say so much about."

"Indeed! Indeed!"

"How thankful we should be for that medicine."

A Daughter's Misery.

"Eleven years our daughter suffered on a bed of misery,

"From a complication of kidney, liver, rheumatic trouble and nervous debility,

"Under the care of the best physicians,

"Who gave her disease various names,

"But no relief,

"And now she is restored to us in good health by as simple a remedy as Hop Bitters, that we had shunned for years before using it."—THE PARENTS.

Father is Getting Well.

"My daughters say:

"How much better father is since he used Hop Bitters."

"He is getting well after a long suffering from a disease declared incurable."

"And we are so glad that he used Hop Bitters."—A LADY, of Utica, N. Y.

We are having good weather in which to secure the fall crops.

The track layers on the M. & O. road are now in Addison, coming east.

A special election has been ordered to fill the office of City Recorder of Adrian.

Yesterday afternoon Charlie Slayton became the happy father of a bouncing boy.

Miss J. A. Hough is fully equipped for the fall trade in millinery, as her announcement on the 4th page will show.

Fred Weisinger, who for the past three months has filled so acceptably the position as salesman in Gainsley's, has gone to Deerfield, where he intends to go into the dry goods business for himself. We wish him success.

Rice A. Beal, of Ann Arbor, died suddenly yesterday of acute pneumonia at Iowa Falls, Iowa. He was visiting there a few days, when the attack came, which was only a few hours in duration. The first his friends knew of his sickness was the day before his death. Mr. Beal was the owner of the Courier and had long been a politician of much influence.

HOLLOWAY HICKUPS.

Mac Sleeper has completed a new well.

The gas well of Dr. Begel's still holds out.

Abbott Smith is building a general workshop.

The foundry has stopped work for want of water.

Work is still in progress on the well of Geo. Hoxsie's.

W. J. Holdridge has purchased the house of W. Soper.

A good bit of ill feeling is indulged in by the farmers of this vicinity over the levying of taxes on what is known as the Springbrook drain.

FLASHES BY C. T. LINE OPRS.

James Eddy, youngest son of Crowel Eddy, of Franklin, starts this week for Iowa, where he intends going into business with his brother. This makes five of the Eddy boys out west.

A son of Wm. Boomer was buried last Sunday.

R. W. Hillman took his departure last Tuesday for his new home in Ionia Co. We regret very much to have him move away, but wish him all success in his new home.

To Mr. & Mrs. Chas. Henry, of Franklin a daughter.

Mrs. H. E. Young, of North Adams, who has been visiting at J. F. N. Bowen's returned home last Monday.

Mrs. Rufus Keyser, of Ypsilanti, is visiting at the old homestead.

W. S. Osborn and Henry Wilson are in attendance at the New York state fair this week. They expect to purchase some registered merino sheep while there, partially to make good their recent loss.

G. W. Kinnicutt, of Novi, Oakland Co., made us a flying visit this week. His sister, Mrs. Wm. Keyser, returned home with him to make a lengthy visit.

N. K. Bowen and son are in Chicago this week, also Mrs. G. N. Bowen, attending the exposition.

Mrs. Conklin, of Elmwood, Ill., is visiting her daughter, Mrs. Morris Conklin.

Geo. Knapp and Abner Wilson are building new wood houses.

One day last week the driver of the horse that draws the rail car on the M. & O. road led the horse to a ditch to water, the ditch being somewhat deep, the horse got in the muck so it took 20 men with a rope to draw him out.

LOCAL AND PERSONAL.

The onion crop is good.

The squash crop is gone up.

The buckwheat crop is a failure.

The potato crop is fair to middling.

War is raging among the Blissfield barbers.

The new two cent postage stamp is a beauty.

The pumpkin crop is hardly worth harvesting.

Remember the grand inaugural ball to-morrow evening.

Jaspar is now connected with Adrian by telephone.

The Morenci schools have been closed by scarlet fever.

Armory Hall will be the scene of attraction to-morrow evening.

One thousand girls are employed in the Jackson corset factories.

A case of small-pox is reported in Ogden near the Fairfield line.

The Blissfield base ball club wants to join the Michigan League.

Be sure and read Slayton & Kinney's advertisement on eighth page.

Watson's tray factory of Deerfield has been crowded with business lately.

The Detroit Art Loan Exhibition will be open until the first of November.

The grading on the M. & O. road between Britton and Dundee is completed.

Oh, Judges, see 'em run to Patterson's after Wall Paper. Still selling for cost.

President Arthur caught an eight pound bass at Newport, R. I., the other day.

Bridgewater Center wants to be connected with the state telephone exchange.

We call attention to the millinery advertisement of Miss J. A. Hough on fourth page.

The man found drowned at Toledo week before last is supposed to be Michael Butrick.

S. T. Snow, for many years the popular landlord of the Morenci Exchange, has sold out.

Oil has been discovered at Roscommon in this state, and a company organized to bore a well.

Three hundred Hillsdale college students went to see the Art Loan Exhibition last Saturday.

J. B. Stephenson, of Cambridge, has bought a residence in Brooklyn, and will move to that town.

The music for Co. C's inaugural ball, Friday evening, will be furnished by Boheme's Monroe Orchestra.

Mr. and Mrs. C. W. Mitchell, of Meadville, Penn., are the guests of C. M. Burlingame for a few days.

At last accounts the Holloway gas well was still blazing away. Can not some plan be devised for utilizing it?

Uncle John Richards, of Raisin has our thanks for a few mammoth bunches of Concord grapes, raised on his farm.

Fred Wood has left at our office a copy of the Southern Recorder, printed at Milledgeville, Ga., Jan., 1, 1861. It is quite a newspaper curiosity.

The two ironing gangs on the M. & O. road will meet in about three weeks. The last spike will probably be driven in the town of Franklin.

At a recent meeting of the Washington, D. C., Horticultural Society, Col. D. S. Curtis delivered an interesting essay on "The Works of Art and Nature.

Mrs. Bigelow and daughter Eva, wish to return their sincere thanks to the many friends and neighbors who so kindly assisted them in their hours of need.

L. F. Wheeler has given us an instantaneous view of Chicago street, Tecumseh, looking east from the Opera House. Every family in Tecumseh should have one.

It is astonishing the amount of furniture that has been sold by Wm. McCowen during the past month.—He keeps his store crammed with all the latest styles, and one knows what kind of furniture they are buying when they purchase of him.

We are in receipt of a copy of the Paper Mill Directory of the World, issued by Clark W. Bryan & Co., of Holyoke, Mass. It is a complete catalogue of all the paper and pulp mills on the globe. It should be in the hands of every paper dealer and manufacturer.

Last Sunday morning about two o'clock cracksmen got in their work at the Hudson post office. $900 in new two cent stamps and $300 in cash were taken. The night watchman was threatened with revolvers by two men who were probably the burglars, and the latter escaped, although they had previously obtained their booty. The next morning it was discovered that a horse and buggy belonging to R. J. Eaton had been stolen. Sheriff Bidwell left Monday morning for Hudson and no effort will be spared to capture the thieves.

Joe Turner, of Milan, was in town last Monday taking a day's vacation from his station at the stave jointer.

Rufus Baker, of Fairfield, and Samuel Morey, of Springville, have been chosen delegates to the Michigan State Grange.

Now is the time to begin fall advertising. Many of our merchants have already "sailed in" and more are coming at an early day.

We intend to build a new woodshed in the rear of our office as soon as we can get around to it. Subscribers will please take notice.

Geo. L. Graves, of Milwaukee, Wis., is in town and will remain during the week. His numerous Tecumseh friends are right glad to see him.

The team belonging to Eaton Bros., of Hudson, which was stolen Sunday morning by the postoffice burglars was found on Monday morning about two miles south of Jackson.

Miss Croswell and Misses Gertie and Mabel Van Camp were in town Tuesday. They came over to sing at L. F. Wheeler's entertainment and remained until Wednesday afternoon.

J. A. Latcha, Chief Engineer of the M. & O. road was in town yesterday. He drove from Cambridge in the afternoon and took the four o'clock train to Toledo, so that he remained here but a short time.

Last Tuesday evening Andrew Smith, while working on the M. & O. railroad near the new depot in this village had one of his feet badly crushed by being caught between a tie and a rail. Dr. Woodward attended the man and he is now doing well.

Bain Hoag, who fills the position of brakeman on the Lake Shore, met with a serious accident near Hudson last Tuesday. While in the act of climbing to the top of a freight car, a round of the ladder broke and he was thrown to the ground. One shoulder was dislocated and his face was badly bruised. He was brought home that night and is receiving good care. Although his injury is a serious one, still he will recover with proper attention.

L. F. Wheeler opened the season with his "Illuminated Rambles," at our opera house last Tuesday evening. He was greeted with a large and appreciative audience, and it is no flattery to say that the entertainment was a most excellent one. The landscape scenes were relieved with an occasional piece of statuary or comedy, which gave a good variety to the exhibition. His comics were mostly original. They were "perfectly killing," and yet not overdrawn. He goes from here to Springville and Brooklyn and then west through the southern tier of counties. Success to him. He deserves it, and we believe he will win it.

THE NICKLE PLATE.

The control of the Nickle Plate railway, which it was supposed had been obtained by the Vanderbilts through their purchase of $26,000,000 of stock, is about to be contested by holders of first mortgage bonds in Pennsylvania and elsewhere. It is now said these bonds possess equal voting powers with the stock, (a fact not previously developed) and as there are outstanding $15,000,000 of these bonds and $25,000,000 of stock which Vanderbilt does not control, his purchase of $26,000,000 only has apparently failed to secure control of the road. Preparations are being made by the bondholders to nominate and elect at the next annual meeting a board of directors representing interests adverse to Vanderbilt's.

THE M. & O. DEPOT.

We paid a visit yesterday to the depot grounds of the M. & O. railroad to note the improvements going on there. A side track has been put in on the North side of the main track, and a large amount of iron rail is piled between the two. A water tank has been built about midway between Maumee street and the big bridge and an engine house on the flat near the west end of the bridge. This contains a large force pump which draws the water from the river and forces it into the tank. Richard Holdway will preside over the engine house. His time has already began, but he finds it hard work at present to find anything to do, as there are only two locomotives now on this end of the line to water. But when regular trains begin to run he will be kept busy. The passenger house is well under way, a large force of carpenters being now employed on it. The building will be about the size of the L. S. & M. S. depot building in this village, but a much more attractive building in outside appearance. It is located just South of the main track and on the East line of Maumee street. The carpenters and painters go together and the painting is done as fast as the carpenters finish their work. The heavy timbers in the building were furnished by Waring & Kniffin of Ridgeway. The finishing stuff, including doors, frames, brackets, etc., is furnished by the Tecumseh Lumber Co., which firm supplies all the depot buildings on the line between here Marshall. The passenger house will be completed within two weeks, and the freight depot will then be erected.

FROM THE "BAPTIST ITEMS."

Mrs. R. Adams is visiting friends in Chicago.

Mr. and Mrs. Munn, of Flowerfield, are in town, visiting at J. Heck's.

Emma Morse has returned from Ypsilanti. She says she has come to stay.

Mary Snaubel goes to Saline this week to take a position in a millinery store.

Miss Carrie Osborn has returned from her northern trip. Had to see her again.

Bro. Alva J. Coddington has accepted a clerkship in Keil's jewelry and bookstore.

Mrs. Luke Wood has been very sick during a part of last month. She better now.

Mr. and Mrs. Zellars have had quite severe attacks of the fever during the past month.

Mrs. Isaac Adams has returned from Omaha. She expects to return after about a month.

The Michigan Baptist State Convention will be held in Coldwater this year. It will begin Oct. 12th.

Married at the pastor's residence, Sept. 4th, Mr. Servillian E. Hendershott and Miss Martha Ellis, both of Macon.

The pastor, Dea. J. Margeson and J. W. De Puy attended the great Christian convention at Chicago, September 18th to 20th.

At a special meeting of the S. S. Board, Sunday, Sept. 2, Bro. Alva Coddington was elected S. S. treasurer to fill vacancy caused by Bro. J. O. Heck's resignation.

Rev. J. W. Payne and wife of Clinton, are in high glee. They have a visitor, and from all appearances he intends to stay. It is a boy. Accept our congratulations, Brother.

Bro. R. F. Taggart has returned from his visit in Illinois. He has spent September in Dr. Steinhoff's office. He left town Friday, the 28th, ult., for Ann Arbor, where he goes to attend the Dental College.

Dr. and Mrs. Hamilton, with Mrs. A. L. Brewer and Albertine started for N. Y. Friday afternoon, Sept. 28, for a six week's visit. We wish them a safe journey and pleasant visit. They go to Branchport, Yates Co.

The resignation of Bro. O. B. Finch, S. S. Secretary, is before the S. S. Board. He has been a very faithful officer and desires to be relieved on account of the number of his other duties. LATER.—Bro. Finch's resignation was accepted Oct. 1st, and Miss Sarah Swartout elected in his place.

Mrs. Abbie Fisher's horse, "Dan," was kicked by one of Bro. J. W. De Puy's horses with the result, a broken leg. Dr. Charles Waldron decided it was impracticible to set it, so the horse had to be killed. People often become much attached to a faithful domestic animal, and "Old Dan," because driven by Dr. W.C. Fisher, was sincerely mourned.

Henry Prentiss met with a terrible accident the 20th of last month. He fell upon a lath saw in Stanton, where he was at work. The saw cut two or three ribs in two and penetrated the lung. At first his physician said that his recovery was impossible. His friends were immediately telegraphed for, his father and his sister Minnie going to him immediately. But strange to say he has recovered so far as to able to return home. In consequence of the anxiety and overwork, Minnie was taken quite ill, but is now better.

Miss Ida Clark, of Poughkeepsie, N. Y., spent the first two weeks of Sept. in Tecumseh as the guest of Mrs. Ida North and Mr. and Mrs. A. Stevens. The two Idas seemed to enjoy their visit as much as when they played together with dolls years ago. They seemed to converse on somewhat graver subjects, but at heart seemed as young as ever. Miss Clark is a member of the 1st Baptist church of Poughkeepsie. She reports that the unfortunate and widely known pastoral troubles of that church are not yet settled, and in consequence the cause suffers.

The formal dedication of the Baptist church at Charlotte occurred on the 13th ult. Sermons were preached by Dr. Hascall, of Ann Arbor, and the pastor of this church in the afternoon and evening, respectively. The building is a gem. Besides its audience room, which will seat from 250 to 300, it has a basement well arranged for S. S. and social purposes. It is complete from steeple to foundation, It is frescoed, carpeted and thoroughly furnished. On the day of dedication it was found that about eight hundred dollars were unprovided for. The committee thought that about every source had been exhausted, and had become thoroughly resigned to carrying a debt. But the people disappointed them. In the afternoon about $300 were subscribed, and in the evening about $550. When the total subscription was announced it was found that they had about $50 more than was needed. The pastor, Rev. E. H. Teall, says that the sums are nearly all of them perfectly reliable. At the close the congregation sang the long meter Doxology with a heartiness scarcely ever excelled.

COUNTY CONDENSATIONS.

The Fairfield band have a new set of nickel instruments.

Wm. P. Silvers, of Clinton, is recovering from his recent illness.

D. Woodward, Clinton, had his new patent plow at the Adrian fair.

Threshing is about over with for this fall in the county of Lenawee.

Bro. Clough, of the Brooklyn Exponent, has purchased a horse and buggy.

The Morenci Grange had a fine display of farm products at the county fair.

The Morenci fair is in session this week. The Observer issues a daily program.

Himan Brown, of Clinton, has entered the medical department of the State University.

Street Commissioner Gregg has decided to rebuild the Porcupine bridge in the town of Clinton.

Don Palmer, of Clinton, exhibited a radish at the county fair 16 inches long and 28 inches round.

Some Clinton men went to Manchester to see the circus, but saw the interior of the lock up instead.

James Brown, of Raisin, has a silver dollar of 1878, on which the eagle is blessed with eight tail feathers.

H. D. Cutting, of Clinton, received $37.00 worth of premiums at the state fair on his bee-keepers' supplies.

The Japanese Liniment company of Morenci have a new carriage, and the boys make a trial trip through Monroe county this week.

The Hudson paving war has ended, the Common Council having withdrawn the suit commenced to enforce the payment of a special paving tax.

Morenci Observer: Fred Fisk bro't to our office this week a genuine Australian boomerang, an implement which he brought back among a large variety of other things from his recent visit to the South Sea Islands

Clinton News: A. S. Mills left three big potatoes at our office the other day which exceed in size any we have seen so far this season. The largest weighed three pounds and was big enough for a whole family. They were of the Burbank variety.

Dundee Reporter: A young son of Wm. Penfield had a narrow escape on Wednesday. He had climbed into a tree on Mr. Penfield's farm when he made a miss step and fell to the ground striking heavily on his side and was insensible for several hours, but he is now better.

Hudson Post: Last week Captain Brown, in Boies' store, sold Mrs. Phoebe Bailey two dresses. The lady is nearly 102 years of age, and the oldest dry goods clerk in town. Mr. Brown, who usually classes himself with the old settlers, felt like a boy while waiting on the ancient lady.

Morenci Observer: Hello! The telephone line from Morenci to Adrian via. Weston and Jasper, is now an assured fact, and is to be constructed at a very early date, as the poles for the purpose are already at Adrian. This places us in close proximity "to the whole world and the rest of mankind."

Blissfield Advance: As a number of hogs were being driven towards town by Chas. Kendrick Tuesday, three of them ran down the embankment near Jipson's mill and swam across the river. Charley footed it around a couple of miles and found when he got there the hogs had swam back to the other side. But he wasn't mad about it!

On Saturday morning last Franklin B. Nixon, City Recorder of Adrian, was found dead in his office. He had gone there about nine o'clock and at once fallen in a fit of some kind near his office desk where he was found shortly afterwards. Mr. Nixon had filled the office of Recorder for fourteen years, and had been a most faithful officer. His funeral was held Monday afternoon in charge of the masonic order.

Hudson Gazette: A young lady friend of a Hudsonite, who has several times sojourned at our beautiful resort, writes thusly on receipt of Mr. Wheeler's stereoscopic views of Devils lake: "Those views of Devil's lake are capital, and I prize them highly, I assure you. My uncle was under the deluded impression that for rusticating, fishing and picturesque scenery, no place could equal Snow-Shoe Bay where he spends his summers, but he has at last yielded and thinks Michigan has one delightful, retired little resort after his own heart."

Blissfield Advance: We visited Cogswell and Bartholomew's fruit evaporating concern the other day, and found all hands busy as bees in preparing the fruit for market. They have but one evaporator of the William's make, capable of drying 150 bushels per day. Owing to the great scarcity of apples, the firm is not running to its full capacity, using but from 50 to 75 bushels. Some ten or twelve hands are employed. The fruit evaporated is of excellent quality, and will readily command the highest market price. Cores and peelings are also evaporated, the sales of which are expected to pay all expenses.

THE BIBLE REVISION.

When a student at Glasgow University, I was fortunate enough to secure a copy of an Elzevir edition of the New Testament in Greek, which I still retain. And I had my attention lately called to an article in the International Review of July, 1874, by Dr. Geo. P. Fisher, of Yale College, not a member of the American Revision Committee, but therefore so much better qualified to review a publication on the subject, which had been made by some of the British revisers and printed in 1873, with an introduction by Philip Schaff, President of the American Committee, some six or seven years before the final completion and publication of the revision of the New Testament in Nov., 1880.

My attention was called particularly to that part of Dr. Fisher's article in reference to the translation of Paul's celebrated address to the Athenians on Mars Hill. Dr. Fisher says:

"Paul opens his address by a reference to the devoutness of the Athenians, carried even to an excess, of which he saw the monuments about him. This apostle knew how to conciliate an audience as well as if he had conned Aristotle's rhetoric." "I perceive," he said, "that ye are very religious. Our revision has it too superstitious. Luther commits the same error, 'allzu abergläubig' (German) is the phrase he uses. 'Whom ye ignorantly worship' contains a reproach which is not conveyed by the original: 'unknowingly' being the true sense of the Greek term, which has reference to the 'unknown God' to whom the altar was dedicated."

I think it is unfortunate that the revisers did not adopt the translation suggested by Dr. Fisher, and they probably would have done so if they had not been bound by one of their rules to follow the old revision as far as they could, and which was done by the British members more so than by the American committee.

In the following sentence, Dr. Fisher says:

"The same apostle is made to exhort us to 'avoid all appearance of evil,' whereas his injunction is to abstain from every form of evil. Paul was much more earnest in opposing evil itself than the semblance of it. This more proper translation is happily adopted in the new version. J. J. A.

Wm. Van Camp, of Adrian, was in Tecumseh last Tuesday, and made us a pleasant call. He has just entered into an engagement with W. C. McConnell, who is opening a new dry goods store at Adrian, to work for him. The new store will be in the Masonic Temple building, which will be filled with an immense stock of goods all bought for cash. Van Camp has many personal friends throughout Northern Lenawee, who should be sure and make him a personal call when they go to Adrian to trade. Read the advertisement of the new firm on the fourth page of this week's HERALD.

We have a new furniture firm in town,—Slayton & Kinney,—A. W. Slayton and John S. Kinney. They will make a good company, and we predict for them success from the start. Gus has worked up a good furniture trade and we were a little surprised that he was willing to part with a one-half interest, but we learn that he has accepted the position of Secretary of the Mich.-Flooring and Handle Co., and sells out an interest in the store so that he can give more attention to the lumber company in which he owns an interest.

The Hudson Gazette is particularly jubilant over the result of the paving war. Wouldn't it be a good time for Bro. Schermerhorn to trot out his election rooster? He seldom has a chance to use him after election days.

—The Detroit Diamond Fanning Mill, the best in the market only $25.
Slayton & Son.

—No guess work. If you want as good flour as is made in the state, get Heck Bros. complete all roll flour.

—Call on Slayton & Son for good cooking apples. Cheap.

—Natural looking and serviceable artificial teeth can be procured at Dr. B. F. Snyder's Dental Rooms.

—You can have your decayed and aching teeth extracted, at Dr. B. F. Snyder's dental rooms, without pain, by taking vitalized air.

—Spring Tooth Harrows at Snedicor's.

—Call at the yard and mill of the Tecumseh Lumber Co., and examine their stock.

—Leave your orders for Sash, Doors, blinds, mouldings, window frames, tanks, troughs, etc., with the Tecumseh Lumber Co. They will receive prompt attention.

TECUMSEH, Mich., March 25, '83.
I have been troubled with a hard cough for many years, and have found nothing to help me until I tried Dr. Bigelow's positive cure, which has completely cured me.
WELCOME SHERMAN.
The medicine is manufactured by Griggs & Co., Ottawa, Ill., and sold by Baker & Hall, Tecumseh.

—One of the best blood purifiers ever made is "King of the Blood."—Sold by Druggists generally. Manufactured by D. Ransom Son & Co., Buffalo, N. Y.

Cataracts and all diseases of the Eye skillfully treated. Deafness in its worst stages cured.

No Charge for Examination.

A 160 ACRE FARM
FOR SALE

At low figures. First-class buildings, a large amount of fruit, and a desirable farm in every respect. Located about three miles from Tecumseh. For particulars inquire at the

HERALD OFFICE

Talmage on Tobacco.

Rev. De Witt Talmage, in a sermon, said of tobacco as follows:

"One reason why there are so many victims of this habit is because there are so many ministers of religion who smoke and chew. They smoke until they get bronchitis, and the dear people have to pay their expenses to Europe. They smoke until the nervous system breaks down. They smoke themseves to death. I could name three eminent clergymen who died of cancer in the mouth, and in every case the physician said it was tobacco. There has been a clergyman whose tombstone was all covered up with eulogy, which ought to have had the honest epitaph, 'Killed by too much Cavendish!' Some of them smoke until the room is blue, and their spirits are blue, and the world is blue, and everything is blue.

"This was what God passed by such sins, but it becomes the duty of the American clergy who indulge in this narcotic to repent. How can a man preach temperance to the people when he is himself indulging in an appetite like that? I have seen a cuspidore in a pulpit where the minister would drop his end before he got up to read 'Blessed are the pure in heart,' and to read about 'Rolling sin as a sweet morsel under the tongue!' and in Leviticus to read about unclean animals that chew the end. I have known presbyteries and general assemblies and general synods where there was a room set apart for the ministers to smoke in. I have seen ministers of religion, their beards anointed not with holy oil, such as ran down Aaron's beard, but with poisonous saliva. Oh! it is a sorry spectacle, a consecrated man, a holy man of God, looking around for something, which you take to be looking for a larger field of usefulness. He is not looking for that at all. He is only looking for some place where he can discharge a mouthful of tobacco juice!

"I am glad the Methodist Church of the United States in nearly all its conferences has passed resolutions against this habit, and is time that we had an anti-tobacco reform in the Presbyterian Church, and the Episcopal Church, and the Baptist Church and the Congregational Church. About sixty years ago a young man graduated from Andover Theological Seminary into the ministry. He went straight to the front. He had an eloquence and personal magnetism before which nothing could stand. But he has been thrown into the insane asylum for twenty years, and the doctor said it was tobacco that sent him there. According to the custom then in vogue, he was allowed a small portion of tobacco every day. After he had been there nearly twenty years, walking the floor one day he had a sudden return of reason, and he realized what was the matter. He threw the plug of tobacco through the iron grates, and said—'What brought me here? What keeps me here? Why am I here? Tobacco! tobacco! O, God, help! help! and I'll never use it again!' He was restored. He was brought forth. For ten years he successfully preached the gospel of Jesus Christ, and then went into a blissful immortality.

"There are ministers of religion today indulging in narcotics, dying by inches, and they do not know what is the matter with them. I might, in a word, give my own experience. It took ten cigars to make a sermon. I got very nervous. One day I awakened to the outrage I was putting upon myself. I was about to change settlements, and a generous whole-sale tobacconist in Philadelphia said if I would only come to Philadelphia he would, all the rest of my life, provide me with cigars free of charge.

"I said to myself, if in these war times, when cigars are so costly, and my salary is small, I smoke more than I ought to, what would I do if I had gratuitous and illimitable supply? And then and there, twenty years ago, I quit once and forever. It made a new man of me, and though I have since then done as much hard work as any one, I think I have had the best health God ever blessed a man with. A minister of religion can afford to smoke?"

Small Pox and Vaccination.

A writer on vaccination, says, "Small-pox and variloid could be entirely driven from the face of the earth by vaccination and revaccination and re-revaccination at proper times. It is well settled principle in pathology that two diseases cannot exist in the system at the same time. Also, it is admitted that a milder form of a disease will prevent or modify a severer type of a disease of a similar nature.

"As an example, a child who has had "simple scarlet fever," or measles, seldom, if ever, afterwards has "malignant scarlet fever," unless, it may be, in some cases where some disease of another character may have eradicated the effect of impression made upon the system by simple scarlet fever or measles. The vaccine disease will modify, and always prevents small-pox proper. The contagion of small-pox is conveyed from victim to victim across street and from house to house, by the air, and is also conveyed by bed-clothing and clothing worn by small pox patients, and by letters written in an affected house, and in so many ways that it seems almost impossible for the uninoculated to escape. Persons who have never been vaccinated are liable to take small pox from small-pox, and from variloid. Persons who have been vaccinated are liable to take variloid only from exposure to small-pox but will not take varioloid from varioloid."

Given Up by the Doctors.

"Is it possible that Mr. Godfrey is up and at work, and cured by so simple a remedy?"

"I assure you it is true that he is entirely cured, and with nothing but Hop Bitters; and only two days his doctors gave him up and said he must die!"

"Well-a-day! That's remarkable! I will go this day and get some for my poor George—I know hops are good."

HOW TO CURE SORE THROAT.—"One who has tried it" communicates the following seasonable item about curing sore throats to the New York *Herald*: "Let each one of your half million readers buy at any drug store one ounce of camphorated oil, and five cents worth of chlorate of potash. Whenever any soreness appears in the throat put the potash in half a tumbler of water, and with it gargle the throat thoroughly; then rub the neck thoroughly with the camphorate oil at night before going to bed, and also pin around the throat a small strip of woolen flannel. This is a simple, cheap and sure remedy.

Physicians Prescribe in Epilepsy.

"I prescribe it in my practice," is the expression used by Dr. J. A. Patmore, of Riley, Ind. He referred to Samaritan Nervine and further along says: "It cures epileptic fits."

Missed the Train.

It was a colored man. His back was all dirt, one tail of his coat was gone, and every button had been ripped off his vest. He had two lumps and a hitch as he came out, and there was a new French shade of sadness in his voice as he toed the mark and said:

"I missed de train, sah."

"Yes, it looks like it. Is your name Gen. Scott Green?"

"Yes, sah."

"What train did you miss?"

"I doan' just remember what train it was."

"Whar was you going?"

"Down the road."

"What road?"

"Dat's what I can't 'member, sah."

"Well do you remember of getting on a drunk?"

"No, sah. Maybe I called for lemonade an' dey gin me whisky, but I doan' zackly 'member it. All I recollect is dat I missed de train."

"I think you got the train all right. You were training around pretty lively when the officer got hold of your collar."

"I alius walks in my sleep, sah."

"Well, that's bad for you. You broke a window, kicked in a door, and raised a big row. Have you observed the state of your wardrobe?"

"I has deserved dat I'm all broke up, sah. Dis suit ob close cost me seben dollars cash, an' I doan't believe it would sell for six. 'Did dey roll me down sta'rs?'"

"No, you resisted arrest and the officer had to mop you around a little."

"He did? I wish I'd bin dar to seen de fun. Kin I step out an' see my pardner 'bout two minits?"

"No, sir; you can step up to the workhouse for sixty days."

"Shoo! Why, dat upsets me from gwine to Bofferier."

"Can't help that. Please fall back."

"Can't I settle dis lawsuit fur fifty cents?"

"No, sir. The omnibus will be along for you in about twenty minutes. Call the next case."—*Detroit Free Press.*

Testimony From the Press.

To those afflicted with lung trouble, hear what V. W. Wilson, of the Ottowa (Ill.) Times says: "After being disabled for three months with a cough, and lung trouble, often spitting up blood, can testify that I am cured permanently by the use of Dr. Bigelow's Positive Cure. A free trial bottle can be had at Baker and Hall's.

Jones finds drinking like a fish makes his head swim.

You mustn't think a dentist is mad because you catch him grinding his teeth.

The demand for chairs that Washington once sat in is keeping the furniture makers busy.

A man who went on a fool's errand was probably performing one of his own commissions.

"Good morning, Mr. Brown; you're first at last; you used to be behind before, but I notice you have been early of late."

The latest in pyrotechnics is a figure of G. Washington holding aloft a flag upon which is inscribed a liver pill advertisement.

The blind man should be the most contented man in the world, because he can have everything he sees.

A correspondent wishes to know if the "Lay on Macduff," was one of Shakspeare's earlier poems.

"Penny wise, pound foolish," soliloquised the man in church, and then he put the penny in the box and the pound in his pocket.

"Now, tell me candidly, are you guilty?" asked a lawyer of his client. "Why, do you suppose I'd be fool enough to hire you if I was innocent?"

A Boston theatrical company recently played a scene laid in a church so naturally that to many of the audience it seemed so real that they went to sleep.

An Illinois chap, in describing a gale of wind, says: "A white dog, while attempting to weather the gale, was caught with his mouth open, and turned completely inside out."

A coquette came out of a fancy goods shop loaded with purchases. "You have renewed your provision," said a rival. "Don't speak of it, I have quite ruined myself! I have bought a thousand things I do not need, among others six tooth brushes." "Ah, one for each tooth," said the other sweetly.

Is Fun Better than Physic?

Fun is excellent; a hearty laugh is known the whole world over to be a health promoter; but fun does not fill the bill when a man needs physic, on the other hand people take too much physic. They would be more healthy, live longer and enjoy life thoroughly if they used Dr. Jones' Red Clover Tonic, which cures all blood disorders, indigestion, kidney and liver troubles, removes pimples, and is a perfect tonic. Can be taken by the most delicate. Only 75c a bottle. of Baker & Hall.

An ear for music is generally accompanied with an eye for the beautiful, a tongue for the free, and a mouth for all the good things of this world.

Shun Danger.

Rheumatism or neuralgia of the heart almost invariably results in the death of the patient, and thousands who are troubled with these diseases resort to their liniments or other applications for relief thus endangering their lives by changing the seat of disease or pain and forcing it to other or more sensitive and fatal portions of the system. It is impossible to cure these diseases while the acrid poison remains in the blood, and Rheumatic Syrup is the only remedy yet known that will dissolve and expel from the system all traces of uric acid, which is the sole cause of all rheumatic and neuralgic pains.

All obstructions of the kidneys and attendant organs prove fatal if not removed. The surest and best remedy to dissolve and expel these obstructions is Rheumatic Syrup.

Robert S. Armstrong, of Auburn, N. Y., writes that his wife had been a great sufferer from rheumatism and kidney disease for years and that the Rheumatic Syrup cured the pain in one week, and that she is now permanently cured by its use.

"Mamie," said he, and his voice was singularly low, "will you be my wife? Will you cling to me as the tender vine clings to the—" "Yes, I catch on," said she.

Malarial disorders as often attack the people of large cities as of the country. Ayer's Ague Cure is warranted a safe and certain specific.

Hay Fever.

For Hay Fever I recommend Ely's Cream Balm. It entirely relieved me from the first application; have been a sufferer for ten years. Going from home and neglecting to take the remedy I had an attack; after returning I immediately resorted to it, and found instant relief. I believe, had I begun its use earlier, I should not have been troubled. J. Collyer, Clerk, 115 Broad st., Elizabeth, N. J.

My brother Myron and myself were both cured to all appearances, of catarrh and hay fever last July and August. Up to this date, Dec. 25, neither have had any return of these troubles. Ely's Cream Balm was the medicine used. Gabriel Ferris, Spencer, N. Y.

DR. A. FRASER'S MAGNETIC OINTMENT.

The Great Healer of all Inflamed Injuries and Disorders.

It is constantly effecting the most wonderful cures, while the unparalleled demand with which it meets, stamps it at once as the great specialty of the age for outward application.

The most incredulous are convinced, and the most skeptical are compelled to believe in the power of this great remedy.

WHAT IT CURES.

All Sores, Cuts, Bruises, Sprains, Burns, Sore Throat, Lameness, Rheumatism, Piles, Inflammation of Lungs and Bowels, Bronchitis, Croup, Salt Rheum, Chilblains, Affection of the Spine, Erysipelas, Nervous Irritation, and all disorders attendant with Inflammation.

It never fails to restore the natural functions of the skin and equalize the circulation of the blood. By this means a controlling power is gained over the most malignant forms of disease. It penetrates to every portion of the human frame; every bone, muscle, vein, nerve and ligament is searched out and made sensible to its soothing and healing influence. Hence it copes readily with internal as well as external diseases.

Over 40 Years,

This Ointment has been used by the people throughout the United States, and our confidence in its qualities is such that as we have no space here to insert any of the numerous certificates of cures which we have from all parts of the country, we simply ask those readers of this notice who have ever used this Ointment, to frankly state their experience with it to inquiring friends. If but one in a hundred would do this we should be perfectly satisfied with the result. Full directions for use will be found on pamphlet around each bottle.

Price 25 and 40 cents per bottle. Sold by all dealers in medicine.

D. RANSOM, SON & CO., Prop's
Buffalo, New York.

COULD NOT GO TO BED.

CHERRY TREE TOWNSHIP, March 30, 1880, Venango County, Pa.

I have been afflicted with Rheumatism more or less for the past thirty years, so much so in the last that I would have to lie down to get ease and at one time I could not go to bed, but was compelled to sit up all night. This affliction continued for five months. I was solicited to use Wilson's Lightning Remedy for Rheumatism, which made a perfect cure. I found it to act with certainty, and giving relief immediately. I used but one bottle and have not been afflicted since.

T. P. WILSON.

Sworn and subscribed to before me this 30th day of March, A.D., 1880. J. B. D. CLARK, Justice of the Peace.

COMPOUND OXYGEN NOT A DRUG

A NEW TREATMENT.

For Consumption, Asthma, Bronchitis, Dyspepsia, Catarrh, Headache, Debility, Rheumatism, Neuralgia, and all Chronic and Nervous Disorders.

A CARD.

We the undersigned, having received great and permanent benefit from the use of "COMPOUND OXYGEN," prepared and administered by Drs. STARKEY & PALEN, of Philadelphia, and being satisfied that it is a new discovery in medical science, and all that is claimed for it, consider it a duty which we owe to the many thousands who are suffering from chronic and so-called "incurable" diseases to do all that we can to make its virtues known, and to inspire the public with confidence.

We have personal knowledge of Drs. Starkey & Palen. They are educated, intelligent and conscientious physicians, who will not, we are sure, make any statement which they do not know or believe to be true, nor publish any testimonials or reports of cases which are not genuine.

WM. D. KELLEY, Member of Congress from Philadelphia.
T. S. ARTHUR, Editor and Publisher "Arthur's Home Magazine," Philadelphia.
V. L. CONRAD, Editor "Lutheran Observer," Philadelphia.

PHILADELPHIA, PA., June 1, 1883.

In order to meet a natural inquiry in regard to our professional and personal standing, and to give the public increased confidence in our statements, and in the genuineness of our testimonials and reports of cases, we print the above "CARD" from gentlemen well and widely known and of the highest personal character.

Our "Treatise on Compound Oxygen," containing a history of the discovery of and mode of action of this remarkable curative agent, and a large record of surprising cures in Consumption, Catarrh, Neuralgia, Bronchitis, Asthma, etc., and a wide range of chronic diseases, will be sent free. Address,

DRS. STARKEY & PALEN, 1109 and 1111 Girard St., Philad'a.

DR. B. MINCER,
Scientific Optician!

I have devoted 25 years wholly to a study of the eye, and how to aid vision properly, and I make a specialty of fitting glasses to the eyes that have been injured by cheap, inferior glasses. I manufacture every kind of glasses, and guarantee satisfaction. Read what prominent physicians of Adrian say:

Having for some time past used glasses to improve my sight, without satisfactorily gaining my object, I called on Mr. Mincer, optician, of Detroit, who readily adapted glasses to my eyes, with which I am so well pleased, that I cheerfully speak in his favor. His method of examining and his application in selecting glasses to fit the eye can only be acquired by a knowledge of the useful organ to which must be added extensive experience. He has also adapted glasses to Mrs. Baker's eyes with which she is well pleased; I recommend him to all who need glasses adapted to their wants; poor glasses are an abomination. V. A. BAKER, M.D.

ADRIAN, Nov. 18, 1882.

I have used spectacles bought of Mr. B. Mincer for the past three months, and find them superior to any I have ever used, and can cheerfully recommend him to anyone in need of glasses, and the benefit of his experience in the science of optics to adjust proper lenses. DANIEL TODD, M.D.

I have investigated the work of Mr. B. Mincer, optician. I have reason to believe that he understands his profession, and adjusts excellent glasses on scientific principles. C. RYND, M.D.

REMEMBER!

I will visit every town in the county during the month.

If you are growing Gray or Bald;

If your Hair is Thin, Brashy, Dry, Harsh, or Weak;

If you are troubled with Dandruff, Itching, or any Humor or Disease of the Scalp;

USE

Ayer's Hair Vigor.

It heals nearly every disease peculiar to the scalp, checks the falling out of the Hair and prevents it from turning gray, and is an unequalled dressing and toilet article.

GIVE ME A CALL.

A Study of Husbands.

BY A WOMAN FOR WOMEN, BUT MEN MAY READ IT WITH PROFIT.

We hear much about the art of winning a husband. Let us take a step further and make a study out of keeping a husband. If he is worth winning, he is worth keeping.

This is a wicked world, and man is dreadfully mortal. Let us take him just as he is, not as he ought to be. In the first place, he is very weak. The wife must spend the first two years in discovering all these weaknesses, count them on her fingers, and learn them by heart. The fingers of both hands will not be too many. Then let her study up these weaknesses, with a mesh for every one, and the secret is hers.

Is he fond of a good dinner? Let her tighten the mesh around him with fragrant coffee, light bread and good things generally, and reach his heart through his stomach. Is he fond of flattery about his looks? Let her study the dictionary for sweet words, if her supply gives out. Does he like to hear her talk about his brilliant intellect? Let her pore over the encyclopedia to give variety to the depth of her admiration. Flattery is a good thing to study up at all hazards, in all its delicate shades, but it must be skillfully done. The harpy who may try to coax him away will not do it absurdly. Is he fond of beauty? Here's the rub—let her be bright and tidy; that is half the victory. Next, let her bang her hair metaphorically and keep up with the times. A husband who sees his wife look like other people is not going to consider her "broken down."

Though it is a common sneer that a woman has admitted that her sex consider more, in marrying, the tastes of her friends than her own, yet it must be considered ludicrous that a man looks at his wife with the same eyes that other people do. Is he fond of literary matters? Listen to him with wide open eyes when he talks of them. A man doesn't so much care for a literary wife if only she will be literary enough to appreciate him. If she have literary inclinations let her keep them to herself. Men love to be big and great to their wives. That's the reason why a helpless little woman can marry three times to a sensible, self-reliant woman's none. Cultivate helplessness. Is he curious? Oh, then you have a treasure; you can always keep him if you have a secret and only keep it carefully.

Is he jealous? Then, woman, this is not for you; cease torturing that fretted heart which wants you for his own, and teach him confidence. Is he ugly in his temper, and faultfinding? Give him a dose of his own medicine, skillfully done. Is he deceitful? Pity him for his weakness, treat him as one who is born with a physical defect, but put your wits to work—it is a bad case. It is well not to be too tame. Men do not waste their powder and shot on hens and barnyard fowls; they like the pleasure of pursuing wild game—quail and grouse and deer. A quail is a good model for a wife—neat and trim, with a pretty, swift way about it, and just a little capricious. Never let yourself become an old story; be just a little uncertain.

Another important fact is, don't be too good; it hurts his feelings and becomes monotonous. Cultivate a pleasant voice, so that this very mortal man may have his conscience prick him when he is in jeopardy; its pleasant ring will haunt him much more than would a shrill one. It is hard to do all this, besides taking care of the babies and looking after vexatious household cares, and smiling when he comes home, but it seems necessary. "To be born a woman is to be born a martyr," says a husband who for ten years has watched in amazement his wife treading the winepress of her existence. It is a pitiful sight to some men.

But if the wife does not make a study of these things, the harpy will, to steal away the honor from his silver hairs when he is full of years and the father of sons and daughters." At the same time, gude-wife, keep from trying any of these things on any mortal man but your own. These rules are only evolved in order to "keep a husband." The poor, weak creature would rather be good than bad, and it is woman's duty to hold him by every means in her power.—*The Argonaut.*

Glad to Hear It.

"For several months I endured a dull pain through my lungs and shoulders; lost my spirits, appetite and color, and could with difficulty remain from my bed. My present healthful condition is due to Burdock Blood Bitters." Mrs. E. A. Hall, Binghamton, N. Y.

Help Yourself.

People who have been bolstered up and relieved all their lives are seldom good for anything in a crisis. When misfortune comes they look around for something to cling to or lean upon. If the prop is not there, down they go.

Once down, they are as helpless as capsized turtles, or unhorsed men in armor and cannot find their feet again without assistance.

Such silken fellows no more resemble self-made men, who have fought their way to position, making difficulties their stepping stones, and deriving determination from defeat, than vines resemble oaks or sputtering rush-lights the stars of heaven. Efforts persisted into achievement ennoble man to self-reliance, and when he has proven to the world that he can help himself the world will trust him.

It is unwise to deprive young men of the advantages which result from their own energetic action by shielding them from all obstacles which they can not surmount alone.

Mr. George Dodge Speaks.

This gentleman lives in Emporium, Pa., and says "One of my men, Sam. Lewis, while working in the woods sprained his ankle so bad he could hardly hobble to the house. Used Thomas' Eclectric Oil and was ready for work next morning. I have never yet seen so good a medicine."

A FEMININE DEFENDER OF TOBACCO.—An advocate of the use of tobacco in support of his stand unearths an article written by Margaret, Duchess of Newcastle, some two hundred years ago. In defense of the seductive weed that lady wrote: "It composes the mind, it busies the thoughts, it attracts all outward objects to the mind's view, it settles and retents the senses, it cheers the understanding, strengthens the judgment, spies out errors, it exasperates follies, it heats ambition, it comforts sorrow, it abates passion, it excites to noble actions, it digests conceptions, it creates fancies, it quickens wit, and it makes reason pleader and truth judge in all disputes or controversies between right and wrong.

Use Baker's Ja[illegible]

Home Politeness.

A boy who is polite to his father and mother is likely to be polite to every one else. A boy lacking politeness to his parents may have the semblance of courtesy in society, but is never truly polite in spirit, and is in danger, as he becomes familiar, of betraying his real want of courtesy. We are all in danger of living too much for the outside world, for the impression which we make in society, coveting the good opinions of those who are, in a sense a part of ourselves, and who will continue to sustain and be interested in us, notwithstanding these defects of deportment and character. We say to every boy and to every girl, cultivate the habits of courtesy and propriety at home—in the sitting room and the kitchen, as well as in the parlor—and you will be sure in other places to deport yourself in a becoming and attractive manner. When one has a pleasant smile and a graceful demeanor, it is a satisfaction to know these are not put on, but that they belong to the character, and are manifest at all times and under all circumstances.

A Blessing To All Mankind

In these times when these newspapers are flooded with patent medicine advertisements, it is gratifying to know what to procure that will certainly cure you. If you are Bilious, blood out of order, Liver inactive, or generally debilitated; there is nothing in the world that will cure you so quickly as Electric Bitters. They are a blessing to mankind, and can be had for only fifty cents a bottle.

Sold by C. A. Wright & Co.

A Rare Talent.

The faculty of drawing out of persons with whom one is conversing the best there is in them—brighter things even than they suppose themselves capable of—is the rare gift with which Nature has endowed some women. George Eliot was a most charming person in conversation, though she was a women of few words, because of her intuitive insight into the thoughts of others. A few words would put her in possession, not of what they said, but of what they would fain have said, and she would so improve upon it that ordinary people went away charmed with her who had made them for once at least feel themselves to be wise. Long afterward, perhaps, she would call to their remembrance the wise or witty things which they could hardly believe themselves to have said, and which they assuredly never would have said but for her quickening influence.

Griggs' Glycerine Salve.

The best on earth can truly be said of Griggs' Glycerine Salve, which is a sure cure for cuts, bruises, scalds, burns, wounds and all other sores. Will positively cure piles, tetter and all skin eruptions. Satisfaction guaranteed or money refunded. Only 25 cents. For sale by Baker & Hall.

Fourteen Wonders of the World.

The seven wonders of the world, in ancient times, were the pyramids of Egypt, the Pharos of Alexandria, the walls and hanging gardens of Babylon, the temple of Diana, the statue of the Olympic Jupiter, the Mausoleum Artemesia, and the Colossus of Rhodes.

The seven wonders of the world in modern times are the printing press, the steam engine, the telegraph, the daguerreotype, the telephone, the phonograph, and the electric light.

The so-called "Seven Wonders" of the ancients were mere trifles compared with those of the present time. The Brooklyn bridge, for example, would make the hanging gardens of Babylon a mere toy, while the whole seven wonders put together would sink into insignificance could the builders have seen a lightning express train at full speed.

Sowing Wild Oats.

How many waste their time and resources in foolish experiments with nasty worthless medicines that can never do them a whit of good. If you are sick and want help get a reputable medicine of established merit. The curative virtues of Burdock Blood Bitters have never been questioned. For an enfeebled circulation or a weak stomach they are splendid.

Shoulder of Veal Baked.

Buy a shoulder of veal, which, according to the locality of your butcher, will cost you from eight to fourteen cents a pound. And let us say just here, that on account of the quantities of immature veal thrown on the market, you had better be sure of your butcher and pay fourteen cents than to buy a suspicious article for eight. Untrimmed it will weigh seven or eight pounds. Have every bit of bone taken out and put them aside for stock. Make a pint bowl full of dressing, flavoring according to taste, but not strongly with any one condiment. Insert this in the pocket made by the butcher. Dot it all over with pieces of butter as large as a hickory nut. About two ounces will be sufficient, and season with pepper and salt. Bits of very nice dripping may be placed in the four corners of the pan. Dredge thoroughly with flour, and place in a good oven. Baste occasionally with the gravy made by the butter, but add no water until the meat is well browned. This will be from half to three quarters of an hour, when you may add a large cupful of boiling water. Baste every fifteen minutes until done. It will require about two hours. Carve down stright through the middle and cut to both ends; serve with spinach. This is a most economical and delicious dish. What is left may be sliced and heated in the sauce, or minced and used for a salad.

Hood's Sarsaparilla is an extract of the best remedies of the vegetable kingdom known as Alteratives, and Blood Purifiers.

It is proposed to use duck canvas stretchers in place of the ordinary berths in sleeping cars. They are comfortable, and can be so cleverly stowed away during the day that one would think himself in an ordinary drawing-room car. The canal-packet men knew the[illegible] years ago.

A Great Discovery.

This is daily bringing joy to the homes of thousands by saving many of their dear ones from an early grave. Truly is Dr. King's New Discovery for consumption, coughs, colds, asthma, bronchitis, hay fever, loss of voice, tickling in the throat, pain in side and chest, or any disease of the throat and lungs, a positive cure. Unsurpassed. Trial bottles free. Large size $1.

Sold by C. A. Wright & Co.

Hatch's Universal Cough Syrup gives your kidneys and liver a jog to help relieve your lungs of a bad cough, or your child of croup. There can be no membraneous croup when Universal Cough Syrup is used in the first symtoms of the disease. No family with children can afford to be without it one day. 25 and 50 cents.

I have found no [illegible] more courage and independence [illegible] rise even a little, but decidedly above the par of the religious world around us. Surely the way in which we commonly go on is not the way of self-denial and sacrifice and cross bearing which the New Testament talks of.—*Dr. J. W. Alexander.*

IMPORTANT

When you visit or leave New York City save baggage, Expressage and Carriage hire, and stop at the Grand Union Hotel opposite Grand Central Depot.

Elegant rooms, fitted up at a cost of one million dollars, reduced to $1 and upwards per day. European plan. Elevator. Restaurant supplied with the best. Horse cars, stages and elevated railroad to all depots. Families can live better for less money at the Grand Union Hotel than at any other first-class hotel in the city.

Your Teeth with pearls will surely vie,
If "TEABERRY" you only try;
Once used, you ne'er will be without it,
Just try one bottle if you doubt it.

IN A FEW WORDS.

We do not claim that ZOPESA will cure everything, but as a liver regulator, and when the stomach and organs need invigorating to healthy action in case of weak digestion it will cure. For habitual costiveness which affects the whole system and the head to a degree that unfits one for work, Zopesa acts certainly, quickly and pleasantly. Those trying it the first time are surprised how quickly it relieves the whole system; a single dose relieves.

JAMES E. DAVIS & CO., Wholesale Agents, Detroit, Mich.

ESTATE OF PETER R. ADAMS.

STATE OF MICHIGAN, County of Lenawee, ss.

At a session of the Probate Court, for the County of Lenawee, holden at the Probate office, in the city of Adrian, on Wednesday, the 20th day of September, in the year one thousand eight hundred and eighty-three.

Present Norman Geddes, Judge of Probate.

In the matter of the estate of Peter R. Adams, deceased.

On reading and filing the petition, duly verified, of Peter S. Adams praying for the probate of an instrument now on file in this court, purporting to be the last will and testament of said deceased, and codicils thereto, and that administration of said estate may be granted to Marcus A. O. Packard, John Margeson, Stephen Crane and Gideon D. Perry, the executors in said will named.

Thereupon it is Ordered, That Monday, the 15th day of October next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs-at-law of said deceased, and all other persons interested in said estate, are required to appear at a session of said Court, then to be holden at the Probate office, in the City of Adrian, and show cause, if any there be, why the prayer of said Petitioner should not be granted.

And it is further ordered, That said Petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said County of Lenawee, for three successive weeks, previous to said day of hearing.

NORMAN GEDDES, Judge of Probate.

(A True Copy.)

A. H. BRIGGS, Probate Register. sep20

COMMISSIONERS' NOTICE.

IN the matter of the estate of Ann Biddle, deceased.

The undersigned, having been appointed by the Judge of Probate for the county of Lenawee, Michigan, commissioners to receive, examine and adjust all claims and demands against the estate of Ann Biddle, deceased, notice is hereby given that for that purpose we will meet at the late residence of deceased in the town of Macon, in said county, on the 12th day of October, 1883, and on the 7th day of March, 1884, at 10 o'clock in the forenoon of each of said days, and that six months from the 8th day of September, 1883, have been allowed by the said court for the creditors of said estate to present their said claims for examination and allowance.

Dated Sept. 12, 1883.

LEWIS CAMBURN, MILAN SAGE, Commissioners.

sept13

COMMISSIONERS' NOTICE.

IN THE MATTER of the estate of William Waring, deceased.

The undersigned, having been appointed by the Judge of Probate for the County of Lenawee, Michigan, commissioners to receive, examine and adjust all claims and demands against the estate of William Waring, late of Tecumseh, in said county, do hereby give notice that we will meet for that purpose at the office of Charles Herrick, in the village of Tecumseh, Lenawee county, Michigan, on the 24th day of November, 1883, and on the 17th day of March, 1884, at ten o'clock in the forenoon of said days, and that six months from the 17th day of September, 1883, are allowed by the said court for the creditors of said estate to present said claims for examination and adjustment.

Dated September 17, 1883.

ELIJAH A. TRIPP, CHARLES HERRICK, Commissioners.

THE "FISHING LINE."

TAKE THE

GRAND RAPIDS & INDIANA RAILROAD.

The only route to the Trout, Grayling and Black Bass Fisheries and the famous Summer, Health and Game Resorts and Lakes of

Northern Michigan.

The waters of Grand Traverse Region and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

Brook Trout abound in the streams, and the famous American Grayling is found only in these waters.

The Trout Season begins May 1st, and ends September 1st. The Grayling Season opens June 1st and ends November 1st.

Black Bass, Pike, Pickerel and Muskalonge also abound in large numbers in the many lakes and lakelets of this territory. The sportsman can readily send trophies of his skill to his friends or exhibit at home, ice for packing fish can be had at nearly all points.

Take Your Family with You. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing.

The climate is peculiarly beneficial to those suffering with Hay Fever and Asthmatic affections.

New Hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The connection of this line from Petoskey to Mackinaw City forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit, Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.

Rods, Guns and Fishing Tackle carried free at owner's risk. It is our aim to make Sportsmen feel "At Home" on this route. For Tourist Guide, a handsomely illustrated book of 160 pages free, Time Tables, Tickets and further information address

MR. [illegible]SON ADVERTISING AGENTS PHILADELPHIA. Receive Advertisements for all Publications at Lowest Rates. ESTIMATES [illegible] Advertising MANUAL

Coloring a Pine Floor.

The *Art Interchange* gives the following directions for coloring a pine floor which is to be partially covered with rugs: Buy at any painters' store turpentine and linseed oil (not boiled.) Ask them to put a little Japanese dryer in the turpentine. Buy either burnt sienna or Vandyke brown, or both, according to the color of the rugs and the tint on the walls. These colors come put up in tin cans, smaller but otherwise similar to tomato or fruit cans. After your floor has been washed thoroughly clean, is free from dust, and dry begin by opening your can and mixing in another receptacle the oil, turpentine and paint. Remember the oil is to thin your paint, the turpentine to dry it. The mixture should be so thin that it will run with liquid readiness. Lay it on with a brush as thick as your hand, stroking the brush the way of the grain of the wood. Protect your hands with old gloves and go over the floor with a rag. In fact, you will need two rags, one pretty well charged with paint, to rub in every crevice, and another rag to rub off any superfluous paint. Mind your stops or, rather, put your mind in the way you stop. Do not stop in a straight line across the grain of wood but carry your brush irregularly down, taking a hint from nature, lines in the wood you are preserving with paint. By mixing the burnt sienna and Vandyke brown you will secure a rich color without needing to use the paint in a thick coat. Your mixture should be so thin that the grain of the wood will show through. If your have too much turpentine and will not dry, or if you have too much oil and will need more days to dry, add as much oil as turpentine certainly will not evaporate the oil and be as tacky, or sticky, as your strength will [illegible]

[illegible] a stained floor it is [illegible] to wash up the dirt with milk of soft soap [illegible]

Weight by Measuring.

[illegible] which plumbers' line will the bottom and direct the [illegible] the back to the proper of the [illegible] this will be the length [illegible] the figures thus: Suppose the [illegible] 6 feet [illegible] length [illegible] which multiplied together [illegible] and [illegible] [illegible] 3 feet girth and 3 feet 6 inches [illegible] that multiplied together makes 126 [illegible] and these multiplied by 16 [illegible] the number of pounds allowed for cattle weighing less than 5 and more than 3 [illegible] make 256 pounds. The [illegible] of cattle, sheep, calves and hogs [illegible] this way will give the weight of the four quarters of the animal, sinking the offal. A deduction must be made for animals not fleshed of one pound in twenty from those that are fat; and for a cow that has had calves one pound must be allowed, in addition to the one for not being fat, upon every twenty."

March with the ears were gathered. The [illegible] of the wheat harvest of Mexico is said to have been three or four grains carefully cultivated in 1530 and preserved by a slave of Cortez. The first crop of Quito was raised by a Franciscan monk in front of the convent. Garcillasso de la Vega affirms that up to 1547, wheaten bread had not been sold at Cusco. Wheat was first sown by Gosnold on Cuttyhunk, one of the Elizabeth islands in Buzzards Bay, off Massachusetts, in 1602, which he first explored the coast. In 1604, on the island of St. Croix, near Calais, Me., the sieur de Monts had some wheat sown, which flourished finely. In 1611 the first wheat appears to have been sown in Virginia. In 1626 samples of wheat grown in the Dutch colony at New Netherlands were shown in Holland. It is probable that wheat was sown in the Plymouth colony prior to 1629, though we find no record of it, and in 1629 wheat was ordered from England to be used as seed. In 1718 wheat was introduced into the Valley of the Mississippi by the "Western Company." In 1719 it was among the cultivated crops of the Panes Indians of the Gila River, New Mexico.—*Millers' National Magazine*

DRAIN COMMISSIONER'S NOTICE.

NOTICE is hereby given that I Edwin Howell township drain commissioner of the township of Macon, in the county of Lenawee, will, on the 8th day of October, at the barn of Wm. Burnett in said township, at one o'clock in the afternoon, meet parties for the purpose of letting contracts for the construction of a drain in said township known as Township Drain No. 6 in Macon, commencing near the southwest corner of Section 11 in Macon, running east along the highway ½ mile thence south and west across Sec. 14, to the center of the highway west of school house in school district No. 4, of Macon, then S and W to Macon Station.

And that I will then and there proceed to let contracts for the construction of the same by sections as I have apportioned and divided the same, and that such contracts will be let to the persons who will do the work according to the specifications thereof made by me, the least sum of money, and who will give adequate security for the performance of the same within such time as shall be specified in such contracts respectively, the undersigned reserving the right to reject any and all bids. Notice is also hereby given that at the time and place of said letting of contracts, the assessment of benefits made by me will be subject to review.

Dated this [illegible] day of September A.D., 188[illegible].

EDWIN HOWELL,
Township Drain Commissioner for the Township of Macon.

ADVERTISING

contracts made for THIS PAPER, which is kept on file with LORD & THOMAS, Advertising Agents, Chicago, Ill.

HERE WE ARE AGAIN.

The steady and continual work we gave the past season to our gigantic clearance sales left our Mammoth Outfitting Establishment in proper shape for the reception of our

Fall and Winter Stock!

To say that we were successful would not half tell the story. OUR TRADE ALMOST DOUBLED, our customers were more than pleased with the bargains we gave them, and we were highly gratified with the liberal patronage bestowed upon us, and this season we intended to strive harder than ever to merit the continuance of the same.

BOYS' & CHILDREN'S CLOTHING.

We have just opened up and put in stock all the new shapes and Styles of Little Folks' Clothing, among which may be found some pretty and attractive garments. Henceforth we shall carry a larger line of these goods than ever. Our trade in this Department has met with such a large increase that we can well afford to, and this increase of trade enables us to sell at

SMALLER MARGINS THAN EVER BEFORE.

With us increase of trade means a decrease of profit. Not only shall our prices be the lowest, but we will carry ten times as many goods as any other house in the city. Our Boys' and Children's department has become very popular, not only because it is fitted up with a view to accommodate our customers, but because the best makes, the prettiest styles and the most attractive assortment of this line of goods can always be found there.

Men's & Youths' Clothing!

We have selected the finest and most desirable goods for this department, that were ever brought to the city; in fact the goods look so well as we open them up that we feel sure of selling them without much trouble. The reliable class of goods we handle together with the uniformly low prices which are characteristic in our institution, are found to meet with public approbation. This department is crammed with new goods, ready for inspection and sale.

Gents' Fine Furnishings!

There is no more complete department of the kind in the state. We have just put in stock several cases of new goods, and are every day receiving fresh additions. It is filled to completion with all the latest styles in Gloves, Hosiery, Neckwear, Undershirts, Collars, Cuffs, Shirts, Handkerchiefs, Suspenders, &c., and everything at popular prices. We can guarantee to save you twenty five cents on every dollar you spend with us in this department.

Everybody is invited to examine our Stock whether they wish to buy or not.

C. R. MABLEY,

105 & 107 Summit St., - TOLEDO.

THE AMERICAN PEERLESS DICTIONARY AND Information FOR Everybody.

A BOOK THAT SHOULD BE IN EVERY HOUSE.

After years of labor, and the expenditure of a large sum of money to writers and compilers, we are now ready to offer **THE MOST USEFUL BOOK IN THE WORLD!** The press, teachers, and professional people throughout the country pronounce it to be the **BOOK OF BOOKS.** It contains upwards of **80,000 WORDS,** with their definition and pronunciation, according to Webster and other recognized authorities; a large number of additional words and definitions in general use, **NOT TO BE FOUND IN ANY OTHER DICTIONARY;** a large collection of Words, Phrases, Proverbs and Quotations from the Greek, Latin and Modern Languages; a list of Abbreviations used in ART, SCIENCE AND LITERATURE. Population of Towns and Cities in the United States, and other interesting statistics taken from the census reports of 1880. Bonehead, Assignment and Homestead laws. American Wars; the Donation of Canada; History of the United States from its discovery to the inauguration of Chester A. Arthur as President, and hundreds of other items of interest, too tedious to enumerate, all within the covers of this **ENCYCLOPEDIA OF USEFUL KNOWLEDGE.** It contains a mine of information for everybody. This book is handsomely bound in cloth, and embossed in 4 colors, containing **542 PAGES PROFUSELY ILLUSTRATED.** We propose to send you one of these valuable books, by mail, all charges prepaid, to any address, on receipt of only **ONE DOLLAR,** provided **THIS ADVERTISEMENT ACCOMPANIES YOUR ORDER,** and that you agree to exhibit it to your friends after receiving it. We feel sure that when you order you will send us the **NAMES AND ADDRESSES OF FIVE PERSONS** in your neighborhood, whom you think would be pleased to receive one of our mammoth Catalogues free, we will **HANDSOMELY EMBOSS YOUR NAME IN GOLD ON THE COVER OF THE BOOK** (as shown in engraving where John Smith's name is) for no other reliable firm ever made so handsome an offer as the above. A more **APPROPRIATE PRESENT** could not be made to any friend, either lady or gentleman than this book. Order as soon as you can and avoid the great rush. **IN ORDERING, STATE** NAME YOU WISH ON COVER. What more appropriate present could you make a friend than this book, with their **NAME ON THE COVER IN GOLD? AGENTS** can make, in their own location, from $5 to $5 an evening, or $40 to $75 a week, if they devote their whole time to selling our goods. Send your name and address on a postal card for our confidential terms and 32-page Catalogue full of articles you want and can sell. **DON'T ENGAGE ELSEWHERE UNTIL YOU HEAR FROM US.** Address,

SPECIAL CORRESPONDENCE.

ROME RIPPLES.

The population of this place is a little low just at present as quite a number are roaming, viz:

Last week a party of four, Dr. Rogs and son, Dick and Zeb Watson and Robert Curtis started for the wild lands of the Dakotas prospecting.—They have our best wishes.

About the same time Charlie Aldrich started for Leadville, Colo.

In a few days Harvey Hood and family will visit Kansas.

For the past few days several of our citizens have been over into Cambridge witnessing the laying of the last few miles of the M. & O. R. R.

Sunday five bicyclers, of Adrian, stopped here on their way to the lakes. Charlie Wiesinger and Charlie Myerhufer were among the number. They stated that the time from Adrian up, 9 miles, was 50 minutes.

Boman Seger is improving his farm by erecting a nice barn.

Bates & Bates are burning another kiln and expect to have another one ready to burn shortly. They are turning out some fine brick and tile.

MACON MUSIC.

Once more we touch the Macon keys and a faint distant music is heard along the HERALD columns.

The concert next Sunday evening will be a missionary one.

Miss Alice Collins is in Ohio visiting her sister, Mrs. Grey.

Mrs. Wilmot Cotton, Miss Mertie Herriott and Thos. Jacobus are on the sick list.

Milan Sage has his sorghum mill in full running order.

Dr. Morden is adding some improvements to his lot.

The many friends of Miss Edna McClue will be pleased to learn that she is slowly rallying from a very severe attack of hemorrhage of the stomach.

Several are desiring to persue the C. L. S. C. course of study for this year. Would it not be well for some one to appoint a place of meeting for those interested, in order that measures could be taken for organizing a local circle?

Spencer Morgan, our merchant, is thinking of taking a partner perhaps for life, who knows?

FLASHES BY C. T. LINE OPRS.

B. C. Knapp, Geo. Knapp, James Hunter and John Burtless, of Franklin, are comparing city with farm life in Chicago.

W. B. Keyser is now a resident of Clinton township, and says it seems lonesome not to hear the click of the C. T. line.

J. F. N. Bowen was appointed Highway Commissioner to fill vacancy occasioned by the resignation of W. B. Keyser.

We regret to learn that Miss Celia Stacy, of Buffalo, fell and broke her arm while getting out of a buggy recently in that city.

B. J. Slater had a sad introduction to an operator's life. He was on duty at Pittsford, when the late accident occurred.

Henry C. Owen, of Clinton, is the happy father of twins. He always did seem to be a successful farmer.

Willis Smith had his finger badly smashed, it being caught by a portable engine wheel while blocking it to rest his team on a hill.

Mudgett & Smith commence clover hulling to-day.

EAST RIDGEWAY ECHOES.

Friday night between the hours of eleven and one, some person or persons who had never learned the lesson of doing to others as they would have others do to them, took from the field of Geo. Price 8 head of cattle, drove them to the next neighbor east and took two from his flock, making ten in all, then drove south to the next farm, where the gate being open the drove turned into the yard. This aroused the watchdog and the lady of the house. The latter arose, struck a light, went to the yard and tried to set the dog on them, but the gate being by this time closed, the cattle were unable to get out. The last that was seen of the would-be thief, he was crossing the next farm east with his face towards Dundee.

The Michigan Southeastern Christian conference is now in session with the Christian church in East Ridgeway. There will be public meetings every evening this week and will continue over the Sabbath. All that can are cordially invited to participate with us in our deliberations in the one common cause of christianity.

The ladies of the York Universalist church will hold a social at the Lake Ridge hotel on Friday evening, Oct. 19th. A cordial invitation is extended to all.

COUNCIL PROCEEDINGS.

VILLAGE OF TECUMSEH,
Council Room, Oct. 1, 1883.

Regular session.

At this regular session council convened at the usual hour.

Present. Messrs. Mills, Heesen, Sparks and the Recorder.

There not being a quorum Council adjourned until the 3d of October, 1883, at the usual hour.

P. S. McKINNON,
Recorder.

VILLAGE OF TECUMSEH, MICH.
COUNCIL ROOM, Oct. 3d, 1883.

Council met according to adjournment.

Present Messrs. Mills, Heesen, Smith, Sparks, and the Recorder.

Minutes of last regular session read and approved.

REPORTS OF COMMITTEES.

On Finance:

Report in writing, and recommend the payment of the following claims out of the contingent fund.

A. Packard, 3½ " " " "	5 25
R. Magill, 8 3-10 " " " "	12 45
Jas. W. Cole, services as Marshal and cash paid	5 50
Toledo Oil Co., oil and freight	31 65
Whitenack, Bordine & Co., as per bill	46 72
Thos. Elliott, as per bill	30 10
John Smyth, services as constable	4 25
Thos. Kyle, services as Deputy Marshal	6 70
Jno. M. Hibbard, " " " "	11 70
Sidney Powell, 1 day labor with team	3 00
L. I. Ross, 1 " " " "	3 00
Harlow Smith, 1 " " " "	3 00
Jas. Mitchell, building furnace at water tank	14 52
B. F. Steinhoff, 1 day's service on Election Board	2 00
W. C. Jordan, 21½ days as St. Com	43 00

On motion the report was accepted and adopted, and orders directed to be drawn for the respective bills.

On Ordinances:

Report in writing on the matter referred at last session.

On motion the report is accepted and adopted, and the following amendment passed by council:

Be it ordained by the Common Council of the Village of Tecumseh this 3d day of October, 1883, that an ordinance passed August 4, 1873, amendatory of "an ordinance to prevent animals running at large in the Village of Tecumseh," be, and the said ordinance is hereby amended by adding thereto two new sections to stand as sections nine and ten.

SEC. 9. It shall not be lawful for any person or persons to herd or hold any animal or animals by a rope, strap, line or anything whatsoever for the purpose of grazing or feeding in any of the streets, highways, lanes or alleys of said village.

SEC. 10. Notice in writing must be made to the Marshal of any violation of Sections 1, 5, 6, 7, & 9, of this ordinance and said Marshal shall prosecute any such offender, according to the provisions of section 8 of this ordinance.

On Streets:

Report in writing and reommend that the prayer of the petition of David H. Zeluff, David McConnell and others be granted in so far as it relates to the grading of Maumee street south of Evans creek.

On motion the report is accepted and adopted.

REPORTS OF OFFICERS.

The Marshal presents his monthly report in writing which is accepted and placed on file. He also files a statement in relation to the collection of village taxes, and asks that the time for the collection of the still unpaid taxes be extended to the first of November.

On motion the time is so extended.

The Marshal makes further report in regard to sidewalks which need to be rebuilt or repaired, and on motion is instructed to notify the following persons to have their walks rebuilt or repaired within 15 days from this date: Mrs. James, Mrs. Bird, David Jones, William Gaston, Wm. McCowan, Wm. Beebe, Henry Force, Wm. T. Thorpe, E. R. Crossman and James Watson.

The Street Commissioner presents his monthly report which is accepted and placed on file.

PETITIONS AND APPLICATIONS.

Of W. T. Owen, W. I. Ide, Wm. Hayden and 9 others, asking that a plank sidewalk be constructed along the east line of Maumee street, from Bean's tannery southward to the corporation line, and also a plank sidewalk on the west side of said Maumee street from a point not named in the petition southward to the corporation line.

Referred to committee on streets.

NEW BUSINESS.

It coming to the knowledge of Council that Henry W. Stevens had taken and appropriated to his use a block of sandstone belonging to the Village without the knowledge or consent of any member of Council, and that the same was now cut into such a shape as to render it of little value to the village. After some discussion the Council concluded to *sell* the stone to Mr. Stevens for the sum of ten dollars, and the Recorder is instructed to make out a bill for that amount and hand it to the Marshal for collection.

Council then adjourned.

P. S. McKINNON, Recorder.

Among the old pioneers of Macon may be mentioned Uncle John Skinner, who is now 87 years of age. He is a farmer, house joiner and plasterer by occupation, and built the house he now lives in. His health is good and his intellect still vigorous. He was married Jan. 8th, 1823, to Phoebe Lewis and has passed the 60th anniversary of his wedding. This aged couple are in possession of good health happy in the enjoyment of their intellectual faculties and hope to remain many years longer.

The funeral of Rice A. Beal, of Ann Arbor, was held last Sunday afternoon and was very largely attended.

MICHIGAN STATE ITEMS.

Jackson will soon have a seventh railroad.

Bay City is getting a reputation as a horse market.

Grand Rapids has $738,000 worth of church property.

There are 187 posts of the G. A. R. in Michigan.

Port Huron people have found small lizards in the city water.

The first factory in White Pigeon was the fanning mill in 1831.

In a few weeks the Purifier Works at Jackson will be completed.

Charles Fox is building a candy factory at Port Huron.

The Marlette district fair will be held Oct. 17-19.

Five thousand dollar fire in the Johnson block at Manistee.

An unusually large stave business is being done at Fair Haven.

The celery crop of Kalamazoo will bring over $300,000 this year.

Conner H. Smith has been commissioned postmaster at Crosby, late Bowen Station.

One hundred and seventy-five tons of hay were shipped from Agens dock St. Clair one day last week.

A postoffice has been established at Talbot, Menominee county, with Fred W. Sensiba, as postmaster.

Egan's Imperial truss will be manufactured by a new Ann Arbor company.

Gen. Israel C. Smith will not resign his position as head of the State troops.

Constantine was surveyed in 1831. There were five families, where there are now 1,405.

The first house built in White Pigeon was the Savery log tavern, in 1827. Present population, 1,021.

The wife of Dr. Webb, of Lowell, died of blood poisoning, at her father's house, in Ann Arbor, last week.

A boy in Cadillac by the name of Maxwell had his right hand badly mangled by a saw in Wade's mill last week.

Kalamazoo has four railroads, with a fifth partially built, and twenty-three daily passenger trains. Pretty good for a village.

There will be an annual meeting of pioneers at Portland October 30. There will be a picnic dinner and an address by S. K. Gates.

Last week a drunken man received a severe scalp wound in Jackson, but no inducement could make him disclose the name of the offender.

Robert Eggleston, of Grand Rapids, was terribly injured last week by jumping off a car near Kalamazoo, thinking that he had reached the station.

Josiah Dilley is the new President of the Ionia County Vigilance Committee. They have been so vigilant that for six months not a single article has been stolen from any of its members.

As the 4:17 p. m. train on the Lake Shore road was entering Adrian on Thursday, it was fired upon by some unknown hoodlums. Three windows were broken, and three passengers were badly cut by the glass.

The $40,000 skake purse now being raised by St. Clair to secure the location of the county seat in that city, is to be used to back up an offer to be made, of a donation of county buildings to the county if the seat is changed.

The Judges of Probate throughout the State have been notified to send no more insane females to the asylums, as they cannot be received. In the case of males they are only to be accepted after corresponding with the asylum authorities.

Edmore is not lacking in manufacturing industries, and it will soon have another—a pail factory. A. H. Farnham's saw mill has several month's cutting before it, and when this is completed the machinery will be moved into the village and the factory started.

Bert Cole, of Jonesville, conductor of train No. 13, on the Lake Shore road, was run over at Eaton Rapids, last week, his right hand mangled, left leg broken and left arm broken. One leg was amputated, one arm must share the same fate, and his recovery is very doubtful.

An Isabella county paper boasts of a farmer's daughter there who has done 126 days of field labor this season, working in the hay field, planting and digging potatoes, clearing land, picking fruit, carrying lumber, etc. Some might think a man who owns as good a farm as her father, could do better than that by the girl.

NOW-A-DAYS.

BY ANDREW LANG.

[illegible]

TWICE BURIED.

A Tale of the Rocky Mountains.

BY MAX B. KEARTON.

Half way from Leadville to the plateau—half way up a new road, running into [illegible] half way down and my horse with my food gone and night close at hand. Night is Providence's death mask.

I wrapped my blanket tight about my shoulders and urged my steed forward through the gloaming.

[illegible] I knew that I would have been certain destruction. I warrant there are strangers in the night who intend no good to any one. For I've whipped them in time and I'm sure that the proof will be waste at last. Three days in the city marshal and [illegible] I'm a Pueblo man.

I knew Charley's reluctance to hasten his speed and whatever else it may do, it does not frighten.

We must reach Hartsorne's ranch on the Platte for provision or sleep out another night. I muttered.

I was returning from a search for certain depredators whose lair is the mountain Pueblo. The marauders had hidden in the mining camps about Leadville and my search had been a long one. Finding them at last I secured and the proof of their crime with them. I was about to return and make arrangements for their arrest when my worst enemy, whom I learned was in the town, I feel, passed by the [illegible] Black Dan. Had he found me my life would not have been worth a bare in a card. I must reach the settlements quickly and return with a posse in order to capture my prize and that without delay.

In the gloaming of the morning I had begun my perilous homeward journey in the gloaming of the evening I was continuing it. No soul had met me along the wagon trail and I believed that I had leaved my enemies.

The blackness of the canyon crept up the narrow trail ran down and among great masses of boulders across patches of snow and again along the bare earth. I followed with watchful eye the indistinct path until just at the verge of the last steep descent that should carry me into the river valley I halted a moment to rest my weary horse.

"Only a little farther [illegible] dismounting and patting his [illegible] head. "A couple of more [illegible] strike support and a [illegible] old fellow saved me."

A sudden [illegible] I sprang toward the shadow of the [illegible] behind me, a single flame of [illegible] ing report, and without a word I [illegible] my hands quivering into the air [illegible] heavily away from my horse and [illegible] Black Dan had found me.

* * * * * * *

Slowly and with great pain consciousness returned—consciousness for my brain was still alive, but not [illegible] for my body I knew nothing.

What had happened?

Laboriously my mind traveled through the midst of death that still surrounded it. Slowly one idea followed another until at last came the knowledge that I should [illegible] had been waylaid and shot.

Yes, I remember now. Remembered the cry of my dog, the ring of a rifle, the sheet of flame, the blow of the ball, and then—nothingness.

I had been shot and was dead.

And yet not dead, for pain revived, and dead men feel no pain. I was shot but not dead. And so came at last the consciousness of matter. I still lived.

I sought to rise, but could not, for I was bound bound hands and feet, arms, legs, body, neck and head, fingers lips and eyelids even bound, yet not with cords.

Where was I? What was the trouble?

Nearer and still nearer came the truth as I groaned in spirit and struggled to gain knowledge of myself: nearer and still nearer, until with a mighty effort, throwing off all lethargy, I made one desperate attempt to rise; but the damp weight of newly-turned earth pressed upon my heart, the clinging bands of newly dug earth around me, and with a wild cry of horror and despair I recognized my situation. I was buried alive.

I did not faint at first—life was too dear—but lay simply designed, crushed by the blow, the loose mound admitting air for my respiration, my [illegible] brain rolling [illegible] Buried alive! Buried alive! [illegible] madness and [illegible] desire [illegible] a second time.

And then it was the tongue of my dog that awakened me. Don dug me out and lapped me back to life again.

As the dull gray of the winter's morning dawned, with groans I dragged my stiffened limbs from my narrow bed, and crept tremblingly down the trail toward the river, the blood oozing from a hole in my side, my eyes wild and fierce, my heart [illegible] my life half gone.

As I thought [illegible] set have [illegible] and the grave to bury me. It [illegible] to his house of carelessness that [illegible] the house door [illegible] me.

If [illegible] I [illegible] but to [illegible] storm [illegible]

[illegible]

There is rapid [illegible]

[illegible] the more quickly.

The next instant more fell and still more and then light began to gleam and I heard the hurrying scrape of feet mingled with low whinny.

[illegible] returned and was [illegible]

The revulsion of feeling was terrible. A moment before I had laid down a [illegible] to wait for death, now I fought and tore at the [illegible] snow like a madman mad with the thought of life.

Nearer and nearer came the rescuing [illegible] I felt the pile of snow beneath [illegible] the light above. The [illegible] mingled with growls now. [illegible] to and fro. The barrier was [illegible] one, it was [illegible] I breathed the air of [illegible] my heart leaped within me [illegible] I uttered a joyful cry a dozen [illegible] great hollow eyes burned into [illegible] a dozen faces peered before [illegible] their gleaming fangs. I had [illegible] by a pack of mountain wolves [illegible] instant I managed my [illegible] wounded and unarmed [illegible] hungry and ferocious a dozen [illegible] with a yell I sprang into their midst.

It was the act of a madman but I was mad. Death should tear me limb from limb now and with brave hands I clutched at the first grey monster before me, and grasped his shaggy throat as with hands of steel seeking to throttle him.

Then the entire pack with demoniac howls hurled themselves upon me.

The struggle was short. I felt the hot breath of the brutes in my face, their red mouths yawned upon me, their strong claws tore my buck-skin shirt; their teeth snapped when suddenly a great big white something was hurled from the bank of snow above into the midst of the melee. A half dozen dark forms followed. Wild shouts, mingled with pistol shots and heavy blows, broke upon my ears, the red blood of my assailants dyed the spotless snow, their hideous eyes faded before me and falling backward, I felt myself caught by strong arms and the well-known voice of old Johnston cried, "Saved, thank God!"

Are saved! and this time for life. My trusty dog had found the ranch and aroused the men by his strange actions; they had followed him in early morning to where I was hidden, arriving at the spot just in the supreme moment of need. I was saved, and five days later confronted Black Dan before the bar of the criminal court in Pueblo, and had the satisfaction of hearing sentence passed upon him, while he trembled as he stared at the man whom he had buried among the peaks of the Rockies.

Neither date nor pleasure will ever again call me along the canyon of the Platte.

A New Departure.

One good result of the hard times a few years ago was the bringing into life an article in proprietary medicine, which gave to every purchaser a full equivalent for his money. The rule of this class of medicines is from 10 to 25 doses for $1, the best only reaching 40. Messrs. Hood & Co. took a new departure and in the article so well and favorably know as Hood's Sarsaparilla, they gave the unprecedented quantity of 100 doses for $1. These facts commend this remedy to the consideration of the sick, also the well, for they are liable to be sick.

A writer advises that girls who wish to have small mouths should repeat at frequent intervals during the day: "Fanny Finch fried fourteen floundering frogs for Francis Fowler's father."

When your blood is impoverished, or corrupted, the remedy is at hand. Take Ayres' Sarsaparilla.

Discoveries Made by Accident.

Valuable discoveries have often been made and valuable inventions suggested by the merest accident.

The swaying to and fro of a chandelier in a cathedral suggested to Galileo the application of the pendulum.

Macintosh owed his invention to the [illegible] very impressing trousers with dew.

An alchemist, while seeking to discover a menstrum of surpassing power, had made the most durable crucible that they found yet had not made a precedent.

The power of lenses was applied to the microscope, and discovering as it were a new world, the microscope, in turn, was applied to the telescope. While adjusting [illegible] between his thumb and finger, he was startled at the enormous enlargement of a pin point, and the microscope was thus [illegible] and the telescope [illegible] was such an excellent adjunct [illegible] with the [illegible] proper [illegible] who entirely disarmed.

The process of whitening sugar was [illegible] a curious way. A lump [illegible] fell into a cask of sugar which was being purified by filtration through animal charcoal, and when the cask was opened the sugar was found to be [illegible] which has gradually [illegible] to the purest white in use, and to which has gradually off nicely. He cut [illegible] to bring them to a point. Taking these cards for communicating notes, his customers were continually wanting some of "that novel little paper," and the stationer found it advantageous to cut paper to the desired pattern. As there was no space for addressing the notelets after they were folded he after much thought, invented the envelope which he cut by the aid of little pasteboard made for the purpose. The sale increased so rapidly that he was unable to produce the envelopes fast enough so he commissioned a dozen houses to make them for him, and thus set going an important branch of the manufacturing, stationary trade.

The origin of blue-tinted paper came about by a mere slip of the hand. The wife of William East, an English paper-maker, accidently let a blue bag fall into one of the vats of pulp. The workmen were astonished when they saw the peculiar color of the paper, while Mr. East was highly incensed over what he considered a grave pecuniary loss. His wife was so much frightened that she would not confess her agency in the matter. After storing the damaged paper for four years, Mr. East sent it to his agent at London, with instructions to sell it for what it would bring. The paper was accepted as a "proposed novelty," and was disposed of at quite an advance over the market price. Mr. East was astonished at receiving an order from his agent for another large invoice of the paper. He was without the secret, and found himself in a dilemma. Upon mentioning it to his wife, she told him about the accident. He kept the secret, and the demand for the novel tint far exceeded his ability to supply it.

A Startling Discovery.

Physicians are often startled by remarkable discoveries. The fact that Dr. King's New Discovery for Consumption and all throat and lung diseases is daily curing patients, that they have given up to die, is startling them to realize their sense of duty, and examine into the merits of this wonderful discovery, resulting in hundreds of our best physicians using it in their practice. Trial bottles free. Regular size $1.

Sold by C. A. Wright & Co.

During a political campaign in Michigan a well known lawyer was addressing an audience composed principally of farmers in Gratiot county. In order to win their confidence, he said: "My friends, my sympathies have always been with the tillers of the soil. My father was a practical farmer, and so was my grandfather before him. I was myself reared on a farm, and was, so to speak, born between two stalks of corn." Here the speaker was rudely interrupted by some one in the audience who exclaimed: "A pumpkin, by jingo!"

Every one should tell his neighbor that the best remedy for curing coughs and colds, and the only sure cure for consumption is Dr. Wistar's Balsam of Wild Cherry. It is pleasant to take and very soothing and healing in its effect.

A correspondent of the *Ohio Farmer* says that he has found by experience that six [illegible] sheep will not consume more [illegible] than a cow, and are more profitable. [illegible] of this breed, weighing 135 pounds, $5.50 is obtained. He estimates that six ewes will produce eight lambs per annum and fifty pounds of wool.

Rev. Father Wilds' EXPERIENCE.

The Rev. E. P. Wilds, well-known city missionary in New York, and brother of the late eminent Judge Wilds, of the Massachusetts Supreme Court, writes as follows:

K. B

KING OF THE BLOOD.

The Most Thorough Purifier of the Blood Yet Discovered.

Cures all Humors, from a Common Eruption to the worst Scrofula.

It purifies the Blood.
It invigorates the Liver.
It regulates the Bowels.
It strengthens the stomach.
It gives vivacity in place of lassitude; cheerfulness in place of gloom, and robust vigor in place of debility.

Dyspepsia, Biliousness, Disordered Liver, Constipation, Nervous Affections, General Debility, in short all the numerous diseases and discomforts caused by impure blood are speedily conquered by this powerful corrector, the chief and sovereign of all ancient or modern medical discoveries—KING OF THE BLOOD.

Its name is its best description as it is a royal dispenser of the blessings of health and vanquishes the foes that lurk in the blood.

It banishes PIMPLES, SALT RHEUM, SCALY ERUPTIONS, ULCERS, SCALD HEAD, FEVER SORES, and all SCROFULOUS DISORDERS.

It checks CONSUMPTION in its early stages. It has frequently cured it when advanced.

It disperses TUMORS and CANCERS without the Surgeon's knife.

It cures DROPSY, general or partial.

It cures FEMALE WEAKNESS and DISEASE.

It reduces in a safe and effectual manner all swellings, external or internal.

It eradicates the effects of Venerial Disease and Mineral Poisons, and establishes a sound constitution.

Many certificates, much further information and full directions for using, will be found in the pamphlet, "Treatise on Diseases of the Blood;" in which each bottle is enclosed.

Price $1 per bottle containing 12 ounces, or to 50 doses. Sold by dealers in medicine.

If your druggist does not happen to have it on hand, request him to order a supply of it for you, as it will be cheaper than for you to order direct of us, and less trouble.

THE STATE FAIR.

WHAT IT HAS INTERESTED A REPORTER TO CHRONICLE.—SOME NOTABLE EXHIBITS.

BEAUTY AND UTILITY.—The Peninsular Stove Works of Detroit at the State Fair recently held in that city, were perhaps more highly favoured with admirers than any other stove company ever has been in the state of Michigan at least. Not only were the decorations which cost several thousand dollars superbly beautiful, but the stoves themselves were so plainly more artistic and elegant than any exhibited at fairs before, that comparison between them and the productions of other manufacturers were in every case favourable to the Peninsular. The Peninsular base burner is an elegant stove this season. Its exterior is a beautiful work of art, while its general construction is probably the superior of any other base burner in the market. The Peninsular square base burner is of the high art order, and is guaranteed in every case to perform that work which other high art stoves have so signally failed to accomplish. The Peninsular ranges were beauty itself and their working principles fully appreciated by the thousands who examined them. The Peninsular Gothic Franklin is a little gem of a stove. It has an open front and is one of the prettiest stoves of the kind in the world. There were several of the many other styles of stoves made by the company exhibited, but lack of space prevents a notice of them. Throughout the entire exhibition it was visible that the Peninsular Stove Company is a dangerous rival of the oldest and largest companies in America, for if any make or can make a handsomer or better line of stoves, the verdict of the public is let them be produced, for as yet they have not been seen.

ART AT THE STATE FAIR.—The beautiful exhibit of artistic gas fixtures, bronzes, etc., made by Messers Mouat & Sheley of Detroit, at the State Fair, attracted so much attention, and such favourable comment on all sides, that it is but justice to the firm to say, that they have won a high position in the trade, and are noted for the excellent judgment they display in the selection of stock, and fearlessness in offering their patrons the handsomest and best productions of both Europe and America. No one of the thousands who saw the richly beautiful fas fixtures in every style of bronze, antique bars and nickel, the truly artistic bronzes bique, figures etc., could for a moment question the statement that Detroit possesses in the establishment of Mouat & Sheley, that which few cities if any on this continent can duplicate. When it is understood that their exhibit at the fair was only a tithe of what one may see at the warerooms on Woodward avenue at all times, and that strangers in the city are welcome to look through them, no one visiting the city can afford to deprive themselves of the pleasure.

THE ARTIFICIAL HATCHER.—The prettiest exhibition on the fair grounds this year is that made by the Perfect hatcher company of Elmira, N. Y. They have one of their machines at work in a tent south of the poultry exhibit, actually hatching chickens and ducks by steam and electricity and the little fowls may be seen breaking and coming from the shell 30 or 40 at a time, kicking and picking their way out. This is indeed a curiosity and must be seen to be appreciated.

A STATE FAIR ITEM.—The Muzzy Starch Works of Elkhart, Ind., had a neat booth at the lower end of main hall in charge of their efficient agent. They manufacture Muzzy's sun-gloss starch and Muzzy's corn starch. Muzzy's starch is rapidly gaining favor with the people and is deserving of the many good things that are said of it.

E. BEMENT & SONS.—This well-known Lansing firm made a fine display on the fair grounds this year. Mr. G. W. Bement had charge of the exhibit. Their large tent was almost constantly thronged and Mr. Bement and his assistants were kept busy. Perhaps the long familiarity of the people of Michigan with the plows and other goods manufactured by E. Bement & Sons had something to do with drawing the crowd to this exhibit. They are manufacturers of chilled, cast and steel plows, wheel cultivators, spring-tooth and other harrows, scrapers, kettles, heating and cook stoves, small cultivators of all descriptions, bobsleds for roads and logging, wheel-spring harrows, etc.,

Their exhibit included quite a full line of the goods manufactured by them except stoves and small tools. They exhibited 12 varieties of plows, though they manufacture many more. It may not be generally known that E. Bement & Sons are the largest manufacturers of bob-sleds in the world. Their exhibit of heavy, medium and light state of Maine sleds attracted the special attention of all who are interested in the lumber business, while their bench bob-sleds, knee bob-sleds and one-horse bob-sleds were inspected with interest by the people generally. For common road work these bob-sleds have no superior. The spring-tooth harrows manufactured by E. Bement & Sons are remarkable for lightness of draft, ease of adjustment, quality and amount of work performed, as well as for the ease and small cost of repairing them. The construction of their harrow is such that the frame rides clear of the ground, avoiding the draft caused by the frame hugging the ground and loading up with dirt, thus wearing it out in a season or two. The tooth sets more like a *cultivator blade*, giving it in that respect *great* advantage in draft by *cutting* the dirt instead of *shoving* it aside. Their spring tooth riding harrow is light, compact, durable and easily managed, and they have a broadcast seeder which can be attached or detached by removing four bolts.

The stove business of this firm has assumed large proportions. Last year they manufactured about 5,000 of their Oak Leaf stoves. Some idea of the magnitude of their business may be gained from the fact that they melt and cast from five to six tons of iron every working day.

All the goods manufactured by this firm can be depended on as being first class, both in point of good working qualities and for the good material of which they are constructed. They are abreast of the times. Whenever there is a chance to improve they are quick to see and adopt the improvement.

The members of the firm are A. O. Bement, G. W. Bement and C. E. Bement, sons of E. Bement who died about three years ago, and Mr. C. A. Gower, the able Superintendent of the Michigan Reform School for boys, who devotes his time, however, exclusively to that institution at present, and does not give the business his personal attention. The brothers have honored their father and themselves by retaining the old firm name. In 1870 they sold about $3,000, of goods, and their business has steadily increased until this year when they will sell more than $275,000. They employ a large number of men, and are contributing largely to the growth of the capital city.

THE ART LOAN.

A Decided Success—All who have Visited it Pronounce it a Wonderful Exhibition.

The city of Detroit ought to take pride in its Art Loan Exhibition, for that it is one of the most complete and entertaining ever held in the West cannot be denied. Each room of the immense building contains sufficient to delight the visitor for hours and the opportunity here presented to familiarize one's self with famous works of art should not be neglected. While in the city there are many institutions which, having made preparations to entertain the public with an exhibition of rare and beautiful articles and the different processes of manufacture of their goods the non-resident may find it agreeable to call upon. The writer having a few hours to spare, looked through a few of the most prominent establishments and was well repaid for the time spent in his wanderings.

DECORATIVE ART.—The rapid advancement made during the past ten years in artistic interior decoration has had the effect of increasing the desire of the people at large for better and more cultured surroundings, and the individual efforts made by those whose profession it is to produce artistic and pleasing effects has undoubtedly heightened the education of Americans as a class. The old world possesses the immortal works of the old masters but were they transferred to the modern home they would be sadly out of place and excite only curiosity. The new world as it is commonly termed requires effects more in keeping with its character and its people, and contrasted with the works of foreign artists, the creations of some of our American decorators are vastly superior, for American homes at least, and rank with the best in world. Among the highest classes of artists in this line, the firm of Dean, Godfrey & Co., of Detroit, Mich., holds a prominent place. Their handiwork will be found in hundreds of the most costly mansions in the west as well as in the neat but unpretentious cottage. Their work is always well done and invariably presents when finished a thoroughly artistic appearance. The work recently done by them in the Art Loan Bulding and Detroit Opera House, is a sufficient proof that they not only execute rapidly but thoroughly.

THE ROGERS GROUPS.—The well known groups of statuary manufactured by John Rogers, New York, show no signs of decreasing in popularity. This is attributable to the fact that they strike a sympathetic chord in every heart: "One touch of nature makes the whole world kin." And so long as mankind cherishes the ideas of home and its surroundings, so long will these works of art maintain their popularity. From the characteristic group, "Checkers up at the Farm," (which was first modeled for the great Sanitary Commission fair at Chicago, we believe), through all his later works there beams the same spirit of purity, grace, and simplicity. These are what attract and charm us all. His well-known war groups comprise a history of the conflict with Secession. All are alike striking and significant. How much better to ornament one's home with such works than to copy the sensual tastes of those who import from Europe the shameless figures of Pagan superstition! This craze after old world styles is working great harm to our people. Why cannot we be sufficient as a nation to ourselves? Why throw away money on reproductions of an armless woman when for a smaller sum we may possess a veritable "thing of beauty" which will be "a joy forever." We advise all our readers to send for an illustrated catalogue of the Rogers Groups, which may be had, postage free, by addressing John Rogers, 23 Union Square, New York.

ACCOMMODATIONS FOR VISITORS.—As we have said, the attendance of visitors is expected to be very great, and prudence dictates to all who intend to go to Detroit that they should make arrangements for suitable accommodations while in the city. To our readers we can recommend no better hotel than the Antisdel House, Antisdel & Scripps proprietors, corner of Michigan and Washington avenues. Its location is central, and its surroundings are very pleasant. The hotel has just been refitted, and now offers as cosy quarters as any in the city. Its rates are low, and will continue so. This long established house has always enjoyed a good reputation, and the success of its new managers is a proof that it continues to gain in public estimation. The Hotel is but two squares from the City Hall, near several lines of street cars (one of which passes its doors), and is but a few minutes walk from the Grand Circus Park. In fact, it may be said to adjoin a park—The wide and beautiful Washington avenue. Stop at the "Antisdel!"

ART AS APPLIED TO WALL PAPER.—Among the few really artistic frescoators, painters and paper hangers in the West, Fred Bamford & Co. of Det. are unexcelled. They possess in a high degree the artistic ability to execute orders to the entire satisfaction of customers, and when their judgment is appealed to, they invariably evince their educated taste and thorough knowledge of art. Probably no firm has made greater progress in this direction than Fred Bamford & Co. They make their business a study, a profession, and as a result are patronized by all whose cultivation and good taste are in keeping with the artistic and love of the beautiful. Many of the fairest homes in Michigan have been made so by their labors, and none have been adversely criticised. So thoroughly did the Art Loan Committee appreciate these artists that they entrusted to them the greater part of the interior decorations of the Art Loan Building. This ought to be sufficient recommendation.

KENNEDY & KOESTER, 201 JEFFERSON AVENUE.—The well-known manufacturing jewelry house whose name leads this article offer a very attractive display, comprising all styles of jewelry. They are also wholesale dealers in watches, clocks, tools and materials, and agents for all kinds of American watches. Their stock of manufactured goods and samples is ample, and is well worth the examination of all our readers. The general public, and the trade especially, are cordially invited to call at this establishment, and see the latest novelties in one of the most attractive lines of goods. Messrs. Kennedy & Koester claim that they can offer prices to retail dealers which make it an object of some importance to buy exclusively of them. They ask only a comparison of the figures with those of other dealers. It does no harm to investigate in these matters, and we hope to see a general acceptance of the kind invitation of the firm.

Are you Billious? Try the remedy that cured Mrs. Clement, of Franklin, N. H.—Hood's Sarsaparilla, made in Lowell, Mass.

Henry Carbolic Salve.

Is the best Salve for cuts, bruises, sores, ulcers, salt rheum, tetter, chapped hands, chilblains, corns, and all kinds of skin eruptions, freckles and pimples. The salve is guaranteed to give perfect satisfaction in every case. Be sure and get Henry's Carbolic Salve, as all others are but imitations and counterfeits. Price 25.

Dr. Green's Oxygenated Bitters

is the oldest and best remedy for dyspepsia, billiousness, malaria, indigestion, all disorders of the stomach and diseases indicating an impure condition of the blood, kidneys and liver.

Dorno's Catarrh Snuff cures Catarrh and all affections of the mucous membrane.

Dedton's Balsam cures colds, coughs, rheumatism, kidney troubles, &c. Can be used externally as a plaster.

HOW OUR FORESTS DISAPPEAR.—The manufacture and shipment of timber is the leading industry in Washington Territory, employing a great many workmen, and an immense number of large saw mills, operated by steam and water power. A large fleet of ships and some small exporting steamers convey the timber to San Francisco, East Indies, Europe, Australia, South America, Egypt, Japan, and China. The timber shipped from one district in western Washington Territory in 1876, by vessels, without reckoning the home consumption, equalled 40,000 railway carloads, or 2,000 railway trains of twenty cars each, and in 1878 amounted to 250,000,000 feet. Timbered lands well situated for logging purposes sell at from eight to twelve dollars per acre. Those miles from a river timber lands can be bought from two to three dollars per acre.

What we Can Cure, Let's Not Endure.

If we can cure an ache, or a sprain, or a pain, or a lameness, or a burn or a bruise, or a bite, by using Thomas' Eclectric Oil let's do it. Thomas' Eclectric Oil is known to be good. Let's try it.

Logical deduction: She was a Boston lady of culture. She stood watching a canal boat loaded with ice, as it was being locked into the canal from Lake Champlain. "What is that boat loaded with?" "Ice," was the reply. "Oh, my!" she exclaimed, "if the horrid stuff should melt the water would sink the boat."

Kicked Out.

How many people there are who are struggling to rise in this world that are kicked down and out by envious rivals. Thomas' Eclectric Oil never "kicked out" its patrons. It is true blue. For throat affections, asthma and catarrh it is a certain and rapid cure.

"When worthy men fall out, only one of them may be faulty at first, but if strife continue long, commonly both become guilty."

From Syracuse, N. Y.

"I felt week and languid; had palpitation of the heart and numbness of the limbs. Burdock Blood Bitters have certainly relieved me. They are most excellent." Mr. J. M. Wright.

Cost of Bringing up a Boy.

A clergyman who has been discoursing about boys has devoted considerable attention to the cost of these somewhat necessary individuals, and he estimates the expense of bringing a good boy, with all the advantages of city life, to the age of fifteen, at about $5,000. These figures are about doubled by the time the boy is of age, if he goes through college. A bad boy, arrived at the age mentioned, costs fully as much, even if he has not been to college, and the computation, as the reverend gentlemen suggests, does not include the value of the mother's tears and father's gray hairs. Most men who have brought up boys will agree that the estimate is not too high.

Hatch's Universal Cough Syrup gives your kidneys and liver a jog to help relieve your lungs of a bad cough, or your child of croup. There can be no membraneous croup when Universal Cough Syrup is used in the first symtoms of the disease. No family with children can afford to be without it one day. 25 and 50 cents.

IMPORTANT

When you visit or leave New York City, save Baggage, Expressage and Carriage hire, and stop at the **Grand Union Hotel** opposite Grand Central Depot.

Elegant rooms, fitted up at a cost of one million dollars, reduced to $1 and upwards per day. European plan. Elevator. Restaurant supplied with the best. Horse cars, stages and elevated railroad to all depots. Families can live better for less money at the Grand Union Hotel than at any other first-class hotel in the city.

In the Hop Plaster are united Fresh Hops, Gums and Balsams, and its power is wonderful in curing back ache, sprains, bruises, neuralgia, pain in the side or soreness anywhere. Thousands testify to this.

Baker's Japanese Liniment never fails.

Bucklen's Arnica Salve.

The greatest medical wonder of the world. Warranted to speedily cure Burns, Bruises, Cuts, Ulcers, Salt Rheum, Fever Sores, Cancers, Piles, Chilblains, Corns, Tetter, Chapped Hands, and all skin eruptions, guaranteed to cure in every instance or money refunded. 25 cents per box. Sold by C. A. Wright & Co.

Daughters, Wives and Mothers.

We emphatically guarantee Dr. Marchisi's Catholicon a Female Remedy, to cure Female Diseases, such as Ovarian troubles, inflamation and ulceration, falling and displacement or bearing down feeling, irregularities, barrenness, change of life, leucorrhœa, besides many weaknesses springing from the above, like headache, bloating, spinal weakness, sleeplessness, nervous debility, palpitation of the heart, &c. No cure, no pay. For sale by druggists. Prices $1 and $1.50 per bottle. Send to Dr. J. B. Marchisi, Utica, N. Y., pamphlet free. For sale by Waldo & Doty.

Positive Cure for Piles.

To the people of this county we would say we have been given the agency of Dr. Marchisi's Italian Pile Ointment—emphatically guaranteed to cure or money refunded—Internal, external, blind, bleeding or itching piles. Price 50 cents a box. No cure, no pay. For sale by Waldo & Doty, druggists.

An English Veterinary Surgeon and Chemist, now traveling in this country, says that most of the Horse and Cattle Powders sold here are worthless trash. He says that Sheridan's Condition Powders are absolutely pure and immensely valuable. Nothing on earth will make hens lay like Sheridan's Condition Powders. Dose, 1 teaspoonful to 1 pint food. Sold everywhere, or sent by mail for 8 letter-stamps. I. S. JOHNSON & CO., BOSTON, MASS.

MAKE HENS LAY

CASTORIA

for Infants and Children.

Castoria promotes Digestion and overcomes Flatulency, Constipation, Sour Stomach, Diarrhœa, and Feverishness. It insures health and natural sleep, without morphine.

"Castoria is so well adapted to Children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D., 82 Portland Ave., Brooklyn, N. Y.

What gives our Children rosy cheeks,
What cures their fevers, makes them sleep;
'Tis Castoria.

When babies fret and cry by turns,
What cures their colic, kills their worms,
But Castoria.

What quickly cures Constipation,
Sour Stomach, Colds, Indigestion,
But Castoria.

Farewell then to Morphine Syrups,
Castor Oil and Paregoric, and
Hail Castoria!

CENTAUR LINIMENT—an absolute cure for Rheumatism, Sprains, Burns, Galls, &c. The most Powerful and Penetrating Pain-relieving and Healing Remedy known to man.

Rheumatic SYRUP.

The Greatest Blood Purifier Known!

RHEUMATISM CURED.

ROCHESTER, N. Y., Apr. 5, '83. Rheumatic Syrup Co.: Gents—I have been a great sufferer from Rheumatism for six years and hearing of the success of Rheumatic Syrup I concluded to give it a trial in my own case, and I cheerfully say that I have been greatly benefitted by its use. I can walk with entire freedom from pain, and my general health is very much improved. It is a splendid remedy for the blood and debilitated system. E. CHESTER PARK, M.D.

SCROFULA CURED.

PORT BYRON, N. Y., Feb. 20, '83. Rheumatic Syrup Co.: I had been doctoring for three or four years with different physicians, for scrofula, as some called it, but found no relief until I commenced taking your Syrup. After taking it a short time, to my surprise it began to help me. Continuing its use a few weeks, I found myself as well as ever. As a blood purifier I think it has no equal. MRS. WM. STRANG.

NEURALGIA CURED.

FAIRPORT, N. Y., March 12, '83. Rheumatic Syrup Co.: Gents—Since November, 1882, I have been a constant sufferer from neuralgia, and have not known what it was to be free from pain until I commenced the use of Rheumatic Syrup. I have felt no pain since using the fourth bottle. I think it the best purifying the blood and for the cure of rheumatism and neuralgia. W. B. CHASE.

Manufactured by RHEUMATIC SYRUP CO., 1 Plymouth Ave., Rochester, N. Y.

PARSONS' PURGATIVE PILLS MAKE NEW RICH BLOOD

And will completely change the blood in the entire system in three months. Any person who will take ONE PILL EACH NIGHT FROM ONE TO TWELVE WEEKS, may be restored to sound health, if such a thing is possible. For curing Female Complaints these Pills have no equal. Physicians use them in their practice. Sold everywhere, or sent by mail for 48 cents in Stamps. Send for pamphlet. I. S. JOHNSON & CO., Boston, Mass.

ADMISSION, 25 & 50 cts

Reserved Seats at Kell's Jewelry Store without extra charge.

BEN F. DODSON, Business Manager.

SPECIAL NOTICES.

FARM FOR SALE. I offer my farm in Raisin for sale. It contains 216 acres, has good buildings and fences and is nearly all improved. It has the name of being one of the best farms in Raisin township. For price and terms enquire on the premises. JOSHUA TAYLOR.

HAIRDRESSING. I am now prepared to do all kinds of hairdressing, combing, etc., at reasonable rates. MRS. C. HAWKINS. Rooms over H. E. Anderson's grocery store.

SCHOOL TEACHERS. Parties wishing to engage a gentleman or lady teacher for the winter term of school, call on or address BROWN, The Photographer, Tecumseh, Mich.

FOR SALE. A good parlor wood stove. Enquire of BROWN, The Photographer.

A SCHOOL TEACHER of experience desires a situation for the winter term in a country school near Tecumseh. Address HERALD OFFICE.

TAKE NOTICE. Tom. Aiken is in the market to buy hides, pelts and furs, butter, eggs and poultry. He also wants a quantity of potatoes. High cash prices paid. Call at Jas. Lowry's and see me before selling. Don't forget. THOS. AIKEN.

FOR SALE. A good pair heavy work mules. Inquire of GEO. HOLLOWAY, Holloway, Mich.

FOR SALE. A house and lot situated within ten minutes walk of the P. O. at a bargain if sold at once. Inquire at the HERALD OFFICE.

FOR SALE. My farm of seventy acres, situated northeast of the village of Tecumseh, about ¼ of a mile from the postoffice. Said farm is all improved and in good condition, with two houses and two barns. Also a large apple orchard containing 215 trees, and other small fruit. Will leave 21 acres of wheat in the ground. RUFUS ADAMS.

PIANO FOR SALE OR RENT. Apply at Mrs. Geo. S. Tiffany's, Chicago st.

FOR SALE CHEAP. A good property on Railroad st., opposite Slayton's warehouse. Has a dwelling house thereon and a vacant lot for building purposes. Will be sold at a bargain. Enquire at the HERALD OFFICE.

Jehiel Davidson is no longer a drain commissioner. He has pulled off his rubber boots, loaned his shovel, returned his law book and retired to private life.

While Timothy Mills was driving down Chicago street last Monday, one of his horses kicked both hind legs over the tug, and for a short time it was impossible to tell whether Mr. Mills would reach the place he started for or not. He stopped the team however before any damage was done.

Geo. E. Adamson has opened a jewelry store in the store occupied by G. P. Sparks as a music store. He will share the space with Mr. Sparks until spring, and then occupy the whole store. Geo. is a first-class workman, a good business man, and has hosts of friends all over the county, and we predict for him a good business, and wish him all success.

One of the finest exhibits in Floral Hall at the county fair was the photographic display of C. H. Hopkins and M. P. Brown, of this village. They united their exhibits in one, giving a large and splendid collection of photos, crayons, india ink and oil portraits. Citizens of Tecumseh do not need to go abroad to obtain the finest pictures that can be made, either photos, or enlarged portraits finished in india ink or oil.

Latest returns from the Ohio election indicate the election of Hoadley by a small majority with the legislature still in doubt. The prohibition amendment polled a heavy vote, but it is probably defeated by a small majority. In Iowa the Republicans elect their state ticket by a large majority and the legislature, although the Democrats gain heavily in legislative members.

LATEST.—The latest returns insure the election of Hoadley by at least 10,000 majority, with a good working Democratic majority in the legislature. The fate of the prohibitory amendment is still undecided.

Last Tuesday afternoon, Mr. Robert Cupples was found lying upon his wife's grave in the cemetery with his throat cut. Mr. Cupples has long been the engineer at Brewer's foundry and was a faithful, trusty, hard working man. He lost his wife in 1875, who took a dose of strychnine by mistake for quinine, and Mr. Cupples has never been himself since. He has been laboring under a fit of melancholy for several weeks, which was undoubtedly the cause of the act. Drs. House & Jones dressed the wound and the poor man is still alive, although but little hopes are entertained of his recovery.

THE TECUMSEH HERALD,

TECUMSEH, MICH., OCT. 11, 1883.

LOCAL AND PERSONAL.

Sunflowers growing in your bay window will ward off the malaria.

Rev. E. W. Miller, of the Clinton Congregational Church, gave us a call last Tuesday.

James Curry last week received an elegant family bible, the gift of his brother, Edward Curry.

Mrs. A. E. Ure, of the New York Millinery, has reopened her store for the fall and winter trade.

The Morenci fair last week was a success in every particular. On Thursday, the principal day, the attendance reached 4,000.

Thos. Lee, of Macon, presented us some of the finest apples we have seen this fall. There were six varieties and all of them perfect.

Mrs. Ed. Prichard returned Monday from a visit to her friends in Kalamazoo. She reports a pleasant trip and a nice visit. Fannie Strickland came with her.

The Ladies' Social of the Baptist Church will be entertained by Mrs. A. P. Coddington and Mrs. P. B. Swick on Thursday afternoon, Oct. 18th, at the residence of Mrs. Coddington. A full attendance is requested.

Geo. I Graves and wife, who have been spending a few days in Tecumseh for their home in Milan last Monday. We hope they enjoyed their visit here as well as their friends enjoyed seeing them.

Vennor says the autumn will be wet, mild and open. No snow at end of year. A rather severe October, but open weather afterward. January, 1884, wet and open. Unusual warmth for winter, 1884. No ice, or hardly any.

The newspaper war in New York City has attracted almost as much interest as the Ohio election. The HERALD insists upon selling at two cents and will establish newstands all over the city in opposition to the regular newsdealers.

Many Tecumseh people took advantage of the excursion rates to Chicago last Tuesday and went out to see the Exposition. It is barely possible that some of them may attend the race next Saturday between St. Julien and Jay-Eye-See.

The two ironing gangs on the M. & O. road met last Tuesday at Wooden's corners in the town of Cambridge.—The only portion of the road now without a track is about five miles from Dundee village to the county line and the grading is finished on this portion.

The inauguration ball given by Co. C last Friday evening was well attended and was a most enjoyable affair throughout. The armory was neatly attired, the music all that could be desired, and the girls danced till they were tired. We hope that Co. C will favor us with a few more such social events during the winter.

Rev. Phelps called in last Monday to say Good Bye. He was off for Philadelphia to attend the General Convention of the Episcopal Church now in session there. Through the kindness of a friend he is enabled to make the journey. During his absence for the ensuing three or four weeks there will be no services at St. Peter's church.

The Detroit Evening Journal pays its daily visits to our sanctum, and it is a welcome visitor. The little imperfections incident to starting a daily journal are disappearing and it is taking rank among the leading journals of Michigan's metropolis. The editor and business manager are both Lenawee boys which causes the residents of this county to take more than the usual interest in their welfare.

We called at S. W. Temple's new brick planing mill the other day and found Mr. T. as usual busy as a bee attending to various customers and the mill running to its full capacity turning out custom work in any quantity. Mr. Temple's new mill is one of the finest in the southern portion of the state—new machinery of the latest make throughout, and plenty of it to do the finest and latest kinds of planing, matching, and moulding work. He is prepared to do all kinds of custom in that line and it will pay any one to go and see the new Brick Planing Mill.

The Congregational Conference of Southern Michigan meets at Franklin next week, commencing Monday evening and closing Wednesday evening. The program contains besides the usual exercises, the following special features. On Tuesday afternoon Miss Cahill, of the American Missionary Association, will present the work of that society. Mrs. H. M. Shelton, of New York, Secretary of the woman's department of home missions, will address the ladies. Tuesday evening Mrs. C. B. Stowell, of Hudson, will teach a primary S. S. class, and Rev. J. V. Hickmott, of North Adams, will lecture to the S. S. teachers on "Our material; or what is a child. All are welcome at the meetings.

There are now 550 students in the State Normal School.

Are we going to have a Florida autumn in Southern Michigan this fall?

O. P. Bills returned from his trip up north on Monday last, feeling much invigorated after his journey.

Mrs. A. E. Ure, of the New York Millinery, Tecumseh, is offering great inducements in millinery and hair goods.

A young man of Muskegon fell in love with his cousin, had a row with her and then married her widowed mother.

The Dundee Corpet Band will give an opening ball at the opera house in that village on Thursday evening, Oct. 18th. Music by Bohemia's Monroe orchestra.

Mrs. A. E. Ure, of the New York Millinery, Tecumseh, has returned from New York with all the new styles and novelties in millinery. Hats made over and trimmed in the latest style.

Dr. Cooper of Rutger's College, N. Y. has presented the Ann Arbor University with a polyglot Bible, eight large volumes in vellum, in 11 languages. It was published in 1657, and is believed to be one of the most valuable Watson's polyglot in America.

J. M. Fuller, Esq., of New York city, a former resident of Tecumseh, was in town last week. He is the manager of Fuller's Detective Agency, office at 841 Broadway, which has grown into an extensive business. Mr. Fuller is now on his way to Minnesota to work up a government job, and will pay our village another call on his return.

"Key and Sequel to Boston Inside Out," three books in one: Catholic Church in Politics, For Sale or to Let, and The Story of a Fallen Priest, thirty-nine chapters, included. Second revised and enlarged edition, eight new chapters, added. 560 pages, gilt cover and back. By Rev. Henry Morgan. Fastest selling book of the age. Startling disclosures concerning the Church of Rome. Author sued by the Catholics for $25,000 for calling names in the advance sheets; other suits pending. Intense excitement in Catholic circles. Retail price $1,50; to agents, 75 cents cash, by postoffice order or registered lettor. No open accounts. No C. O. D. Sample copy $1,00 by mail. Address Rev. Henry Morgan, 81 Shawmut Avenue, Boston, Mass.

A BIG HAUL OF BONDS.

Last Thursday evening the residence of Wm. Dutton, of Adrian, was burglarized and several thousand dollars worth of bonds and mortgages taken, a small sum of money and a gold watch. The bonds were registered U. S. coupon upon which payment can be stopped, as it can also be on the mortgages. The burglars will probably not realize anything besides the seven or eight dollars in cash and the gold watch stolen. None of the securities taken were negotiable. In making their way into the house, it seems that they made several unsatisfactory attempts, one at the cellar entrance, and another by way of a kitchen window. Before finally entering, they broke off the handle of a mop which they found at the back of the house, thus securing a stout club, which they left in the house after completing the robbery. It is probable that Mr. Dutton would have heard from the mop handle if he had awakened and made a struggle with the thieves.

TERRIBLE RAILROAD ACCIDENT.

Last Saturday morning a collision took place between two freight trains at Pittsford, in Hillsdale Co. We gather the following details from the Adrian Times.

The station at Pittsford is on a steep grade to the east. About a mile west of the station is a curve, and the grade is then heavy to the west. A locomotive has to work hard over the grade, but when straightened out around the curve, there is a long stretch of down grade coming east, and trains going that way make fast time. The grade is steep a short distance west of Pittsford, that a car will not stand on the track without the brakes being set. No. 50 was not to stop at Pittsford, and came along at a high rate of speed. The shock was terriffic, waking up the sleeping villagers, who hastened to the scene to render what assistance they could. There is no fire engine in the village, and the people did what they could to put out the fire with pails of water. The locomotive of train No. 50 was completely demolished, the caboose of 60 was burned and three loaded cars of that train. The heat of the fire was so intense that a lot of lead was melted into a heap in one of the cars. A number of cars on train 50 were wrecked. Train No. 60 was several hours late, and it is said the conductor failed to send out the proper signals to the west.

Three persons were killed: Mrs. J. Rogers, of Hudson, Mr. Milick, of West Unity, Ohio, and A. A. Rose, of Adrian.

The conductor on train 60 was Al. Corpe, of Elkhart; the conductor of 50 was Harry Andrews, of Toledo. Chris. Neidhart, the engineer of 50 was badly hurt by jumping from his engine. His train was running too fast.

Train 60 left Osseo at 5:18, and 50 at 5:35. The former train left a brakeman at Hillsdale with information for 50, and this man went into the depot and went to sleep, leaving a request with the telegraph operator to awake him when 50 came along. This the operator did not or could not do.

Miss Nellie Koch left for her home in Indiana yesterday.

There will be a total eclipse of the moon on the 16th inst.

A rag picker at work in the Marshall paper mill found a $20 bill in the rags one day last week.

Postage on a letter from here to Canada is two cents, but the rate from Canada here is three cents.

Miss Ida Davis, formerly of Clinton, has been visiting friends at Tecumseh and Clinton during the past week.

Mr. Passmore carried away the 1st premium for gentleman's driving teams at the county fair, with his little team, and they showed the blue ribbon nicely.

Miss Libbie Pitcher, of Franklin, was the guest of Mrs. Jas. Mitchell and her daughter Lena last week. Friday evening a surprise was given in honor of Miss Pitcher, and all enjoyed a pleasant evening.

Miss Kate Anderson is much better this morning, and her father informs us she is entirely out of danger. Her condition during the past week has been very critical and her many friends will gladly hear of her improved condition.

FARMING IN MICHIGAN A SUCCESS.

According to the U. S. Agricultural Report for six years in succession the farmers of the Wolverine State received more actual cash per acre for 8 of the principal farm crops, than did the farmers of any one of the ten great farming states of the West and Northwest. The aggregate for the six successive years in Michigan, per acre, was $97.42, while in Nebraska it was but $43.60, being the lowest figures in the ten principal Western agricultural States.

In the year 1881 the average cash value of these crops was in Michigan, $19.48 per acre. According to the same reliable authority that State is well up amongst the sisterhood of states in supplying the world with articles of prime necessity, being first in salt, first in lumber, first in copper; and, as for iron, in comparison with Pennsylvania, the value of the ore at the mines where it was produced, it was in Michigan, according to the last census report for 1880, $6,034,648, and in Pennsylvania it was $5,517,079, though the out-put in Pennsylvania was 350,953 tons the most. While in the matter of miners' wages per month the average in Pennsylvania was $28,57 and in Michigan the average was $43.11. Michigan is fourth in her wool product and amongst the foremost in fruit, and out-ranks all others, according to U. S. official returns for the census year, in the average number of bushels of wheat per acre, and is 4th in aggregate amount produced. All this and much other valuable information may be obtained from a pamphlet entitled "Michigan and its Resources. Let all parties interested make a note.

RESOLUTIONS OF RESPECT.

On the 18th ult., the committee appointed by the Lenawee County Bar to draft resolutions in regard to the death of Willis Merritt, reported the following, and by order of the court they were spread upon the journal.

Once more death has invaded our ranks. Our friend and brother, Willis Merritt, has been taken from us.

He was born in the township of Tecumseh, in this county, on the 10th day of March, 1854, and passed his life as boy, student, lawyer and man among us. We remember him as an active, hard working boy, with pure motives, striving hard to make himself an honorable and useful member of society. As a student he mastered the first principles of law, and as a lawyer he had already shown that he had the will and ability to take a high and honorable position in his chosen profession.

As a man, the many positions of honor and trust he had been selected to fill, show how he was esteemed by his fellow men. He possessed a mind of more than ordinary legal acumen, and with good health and added years, his prospects for a useful and honorable career were equal to any. But his disposition to labor was stronger than his body. Always inclined to be frail, his labors during the last political campaign proved too great a strain, and he gradually went down under his every day labor, that only final exhaustion induced him to give up.

And while we mourn his early death, we recall with melancholy pleasure our intercourse with him during all these years. Open hearted, genial, generous, candid, courteous and fair minded, he endeared himself to all of us. Those who knew him best, esteemed him most.

Hope was ever strong within him; he always looked on the bright side of things. He believed in the good faith and common honesty of men, and saw only the good qualities of his friends; and to his credit be it said, that his own bearing to his fellows was such that to him was meted out that same generous judgment that he accorded to others.

A steadfast friend, an open, magnanimous opponent has gone from among us, and we mingle our tears with those who are called to mourn him as son and brother. We extend to those sorrowing friends our sympathy and condolence.

Resolved, That a copy of this memorial, under the seal of the court, be furnished the mother of our departed friend, and a copy for publication in the Tecumseh and Adrian papers.

C. F. WEAVER,
A. BENNETT,
H. C. SMITH,
Committee.

C. JOSLYN, Circuit Judge.

Countersigned,
[SEAL.] THOS. M. HUNTER, Clerk.

COUNTY CONDENSATIONS.

The Ottawa Lake big drain will cost $26,000.

Clinton will have a lecture course this winter.

Many sidewalks in Adrian are in an unsafe condition.

Hudson is shipping whole car loads of broom handles.

The war concert at Adrian to-morrow evening promises to be a grand affair.

Cambridge has turned out one hundred and six wood chuck scalps since town meeting.

The Osborn Bros. of Franklin, carried off the best sheep premium at the county fair.

The assessed valuation of the real and personal property of Deerfield village is $110,000.

Beers' Post No. 140 of this village will attend the War concert at Adrian to-morrow evening.

Miss Helen Queal and Mr. C. L. Vaughan are the only members of the Springville C. L. S. C.

John Burtless, of Clinton, threshed over 800 bushels of oats recently for C. Eddy in less than half a day.

The telephone line from Adrian to Jasper, Weston and Morenci is completed and in good working order.

The Blissfield girls are worth having. One of them pared a bushel of apples in three minutes the other day.

Morenci has another milkman. Let him take warning from the downfall of his predecessor and visit the town pump.

A new building will soon be erected in the rear of the Masonic Temple in Adrian for the use of the Press and Record.

The Dundee cornet band is called the "W. A. F." in honor of Hon. W. A. French who furnishes the stamps to run it.

Wm. Doan & Son, of Blissfield, have a new patent scraper and it looks now as though they had scraped up a good thing.

Some rascal has been stealing flower vases from the graves in the Clinton cemetery. The News says. "Tar and feather him."

No man could be found in Cambridge who would sign a liquor bond and so the saloon business goes begging in that town.

John Long has been highway commissioner of Deerfield. But he does not want the office any longer and so steps down and out.

Hudson has just organized a Young Men's Christian Association. That's right. A stop should be put to these post office burglaries if possible.

The present Lenawee County Board of Supervisors contains 12 Republicans, 12 Democrats and 2 Prohibitionists. Honors are easy, gentlemen.

Bridge Wells and Ellsworth Arnold tried to pass each other on the same track, in Clinton, the other night. A couple of broken axles was the consequence.

P. H. Scully, of Deerfield, drove from Tecumseh home last Friday in 90 minutes, a distance of 16 miles.—That was sculling along with a vengeance.

Burglars raided two houses at Clayton on Saturday night. Four dollars in cash and a silver watch were taken from Spencer Porter's and a gold watch from Jay Torbron's.

The county Pioneer meeting which was to have been held at Fairfield on the 3d inst., was adjourned until the 17th inst. The adjourned meeting will be addressed by Mr. H. C. Pratt.

The Adrian Times says: "Beginning with November 2 the Cambridge and Morenci mail stage will run four times a week, Mondays, Wednesdays, Fridays and Saturdays." The geographical editor must have been out when this item was written.

Blissfield Advance: A lady of Charlotte boasts in the Christian Advocate that she has made 500 pounds of butter from three cows since the first of May. Mrs. Geo. A. Baker, of this village, made 225 pounds from one cow from the 8th of May to the 8th of September.

Brooklyn Exponent: G. R. Culver raised 54 bushels of wheat this season from 232 rods of ground, using one bushel and 28 quarts of seed. Eighty rods of the ground produced 15 bushels of grain, the balance yielding 39 bushels. The land which produced the 39 bushels had 200 pounds of artificial fertilizer, the other part had none. The sowing was done the first week of last October. The variety is what is called the "Valley Wheat."

Adrian Press: Ex-Gov. Greenly last week left the city of Adrian, to reside elsewhere, and will make his home in St. Paul. He is in poor health, and spends some time at Eaton Rapids, and may perhaps go to Florida during the winter. Few men in the state possessed greater ability than Gov. Greenly. He is a finished scholar, a sound lawyer, and a man whom every body respected. Few people realize how acutely he has suffered from his illness during the past six or eight years, or how bravely he has borne his troubles.

THE PENSION LIST.

Below we give a full list of the residents in the northern towns of Lenawee County who draw pensions, from the government. The list for the entire county contains 503 names.

A Timely Lyric.

And now the ladies, bless 'em—
When gone, how much we miss 'em—
Are from the beaches coming home in scores,
scores, scores.
Where lately they've been stopping:
And now they'll go a shopping
And overrun the various dry goods stores,
stores, stores.

And now the merchant, wary
Will deem it necessary,
To have an advertisement well displayed,
played, played,
Within his local paper,
For that's the proper caper,
By which to catch the coming autumn trade,
trade, trade.

On Wednesday, Oct. 17, the ladies of St. Peter's church will give an oyster supper at the residence of Mrs. C. A. Keil, where they will be pleased to welcome all their friends. Supper from 6 to 10 P. M.

Mr. & Mrs. Chas. Elliott, of Chicago, Ill., are visiting Mr. & Mrs. David Spalding. It might be well to say that Mrs. Elliott used to be Miss Minnie Spalding, and congratulations are in order.

—Mrs. C. M. Webster has moved to the residence of Mrs. Luke Wood, one door west of P. B Swick, with the other branches of work. Colors hair switches for 25c and does oil stamping on short notice.

Cider Apples and Potatoes.

Slayton & Son want to buy your cider apples and potatoes. Call and see them.

—The Detroit Diamond Fanning Mill, the best in the market only $25. Slayton & Son.

—No guess work. If you want as good flour as is made in the state, get Heck Bros.' complete all roll flour.

—Call on Slayton & Son for good cooking apples. Cheap.

—Natural looking and serviceable artificial teeth can be procured at Dr. B. F. Snyder's Dental Rooms.

—You can have your decayed and aching teeth extracted at Dr. B. F. Snyder's dental rooms, without pain, by taking vitalized air.

—Spring Tooth Harrows at Snedicor's.

—Call at the yard and mill of the Tecumseh Lumber Co., and examine their stock.

—Leave your orders for Sash, Doors, blinds, mouldings, window frames, tanks, troughs, etc., with the Tecumseh Lumber Co. They will receive prompt attention.

TECUMSEH, Mich., March 25, '83.

I have been troubled with a hard cough for many years, and have found nothing to help me until I tried Dr. Bigelow's positive cure, which has completely cured me. WELCOME SHERMAN.

The medicine is manufactured by Griggs & Co., Ottawa, Ill., and sold by Baker & Hall, Tecumseh.

CATARRH

ELY'S CREAM BALM

has gained an enviable reputation wherever known, displacing all other preparations. An article of unexcelled merit.

CURES ROSE COLD IN HEAD

HAY-FEVER

LIQUID OR SNUFF

Apply by the finger into the nostrils. It is quickly absorbed, effectually cleansing the nasal passages of catarrhal virus, restoring healthy secretions. It allays inflammation, protects the membranal linings of the nose from additional colds, completely heals the sores and restores the sense of taste and smell. Pleasant. Agreeable. Unpolluted by a few applications.

A Thorough Treatment Will Cure.

Price 50 cts. Ely's Catarrh Health Header, containing every kind of nasal remedy, sent free on receipt of stamp. By mail, prepaid, a package containing one of each size, $1. Sold by all druggists.

ELY BROTHERS, Owego, N. Y.

Half Out of His Head.

[illegible] Hop Bitters [illegible] Sandusky [illegible] "Why, if one cannot for another's good [illegible] become a drunkard." [illegible] Mr. John Coleman, the well known whole[illegible] of Buffalo, N. Y.

[illegible] nervous and my kidneys were quite [illegible] of prostration, which nearly [illegible] a kind of stupor haunted by [illegible] dreams. Having taken Parker's [illegible] I feel as good as ever. I am [illegible] surprised and delighted at the [illegible] I feel into the ranks of they [illegible] nights. I should add that the Tonic [illegible] with the condition of general [illegible] dyspepsia developed by my pre[illegible] sedentary habits, and gave me strength and [illegible] a brief trial of the Tonic [illegible] health. I have [illegible] the lowest disorders [illegible]

[illegible] preparation which has been known as Parker's Tonic, will hereafter be advertised and sold simply under the name of Parker's Ginger. Bitters & [illegible] make this change to the [illegible] unprincipled dealers who have for years [illegible] their customers by substituting inferior [illegible] under the name of ginger. We [illegible] the dealing would all the more willingly, as ginger is an important flavoring ingredient in [illegible]

There is no change in the preparation [illegible] Parker's Tonic remains in the hands of [illegible] under the name of Parker's Ginger. [illegible] the genuine bear the signature of [illegible] on the wrapper.

Did She Die?

No.

"She lingered" and suffered along [illegible] all the time for years.

"The doctors doing her no good."

"And at last was cured by this Hop Bitters the papers say so much about."

"Indeed! Indeed!"

"How thankful we should be for good medicine."

A Daughter's Misery.

[illegible] our daughter suffered [illegible] of misery.

"From a complication of kidney [illegible] rheumatic trouble and nervous [illegible]

"Under the care of the best physicians [illegible]

"Who gave her no lasting relief [illegible] various remedies [illegible]

"Finally we [illegible]

"And now she is enjoying perfect good health [illegible] a remedy as Hop Bitters that we can recommend for years before [illegible]

Father is Getting Well.

Does Farming Pay?

An impression somewhat general seems to prevail that farming is not as profitable as other vocations, that more money can be earned in almost any other vocation with less labor; hence the farmer's son abandons the farm, where he is a success, for the uncertain gains of town.

This impression, it seems to me, is very far from the truth. Take the farmers in every state in the West, most of them commenced life poor; if they have strictly adhered to legitimate farming and avoided speculation, in most cases they are well situated, and are far more comfortable than an equal number of associates who chose the town. Facts sustain us in the assertion that out of one hundred young men who move the country for the town or city, not more than one becomes wealthy; perhaps one-tenth obtained a competency, and nine-tenths barely make a living. Out of one hundred young men who remain on the farm, probably not one becomes wealthy, but more than fifty per cent. have substantial possessions and good houses, while most of the remainder make a good living and rear respectable families. The point so impressed is that average young men are far more likely to succeed on the farm than in the town, although they may not actually make more money. One thing that has allured many from the farm is society, and schools may be added. In these particulars a marked difference can be observed within a few years to the credit of the country. Farm houses and surroundings are more beautiful; the sons are men of culture and the daughters are accomplished in the elegant as well as the useful. Society in the country is no longer rude; if it lacks some of the grace of the city, this is more than compensated by solid adjirements and an honest welcome, characteristic of a high bred people. The turning point has undoubtedly been passed, and the future great man of this nation will be a farmer.—[Knapp.

One of the Worst Cases of Erysipelas cured with Three Bottles of Rheumatic Syrup.

WOLCOTT, N. Y., Sept. 15, '83.

Rheumatic Syrup Co.:

Gents—Although your remedy is called Rheumatic Syrup, I find it is equally good for other diseases of the blood. Some six weeks since I was taken with erysipelas in my face, so that my eyes were terribly inflammed and I was a sight to behold, and the pain I suffered was almost beyond the limit of human endurance. I was induced to try your Rheumatic Syrup, as it was recommended as a great Blood Purifier, and before I had used all of the second bottle I was entirely cured, and my skin is now as smooth and clear as ever. I desire to recommend the Rheumatic Syrup to all whose blood is impure.

Gratefully yours, B. F. KNAPP.

I remarked to an old farmer back in the country, whom I had not seen for several years, and whose farm, in the meantime, had improved wonderfully, that his place was so changed I hardly knew it. "Yes," said he, "I've been fixin' up a little. The old woman pestered me to death about the garden, and so I slicked it up a little, and fixed about the house, and it looked so nice I went at the farm fences and the brush, and saved more manure, and kept killing the weeds, and the crops got better, and so I kept going on, and things do look pretty good now. Wife takes a paper, and I take one, and I get time to read it too, and I used to think that I hadn't time for anything." And so he ran on, seemingly much pleased with what he had done, and his life and his home without doubt the happier for it. Examples of a like kind may be found all over the country.

Thousands Say So.

Mr. T. W. Atkins, Girard, Kan., writes: "I never hesitate to recommend your Electric Bitters to my customers, they give entire satisfaction and are rapid sellers." Electric Bitters are the purest and best medicine known and will positively cure Kidney and Liver complaints, Purify the blood and regulate the bowels. No family can afford to be without them. They will save hundreds of dollars in doctor's bills every year. Sold at fifty cents a bottle.

Sold by C. A. Wright & Co.

[illegible] Dr. Leigh Dixon, the Parisian [illegible] for Australia, said at a point opposite [illegible] Naples, midway between each [illegible] in that quarter of the earth [illegible] cheerless. About 8000 people live [illegible] there, and are the effete descendants of the most formidable band of pirates that ever [illegible]. It is a very old town. One hundred and sixty-seven years before Christ [illegible] the city surrendered to the Romans and received exemption from taxation, and its freedom. From 1500 to 1600 the pirates held full [illegible] in 1714 a great battle was lost the [illegible]

Given Up by the Doctors.

"Is it possible that Mr. Godfrey is up and at work, and cured by so simple a remedy?"

"I assure you it is true that he is entirely cured, and with nothing but Hop Bitters, and only ten days ago his doctors gave him up and said he must die!"

"Well a-day! That's remarkable! I will go this day and get some for my poor George—I know hops are good."

It is said by a well-known Illinois educator that "The average western farmer toils hard early and late, often depriving himself of needed rest and sleep—for what? To raise corn. For what? To feed hogs. For what? To get money with which to buy more land. For what? To raise more corn. For what? To feed more hogs. For what? To buy more land. And what does he want with more land? Why he wishes to raise more corn—to feed more hogs—to buy more land—to raise more corn—to feed more hogs—and in this circle he moves until the Almighty stops his hoggish proceedings."

Time to Stop It.

It's too bad, Sir or Madam, but don't get frightened. Your hair is falling off—that's certain. A glance in the mirror, or an investigating committee of fingers tell the dismal story. We won't discuss the possible cause. It is enough that Parker's Hair Balsam used now will prevent further destruction. Is your hair somewhat gray, too and crisp? Alas, yes. The Balsam will give back the original color, softness and gloss. Not a dye, not oily, elegantly perfumed, a perfect dressing.

Don't allow the accumulation of scurf or dandruff, when it can be so easily prevented by the use of Ayre's Hair Vigor.

Coloring a Pine Floor.

The *Art Interchange* gives the following directions for coloring a pine floor which is to be partially covered with rugs: Buy at any painters' store turpentine and linseed oil (not boiled.) Ask them to put a little Japanese dryer in the turpentine. Buy either burnt sienna or Vandyke brown, or both, according to the color of the rugs and the tint on the walls. These colors come put up in tin cans, smaller but otherwise similar to tomato or fruit cans. After your floor has been washed thoroughly clean, is free from dust, and dry begin by opening your can and mixing, in another receptacle, the oil, turpentine and paint. Remember, the oil is to thin your paint, the turpentine to dry it. The mixture should be so thin that it will run with liquid readiness. Lay it on with a brush as thick as your hand, stroking the brush the way of the grain of the wood. Protect your hands with old gloves, and go over the floor, with a rag. In fact, you will need two rags, one pretty well charged with paint, to rub in every crevice, and another rag to rub off any superfluous paint. Mind your steps, or, rather, put some mind in the way you step. Do not step in a straight line across the grain of wood, but carry your brush irregularly down, taking a hint from nature's lines in the wood you are preserving with paint. By mixing the burnt sienna and Vandyke brown you will secure a rich color without needing to use the paint in a thick film. Your mixture should be so thin that the grain of the wood will show through. If you have too much turpentine the paint will rub off. If you have too little your room will need more days to dry. Twice as much oil as turpentine certainly. Do not economize the oil, and be as prodigal in rubbing as your strength will permit.

To keep the floor on a stained floor it is recommended once a week to wipe up the floor with diluted buttermilk or sour milk.

The best interests of humanity depend on the good health of our women folks, and yet those with brightest intellects seem to suffer most with ailments peculiar to female life. It is well to remember that the whole female system can be built up to a proper state of endurance, pimples, sores, swollen limbs, monthly pains, and other indications of female disease, made to disappear and robust health of mind and body take the place of illness and distress, if a timely use is made of Dr. Guysott's Yellow Dock and Sarsaparilla. It restores the blood to perfect health, it strengthens the muscular and nervous system. It gives tone to the digestive and urinary organs. It allays all irritation of the mucous membrane. In a word it is a perfect female medicine, and aids every function of female life. No other remedy equals it. Have your druggist get it. Take no substitute.

Weight by Measuring.

The following rule for finding out the weight of an animal by measuring may prove convenient: "See that the animal stands square; then take his circumference behind the shoulder-blade—this is the girth. Then measure from the bone of the tail which plumbs the line with the under part of the buttock, and direct the string along the back to the forepart of the shoulder-blade; this will be the length. Then work the figures thus: Suppose the girth of bullock 6 feet 4 inches, length 5 feet 3 inches, which multiplied together make 33 square superficial feet; and these multiplied by 23—the number of pounds allowed for each superficial foot of cattle measuring less than seven and more than five feet in girth—make 759 pounds. When the animal measures less than nine and more than seven feet in girth, 31 is the number of pounds to be estimated for each superficial foot. And suppose a small animal to measure 2 feet in girth and 2 feet in length, these multiplied together make 4 feet, which multiplied by 11—the number of pounds allowed for each square foot when cattle measure less than 3 feet in girth—make 44 pounds. Again, suppose a calf or sheep, etc., to measure 4 feet 6 inches in girth and 3 feet 9 inches in length, that multiplied together makes 16 square feet, and these multiplied by 16—the number of pounds allowed for cattle measuring less than 5 and more than 3 feet in girth—make 256 pounds. The dimensions of cattle, sheep, calves and hogs, taken this way, will give the weight of the four quarters of the animal, sinking the offal. A deduction must be made for animals half fat—of one pound in twenty from those that are fat; and for a cow that has had calves one pound must be allowed, in addition to the one for not being fat, upon every twenty."

A lady who suffered from weakness peculiar to her sex, in writing to a friend, said: "I tried various kidney medicines, but only found myself growing worse. A friend told me to use Dr. Guysott's Yellow Dock and Sarsaparilla. Its effect on me was soon indicated by a clear and beautiful complexion, a freedom from aches and pains, a complete removal of nervous depression, painless regularity in habits of digestion, and otherwise. I can not praise the remedy too highly as a true friend to suffering womanhood and as a strengthening medicine.

A copy of the oldest newspaper, of which anything is known was recently found in the library of the University of Heidelberg. John Carolus, of Strasburg, is thought to have printed this copy, which is in the form of a quarto volume and bears the date of 1609. Much of the contents is extremely interesting, and consists principally of letters written by correspondents. These letters, when coming from Rome, were twenty-one days on the route; from Venice, fourteen to seventeen days, and from Vienna, about eight days. When there was not sufficient matter to fill out the sheets, blank spaces were left. One of the incidents mentioned was the manufacture of a telescope, by Galileo. Some of the news was of a very bloody character, and pictures a lawless state of society, one item relating to the confession of seven criminals who acknowledged that "on the 18 of this month they threw about fourteen persons into the water, and that their band numbered eighty, who for the most part were natives of Prague."

A GOOD INVESEMENT.—One of our prominent business men said to us the other day: "In the spring my wife got all run down and could not eat anything; passing your store I saw a pile of Hood's Sarsaprilla in the window and I got a bottle. After she had taken it a week she had a rousing appetite, and did everything. She took three bottles, and it was the best three dollars I ever invested. C. I. Hood & Co., Lowell, Mass.

Hay Fever.

For Hay Fever I recommend Ely's Cream Balm. It entirely relieved me from the first application; have been a sufferer for ten years. Going from home and neglecting to take the remedy, I had an attack; after returning I immediately resorted to it, and found instant relief. I believe, had I begun its use earlier, I should not have been troubled. J. Collyer, Clerk, 115 Broad st., Elizabeth, N. J.

My brother Myron and myself were both cured to all appearances, of catarrh and hay fever last July and August. Up to this date, Dec. 28, neither have had any return of these troubles. Ely's Cream Balm was the medicine used. Gabriel Ferris, Spencer, N. Y.

WOA-PHORA

Began life 12 years ago under the name

WOMAN'S FRIEND

Without puffery, simply on the good word of those who have used it, it has made for itself a literary State in the Union.

DR. A. PRASH'S MAGNETIC OINTMENT.

The Great Healer of all Inflamed Injuries and Disorders.

It is constantly effecting cures in apparently desperate cases, while the unparalleled demand with which it meets, stamps it at once as the greatest medicine of the age for outward application.

The most incredulous are convinced, and the most skeptical are compelled to believe in the power of this great remedy.

WHAT IT CURES.

All Sores, Cuts, Bruises, Sprains, Burns, Sore Throat, Lameness, Rheumatism, Piles, Inflammation of Lungs and Bowels, Bronchitis, Croup, Neuralgia, Rheum, Chilblains, Affection of the Spine, Erysipelas, Nervous Irritation, and all disorders attendant with Inflammation.

It never fails to restore the natural functions of the skin and equalize the circulation of the blood. By this means a controlling power is gained over the most malignant forms of disease. It penetrates to every portion of the human frame; every bone, muscle, vein, nerve and ligament is searched out and made sensible to its soothing and healing influence. Hence it copes readily with internal as well as external diseases.

Over 40 Years,

This Ointment has been used by the people throughout the United states, and our confidence in its qualities is such that as we have no space here to insert any of the numerous certificates of cures which we have from all parts of the country, we simply ask those readers of this notice who have ever used this Ointment, to frankly state their experience with it to inquiring friends. If but one in a hundred would do this we should be perfectly satisfied with the result. Full directions for use will be found on pamphlet around each bottle.

Price 25 and 50 cents per bottle. Sold by all dealers in medicine.

D. RANSOM, SON & CO., Prop's Buffalo, New York.

A CURE GUARANTEED IN ALL CASES

For Old and Young, Male and Female,

Magnetic Medicine: a Brain and Nerve Food. Positively cures Night Losses, Spermatorrhœa, Impotency, Nervous Debility, Leucorrhœa, Barrenness, and for all (BEFORE) weaknesses of the Generative (AFTER) organs in either sex. It is an enabling and positive cure. Tones up the debilitated system, arrests all involuntary discharges, removes mental gloom and despondency and restores wonderful power to the weakened organs. ☞ With each order for twelve packages accompanied with five dollars, we will send our Guarantee to refund the money if the treatment does not effect a cure. It is the Cheapest and Best Medicine in the market. For particulars in Pamphlet, which we mail free to any address, sold by all druggists, one package $1 or six packages $5, or sent by mail on receipt of price by addressing the MAGNETIC MEDICINE CO., DETROIT, MICH. Guarantees issued in Tecumseh by Waldo & Doty.

COMPOUND OXYGEN NOT A DRUG

A NEW TREATMENT.

For Consumption, Asthma, Bronchitis, Dyspepsia, Catarrh, Headache, Debility, Rheumatism, Neuralgia, and all Chronic and Nervous Disorders.

A CARD.

We the undersigned, having received great and permanent benefit from the use of "COMPOUND OXYGEN," prepared and administered by Drs. STARKEY & PALEN, of Philadelphia, and being satisfied that it is a new discovery in medical science, and all that is claimed for it, consider it a duty which we owe to the many thousands who are suffering from chronic and so-called "incurable" diseases to do all that we can to make its virtues known, and to inspire the public with confidence.

We have personal knowledge of Drs. Starkey & Palen. They are educated, intelligent and conscientious physicians, who will not, we are sure, make any statement with which they do not know or believe to be true, nor publish any testimonials or reports of cases which are not genuine.

WM. D. KELLEY, Member of Congress from Philadelphia.
T. S. ARTHUR, Editor and Publisher "Arthur's Home Magazine," Philadelphia.
V. L. CONRAD, Editor "Lutheran Observer," Philadelphia.
PHILADELPHIA, PA., June 1, 1882.

☞ In order to meet a natural inquiry in regard to our professional and personal standing, and to give the public increased confidence in our statements, and in the genuineness of our testimonials and reports of cases, we print the above "CARD" from gentlemen well and widely known and of the highest personal character.

Our "Treatise on Compound Oxygen," containing a history of the discovery of and mode of action of this remarkable curative agent, and a large record of surprising cures in Consumption, Catarrh, Neuralgia, Bronchitis, Asthma, etc., and a wide range of chronic diseases, will be sent free. Address,

DR. B. MINCER,
Scientific Optician!

I have devoted 25 years wholly to a study of the eye, and how to aid vision properly, and I make a specialty of fitting glasses to the eyes that have been injured by cheap, inferior glasses. I manufacture every kind of glasses, and guarantee satisfaction. Read what prominent physicians of Adrian say:

Having for some time past used glasses to improve my sight, without satisfactorily gaining my object, I called on Mr. Mincer, optician, of Detroit, who readily adapted glasses to my eyes, with which I am so well pleased that I cheerfully speak of his talent. His method of examining and his application in selecting glasses to fit the eye can only be acquired by a knowledge of the useful organ to which must be added extensive experience. He has also adapted glasses to Mrs. Baker's eyes with which she is well pleased. I recommend him to all who need glasses adapted to their wants; poor glasses are an abomination. V. A. BAKER, M.D.

ADRIAN, Nov. 18, 1882.

I have used spectacles bought of Mr. B. Mincer for the past three months, and find them superior to any I have ever used, and can cheerfully recommend him to anyone in need of glasses, and the benefit of his experience in the science of optics to adjust proper lenses. DANIEL TODD, M.D.

I have investigated the work of Mr. B. Mincer, optician. I have reason to believe that he understands his profession, and adjusts excellent glasses on scientific principles. C. RYND, M.D.

REMEMBER!

I will visit every town in the county during the month.

TIRED OUT.

The distressing feeling of weariness, of exhaustion without effort, which makes life a burden to so many people, is due to the fact that the blood is poor, and the vitality consequently feeble. If you are suffering from such feelings,

Ayer's Sarsaparilla

is just what you need, and will do you incalculable good.

No other preparation so concentrates and combines blood-purifying, vitalizing, enriching, and invigorating qualities as AYER'S SARSAPARILLA.

Cephrenes, the Second Pyramid.

Of the many wondrous discoveries made by the Belzoni, perhaps none was more noteworthy than that of the entrance to Cephrenes, the second of the mighty pyramids of Ghiza—those huge structures which for countless ages have bid defiance to time; vast, solitary and grand. Seated during his travels at the foot of this second pyramid, Belzoni mused as to the probability of there being an entrance to its interior, arguing that it was highly improbable that such a magnificent structure should have been reared without containing chambers and a means of entrance thereto. He knew that the first pyramid had been explored, but every historical account, from those of Herodotus downward, joined in declaring the second pyramid, at whose foot he mused, to be one huge monumental block. But Belzoni was of too inquiring a mind to be satisfied, and, carefully examining the exterior, he at length came to the conclusion that there must be a way to the interior, and set himself boldly to the discovery. The first step to be taken was to obtain permission from the Bey, and that accorded he collected sixty workmen, and set them to break with their hatchets through a heap of debris joined together by the pulverized mortar that had fallen from far up the side of the pyramid, and then been moistened by the heavy night dews.

A long period of toil then followed, ending in the discovery of a cavity in the side, but no means of entrance. Disappointed but not daunted, Belzoni again surveyed the vast building, and determined to try in another spot, where, after the labor of many days, first one and then another block of granite was uncovered, and at last the entrance to the pyramid reached—a low passage choked up with fallen stones, which required arduous toil to draw them out. But in spite of the opposition and idleness of his Arab laborers, Belzoni persevered, till a passage large enough to admit one of the men was cleared, and soon after, armed with a torch, the traveler stepped in, and began to look for the reward of his thirty days of incessant labor.

His light burned dimly in the gloomy echoing passage leading to the vast solitudes that had not been invaded for perhaps two thousand years, and it was with a strange feeling of awe that this enterprising man passed on, breathing the dust of a vast antiquity, and with lifted torch trying to pierce the gloom. Passage after passage he explored through the huge rock-built structure; peering anxiously forward lest he should be plunged unawares into some deep pit yawning to engulf him; but he passed on in safety until he reached a door, evidently leading into some great chamber, and then, stepping boldly forward, he stood in the centre of the huge building, trying to pierce the darkness around, and gazing wonderfully at this mausoleum of an antiquity so great that human history gives but a poor clue to its age. His steps echoed upon the stony floor, and seemed to die away in strange whisperings from the sides of the great tomb as he eagerly explored it, now with lowered torch, now with it elevated towards the roof, and listened again and again to some sound, to break the death-like stillness of the place.

The contents proved to be a large sarcophagus of granite; but far from satisfied with this result of his research, Belzoni sought on, and explored passage after passage, and echoing gloomy chambers, evidently formed to be the last resting-places of the kings of some ancient dynasty; but the grandeur of this solemn temple of the dead seemed to lie in its vast solidity and massiveness of construction, qualities which have been the admiration of travelers of every country. Oppressed at length by the strange stifling air of the place, Belzoni returned to the light of day once more, but only to recruit himself, and then, better provided with lights, to return through the long passages, and explore once more the many chambers, which brought to his mind visions of the past grandeur of Egypt, and the scenes that had been enacted upon earth when the pyramid was first declared by its architect complete.

Griggs' Glycerine Salve.

The best on earth can truly be said of Griggs' Glycerine Salve, which is a sure cure for cuts, bruises, scalds, burns, wounds and all other sores. Will positively cure piles, tetter and all skin eruptions. Satisfaction guaranteed or money refunded. Only 25 cents. For sale by Baker & Hall.

Poison Ivy.

The poison ivy is very poisonous to some persons; they are poisoned by not touching it at all, or even, it is said, passing near it, while others may handle it without being afflicted by the contact in the least. The poisonous property of the plant is owing to a volatile acid; its effect is an acute inflammation of the skin, often accompanied by a great swelling. The effects remain sometimes for months before the poison is completely removed from the system. The usual remedies are cooling purgatives and an external application of lead water. An application of a solution of hops has been known to prove an effectual remedy when all other remedies failed. The plant has sometimes been mistaken for Virginia creeper, to which it bears no slight resemblance. The distinguishing feature is that the poison ivy has three leaflets, whereas the Virginia creeper's leaves have five leaflets. Persons have been poisoned by mistaking the poisonous for the harmless species. This plant is of the genus *rhus* or sumac. There is also an upright plant that is poisonous.

Eight Years' Scrofula Cured.

A valued correspondent, Albert Simpson, Esq., writing from Peoria, Ill., says: "Samaritan Nervine cured me of scrofula, after having suffered for 8 years with the disease." Mr. Simpson lives in Peoria. Ask him. Your druggist keeps it. $1.50.

A GATE WITHOUT HINGES.—A subscriber in Pennsylvania sends a description of a gate which is without hinges. It turns upon a pin of 1-inch round iron, fixed in a block of wood or a stone, under the heel post, and a pin bent to a proper shape, fitted in the top of the heel post. This method of hanging a gate is cheap, simple, and more secure than to use hinges.

How to [illegible]. Expose yourself day and night, eat too much without exercise, work too hard without rest, doctor [illegible], take all the vile nostrums advertised, and then you will want to know How to Get Well.—Which is answered in three words—Take Hop Bitters!

They were twins. The parents christened one of them Kate and the other Duplicate.

New Cure for Whooping Cough.

This has been considered one of the incurable diseases. Physicians [illegible] that it must take its course [illegible] weeks of incubation preceding the [illegible] four weeks of gradually increasing number and power of the paroxysms, and from six weeks to six months of restoration to health. Often this malady is followed by pneumonia, bronchitis, or extreme physical exhaustion, ending in lingering illness or death. When the paroxysms are very violent, patients frequently rupture blood vessels or the delicate membranes of the eye or other organs. The disease is increasing in virulence. The number of deaths in New York city in one year has reached 469; in the city of London the appalling number of 6,000 annually. It has been known to some of the medical profession that persons suffering from whooping cough, asthma, bronchitis, catarrh, croup, and the other zymotic diseases, experienced quick relief, and sometimes rapid cure, by breathing the vapors arising from the open purifying boxes at gas works. This fact was discovered by a French physician in 1865, and published. Shortly after, the gas works of this country were visited, and now it is quite common to see several patients gathered about a purifying box inhaling the strong vapors.

The secret of the relief has been recently discovered. A Providence (R. I.) chemist procured the condensed hydro-carbon deposited in the bottom of the purifying box and by analyzation ascertained it to be cresolene ($C_6H_5CH_3O_2$), a coal tar product somewhat akin to carbolic acid but possessing far greater power in destroying the germs of contagious diseases. Vaporized in a closed room, the terrible paroxysms in pertussis (whooping cough) are checked immediately, and ordinarily in five nights the patient entirely recovers.

Persons suffering from chronic asthma and unable to recline at length, can assume a recumbent position and sleep peacefully all night. Bronchitis and croup are quickly relieved. Diphtheria and scarlet fever are not only often cured, but it is absolutely impossible for these dreaded diseases to be communicated to others.

The contagious germs deposited in bedding, carpets, clothing, wall paper, or floating in the air, are instantly destroyed by the powerful vapor of cresolene, which is conveyed in the air everywhere. A sick room—indeed the entire house—can be almost instantly perfumed with exact fragrance of cologne, Florida water, bay water, etc., the odor remaining for hours. These results are made possible through the use of a very ingenious but simple metal vaporizer, which consists of a stand six inches high, supporting a cup which contains a half ounce of liquid. Under this cup is a disk, against which the direct rays of heat given off by a toy kerosene night lamp strike, and pass thus modified to the bottom of the cup. This produces perfect volatilization.

You will, I trust, pardon the length of this communication, but the subject seemed to me to possess such general interest and promising to occupy a new and important field in the relief of suffering children humanity, that I thought it worth a place in your widely circulated column. *Kenosha (Wis.) N.Y. Evening [illegible]*

A Short History of Wheat.

The varieties of wheat are almost numberless, and their characters vary widely under the influence of cultivation and climate. There are said to be 180 distinct varieties in the museum of Corneli university. On the slopes of the mountains of Mexico and Xalpa the luxuriance of vegetation is such that wheat does not form ears. In Japan, it is said, the wheat has been so developed by the Japanese farmers that no matter how much manure is used the straw will not grow larger, though the length of the ears increases. The height is rarely more than two feet, and often not more than 20 inches. Through selection winter wheat has been changed to summer wheat in three years, and summer wheat converted in the same time to winter wheat. In general, wheat is the most esteemed of the cereal productions, but in Abyssinia, according to Parkyns, the flour of the "teff" or "dogussa," scarcely palatable to Europeans, is preferred by the natives to any other grain.

Isis was supposed to have introduced wheat into Egypt, Demeter into Greece, and the Emperor Chin-Wong into China about 3000 B. C. In Europe it was cultivated before the period of his history, as samples have been recovered from the lacustrine dwellings of Switzerland. In England it was probably not cultivated by the ancient Britons, but the Anglo-Saxons when Bede wrote, early in the 8th century, sowed their wheat in the spring, and in the days of Queen Elizabeth its cultivation was but partial. Indeed, wheat was an article of comparitive luxury till nearly the 17th century. In India wheat seems not to be native, but introduced, for its Sanscrit name signifies "food of the barbarians," yet three varieties are mentioned in the Avaprakasa, one of which, a large-grained, is said to have come from the West, another, a small-grained, or beardless wheat, is said to have been indigenous to Malabar, India.

The first wheat raised in the "New World" was sown by Spaniards on the island of Isabella, in January, 1494, and March 30th the ears were gathered. The foundation of the wheat harvest of Mexico is said to have been three or four grains carefully cultivated in 1530, and preserved by a slave of Cortez. The first crop of Quito was raised by a Franciscan monk in front of the convent. Garcilasso de la Vega affirms that in Peru, up to 1557 wheaten bread had not been sold at Cuzco. Wheat was first sown by Gosnold on Cuttyhunk, one of the Elizabeth islands in Buzzard's Bay, off Massachusetts, in 1602, when he first explored the coast. In 1608, on the island of St. Croix, near Calais, N. S., the Sieur de Monts had some wheat sown which flourished finely. In 1611 the first wheat appears to have been sown in Virginia. In 1626 samples of wheat grown in the Dutch colony at New Netherlands were shown in Holland. It is probable that wheat was sown in the Plymouth colony prior to 1629, though we find no record of it, and in 1629 wheat was carried to England to be used as seed. In 1718 it was introduced into the Valley of the Mississippi by the "Western Company." It was among the cultivated crops of the Indians Indians of the Gila Valley, Mexico.—*Millers' National Magazine.*

Perfect Success.

Those two words have a vast meaning when fully comprehended. A perfect success can be truthfully applied to Dr. Jones' Red Clover Tonic, which cures dyspepsia, biliousness, costiveness, all diseases of the kidneys, liver and bladder. It is a perfect tonic and blood purifier; it keeps the skin clear and bright, drives away pimples and makes the general health excellent. Price 50 cents of Baker and Hall.

OPTICIAN AND OCULIST!

Having just arrived from Germany, where he has spent 8 years in the Crown Hospital, would respectfully announce to the citizens of Tecumseh and vicinity that he has engaged rooms at the Lilley House, where he can be consulted at all hours in regard to diseases of the eye or ear.

A full assortment of the celebrated

Perfected Spectacles AND EYE GLASSES ON HAND.

Cataracts and all diseases of the Eye skillfully treated. Deafness in its worst stages cured.

No Charge for Examination.

ESTATE OF PETER R. ADAMS.

STATE OF MICHIGAN, County of Lenawee, ss. At a session of the Probate Court, for the County of Lenawee, holden at the Probate office, in the city of Adrian, on Wednesday, the 19th day of September, in the year one thousand eight hundred and eighty-three.

Present, Norman Geddes, Judge of Probate.

In the matter of the estate of Peter R. Adams, deceased.

On reading and filing the petition, duly verified, of Peter W. Adams, praying for the probate of an instrument now on file in this court, purporting to be the last will and testament of said deceased, and codicils thereto, and that administration of said estate may be granted to Marcus A. G. Packard, John Margeson, Solomon Crane and Gideon P. Perry, the executors in said will named.

Thereupon it is Ordered, That Monday, the 15th day of October next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs-at-law of said deceased, and all other persons interested in said estate, are required to appear at a session of said Court, then to be holden at the Probate office, in the City of Adrian, and show cause, if any there be, why the prayer of said Petitioner should not be granted.

And it is further ordered, That said Petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said County of Lenawee, for three successive weeks previous to said day of hearing.

NORMAN GEDDES, Judge of Probate.

THE "FISHING LINE."

TAKE THE

GRAND RAPIDS & INDIANA RAILROAD.

The only route to the Trout, Grayling and Black Bass Fisheries and the famous Summer Health and Game Resorts and Lakes of

Northern Michigan.

The waters of Grand Traverse Region and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

Brook Trout abound in the streams, and the famous American Grayling is found only in these waters.

The Trout Season begins May 1st, and ends September 1st. The Grayling Season opens June 1st and ends November 1st.

Black Bass, Pike, Pickerel, and Muskalonge also abound in large numbers in the many lakes and lakelets of this territory. The sportsman can readily send trophies of his skill to his friends or "Club" at home, as ice for packing fish can be had at nearly all points.

Take Your Family with You. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing.

The Climate is peculiarly beneficial to those suffering with Hay Fever and Asthmatic affections.

New Hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw city, forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit, Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns, and Fishing Tackle carried free at owner's risk. It is our aim to make Sportsmen feel "At Home" on this route. For Tourist Guide, a handsomely illustrated book of 164 pages free, Time Cards, Folders and further information address

Where Did Potatoes Come From?

Nobody knows positively where the potato came from originally. It has been found, apparently indigenous, in many parts of the world. Mr. Darwin, for instance, found it wild on the Chonos Archipelago. Sir W. J. Hooker says that it is common at Valparaiso, where it grows abundantly in the sandy hills near the sea. In Peru and other parts of South America it appears to be an home, and it is a noteworthy fact that Mr. Darwin should have noted it both in the humid forests of the Chonos Archipelago and among the Peruvian Andes, mountains, whose summits even then, and, all the year, capable of snow. It was in the mountains of Chili, Darwin says, not in Virginia, which was one indebted for its cultivation.

Humboldt who, seeing one with these, [illegible] and who speaks of potatoes as [illegible] large, says, perhaps, he [illegible] at the northern extremity of the Andes. Under the heading of "Roots" he [illegible] "Three roots, he says, are found, [illegible] large, as a walnut, others much larger. They grow on [illegible] rocks, nearly [illegible] gathered in [illegible] dried on fires. They are [illegible] of roasted."

At the [illegible] of the seventeenth century this root was planted, as a curiosity, in the gardens of the nobility [illegible] grew long ere it came into general use. Very hard, cold, to be [illegible] and [illegible] some, the allegation [illegible] no either. The potato is closely related to the deadly nightshade and the mandrake, and from its stems and leaves may be extracted a very powerful narcotic. In England, preparing agaiist it was for a long time very strong, especially among the poor.

How Chickens Get Out of Shells

Take an egg out of a nest on which a hen has sat for two weeks, carefully boiling it in the hot water, it appears you will find that the chick, which the little fellow is pecking to the inside of the shell, has by this time dried and the shell is forced outward in small scaly pieces, leaving a hole. Now if you shall have one of the eggs in the incubator then under the hen remove it to the table or other suitable place, put it in a box or basket, packing it warm and quiet, as near the temperature of the nest as you can, which may be done by laying in the bottom two bottles of warm water, cover the entire chicken or chicks, and say a blanket over the top of them, then you can sit or stand in comfortable attitude and witness the [illegible] opening. Now watch the little fellow work his way into the world, and you will be amused and instructed as I hope other [illegible]. After he has got his head out he will remove a peculiar membrane which has been of the chick always working to the right, if you have the large end of the egg from you, and the now upward, which he has worked his way through around any with one-half of an inch of it in a perfect circle, he then forces the cap of that end of the shell off and then has a chance to stretch his neck, and thereby lengthening his legs somewhat, and so by their help forcing the body from the shell.—*American Farm Journal.*

BOARD OF SUPERVISORS

The regular annual session of the Board of Supervisors convened at Adrian on Monday last. Sup. McComb, of Ogden, was elected chairman and the following standing committees were appointed:

Ways and Means—Hollridge, Freeman, Swaney.

ESTATE OF WILLIAM TAYLOR.

STATE OF MICHIGAN, County of Lenawee, ss.

At a session of the Probate Court for the County of Lenawee, holden at the Probate office, in the city of Adrian, on Friday, the 5th day of October, in the year one thousand eight hundred and eighty-three.

Present, Norman Geddes, Judge of Probate.

In the matter of the estate of William Taylor, an insane person.

On reading and filing the petition, of Charles C. Tefft, guardian of said insane person, praying for the allowance of his first guardian's account, now on file in this court.

Thereupon it is ordered, That Monday, the 5th day of November next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the next-of-kin of said ward and all other persons interested in said estate, are required to appear at a session of said court then to be holden at the Probate office, in the city of Adrian, and show cause if any there be, why the prayer of said petitioner should not be granted.

And it is further ordered, that said petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said county of Lenawee, for three successive weeks previous to said day of hearing. COULD NOT GO TO BED.

CHERRY TREE TOWNSHIP, March 30, 1883, Venango county, Pa.

I have been troubled with Rheumatism more or less for the past thirty years, so much so in the leg that I would have to lie down to get ease and at one time I could not go to bed, but was compelled to sit up all night. The affliction continued for five months. I was solicited to use Wilson's Rheumatic Remedy for Rheumatism, which made a perfect cure. I found it to act within certainty, and giving relief immediately. I used but one bottle and have not been afflicted since.

T. P. WILSON.

HERE WE ARE AGAIN.

The steady and continual work we gave the past season to our gigantic clearance sales left our Mammoth Clothing Establishment in proper shape for the reception of our

Fall and Winter Stock!

To say that we were astonished would not half tell the story. OUR TRADE ALMOST DOUBLED, our customers were more than pleased with the bargains we gave them, and we were highly gratified with the liberal patronage bestowed upon us, and this season we intended to serve them better than ever, with a continuance of the same.

BOYS' & CHILDREN'S CLOTHING.

We have just opened up and put in stock all the new shapes and Styles of Little Folks' Clothing among which may be found some pretty and attractive garments. Henceforth we shall carry a larger line of these goods than ever. Our trade in this Department has met with such a large increase that we can well afford to, and this increase of trade enables us to sell at

SMALLER MARGINS THAN EVER BEFORE.

With an increase of trade means a decrease of profit. Not only shall our prices be the lowest, but we will carry ten times as many goods as any other house in the city. Our Boys' and Children's department has become very popular, not only because it is fitted up with a view to accommodate our customers, but because the best makes, the prettiest styles and the most attractive assortment of this line of goods can always be found there.

Men's & Youths' Clothing!

We have selected the finest and most desirable goods for this department that were ever brought to the city; in fact the goods look so well as we open them up that we feel sure of selling them without much trouble. The reliable class of goods we handle, together with the uniformly low prices which are characteristic in our institution, are found to meet with public approbation. This department is crammed with new goods, ready for inspection and sale.

Gents' Fine Furnishings!

There is no more complete department of the kind in the state. We have just put in stock several cases of new goods, and are every day receiving fresh additions. It is filled to completion with all the latest styles in Gloves, Hosiery, Neckwear, Undershirts, Collars, Cuffs, Shirts, Handkerchiefs, Suspenders, &c., and everything at popular prices. We can guarantee to save you twenty five cents on every dollar you spend with us in this department.

Everybody is invited to examine our Stock whether they wish to buy or not.

It has 75 acres of plow land, 10 acres of well assorted timber, 20 acres of meadow, and 15 acres of pasture. There are two wells on the place and a brook of living water that never freezes over. A good apple orchard, a young peach orchard, and lots of small fruit. The location is an excellent one and the neighborhood is first-class. For further particulars call at the

HERALD OFFICE.

Rheumatine!

An Internal Remedy and a Sure Cure for all kinds of

Rheumatic Complaints!

Kidney Complaints

Give Rheumatine a fair trial. You will never regret having done so.

Testimonial from Mr. Thomas H. Day, of No. 8 [illegible] street, Chicago, who has been for many years employed by the Wagner Sleeping Car Co. and is now conductor of one of their cars running between New York and Chicago.

J. N. SUTHERLAND,
Manager Rheumatine Mfg. Co.
Niagara Falls.

CHICAGO, [illegible]

Dear Sir—It gives me pleasure to inform you of the benefit your rheumatic cure "Rheumatine" has been to my daughter, who for the past few years has been a great sufferer from Rheumatism at times being quite helpless. She took three (3) bottles of your preparation, and can bear testimony to the speedy action in affording her relief from pain and soreness. Thanks to Rheumatine her health is now quite restored.

Yours very truly,
THOS. H. DAY.

See our change of Testimonials every Daily Papers.

SPECIAL CORRESPONDENCE.

ADDISON ATOMS.

Cold weather has come again and with it the necessity of preparation.

A new Beatty organ is soon to be installed at the school building here.

Mr. Charles Elmore arrived home from Iowa last week. He will discipline the scholars of the Strong district during the winter.

The friends of the M. E. church propose to contributn to the perishable necessities of their pastor by a pound social next Thursday—a method of pounding somewhat out of the usual line in this village.

Nesmith, the new dry goods man, has a fine selection of first class goods and proposes to sell them cheap as the cheapest.

Where shall the depot be located? is a question over which more random speculating has been indulged in by our people than might be expected if a million dollar legacy were to be bequeathed to the winning side.

FARMERS' CLUB.

The Farmers' Club will held the first meeting of the season at J. W. Benedicts, Friday evening, Nov. 9.

PROGRAM.

Singing.
Select reading—Mrs. J. Gillespie.
Inst. and vocal music—Ellen Fisher and Lizzie Henderson.
Essay—F. V. Horton.
Dec.—Grant Schreder.
Music—Frank and Rhoda Benedict.
Question—Is it right for the people of Michigan to be taxed for the erection and support of such expensive and magnificent public institutions as the Reform School at Adrian and like institutions intended for penal purposes? Led by R. R. Hall, followed by J. Schreder.

How They Meet and Part.

A gentleman lately took down verbatim the conversation of two fashionable ladies during a morning call—viz: "How do you do, dear?" "Pretty well, thank you." (They kiss.) "How have you been this age?" Pretty well. How have you been?" "Very well, thank you." "Pleasant to-day." "Yes, very bright, but had a shower yesterday." "All your family quite well?" "Quite well, thanks. How is yours?" "Oh, very well thank you." "Have you seen Mary B. lately?" "No, but I have seen Susan C." "You don't say so! is she quite well?" "Yes, very well, I believe." (Rising.) "Must you go?" "Yes, indeed; I have seven calls to make." "Do call again soon." "Thank you; but you don't come near me once in age." "Oh, you shouldn't say so, dear; I'm sure I'm very good." "Good bye." "Good bye, dear."—*Exchange.*

"Gale Forest gives the following pat reply to the above:

"Yes! and after writing that the gentleman discovered the strain upon his mental faculties had been so severe, he went out to "brace up." Just as he reached his destination, met a friend from out of town, when the following conversation was overheard and taken down by the writer, as an example for women, of men's "wit and wisdom." "Hellow! old fellow, how are you?" (They shake) "First rate, how are you?" "Tip-top!" "When dy'e get in?" "Just now." "Have something?" significantly.) "Well—yes, don't care-fi-do." (They step into a saloon, after cautiously looking around, to make sure no outsiders are about; to see they are breaking their pledge—pause—they emerge, innocently wiping their mouths, before putting into them their lighted cigars, and being primed," resumed.) "How's yer folks?" "All well; how's yours?" "All flourishing now; youngest boy had diphtheria, but all right now." "Crops good up your way?" "Well, yes, pretty fair." How do politics look?" "Bad—very bad—all democrats up our way; big democratic majority. (Takes out his watch.) "Thunder! ten minutes to 12—must be off—got to see a man at 12." "Can't you come up to the house and take dinner?" "No, guess not to-day—got several pressing business engagements. Good bye." "Good bye." They again wring hands, and then rush away from each other as if fearing they might have to stand another treat

Canning Fruit.

In canning fruit it is wise to use a good deal of sugar. Plain canned fruit is apt to turn, and does not retain its flavor as when made a little rich. If our housekeepers would take as much pains in making preserves as the French do, they would find themselves amply rewarded when, in the winter, they turn out the beautiful clear fruit, always in perfect shape. To preserve fruit in the French method it is necessary to make a clear syrup first, which can be done by melting two pounds of the best sugar with a pint of water, using a white porcelain kettle; add the slightly beaten white of one egg before the syrup becomes hot; let it boil, and skim it until the scum ceases to appear. Then put in carefully selected fruit, a few at a time, watching carefully that they do not break, and removing one at a time as soon as they become soft. When these are put in glass jars and the syrup poured over them, the result will make glad the most stoical cook.

THE LAND OF FLOWERS.

SANFORD, FLA., Oct. 7, 1883.

EDITOR HERALD:

As I promised, I will write and give the readers of the HERALD a truthful account of Florida as I find it.

I left Tecumseh October 1st, on the morning train with thermometer at 6 o'clock A.M. standing at 32°. On reaching Toledo I bought a ticket to Jacksonville for $31.40, got my trunk checked through, and taking the C. H. & D. road at 11 A.M. (weather clear, ther. 60°) arrived in Cincinnati at 8 P.M., was rushed across to the Cincinnati Southern depot, and left at 9 P.M. (weather a little damp.) Took a sleeper after paying $2. The coach, by the way, was very nice and runs clear, through to Jacksonville. At 5:30 I awoke and lifted the curtain at my drawing room window and the first thing that my eye fell upon was a high mountain, the top of which was in a fog. While trying to decide in my mind what kind of trees they were upon the mountain side, which I concluded were of pine, oak, maple, ash, etc., we darted into a tunnel, and I counted 40 seconds before I saw daylight again, and during 15 minutes we passed through four of them. I could not tell where I was, but it was not far from Chattanooga for we arrived there at 8 A.M. The soil here is red when found among the rocks.

We crossed the Tennessee river which was broad and deep, after which we could see Lookout Mountain, which we left on our right and passed over an old battle ground. At Allatoona we saw a large peach orchard, also at Chicamauga. Some of the trees were still full of fruit. But a few miles out of Atlanta did we find good land, but very rough from Calhoun to Atlanta with one long tunnel through the mountain. Acres of cotton in this section is entirely worthless. All dried up on account of but little rain. From Atlanta, Ga., to Macon cotton is better, but a general complaint of a failure in the crop. We saw many picking and hauling bales to market, the weight of which is 450 to 500 pounds and worth $50. Soil all through Georgia is of that same red appearance. At Macon 8 P.M we again took the sleeper, and at 7 A.M. crossed the St. Mary river and then we were in Florida. At this point and all the way to Jacksonville nothing but flat pine land with white sand. About 8 A.M. we took a street car for the boat landing on the St. John's river, where for the first time in 24 hours could we breath free on account of heat and dust. At Macon, Ga., the heat was almost unbearable, many of the inhabitants there complained of the heat, and said that no time this summer has it been worse. (Ther. 92 at noon.) We had a grand opportunity of looking about Jacksonville, seeing its streets of white sand and beautiful shade made by live oak, orange and other trees unknown to me. Jacksonville has quite a thrifty, prosperous look, judging from the appearance of business on the streets. Persons that are fitting up hotels say that the rush has commenced earlier this season than usual, stores renting for from $30 to $40 per month. At 3:30 we started up the river for Sanford, fare $6. The St. Johns River has more the appearance of a bay than a river, as the effects of the tide is noticable 60 miles from the ocean and brackish water found as high up as 70 miles, so I was informed by the captain of the boat. The river appeared to me to be from 2 to 4 miles wide up as far as Lake George, which point we reached about midnight. At noon, next day we landed at Sanford, Orange Co., Fla., 200 miles by river from Jacksonville. In my next letter I will give a description of Sanford and the surrounding country. The orange crop is good.

E. HAUSE.

Copp's U. S. Salary List and Civil Service Rules. Our many readers will welcome the solid information contained in the 160 pages of this recently issued book. It is prepared by Henry N. Copp, a lawyer of Washington, D. C. All the Government salaries are given from President Arthur's $50,000 to postmasters with $500, officials of the Treasury, Interior, War and Navy Departments, Custom Houses, post offices, and fully 20,000 federal offices arranged by States and Territories. Specimen examination questions for admittance to the Civil Service throughout the country are added. The price of the book is only 35 cents.

Gen. Sherman is fond of the drama, and he thinks that he might have been a good actor. The New York Herald suggests he is no means too old to begin. He would make a delightful Little Eva or Fanchon.

MICHIGAN STATE ITEMS.

Elk Rapids now has a telephone exchange.

Battle Creek's telephone list now numbers 84.

The locked out cigarmakers are rapidly deserting Coldwater.

A lodge of knights of labor is to be organized at St. Ignace.

The new union passenger depot at South Lyon is nearly finished.

Diphtheria has appeared near Galesburg.

Big Rapids is moving for the erection of a Mecosta county court house.

The Wright House at Alma built at a cost of $75,000 was opened last week.

They make grindstones at Tyne, Huron county.

Nine divorce cases in the Washtenaw Circuit Court calendar at Ann Arbor.

There have been 46 stores and dwellings erected in Bad Axe since the first of last April.

Parties from Battle Creek will go into cheese making on a large scale at Owosso.

Charles Snyder, a young man at Evart, cut an artery in his foot with an axe last week.

The next meeting of the State board of education will be held at Ypsilanti on the 22d inst.

Mrs. Postmaster Adams and Mrs. Town, of Galesburg, thrown from a carriage and badly injured.

On the 29th inst. the Somerville school at St. Clair will celebrate the fourth anniversary of its institution.

The Mecosta county supervisors offer $500 reward for the arrest of the parties who set fire to their poor house.

S. S. Smith, of Bay City, has been appointed deputy salt inspector for the St. Clair district, and will live at Marine City.

The Estey manufacturing company and Woodard Bros., both of Owosso, build large four-story additions to their works.

The Messrs. Thompson have purchased land at the mouth of Pine river, St. Clair, and will begin boring for salt in a few days.

The Bay View association will buy the dock, build the new reservoir and otherwise increase the blessedness of its camp grounds.

There were less fevers, consumption, whooping cough and cholera morbus in Michigan last month than during any September for several years.

Presque Isle county was organized in 1871, it has an area of 756 square miles, and the population in 1880 was 3,113.

A citizen of Elba, Lapeer county, sues the township because his horses got mired in an alleged road in the township.

A 20-horse power water wheel at Alma became so clogged with eels that it was necessary to stop and remove them.

It is said that a woman from a western town who recently visited some of the gilt-edged families of Grand Rapids took away with her $700 won at playing poker while there

The tower on the new Episcopal church at Saginaw is 185 feet high, and is surmounted by a cross 11 feet high. It makes, for its size, one of the handsomest towers in Northern Michigan.

Joseph H. Carter, a 15-year-old boy, of Ann Arbor was sent to the Reform school last week for horse stealing. He had been out on suspended sentence, and threatened to burn his employer's barn.

A petition has been made for probating the will of the late R. A. Beal, of Ann Arbor, whose estate is variously estimated at from $250,000 to $300,000. He has appointed as executors his wife and adopted son, J. E. Beal.

Shiploads of hemlock bark are landed at Chicago, to be used in the manufacture of beer. So says the Times. "It is not poisonous but reddish and bitter." It comes from Michigan, it is alleged, and it is the bark that makes the beer so dog-goned bitter.

The "Jesse James" gang of boys at Jackson will have the satisfaction of imitating Frank James in one respect—imprisonment—although a Michigan reform school may be a better place than a Kentucky prison, and the boys may not have quite as many distinguished visitors.

The wife of Sheriff Ellis prevented an escape from the Monroe jail last week. A horse thief had wrenched a bar of iron from a closet door, with which he had made daylight through the wall, a murderer keeping watch in the meantime. Mrs. Ellis sent to the court house for her husband, and he promptly ironed them.

GUILT.

Only a beam of indignant eyes,
Only a gesture of pained surprise,
Only a sting from a tongue stung
Stronger as its lies, and wilder was its lie.

Only a mention and end crime
Lurking for some unsuspected time
Only a tear on a ringless hand,
For the giver gone to a foreign land.

Only a ship by the sea waves swept,
Only a man with hands silly crossed,
Who looked and saw the ship go down
While a mother wept for her boys now gone.

Only an aching pain in his heart,
For the cruel words that made them part
Longing with his whole soul to clasp
Lovers by her side as in days of yore.

Only anguish of a deep, pale face,
Dressed and grayed in the mourning garb
Crape signed for the dead, but hard to bear
Every a prayer to be forgiven.

Only a silence in the mother's home,
Only a vacant place empty
Only a chair of the fingers who
Only a child—and God was all.

A MAIL-CARRIER'S EXPERIENCE.

A great while ago—long before the late war—there was a young man who carried the mail between Madison and Macon, Georgia. His name was George Lovic. He had his wits and was quite well educated—had an eye for a good story—and liked a joke. To say Bob Lovic was a verity is the truth of a statement which was certainly to his credit and moreover he was a student in the day and could have been entertained with actual gold or, conversed diamonds. Morally he was not so bad a fellow with Bob. Morally he was very well for an unsophisticated man. He was passionately fond of—great particular! in the eyes of pretty little Wesley who otherwise esteemed him perfection. He had almost humanized with a certain class of persons who term themselves free thinkers.

The theological difference at last led to a little quarrel, and Bob tried to get Annie out of the mind but failed to do it, and Annie was very miserable, as well for the sake of Bob's soul as for herself; for, though she had offers in plenty, not one—not even rich Peter Grab, who had ever so many acres of land—could be compared for a moment in her mind to Bob. Bob had Bob's proper resentments.

So though they kept apart for a whole month, at last one bright morning, as Bob rode away, sighed and sympathized for him, he saw a thing under a tree a little figure in a huge dress that he couldn't pass to save his life. So he stopped his horse and called out:

"Annie is that you?"

"Yes Bob," said Annie, throwing a pair of wet eyes. "I came here on purpose to see you. I've talked in my poor weak, womanish words but you talk so much better than I that of course it's of no use, and all the while there is one who talks so plainly to you and the words are here, and I've brought them to you and please, dear Bob to read them and perhaps—

She did not finish the sentence, but placed a pretty Bible in Bob's hand.

"I've had it bound very nicely for you, and oh! for my sake read it—it will teach you so much, Bob—so very much."

Bob took the book. For a moment he was annoyed and felt like sneering, but Annie was very dear to him, so he kept the anger down for her sake, thanked her for her present and placed it in the breast pocket of his coat.

"As if I were to be converted like a sinner in a tract," said Bob, after he had reflected a little. "But women are not expected to have minds like ours." And out of another pocket he pulled an infidel tract which a friend an unbelieving doctor had loaned him and fell to reading.

It was not a very wise thing, as the event proved, for the horse, left to himself, mounted over something in the road and was lamed, not badly, it seemed, but sufficiently to be dangerous and stop at a country store to examine and bathe the limb, and then he had to allow the beast to take his own time afterward, so that instead of trotting briskly into Macon before sundown the young man found himself benighted on a lonely road hours after the sun had quite vanished—his horse growing lame and his hopes of supper quite gone.

"Hang the tract," growled Bob, "what did I bother with it for?" And he gave the paper a toss into a clump of bushes, and then his mind went back to Annie Wesley's Bible.

He felt for it. It was safe. He wished that he was somehow better and he walked along with the Bible over his arm in quite a melancholy mood.

Suddenly a shadow fell across the road. Bob looked up. Straight before him sat a mounted man with a black mask on his face and a pistol in his hand.

"Halt!" commanded the individual, ferociously; and Bob halted. "If you are quiet, you will come to no harm," said the man. "I only want your mail bag. I happen to know that it is worth something to-night, and I've followed you from the store back yonder. There ain't a soul within hearing, and you may as well take it coolly, I am armed you see, you are not. Hand over the bag."

"Never!" exclaimed Bob. "The mail-bag is in my care—entrusted; I'll guard it as long as I have breath in my body."

"That won't be long," with a coarse laugh, "if you don't listen to reason."

Bob, for reply, mounted his horse and sat behind the mail-bag.

"Your life is in danger," warned the robber. "I intend to have those letters, and a life isn't worth much to me. I'm in earnest; no fooling," and he took deliberate aim at Bob Lovic's breast.

Bob was unarmed, and he loved life dearly, but he was no coward. It was useless to try to overcome the robber. He had only his fists—rather useless weapons under the circumstances; but he "showed fight," and as the robber's anger kindled he fired. The aim was good. The little ball of lead lodged in Bob's coat, just where his heart should have been, and Bob staggered.

He was shocked rather than hurt; and in that moment of excitement he remembered having heard that it was often so in mortal injuries. Probably he had received his death wound, and the robber would walk off with the mail-bag, where Bob, well knew reposed the money which energetic Dick Dorr had sent to take his poor old mother from the alms-house, and other trusts were in that leather bag—the humble hopes and dreams of those who wrote the letters twined around them.

The doctor and his infidel tract had done Bob Lovic little good; but he was honest and kindly yet.

"I'll fight while I have a drop of blood left," he said to himself. "And help may come and the mail bag be saved, even if I die."

He leaped from his horse and sprang upon the highwayman with such vigor that the man tumbled from his saddle. Then Bob struggled for the pistol, and getting it, knocked the ruffian senseless with the butt end, and sat down on his bosom to keep guard, expecting to die every moment, but praying that help might come before the robber regained consciousness.

About that time a party of young men, who were out on a coon hunt, came up with flaring torches, and a score of dogs at their heels. They all knew Bob well, and the most zealous were for dispatching the robber; but the wiser of the majority were for bending him and carrying him to the city, to stand his reward at the hands of justice, and with this plan Bob agreed. He felt weak and he leaned on them, and he expected every moment to feel the touchless of death stealing over him. He knew, was the round hole just over his heart, and the bullet must be somewhere. A few unpleasant sensations, which gave rise to his opinions of the future, were not so fixed as they might have been, perhaps, but he signed a letter as the new company gathered him.

"The bullet went in here," he said, touching the hole. "I don't feel any pain, and must be bleeding internally of as fine a stream."

He entertained the chief continually and got dropped Annie Wesley's Bible with the bullet freely imbedded in its cover.

The worst came to Bob's eyes and the others stared, for he had been in the habit of boasting of his infidel opinions and was old enough that he should wear a Bible next to his heart. But every one was too glad to find him robust to care for much else and so they gave three cheers and started toward the city with their prisoner.

Bob followed, leading his horse, and keeping his eye on the mail-bag and on the way he thought—what he thought may be dressed from the fact that six months after Annie Wesley found her lover by her side at church, and heard from his own lips that he had not half so high an opinion of his own smartness and that of his doctor friend as formerly, and he believed she was right after all.

And so they were married, and for many years have been living very contentedly on their little cottage on the outskirts of Madison.

The American Eagle.

There are several varieties of eagles in the United states, but not all that are commonly called by different names are entitled to the separate distinction. The largest is Audubon's "Bird of Washington," or Washington Eagle, a huge bird that has apparently been seen by few persons but the great naturalist himself, and which inhabits the region of the Great Lakes and the Upper Mississippi. Its spread of wings is over ten feet. It rarely comes to New England; but Dr. Wood, the Connecticut ornithologist, in his "Birds of Connecticut," describes one that was caught in a steel trap on the East Windsor meadows, just after a Connecticut river freshet had left thousands of dead fish on land. On these he was feasting, in company with two "Bald Eagles," whom he greatly surpassed in size. He was killed as was supposed, after being caught, by a blow on the head with a club; but he recovered on being thrown upon the grass and flew away. He was nearly four feet long, and his spread of wings was ten feet. The "national bird" of our country is the so-called improperly so-called Bald Eagle—a bird whose head is as well supplied, proportionately, with feathers as any part of his body; but on the head these are white while the rest of the bird, except the neck and tail, is quite dark. The female (who is always the largest in birds of prey) often measures three feet four inches in length, with a stretch of wings between seven and eight feet. It is incorrectly described in our cyclopedias as the largest of the fishing or sea eagles. To my notions of Audubon's great bird there is in Greenland and in some parts of Europe a sea eagle a little larger than the bald species. The bald eagle not uncommon here, builds on cliffs and great trees a nest of coarse sticks, which is used by the same pair, if undisturbed for very many years; they will live to the age of 120 or 140 years, and in this latitude they lay their eggs after the middle of January, and hatch out about the middle of February. The diversity of color between the young and the adult occasions mistakes in naming them, and leads to the idea that they are "sea eagles," "black eagles," "gray eagles," etc. Doctor Franklin objected to the adoption of the eagle as our national bird, because of its predatory habits, and suggested the turkey instead. The golden eagle (which may be the kind that was shot near Riverton, and if so, it is a rare and valuable bird for ornithologists) is seldom seen in Connecticut. It is a magnificent bird, belonging in Europe as well as the United States; is about as large as the bald eagle, and derives its name from the golden-red feathers on its head and neck—the rest of its plumage is a rich, dark brown. It lives about the Great Lakes, the Upper Mississippi, and to a less extent among the White and Green Mountains of New Hampshire and Vermont. There are about seventy species of eagles and even of those in America we cannot give all the names and varieties. A dark eagle, not quite so large as the bald, is common in Connecticut. One ferocious kind, found in Mexico and on the Isthmus, is the harpy eagle. The osprey is improperly classed among the true eagles.

What Has It Done for You?

The sceptical Mr. Bradlaugh was once lecturing in a village in the north of England and at the close challenged discussion. Who should accept the challenge but an old bent woman, in the most antiquated attire, who went up to the lecturer and said: "Sir, I have a question to put to you." "Well my good woman, what is it?" "Ten years ago," she said, "I was left a widow, with eight children unprovided for, and nothing to call my own but this Bible. By its direction, and looking up to God for strength, I have been enabled to feed myself and family. I am now tottering to the grave, but I am perfectly happy, because I look forward to a life of immortality with Jesus in heaven. That's what my religion has done for me. What has your way of thinking done for you?" "Well, my good lady," rejoined the lecturer, "I don't want to disturb your comfort; but"—"Oh! that's not the question," interposed the woman; "keep to the point, sir. What has your way of thinking done for you?" The infidel endeavored to shirk the matter again, the feeling of the meeting gave vent in uproarious applause, and Mr. Bradlaugh had to go away discomfitted by an old woman.—*The Lutheran.*

Neuralgia and Sick Headache.

In Aurora, Ill., lives Mrs. Wm. Henson. She says: "Samaritan Nervine cured me of neuralgia, vertigo and sick headache."

Origin of Popular Phrases.

VAMOSE.—A Mexican phrase—an adaptation of the Spanish vaya—meaning literally, "let us go."

TAFFY.—This word, which is now used as a vulgar synonym of flattery, is by no means of recent origin, as many suppose, but was really coined 200 years ago, and has been in use in London ever that period.

BOSH.—This term, which is extensively used in the United States and England to designate the person placed as overseer of workmen and working women, is an importation on the Dutch word bosh, meaning, employer.

BOYCOTT.—An Englishman—the originator of "Boycotting," the name of a forger who "operated" somewhat extensively across the water about thirty odd years ago. He passed false bankers and mercantile bills to the amount of many thousand dollars, and leaves the word "boycott" as applied to which ever is false and fraudulent.

A DEAD STICK, A MOCKERY AND A SHAM.—The fact that this thoughtful saying has been in a certain Editorial ring has sometimes led to its being quoted as from one or other of the Hebrew prophets, the words are, instead, an extract from the judgment of Lord Ivenmax, of the English house of lords, on the appeal of Daniel O'Connell to that body from the verdict rendered in his case.

RED TAPE.—An English expression originated by Carlyle and made popular by Dickens. It was designed to represent the ceremonious delays and official formalities characteristic of the British governmental routine. It is similarly used in this country to designate the tardiness with which everything is effected by the formalism of government officials. The expression arises from the fact that government officers generally tie up their bundles of paper with red tape.

CANTEEN.—This is, perhaps, the only word in our language which, originally passed into a foreign tongue and was afterward taken back in a modified form. As originally spoken by the Swiss, it was simply a tin can; but the Gaul, as is his wont, placing the noun before the adjective, and pronouncing the letter e as a, brought it out as cantee, pronounced canteen. Adopting a thousand other French terms, the obtuse Englishman took back his own original word in a new shape without any inquiries on the subject, and hence we now say canteen instead of tin can.

TO THE MANOR BORN.—This phrase, strictly construed, has perhaps a meaning. It is a form of expression that defines the privilege or position of an heir on whom is entailed some landed estate, the manor of a wealthy or noble family. But has it any authority to be used, as we frequently see it, as a technical or proverbial saying? Probably not. It is not a phrase known in law to define the legal status; and it is not a question of proverbial significance from any of our classic writers. It is apparently a perverted reading of the following passage in Shakespeare:

Horatio—Is it a custom?
Hamlet—Aye, marry is it;
But to my mind—though I am a native here,
And to the manor born—it is a custom
More honored in the breach than the observance. —Hamlet, Act 1, Scene 4.

OLD HARRY.—The popular attributes of the evil one are a human form with horns, tail and cloven foot. There are probably derived from the representations of the Greek satyrs, and the Roman fauns—the wild gods of the mountains and groves; and it is probable that the name Old Harry was originally Old Hairy. The satyrs were said to have hair like goats; and "hayre," or "harie," in old English, signified a garment made of goat's hair.

On this supposition Old Harry or Old Hairy would have some affinity to Old Shock, a popular English name given to the demon that was supposed to haunt roadsides and wild pathways. Shock is a head of rough hair, a rough-haired dog. The evil one is sometimes called "the Lord Harry," a title perhaps given derisively; or it may allude to the Scripture term, "the god of this world," the prince of the powers of darkness.

"FIRE AWAY, FLANAGAN.—Cromwell having marched his army southward, came to a castle garrisoned by some rebels, under command of a Flanagan, who sent Cromwell a violent philippic, ending with an order to quit the place, or he would open his cannon on the English forces. Cromwell returned the note, with his reply written in the corner of the missive: "Fire away, Flanagan." The laconic reply so frightened the redoubtable Flanagan that he fled without firing a shot.

TOO UTTER, TOO VERY, ETC.—This just now popular and novel style of slang, originated in the London Punch, and was to ridicule the pretentions of the very exquisite pretenders to art and aesthetic culture, whom that paper also travesties in pictures. It was first employed to satirize in pictures and verbal jests one Oscar Wilde, a young poet in London, who is greatly given to affectation, such as parading the street with a white lily in his hand, and writing very extravagant verses. The phraseology of Punch is copied by writers who want to indicate that anything is very pretentiously aesthetic or artistic.

Magnetic Storms

Remembering the influence which the sun has been found to exercise upon the magnetic needle, the question will naturally arise, has the sun anything to do with magnetic storms? We have clear evidence that he has. On the 1st of September, 1869, Messrs. Carrington and Hodgson were observing the sun, one at Oxford and the other in London. Their scrutiny was directed to certain large spots which at that time marked the sun's face. Suddenly a bright light was seen by each observer to break out on the sun's surface and to travel, slowly in appearance, but in reality at the rate of about 7,000 miles in a minute, across a part of the solar disk. Now it was found afterward that the self-registering magnetic instruments at Kew had made at that instant a strongly-marked jerk. It was learned at that moment a magnetic storm prevailed at the West Indies, in South America, and in Australia. The signal-men in the telegraph stations at Washington and Philadelphia received strong electric shocks; the pen of Bain's telegraph was followed by a flame of fire; and in Norway the telegraphic machinery was set on fire. At night great auroras were seen in both hemispheres. It is impossible not to connect these startling magnetic indications with the remarkable appearance observed on the sun's disk.—*Prof Proctor.*

People of sedentary habits, and all who are subject to constipation, can keep in good condition, by a moderate use of Ayer's Pills,—the surest, safest and most reliable Cathartic.

How Watch Cases are Made.

A plate of SOLID GOLD 14 2-10 karats fine is soldered on each side of a plate of hard nickel composition metal, and the three are then passed between polished steel rollers. From this plate the various parts of the case—backs, centers, bezels, etc. are cut and shaped by dies and formers. The gold is thick enough to admit of all kinds of chasing, engraving, and engine-turning. The composition metal gives it needed *strength, stiffness* and *rigidity*, while the written guarantee of the manufacturers warranting each case to wear *twenty* years proves that it contains *all* the gold that can possibly be needed. This guarantee is given from *actual results*, as many of these cases have been worn perfectly smooth by years of use without wearing through the gold.

DUBUQUE, IA., Dec. 14, 1880.
I have used one of your James Boss' Gold Watch Cases for seventeen years. I bought it second-hand and know of its having been used before I got it, but do not know how long. It looks good for ten years longer. Did not suspect it was a filled case until informed by a jeweler a short time since. I most cheerfully recommend your cases to be all they are represented to be, and more.
O. MCCHARNEY, Dep. Col. Int. Rev. 1st Dis. Iowa.

Send 2 cent stamp to Keystone Watch Case Factories, Philadelphia, Pa., for handsome Illustrated Pamphlet showing how James Boss' and Keystone Watch Cases are made.

SAMARITAN NERVINE

NEVER FAILS.

THE GREAT

NERVE CONQUEROR

The only known specific for Epileptic Fits. Also for Spasms and Falling Sickness. Nervous Weakness quickly relieved and cured. Equalled by none in delirium of fever. Neutralizes germs of disease and sickness. Cures pimples and stubborn blood sores. Cleanses blood, quickens sluggish circulation. Eliminates Boils, Carbuncles and Scalds. Permanently and promptly cures paralysis. Yes, it is a charming and healthful Aperient. Kills Scrofula and King's Evil, twin brothers. Changes bad breath to good, removing cause. Routs biliousness and clears complexion. Charming resolvent and matchless laxative. It drives Sick Headache like the wind. Contains no drastic cathartic or opiates. Promptly cures Rheumatism by routing it. Restores life-giving properties to the blood. Is guaranteed to cure all nervous disorders. Reliable when all opiates fail. Refreshes the mind and invigorates the body. Cures dyspepsia or money refunded. Endorsed in writing by over fifty thousand Leading physicians in U. S. and Europe. Leading clergymen in U. S. and Europe. Diseases of the blood own it a conqueror. For sale by all leading druggists. $1.50.

The Dr. S. A. Richmond Med. Co., Props.,
St. Joseph, Mo. (12)

B.B.B.

KING OF THE BLOOD.

The Most Thorough Purifier of the Blood Yet Discovered.

Cures all Humors, from a Common Eruption to the worst Scrofula.

It purifies the Blood.
It invigorates the Liver.
It regulates the Bowels.
It strengthens the stomach.
It gives vivacity in place of lassitude; cheerfulness in place of gloom, and robust vigor in place of debility.

Dyspepsia, Biliousness, Disordered Liver, Constipation, Nervous Affections, General Debility, in short all the numerous diseases and discomforts caused by impure blood are speedily conquered by this powerful corrector, the chief and sovereign of all ancient or modern medical discoveries—KING OF THE BLOOD.

Its name is its best description as it is a royal dispenser of the blessings of health and vanquishes the foes that lurk in the blood.

It banishes PIMPLES, SALT RHEUM, SCALY ERUPTIONS, ULCERS, SCALD HEAD, FEVER SORES, and all SCROFULOUS DISORDERS.

It checks CONSUMPTION in its early stages. It has frequently cured it when advanced.

It disperses TUMORS and CANCERS without the surgeon's knife.

It cures DROPSY, general or partial.

It cures FEMALE WEAKNESS and DISEASE.

It reduces in a safe and effectual manner all swellings, external or internal.

It eradicates the effects of Venerial Disease and Mineral Poisons, and establishes a sound constitution.

Many certificates, much further information and full directions for using, will be found in the pamphlet, "Treatise on Diseases of the Blood," in which each bottle is enclosed.

Price $1 per bottle containing 12 ounces, or 50 doses. Sold by dealers in medicine.

If your druggist does not happen to have it on hand, request him to order a supply of it for you, as it will be cheaper than for you to order direct of us, and less trouble.

Mailed on receipt of price. *Hop Plaster Co.*, Proprietors and Manufacturers, Boston, Mass.

HOP PLASTER

Coated tongue, bad breath, sour stomach and liver disease cured by Hawley's Stomach and Liver Pills, 25 cts.

EAU MIGH!

There was a young girl from Bordeaux
With corns on her little pink toeaux,
They gave her such pain
The tears ran like rain
Down the bridge of her delicate neaux.

Her lover—a youth from Cologne—
Fled wildly and left her alogne.
When he found that her feet
With corns were replete,
With never a word he had flogne.

They sent for a doctor from Lyons,
A shining and neat as a pyns,
He looked at her teaux,
The source of her weaux,
And indulged in a gratified gryns.

He prescribed for this maid from Bordeaux
And cured all her little pink teaux,
And now, it is said,
They, too, will be wuld,
And from sorrow and grief find reposeaux.

The sweet-scented youth from Cologne
Who left her severely alogne,
When he first heard the news
His mind he did lews,
And jilted from life with a groigne.

Franklin as a Writer.

His pen was as ready as his purse in the service of all human kindness. And what a pen it was! It could discourse metaphysics so clearly and lucidly as to make them seem plain moralizing. It could tear a sophism to pieces by a mere query. It could make a simple tale read like a subtile argument. He could be grave and he could be gay in a breath. He could spend as much wit and humor on a "Craven Street Gazette"—which was meant only to amuse an old landlady, away from home, and probably out of joint before her return from Rochester—as on a State paper designed to fire America and sting England. In another tone, he translates into human language, for the amusement of a court lady, the reflections, in the garden of her house, of a gray-headed ephemera, full seven hours old, on the vanity of all things. His "Petition of the Left Hand," might have been composed by Addison. In it, the left hand bewails the partiality which educates the right hand exclusively. Some of Franklin's fables and tales have been so absorbed into the thought of the world that their source is absolutely forgotten. Only in this way can we account for what was doubtless an unconscious plagiarism by an eminent sanitary authority, last year, of Franklin's "Economical project for Diminishing the cost of Light." The economy consisted simply in rising at six o'clock instead of nine or ten. Ideas such as Franklin's never become superannuated. Not every one who uses the expression, "to pay dear for one's whistle," knows that the dear whistle was a purchase made by Franklin, when seven years old, with a pocketful of pence. Franklin's store was too abundant for him to mind, though some of his fame went astray. "You know," he tells his daughter, "everything makes me recollect some story." But it was not recollection so much as fancy. His fancy touched every idea in circumstances. When the illustration had served its turn, he was indifferent what became of it. Franklin did injustice to himself when he fancied he wanted any such mechanical aid. His English had been learned from the "Pilgrim's Progress," and the "Spectator." It had the force of Bunyan without his ruggedness. It had the serene light of Addison with tenfold his raciness and vigor. It sparkled with sarcasms as cutting as Voltaire's, but all sweetened with humanity. Many of his inventions or adaptions—such as "colonize"—have been stamped, long since, as current English. But he did not covet the fame of an inventor, whether in language, in morals, or in politics. In language, he was even declared a foe to innovation. Writing to Noah Webster, in 1789, he protests against the new verbs "notice," "advocate," and "progress." He had as little ambition to be classic as to be an innovator in English. He wrote because he had something at the moment to say, with a view to procuring that something should at the moment be done.—*Edinburgh Review.*

Roman Remains in London.

Modern London is built on the debris of the London of the times of Julius Cæsar and Agricola, and it is by no means infrequently that 1800-year old relics of the Roman town are found many feet below the surface of the existing streets. There was a rich find recently in the vicinity of Warwick Square at the depth of nineteen feet. The most interesting relic that came to light was hitherto unknown coin, of the the year 50, which lay alongside of about a dozen urns containing the products of cremation. Just think of the pangs which dying would have afflicted on those ancients if they had known that their ashes would have been seen and handled by an unknown race eighteen centuries and a half, nearly, after their demise! The most aristocratic urn was of glass and fifteen inches high. Well executed leaden pots inclosed several of these depositories, and roofing tiles the rest. The use of lead, as well as of tin, by the way, has great antiquity in Britain. Herodotus speaks of the production of tin there. Emblems of more or less significance touching the future state appeared on some of the receptacles. Along with the coin of the year 50 were others of dates between 40 and 300. But the Romans left something besides these useless things to be remembered by. They introduced into Great Britain its chestnut, walnut, peach, pear and cherry trees.

We All Believe

That it is a long lane that has no turning; that many a shaft at random sent, finds a mark the archer little meant; that no remedy sold will cure coughs, colds, croup, whooping cough and all throat and lung troubles so quickly nor permanently as Dr. Bigelow's Positive cure; that our druggists, Baker and Hall, are very generous to give trial bottles of this remedy free of charge.

The story is told of an old hunter in Michigan who lost his way in the woods a number of times while the country was new. At length he secured a pocket compass and its use was explained to him by a friend. But shortly afterward he lost his way again and lay out as usual. When found he was asked why he did not travel by the compass. He did not dare, he said. He wanted to go north, and he "tried to make the thing point north, but it wasn't no use, 'twould shake, shake, shake round and point southeast every time.

Put Upon His Feet.

"Set up in bed and coughed till the clothing was wet with perspiration.—My wife insisted that I use Thomas' Eclectric Oil. The first teaspoonful relieved me, and two bottles have cured me. I can honestly recommend it." E. H. Perkins, Creek Centre, N. Y.

An Editor's Reflections.

The editor of the *Lockport Phœnix* is responsible for the following. Who has not thought in about the same strain? And in our sober moments too:

Every once in a while something or other occurs which brings up before us feelings of other days; we are solemn—we indulge in retrospection and dream of "what might have been." And, while in the mood, other serious thoughts succeed, one to another, and we are prone to reflect on such sayings of the proverb-makers as "An hour once lost is gone forever," "What is past can never be recalled," etc., and we speculate as to the future even so much as to wish to raise the impenetrable veil that divides our life here, from the shadowy realms beyond and know the mysteries that lie hidden there.

When we come to think seriously on the subject, what a confoundedly strange thing life is! What peculiar mysteries we ourselves are that we cannot even "know ourselves." And yet one thing is pretty certain, viz, that each and every one of us can say with a very comfortable degree of assurance "I am," although a good number of our great and shining lights have expressed themselves doubtful of even that.

Suppose sometime, you or ourself, friend reader, should wake up and find we were somewhere else and learn that this earthly existence had been all "in our mind," as slang parlance hath expressed it. It would be strange would it not? And yet a dream seems even as real as this sometimes. But enough of conjecture such as this. We will take it for granted that all things ARE. There is room enough for guesswork left after that.

Not very long ago, you and the rest of us were babies, nothing but squalling, ugly looking little chunks of incipient humanity. We have ceased to be such, and can never be babies any more. Let us be thankful.

From babies in long clothes, as we grew older, we graduated, some into petticoats and some into breeches. We became school children. That was an epoch in our existence which we probably will never forget. What good times we used to have. How we played together; how we quarreled; how the breeches and petticoats fell in love with each other and then fell out again. We can recollect how we felt the first time we fell a victim to the tender passion. For a long time we worshipped at a distance, but when we found that our feelings were reciprocated we seemed to walk on air; and when we found an opportunity to perform the first osculation of our life—Gosh—but words are inadequate to express what feelings the operation gave rise to. We've got a lock of her hair yet, but she is married now, and to some other fellow. With some slight modifications this has probably been the experience of the majority. But those halcyon days are a thing of the past. As someone once remarked—How *tempus* does *fugit*, and right here perhaps it would be appropriate to quote Shakespeare:

"This world, you know
Is a fleeting show,
And thus it is that round we go—
Sometimes above, sometimes below
Like horses in a circus."

Perhaps the immortal William never wrote those words; in fact there is some doubt expressed as to whether W. S. was himself or somebody else. But the sentiment is good, and his "shade" need not get "upon its ear" because we have imputed it to him.

But here we are—men and women—and what the past has been we may as well relegate to some comfortable little nook in our memory and—drop it. What the future is to be we ourselves must decide, for are we not "the architects of our own fortune?" The best way to do it is perhaps, to

"Trust no future howe'er pleasant,
Let the dead past bury its dead:
But act—act in the living present,
Heart within and God o'erhead."

Let us then be up and doing
With a heart for any fate.
Still achieving, still pursuing,
Learn to labor and to wait."

Nothing Like It.

No medicine has ever been known so effectual in the cure of all those diseases arising from an impure condition of the blood as Scovill's Sarsaparilla or Blood and Liver Syrup the Universal Remedy for the cure of Scrofula, White Swellings, Rheumatism, Pimples, Blotches, Eruptions, Venereal Sores and diseases, Consumption, Groitre, Boils, Cancers and all kindred diseases. It purifies the system, brings color to the cheeks and restores the sufferer to a normal condition of health and vigor.

It is asserted that the ordinary cosmetics used by ladies are productive of great mischief. We believe this is so, and that a better means of securing a beautiful complexion is to use some good blood medicine like Scovill's Sarsaparilla or Blood and Liver Syrup which cleanses the blood and gives permanent beauty to the skin.

Visiting---Hired Girls.

Once on a time I went to spend the afternoon with a neighbor friend, and my visit turned out nothing but apologies, with now and then something said between. She said she had put off baking on account of some sewing she wanted to finish, and thought she would bake in the afternoon. She had to chase the hens and search the barn to get some eggs to bake a cake, as the day before she had sent all she had to market. And then all her wood was out doors in the rain and snow, and was slow to burn; consequently the cake got sad before it was baked. Her knives and forks she had laid aside in the morning; they then had to be scoured, and then as soon as it got a little dusk she thought of her lamp, which had to take its share, etc. But, farmer sisters, here let me say that if ever I am found in such a fix, I will make the best of it, and let visitors eat the same as I do, and try to visit one-half the time any way. I think the better way is to do all necessary work in the morning, and let sewing go until afternoon, as nine-tenths of the visiting people would rather have their chat and partake of a cup of good, hot coffee, and plain bread and butter, than to have nick-nacks.

I always have thought that housewives needed help just as much as the men, and think so yet. Let a man get in a hurry and his first thought is, hire a man to help him out, and it is all right. And how many are the times that his worked-down wife is hurried and worried and no help ever thought of for her; and if she should speak of hiring a girl at two dollars, or one and a half a week, the man will say "This girl business counts up like Sam Hill." All this time he keeps his man week in and week out, costing him from five to six dollars a week, and only works from sun to sun, while a girl works from sun until sun at night.—*Genina Bedot*

The Hop Plaster will cure Back Ache, and all other pains instantly.—25 cts. only, at druggists.

How to Beautify a Home.

Almost everybody knows what a relief to the eyes a little spray of green is in the winter. The wealthy can indulge in expensive conservatories, but those of moderate circumstances, even the very poor, can secure a pretty object at a small expense by following the directions. To begin with, an acorn, which any urchin can procure in the woods, and a pickle jar, which any housekeeper can supply. Procure a fine healthy acorn and crochet around it a little network cap. Take off the cup first and leave a loop of the cotton to hang the acorn point downward in the glass. The glass must have so much water in it that the tip of the acorn scarcely touches; keep it in a dark closet until it has sprouted, and then put it in the light. A chestnut thus kept in water will sprout the same way. A hyacinth bulb will grow luxuriantly, and may be trained around walls and pictures. A carrot grown in sand is a well made, a highly ornamental object. A good sized and healthy root must be selected, cut off quite evenly the top of the carrot and place it on top of a saucer full of sand, so that the leaves look as if they spring from it. Moisten it well and keep it in the dark until it has begun to sprout, be careful to keep it damp, and move it into the light directly the leaves appear. If the cultivation is successful, an ornament pretty enough for any room will be the result, and which will have to the unacquainted the appearance of a pot of ferns. Another experiment may be made with a turnip, which must be as sound as possible. Clean the outside, taking care not to injure the part from whence the leaves spring. Cut a piece of the bottom and scoop out the inside, so that you have a a hollow cap; fasten string or wire to it, so that it can be hung up. Fill the cavity and keep it filled with water. In a short time the leaves will begin to sprout, and will curl up around the ball of the turnip, forming a pretty little hanging basket. Children can be made to interest themselves in such experiments, which will be found an easy method of inculating taste and refinement; besides, each and all point out their own botanical lesson, and much is to be learned by careful and patient observation and experiment.

Never Give Up.

If you are suffering with low and depressed spirits, loss of appetite, general debility, disordered blood, weak constitution, headache, or any disease of a bilious nature, by all means procure a bottle of Electric Bitters. You will be surprised to see the rapid improvement that will follow; you will be inspired with new life; strength and activity will return; pain and misery will cease, and henceforth you will rejoice in the praise of Electric Bitters. Fifty cents a bottle.

Sold by C. A. Wright & Co.

Pedigree of Maud S.

The remarkable trotting speed of a mile in 2:10¼, made by Mr. W. H. Vanderbilt's six-year old mare Maud S., at the Chicago Trotting Park, leads one naturally to look into the character of her ancestors, in order to account for her wonderful performance. Her sire was Harold (son of Rysdik's Hambletonian and Enchantress by old Abdallah. Her dam was Helen Russel by Pilot, son of Pacing Pilot; her third dam was Maria Russel, by Thornton's Rattler.) It will thus be seen that Maud S. is from fast stock and a good record might be expected of her. Her legs and feet are faultless in form, and apparently of a quality that will stand up under any amount of use; and judging from her actions on the track, she is as faultless in disposition as in conformation. This simply shows that breeding will tell, and that there is a great deal in pedigree, if made with some definite end in view. Like produces like.

"Home Sweet Home."

This song is very good in its way, but is there any sickness in the homestead? If so, home cannot be always pleasant. We take especial pleasure in recommending Burdock Blood Bitters, a bona fide and certain cure for dyspepsia, and all diseases of the liver and kidneys.

Location of New School-Houses.

Select a site that is accessible to fresh air and sunlight; those facing to the West and South are the most desirable. 2. See that the location is elevated; not low and damp. 3. If in a city, ascertain whether the building is on natural or "made" soil. The latter is very unhealthy. 4. Have as much open ground around the school-house as possible. A school-house with a yard however small is much more pleasant than one without a yard; and have a garden if possible. 5. Ascertain with a certainty that the drainage is good. 6. Observe whether there are any bodies of stagnant water, or other contaminating influences near, and whether the prevailing direction of the wind will carry unwholesome vapors to the school-house. 7. Never choose a location so thickly surrounded with trees that the sun can never penetrate the rooms. Such places are very unhealthy. 8. Be sure that the water supply is abundant and pure in every respect.

Bucklen's Arnica Salve.

The greatest medical wonder of the world. Warranted to speedily cure Burns, Bruises, Cuts, Ulcers, Salt Rheum, Fever Sores, Cancers, Piles; Chilblains, Corns, Tetter, Chapped Hands, and all skin eruptions, guaranteed to cure in every instance or money refunded. 25 cents per box.

Sold by C. A. Wright & Co.

Daughters, Wives and Mothers.

We emphatically guarantee Dr. Marchisi's Catholicon a Female Remedy, to cure Female Diseases, such as Ovarian troubles, inflamation and ulceration, falling and displacement or bearing down feeling, irregularities, barrenness, change of life, leucorrhœa, besides many weaknesses springing from the above, like headache, bloating, spinal weakness, sleeplessness, nervous debility, palpitation of the heart, &c. No cure, no pay. For sale by druggists. Prices $1 and $1.50 per bottle. Send to Dr. J. B. Marchisi, Utica, N. Y., pamphlet free. For sale by Waldo & Doty.

Positive Cure for Piles.

To the people of this county we would say we have been given the agency of Dr. Marchisi's Italian Pile Ointment—emphatically guaranteed to cure or money refunded—Internal, external, blind, bleeding or itching piles. Price 50 cents a box. No cure, no pay. For sale by Waldo & Doty, druggists.

VACATION RAMBLES.

The Town of St. Ignace—A Boat Ride on the "City of Grand Rapids."

After a delightful ride of thirty minutes the Algomah struck the wharf at St Ignace. This is the jumping off place on the North shore. The city is the terminus of the D. M. & M. railroad and since the opening of that road, which extends into the heart of the Northern peninsula, it has had a wonderful growth. There is a strange blending of the old and the new to be seen here. St. Ignace was a French missionary post as long ago as 1670.—In 1671 Father Marquette settled here and the "Huron fort" was built. A little church was built later near the fort, which was protected by a palisade "inclosure." In this church Father Marquette's remains were interred in the month of June, 1677. This church was burned in 1706, but there is no doubt as to the site which it occupied. The remains of an Indian village on the South shore are still to be seen, and a few old block shanties on the principal street. As I leaned over a dilapidated picket fence and gazed upon the clump of burdocks which shaded Father Marquette's tomb strange thoughts flitted through my brain. How were the funeral ceremonies conducted? Did the military company take charge? Did the masons and odd fellows turn out? Why should the burdock have been chosen for a tombstone, in preference to the fragrant hollyhock or the æsthetic sunflower? But then, Marquette's funeral was attended two hundred and six years ago. It is doubtful whether there was a regular undertaker in the city at that time. The Vermont granite quarries had not been discovered, and white bronze was unknown in Marquette's time. Italian marble was in the market then, but Italian artists monopolized the stock to carve Cupids and Venuses out of. Perhaps Marquette's body reposes as quietly in its resting place as though a Washington monument had been erected over his grave, but that does not relieve the patriotic citizens of St. Ignace from the obligation to honor the old missionary's memory after the fashion of modern times. Every city of any consequence has a monument in these latter days, and St. Ignace is honored with a historical subject from which some Rogers could mould a colossal white bronze statue large enough to serve as a light house from Lake Huron to Lake Michigan. If St. Ignace knows herself she thinks she does. Marquette's grave will be decorated with a monument at no distant day. Side by side with the relics of antiquity stand the hasty structures of western civilization. An ore dock, costing $300,000, is within a stone's throw of the old catholic church yard. Block houses one hundred years of age, and beer saloons less than twelve months old, are almost locked in each other's embrace. The principal street is about three miles in length, the big lumber mills standing guard at the northern end of this thoroughfare, the Martel iron furnace at the southern extremity, and the mammoth ore dock about midway between. These three enterprises constitute the "big sights" of the city, and they are all worthy of a day's visit and a lengthy description. The street is laid out on the shore of the bay, following the natural contour, and has a striking resemblance to a double-bow knot. The business houses have nearly all been erected within the past two years, and new ones are shooting up every month as if by magic. St. Ignace already boasts of three newspapers. The Republican, which supports the politics of the same name, the Free Press, democratic, and the News, independent. They are all red-hot enterprising sheets and ably reflect the go-ahead-a-tiveness of the town. The Free Press has ordered a new cylinder-press, and the News is now running a semi-weekly edition. St. Ignace in her own estimation is the favored child of destiny, and judging from a half day's survey of the town I am inclined to regard the claim as well founded. Before the close of the present decade the city will be the metropolis of the upper peninsula. The country in the rear of town is not yet "out of the woods," although it is rapidly developing.—Hunting is a favorite sport in that section. At Mackinaw sportsmen angle for big fish; above St. Ignace they hunt for big game. Deer are plenty and bears are quite often captured.—Circuses never strike this town. Good little boys worry through a miserable existence without seeing Barnum's aggregation or Forepaugh's combination. But hunters from the back woods visit the city and exhibit trained bears. Among the Indian population bear meat is a legal tender and debts are paid with live bears.—When the citizens wish to raise money to start a brass band they organize a hunt, capture a lot of bears and peddle them off at auction. When a church wants a new bell or some pulpit chairs or a communion set, the ladies social will issue a hundred tickets at one dollar each and get up a raffle for a live bear. When the ladies wish to start a library they take subscriptions in bears and issue certificates of bear stock. At the last raffle the lucky ticket was held by the minister's ten years old boy, and the lad couldn't have been more elated if he had drawn a mustang pony or a bicycle. When a base ball nine is short a man in a match game they fill the vacant place with a live bear. Bears make excellent field men, for they grab everything within reach and hang on. But these good times cannot last forever. The woodman's ax and the gang saw are rapidly driving Bruin into the last ditch, and the day is not far distant when the juvenile heart of St. Ignace will be no longer gladdened by the hug of a live bear.

I put up at the Bay View House, which is located near the depot. I arranged to leave at five o'clock the following morning on the "City of Grand Rapids" for Petoskey, and upon retiring left instructions with the clerk to be called at 4:30. I awoke the next morning and looking at my time repeater found it was then half past five. I hastily dressed myself and glided down stairs. Not a creature was stirring, not even a mouse. With grip sack in hand I "lit out" and made for the dock. Upon arriving there I found the steamer had gone. While deliberating what to do the hotel clerk came up, pretty well blown, and kindly offered to carry my satchel. He took it, and then suggested that he would carefully take charge of it until I recovered my self possession and settled for two meals and a lodging at the Bay View House. This was too much. Even the hackman on Mackinac Island never accused me of financial forgetfulness. I cast a withering glance upon the young man and politely asked him if his mother knew he was out. He allowed that she did and that the old lady herself had sent him to look up "that little bill." One dollar and fifty cents recovered my satchel from pawn and I skipped to another dock and took the Algomah, which was just starting on her morning trip to the Island and Mackinaw City. I bade a sad farewell to St. Ignace, hoping to visit the city again some day under more favorable auspices.—Upon arriving at the Island I found the City of Grand Rapids moored at another dock. She had gone down to Cheboygan the night before on a special trip and just arrived at Mackinac on the return. She usually stops over night at St. Ignace. Here was my chance after all to take the contemplated steamboat ride to Petoskey. I left the Algomah and started for the other dock, but before reaching it the "Grand Rapids" hauled in her cables and put on steam. At that moment I struck Alvinza Whelan.—His lungs were good and with his aid I signalled the departing steamer.—She hove to and I was soon safely on board with my luggage. The first man I met on deck was O. P. Bills.—He had changed his plans the night before and concluded to take the trip to Harbor Springs by water. Cols. Church and Saviers and Mr. Bills have a summer cottage at Harbor Point and Mr. Bills wished to leave his canoe there for winter quarters.—That half day's ride was a delightful one. The air was cool and bracing. A few sun clouds were flitting across the sky. The gentle north-west breeze was more invigorating than a whisky sling. The thug, thug of the engine was a better narcotic than the best Havana. The boat carried a light load and a full head of steam and her bow parted the liquid mass like a hot butcher knife traveling through a roll of butter. We halted at Cross Village, a small settlement above Little Traverse Bay, and our next stop was at Harbor Springs. Here Mr. Bills took his leave, and as the steamer turned into the bay I could see him vigorously paddling for the "Point" in his birch bark canoe. At two P. M. the steamer halted at Petoskey. I chartered an express boy to carry my satchel up town and was soon registered at the "Occidental."—This is one of the best, among the many good hotels at Petoskey. Here Trackmaster Corbus, of the Lake Shore road, puts up when he takes his annual sneezing excursion. He had left for home only three days before my arrival. A. J. Sinclair, of Adrian, State Agent of the Home Ins. Co., registered at the Occidental the day before and I soon found him. We easily recognized each other, exchanged the Odd Fellows' grip, each found out what the other was about, and we agreed to take a fishing trip to Pickerel lake on the following day.

THE FATHER OF FISH-CULTURE.

Seth Green's Ideas about the Finny Tribe and Some of His Varied Experiences.

(Turf, Field and Farm.)

"How did you ever come to devise the scheme?"

"I have been working at it ever since I was large enough to bend a pin."

The above remark was addressed to Mr. Seth Green, the veteran fish culturist, who is known to the entire world, and his reply indicates the extent of his labors.

"When I was quite young," he continued, "I would lie on the limbs of trees that reached out over the water entire afternoons watching the movements of the fish and studying their habits. In this way I discovered many characteristics which were before unknown. I saw, as every observer must see, the destructive elements that are warring against fish, and I realized that unless something was done, the life in the streams of this country would become extinct. To counteract this disastrous end became my life work, and I am happy to say that I have seen its accomplishment."

"Were you successful on the start?"

"No, indeed. Up to that time all artificial attempts to hatch and raise fish from the spawn had failed, and I was compelled to experiment in an entirely new manner. The work was a careful and tedious one, but I finally succeeded, and to-day I am able to hatch and raise fully seventy five per cent of all spawn."

"Enormous. Why that is a larger percentage than either the vegetable or animal kingdoms produce in a natural condition."

"I know it, but we exercise the greatest care in the start, and guard the little fellows until they become able to care for themselves."

The foregoing conversation occurred at Caledonia where the representative of this paper was paying a visit to the state fish hatcheries. It has been his privilege to report very many interesting sights within the past twenty five years, but the view presented here exceeds in interest anything ever before attempted.

"How many fish are there in those ponds, Mr. Green?"

"As we have never attempted to count them it will be impossible to say. They extend way up into the millions though. We shipped over three millions out of the ponds this year and there seemed to be as many afterwards as before. We have nearly every variety of the trout family and many hybrids."

"You speak of hybrids, Mr. Green. What do you mean by that?"

"I have experimented for years in crossing the breed of the various fish and am still working upon it. We cross the female salmon trout with the male brook trout, and thus produce a hybrid. Then we cross the hybrid with the brook trout which gives us three-quarter brook trout and one-quarter salmon trout. This makes one of the finest fishes in the world. He has all the habits of the brook trout, lives in both streams and lakes, develops vermillion spots on his sides, rises readily to a fly, is far more vigorous and fully one-third larger than ordinary brook trout of the same age. The possibilities of development in the fish world are great and we are rapidly ascertaining what they are."

As the man of news watched the countenance of Mr. Green while he was giving the above account, he could not but feel that he was in the presence of one of the few investigators, who from a rich and life-long experience, bring great benefit to the world. Let the reader imagine a strong and stalwart frame, surmounted by a head strongly resembling that of Socrates, and covered with a white silky beard and luxurant gray hair. Seth Green, the father of fish culture, is a picture of health, and the reporter could not help remarking so.

"If you had seen me the last winter and spring, young man you might have thought differently, said the veteran.

"How is that? One would think, to look at you, that sickness was something of which you knew nothing.

"And so it was until last winter. I went down into Florida in the fall to see what kind of fish they had in that state and study their habits, and was attacked with malaria in its severest form, and when I came home I realized for the first time in my life that I was sick. My symptoms were terrible. I had dull, aching pains in my head, limbs and around my back. My appetite was wholly gone, and I felt a lack of energy, such as I had often heard described but had never experienced. Any one who has ever had a severe attack of malaria can appreciate my condition. I went to bed and remained there all the spring, and if there ever was a sick man I was the one."

"It seems hardly possible. How did you come to recover so completely?"

"My brother, who had been afflicted by a severe kidney trouble and threatened with Bright's disease was completely cured by a remedy in which I had great confidence. I therefore tried the same remedy for my malaria and am happy to say I am a well man to-day and through the instrumentality of Warner's Safe Cure which I believe to be one of the most valuable of medicines. Indeed, I see it is endorsed by the United States medical college of New York, and that Dr. Gunn, dean of that institution, has written a long article concerning its value."

"And are you now as well as formerly?"

"Apparently so. I keep the remedy on hand all the while though and do not hesitate to recommend it to others."

"One question more. How many ponds of fish have you here and how are they divided?"

"Well we have 43 ponds which are divided up as follows: 22 ponds of brook trout, 2 ponds of salmon trout, 4 of McCloud river or rainbow trout, 2 ponds of German trout, 3 of California mountain trout, 2 ponds of hybrids, 4 of one-quarter salmon and three-quarters brook trout, 2 ponds of gold fish and 1 pond of Carp. Then we have what we call the centennial pond or 'happy family,' consisting of crosses of different fish, including Kennebec salmon, Land Locked salmon, California salmon, brook trout, salmon trout and hybrids. These fish range in size from minnows to 18-pounders, and in age from one and a half months to eleven years. I forgot to say also that we have a 'hospital' pond, which is entirely empty, which speaks pretty well for a community of many millions. Indeed the whole secret of fish culture can be summed up in four things. Impregnation,—using no water. Plenty of food. Plenty of pure water and cleanliness."

The numerous fish exhibitions which are taking place in all parts of Europe and the unusual interest which is being manifested in this subject throughout the world all owe their origin to the process above described as originated and conducted by Seth Green. It is certainly cause for congratulation to every American that this country produces so many men whose genius brings value to the world, and it is proof positive of the greatest merit that a remedy even with such high standing as Warner's Safe Cure is known to have should be so strongly endorsed, and recommended by one so reputable and reliable as Seth Green.

IMPORTANT.

When you visit or travel New York City, save Baggage, Expressage and Carriage hire, and stop at the Grand Union Hotel opposite Grand Central Depot.

Elegant rooms, fitted up at a cost of one million dollars, reduced to $1 and upwards per day. European plan. Elevator. Restaurant supplied with the best. Horse cars, stages and elevated railroad to all depots. Families can live better for less money at the Grand Union Hotel than at any other first-class hotel in the city.

Your Teeth with pearls will surely vie,
If "Teabberry" you only try.
Once used, you ne'er will be without it,
Just try one bottle if you doubt it.

IN A FEW WORDS.

We do not claim that Zopesa will cure everything, but as a liver regulator, and when the stomach and organs need invigorating to healthy action in case of weak digestion it will cure. For habitual costiveness which affects the whole system and the head to a degree that unfits one for work, Zopesa acts certainly, quickly and pleasantly. Those trying it the first time are surprised how quickly it relieves the whole system: a single dose relieves.

JAMES E. DAVIS & CO.,
Wholesale Agents, Detroit, Mich.

SCROFULA.

A remedy that can destroy the germs of scrofula, and when once settled has the power to root it out, must be appreciated by those afflicted. The remarkable cures of young children and the more wonderful cures of those of middle age and late in life, as illustrated by our painted testimonials, prove Hood's Sarsaparilla to be a reliable remedy, containing remedial agents which do positively cure scrofula and eradicate it from the blood.

Warner, N. H., Jan. 21, 1879.
Messrs. C. I. Hood & Co., Lowell, Mass.:
Gentlemen—For ten years previous to the early part of 1877 I had been a constant sufferer from scrofulous ulcers or sores, which had finally reduced me to a helpless condition, as described in my letter to you in September of that year. The continued excellent health which enables me to keep house for my aged father and to enjoy life, keeps alive my intense personal interest in Hood's Sarsaparilla, and I cannot refrain from expressing my gratitude for the permanent cure this wonderful medicine effected in my case nearly two years ago, while living in Lowell, when all my physicians gave me up as being in an incurable condition. One thing before I close. I have recommended your Sarsaparilla to hundreds, and I think more than a thousand cases, and my faith in its invincibility in curing scrofula has become absolute by the wonderful cures it has effected aside from my own. I trust you will not be slow in making the merits of Hood's Sarsaparilla known everywhere, for it is a duty you owe to mankind. With best wishes I remain very truly yours,
Sarah C. Whittier.

HOOD'S SARSAPARILLA

Is a skilfully-prepared compound, concentrated extract, *by a process peculiarly our own*, of the best remedies of the vegetable kingdom known to medical science as alteratives, blood-purifiers, diuretics, and tonics.

Sold by all druggists. Price $1, or six for $5. C. I. HOOD & CO., Lowell, Mass.

$500,000.00

THE WAYNE COUNTY SAVINGS BANK,

at DETROIT, MICHIGAN, has on hand the above amount to invest in bonds, issued by cities, counties, towns and school districts of Michigan.

Officers and officials of municipalities authorized to issue Bonds will find it to their interest to confer with this institution before disposing of same.

One Door West of Anderson's Dry Goods Store.

SPECIAL NOTICES.

A GOOD BOY wanted to do chores for his board and go to school, or work for low wages. Enquire at the HERALD OFFICE.

CHOICE MERINO RAMS for sale. Wilson & Osborn have returned from western New York and brought with them a few choice rearling rams, and they will sell them at reasonable prices. All who would wish to see some good select rams would do well to call at Henry Wilson's place. All are selected from among the finest flocks in western N. Y.

NOTICE. My wife, Harriett I. Kelley, having left my bed and board without just cause or provocation, all persons are hereby forbidden to harbor or trust her on my account, as I shall pay no debts of her contracting after this date.
MACON, October 12th, 1883.

FARM FOR SALE. I offer my farm in Raisin for sale. It contains 240 acres, has good buildings and fences and is nearly all improved. It has the name of being one of the best farms in Raisin township. For price and terms enquire on the premises. JOSHUA TAYLOR.

HAIRDRESSING. I am now prepared to do all kinds of hairdressing, combing, etc., at reasonable rates. MRS. C. HAWKINS, Rooms over H. H. Anderson's grocery store.

SCHOOL TEACHERS. Parties wishing to engage a gentleman or lady teacher for the winter term of school, call on or address BROWN, The Photographer, Tecumseh, Mich.

FOR SALE. A good parlor wood stove. Enquire of BROWN, The Photographer.

A SCHOOL TEACHER of experience desires a situation for the winter term in a country school near Tecumseh. Address HERALD OFFICE.

TAKE NOTICE. Tom. Aiken is in the market to buy hides, pelts and furs, butter, eggs and poultry. He also wants a quantity of potatoes. High cash prices paid. Call at Jas. Lowry's and see me before selling. Don't forget. THOS. AIKEN.

FOR SALE. A good pair heavy work mules. Inquire of GEO. HOLLOWAY, Holloway, Mich.

FOR SALE. A house and lot situated within ten minutes walk of the P. O. at a bargain if sold at once. Inquire at the HERALD OFFICE.

FOR SALE. My farm of seventy acres, situated northeast of the village of Tecumseh, about ¼ of a mile from the postoffice. Said farm is all improved and in good condition, with two houses and two barns. Also a large apple orchard containing 945 trees, and other small fruit. Will leave 21 acres of wheat in the ground. RUFUS ADAMS.

PIANO FOR SALE OR RENT. Apply at Mrs. Geo. S. Tiffany's, Chicago st.

FOR SALE CHEAP. A good property on Railroad st., opposite Slayton's warehouse. Has a dwelling house thereon and a vacant lot for building purposes. Will be sold at a bargain. Enquire at the HERALD OFFICE.

Paste and diamonds this evening.

Miss Bertha Maltbie, of Cataraugus, N. Y., who has been visiting relatives and friends here during the summer, returned home last Tuesday.

Miss Libbie B. Helm has been in Jackson for the past year acting as nurse. She was called here in September to take care of a patient and has concluded to remain in Tecumseh for a few months. She has the reputation of being an excellent nurse.—Any one desiring the services of such can address Miss L. B. Helm, Box 12, Tecumseh, Mich.

Electrical Review: The telephone is one of the greatest of economizers of errand boy and shoe leather in general. Business got along without the telephone when it didn't know the telephone, just as it got on without the telegraph, the railway and the steamboat before these came in. But with every new invention facilitating exchange and traffic, there is more business, more satisfactory and comfortable business and a better bringing of the world together.

Foremost among household magazines is Demorest's Monthly, which for utility, variety, and artistic excellence cannot be surpassed. The November number compares very favorably with its predecessors, and is replete with interesting and useful information, the illustrated portion being all that could be desired. We are promised in the December number the first chapters of a fine serial story by Mrs. Champney, author of "Three Vassar Girls," and other novels.

Read Blosser's last fish story: "Manchester has long been noted for her pretty girls, modest young men, poor side walks and lack of street lamps; and now it is with pride that we call attention to the fact that an extra smart feline is to be added to the list. For a long time it has been observed that a certain cat would take its position near the river back of the Enterprise office, and after watching intently for a time would make a dive and invariably haul out a fish. This may sound "cat-fishy" but its the solemn truth nevertheless."

Among the fine dwelling houses which have gone up in Tecumseh within the past year one of the best is John Hialey's which is now about completed. It is situated on his old lot upon the west side of Pearl street, between Pottawatamie and Kilbuck. It is a square two story house, with a wing in the rear. The main portion contains a hall extending through the middle with two large rooms on each side connected by folding doors. The rooms on the south side of the hall will be used as double parlors and those on the north side as a family room and dining room. The wing contains kitchen, pantry and wash-room, and a rear stairway. A splendid cellar is placed beneath the wing. The inside finish is plaster "hard finish" and the casing and doors are all of pine and ash finished with hard oil and varnish which presents an elegant appearance. The exterior is painted a dark drab, two shades, which blend harmoniously together. Mr. Hialey will be nicely fixed when he moves in which will be within a few days.

THE TECUMSEH HERALD.

TECUMSEH, MICH., OCT. 18, 1883.

LOCAL AND PERSONAL.

Sheriff Bidwell was in town last Tuesday.

This Thursday, Oct. 18, will pass as a rainy day.

A postoffice has been established at Lenawee Junction.

Mrs. Henry Smith and Mrs. E. Hand have been visiting friends in Toledo for the past few days.

Excursionists who went to Chicago last week to see the exposition returned disappointed. Jay-Eye-See did not trot.

Soldier's widows are entitled to a copy of the book, "Michigan in the War." Write to Mrs. H. A. Tenney, state librarian at Lansing.

Massachusetts is suffering from such a drought that water for family use is sold by the barrel. Ben Butler is probably the cause of it.

Mrs. R. E. Lee who has been visiting her sister Mrs. E. Hand, of this village for the past month, returned to her home at Rome, N. Y., last Monday.

The Jackson County Lodge I. O. G. T. were entertained by the Brooklyn Lodge on the 6th inst. in a very hospitable manner. About 150 delegates were provided with dinner and supper.

Slayton & Kinney the furniture men have rented Bidwell's corner and are now off buying a very large nice stock of furniture to put in it. See their ad. this week about reduced prices.

Morenci Observer: Goodremont's apple drying establishment commenced last Tuesday, and owing to the general scarcity of the crop only a moderate business will be done this season.

Ohio is never at peace. Before the election the Democratic leaders were in a quarrel over the anticipated spoils of victory. Since the election the Republican leaders are in a quarrel over the question, who did it?

At a recent election of the graduating class of the Detroit Medical College, Jno. B. Haynes, of this village was elected treasurer of the class for ensuing year. It is a good selection and John will take good care of the funds.

Miss Ida Davis, who has been the guest of Judge Stacy's family, at Adrian, during the past week, went to Ypsilanti Monday. She will leave in a few days with her mother for New York City, where they expect to remain during the winter.

Adrian Record: A Tecumseh man has just been presented with an elegant new family bible. Gradually the gospel is being spread in the benighted parts of the land.

Yes, different communities have different ways of spreading the gospel. Adrian takes hers in Salvation Army pills.

There will be a special communication of Tecumseh Lodge, No. 69, F. & A. M., on Friday evening, Oct. 26th, for work in the M. M. degree. A full attendance of the members is requested. By order of

P. J. FARLEY, W.M.

J. R. HIALBY, Sec.

P. W. Adams and wife started yesterday morning for their Deleware home. Mrs. P. R. Adams will accompany them and will probably remain there through the winter. Mr. and Mrs. Shull, of Lansing, have moved to Tecumseh and will occupy the old home this winter.

We called upon District Manager Mason at his telephone rooms in Adrian the other day and found him well fixed. He has his new state line plug board in operation now which he finds a very great convenience.—He says the new line to Morenci is working like a charm.

A writer in the Scientific American gives the following recipe for chucking woodchucks under the sod: After they had retired for winter quarters, and the ground had been deeply frozen, he chose a cold night and shut up all the holes with earth, pressing it down so that the entrance and exit were hermetically sealed, excluding the air. With all their strength they could not dig out of their prison, and died as in the "black hole of Calcutta;" not one came out alive. This plan is better than a bounty or "drowning out." It might be well for people in this vicinity to try his plan the coming winter.

Peterson's Magazine for November is already on our table, a splendid number, with a perfect galaxy of steel engravings, colored fashion plates, colored patterns for the work table, tales, poetry, etc. We do not see how any lady can get along without this charming monthly. With this number appears the prospectus for 1884.—It promises better things than ever; and "Peterson" always keeps his promises. The terms are only two dollars per year. To clubs it is cheaper still. Subscribe to no magazine until you have seen a copy of 'Peterson.' Specimens are sent gratis, if written for, to persons wishing to get up clubs. Address Charles J. Peterson, 306 Chestnut St., Philadelphia, Pa.

Mattie Vickers to-night.

The apple crop is very easily gathered this fall.

Read what Alva Parker has to say on the 8th page.

Blissfield will have a series of club parties this winter.

Tecumseh is shipping cabbages to Adrian by the car load.

The nights are growing longer and the weather is growing stronger.

The Universalist State Convention was in session last week at Detroit.

Keep your houses well locked, as burglars are roaming about the county.

People who visit the Opera House to-night can depend on seeing a good play.

Supervisor James is in Adrian this week attending the sessions of the county board.

An Adrian druggist lately sold a man morphine in the place of quinine which was ordered.

The Detroit Art Loan will close Nov. 1st. It is well worth taking a trip to Detroit to see.

Wilson & Osborn have a fine lot of merino rams for sale. See their notice in another column.

Elijah Wilson has taken the contract for building the "porcupine" bridge in Clinton for $485.

Thos. Conlin threshed 1005 bushels of oats for Chas. A. Pawson, of Franklin in 5½ hours. How is that?

A scheme is on foot to establish a permanent Art Gallery in Detroit. It will require an outlay of $1,000,000.

The county pioneer meeting was held at Fairfield yesterday. We shall be able to present a report of the doings in our next issue.

Col. Wm. Humphrey, ex-warden of the prison at Jackson has bought an interest in the Adrian Brick and Tile Co., and will move to the latter city.

The Baptist State Convention has closed. Rev. C. E. Conley has returned and will occupy his pulpit next Sunday, both morning and evening.

A little fellow went into a Chelsea drug store last week and asked for three bars of "baptist" soap. The clerk satisfied his wants by giving him Babbit's soap.

Miss Eva Clement has gone on a visit to Fredonia, N. Y., to recuperate her health before resuming her position in the telephone exchange office in this village.

We understand that a certain traveling man, whose name is Beatty, refers to Tecumseh as the suburbs of Adrian. Perhaps our merchants will look this matter up a little.

Adrian Record: The editor of the Clinton News claims to have dieted on fresh-picked ripe strawberries on the 6th of October. There is need of another revival in Clinton.

H. Brewer & Co. will soon commence the building of a large addition to their foundry. The present building is entirely too small to accommodate their increasing business.

Dr. Snyder, who has been at Hillsdale on the sick list, has returned to Tecumseh and would be pleased to see all who are in need of dental work at his rooms over Strong & McNair's.

Deerfield Record: It took two or three hours' time, the other day, two doses of strychnine, a boy with a five-shooter revolver and a man with a double-barrel shot-gun to kill one dog.

The young people's social club of Dist. No. 5, Clinton township, will hold a box social on Friday evening, Oct. 26th, at the residence of John Schreder. All are cordially invited to attend.

At the Baptist convention Rev. C. E. Conley was elected Secretary of the Board of Foreign Missions. This places the Foreign Mission work of Michigan among the Baptists under his supervision.

We call the attention of our readers to the new advertisement of Mrs. M. A. Freeman on 8th page. She has an elegant new stock of goods and the best of help to put them together.—Give her a call.

Will H. Aten, who has been attending medical college at Brooklyn, N. Y., has just secured a position for one year in the Homœopathic hospital on Ward's Island. Will is in luck, and his many friends here will be glad to hear the good news about him.

Program for Macon Grange, Friday, Oct. 26, (open meeting.)

Address—A. H. Briggs, Adrian.
Quartette—Miss Julia Easlick.
Song—Frank Aten.
Instrumental—Miss Hattie Osgood, Mrs. Fred Miller.
Other literary exercises.

The night watch association held a meeting last Monday evening and a committee, consisting of Lilley, McNair and Hosmer was appointed to circulate a subscription paper to raise an increased salary for the night watchman. It is impossible to procure a first-class man for the wages now paid. The committee have made a canvass and met with good success. They are now taking a vote from the subscribers to ascertain what applicant is preferred.

Richelieu at the opera house last Friday night was fearful and the music was worse.

Mr. Anson Brown, who two years ago left Rome, N.Y., to settle in Wisner, Nebraska, has decided to make Tecumseh his home.

The last rail was laid on the M. & O. road on Tuesday afternoon at five o'clock, when a connection was made with the Toledo & Ann Arbor road at Dundee. The ballasting will now be pushed as rapidly as possible, and regular trains will be running at an early day.

We made a little business trip to Monroe Tuesday and stopped over night with W. H. Sink. Sink keeps just as good a hotel as he ever did, and the climate down at Monroe seems to agree with him first rate. He treated us like a king and sent us home with a pair of fine ducks of his own shooting.

CLEARING OUT THE RAISIN.

Last Monday a petition signed by three freeholders each from Monroe and Lenawee counties, as well as by some hundred or so other freeholders of said counties, was presented to the judge of probate, requesting him to appoint a special commissioner to straighten, clean out, widen and deepen the river Raisin from the junction of its two branches in the southwest quarter of section 29 in the township of Raisin, to its outlet in Lake Erie. Judge Geddes, finding the petition correct and in due form, and having no option under the law, complied with the request embodied therein, and appointed Josephus M. Robertson, of Blissfield, as such special commismissioner.

That this work, if successfully carried out, would be of benefit to the land and health of all parties living near the river, is a self-evident fact. The clearing out of the dams alone would be a vast improvement in a sanitary point of view. But the expense! Ah, there's the rub. The original signers of the petition are Elisha Eddy, Frederick Bay, Dayton Parker of Lenawee county, and George Peters, Oliver Logan, B. F. Rose, of Monroe county.—Adrian Times.

FLASHES BY C. T. LINE OPRS.

Franklin was well represented at Chicago last week, there being not less than ten farmers from that town. Eight went in one party, and they saw all the principal sights of the city and had a lively time. Two at least had a lively time with some boot blacks. It was thought at one time the police would have to be called to save the grangers from annihilation, but the "hay seeds" came out O. K.—All attended a museum one afternoon and one of them saw so much that it took away his appitite for supper.—One of the party saw a man sticking hogs, at the slaughter house, until he began to look pale, then hurried from the scene. Another missed his watch one morning and thought it was stolen at the theatre the night before but finally found it in the bed clothes where it had slipped from his pocket. One of the party, being a strict temperance man, got sick and came home in advance, of the others. Travelers should beware of Chicago water.—Coming home one of the party went out on the platform to view the landscape west of Coldwater and not having a brick in his hat at the time he and his hat parted company, and he had to ride to Adrian hatless.

The Excelsior school house was burned Monday night.

CHRISTIAN CONFERENCE.

BALCH, Mich., Oct. 16, 1883.

EDITOR HERALD:

Having been appointed by the Southeastern Michigan Christian Conference to report to your paper matters of interest of its work in its late session, I submit the following:

The Conference met in its 33d annual session on Wednesday, Oct. 10th at 2 o'clock P.M. with the Church of Christ in East Ridgeway, and continued its sessions until the following Saturday.

The session was harmonious throughout, and a large amount of business of vital importance to the body was transacted. There were preaching services each evening during the conference session and over the Sabbath following. The preaching was done by Revs. M. W. Tuck, of Coral; Geo. Price, Tecumseh; Sarah E. Garwood, Fairfield; and J. H. Gilbert, Bellevue, O.

The preaching was all characterized by having much spirituality in it; was well timed, and well received by the large audiences who listened to it. The annual fellowship meeting of the Conference was held on Saturday afternoon, commencing at two o'clock. It was participated in by all church members or professers present, except one, and was a most glorious spiritual feast, the "Master of Assemblies" being present, who did most powerfully bless us in that religious convocation.

I wish to say in conclusion, as church and pastor, we accept the business sessions, preaching services and speaking meetings of the conference as being of very great value and lasting benefit to us in our future church work. B F. RAPP, Pastor.

COUNTY CONDENSATIONS.

Petersburg had a fair last week.

The new engine house at Deerfield is enclosed.

The Hudson post-office received a new safe last week.

The masons of Fairfield are fixing up their lodge room.

Fred Weisinger will soon open a new store at Deerfield.

Mont. Van DeMark, of Clinton, intends to soon get up a dancing school.

John T. Clark, of Clinton, has gone to New York to purchase blooded cattle.

The Dover red ribbon club has expired. The chairs will be sold to pay the rent.

A party of Brooklyn sports started for the north woods last week to hunt for big game.

Blissfield fruit evaporators are paying from 40 to 50 cents per bushel for drying apples.

The Sons of Temperance Lodge of Morenci has "gone where the woodbine twineth."

J. S. Kies, of Clinton, raised 363 bushels of potatoes from one acre of ground. Next.

Adrian is happy. A double Uncle Tom's Cabin troupe showed in that city last Tuesday.

Hudson will celebrate the semi-centennial anniversary of her settlement on the 5th of November.

Jim Barrow, of Blissfield, has emigrated back home again from Dakota. Jim has got enough.

The poles have been ordered for the Hudson and Addison telephone line. It will take in Rollin and Beardsell's landing.

The Brooklyn Exponent speaks highly of L. F. Wheeler's Illuminated Rambles which exhibited in that village last week.

The wife of the well-remembered evangelist Martin had her unpleasant conjugal ties unloosened by a Chicago court recently. She obtained a divorce on the ground of cruel treatment.

Hudson Post: A Hillsdale justice of the peace was robbed of a pocket book containing $75 during the fair. The next thief tried before his Honor will probably be sentenced for life, as he is down on this class of criminals.

Clinton News: George Goodrich reports that he planted a piece of ground fifty feet square, with one peck of Early Ohio potatoes, the hills four feet apart, the last week in May, and on the 10th of August dug 18 bushels of nice potatoes.

Clinton News: Ripe, luscious strawberries, fresh from the vines on the 6th of October are rare in this part of the world, but nevertheless we had some at our office that day which Mr. Slade Lazell brought us and which he had just picked from a bed in Amos Lazell's garden.

Clinton News: The High School lecture course, is as follows: Prof. R. L. Cummock, Humorous and Dramatic Readings; James Clement Ambrose, "The Sham Family;" Prof. J. B. Steere, "Crossing the Andes;" Col. J. P. Sanford, "Future America;" Stuart Rogers, Impersonations.

Morenci Observer: The Rev. I. M. Foster, of New York, Grand Lecturer of the G. A. R. of the United States, will speak to the Posts in this vicinity on the 7th, 8th and 9th of November next, probably as follows: At Lyons on the 7th; Fayette on the 8th, and in the village on the 9th. He is the most eminent speaker of the order, and a great treat is in store for our people.

The people of Addison are in a turmoil over the location of the depot.—It has been supposed that it would be located on the west side, but the people of the east side are making an effort to secure it, and it is now an open question. In order to win the people on the east side must do $2,500 better than those on the west side, it requiring that amount to grade the ground. Such is the rumor.

Blissfield Advance: An organization is perfecting that contemplates the giving of a series of entertainments during the winter, the proceeds (if any) to go toward a fund for a base ball association next season. That base ball will be played more than ever next season is very evident, and Blissfield will take such measures as to hold its reputation for the best amateur nine in this section.

Deerfield Record: We have been requested to publish a warning to the people generally and the small boys in particular, who have been in the habit of discharging guns, revolvers, etc., within the corporation limits, for them to desist, as all offenders will be punished according to law. It is a lamentable fact that a number of boys carry revolvers, and it would be well for parents to inquire into the matter ere some of these youths are arrested. A word to the wise is sufficient.

—Call at the yard and mill of the Tecumseh Lumber Co., and examine their stock.

—Don't buy any Sewing Machines without seeing the Light Running New Home and Singer, sold only by B. J. Coller, Adrian.

—At Coller's Palace of Music, in Adrian you can find the largest stock of Pianos and Organs at the lowest prices in Michigan. Call, or drop a postal for prices.

—Mrs. A. E. Ure, of the New York Millinery, Tecumseh, has returned from New York with all the new styles and novelties in millinery. Hats made over and trimmed in the latest style.

—Mrs. A. E. Ure, of the New York Millinery, has reopened her store for the fall and winter trade.

—Mrs. C. M. Webster has moved to the residence of Mrs. Luke Wood, one door west of P. B. Swick, with the other branches of work. Colors hair switches for 25c and does oil stamping on short notice.

Cider Apples and Potatoes.

Slayton & Son want to buy potatoes, cider apples and potatoes. Call and see them.

—The Detroit Diamond Farming Mill, the best in the market only $[illegible] Slayton & Son.

Mrs. E. Drew, of Chicago, and Mrs. Swhab, of Sandusky, are the guests of Mrs. I. P. Keyser.

—No guess work. If you want as good flour as is made in the state, get Heck Bros.' complete all roll flour.

—Call on Slayton & Son for good cooking apples. Cheap.

—Natural looking and serviceable artificial teeth can be procured at Dr. B. F. Snyder's Dental Rooms.

—Parties in Tecumseh and vicinity will do well by seeing B. J. Coller, of Adrian, Gen. Agt. for the New Home Sewing Machine if they contemplate purchasing any sewing machines. He is the company's only authorized agt. in this vicinity. Don't be misled.

—Spring Tooth Harrows at Snedicor's.

—You can have your decayed and aching teeth extracted at Dr. B. F. Snyder's dental rooms, without pain, by taking vitalized air.

—Leave your orders for Sash, Doors, blinds, mouldings, window frames, tanks, troughs, etc., with the Tecumseh Lumber Co. They will receive prompt attention.

—Mrs. A. E. Ure, of the New York Millinery, Tecumseh, is offering great inducements in millinery and hair goods.

TECUMSEH, Mich., March 25, '83.

I have been troubled with a hard cough for many years, and have found nothing to help me until I tried Dr. Bigelow's positive cure, which has completely cured me.

WELCOME SHERMAN.

The medicine is manufactured by Griggs & Co., Ottawa, Ill., and sold by Baker & Hall, Tecumseh.

—One of the best blood purifiers ever made is "King of the Blood."—Sold by Druggists generally. Manufactured by D. Ransom Son & Co., Buffalo, N. Y.

DIED.

McNEIL.—At his residence in Clinton, Monday, Sept. 3, 1883, Jacob McNeil, aged 75 years.

The deceased was born in Jefferson Co., New York, Feb. 24, 1808, was united in marriage with Susan Winslow in 1832 and came to Clinton in 1833, where he continued to reside until his death. Having done business in this vicinity until within a few years, he was widely known as a man of integrity and worth. He leaves a large circle of friends, and acquaintances from which he will be greatly missed. He had been failing in health sometime previous to the celebration of his fiftieth anniversary, which occurred on the 27th of Dec. last, from which time he failed slowly but gradually until his decease. He leaves a wife and three daughters to mourn his loss. We can truly say a good man ripe in years and deeds has gone to his reward.

McNEIL.—At his residence in this village, Sept. 26th, 1883, Archibald McNeil, aged 70 years.

The deceased was born in Jefferson Co., New York, June 23d, 1813. His youth was passed in his native county, and in 1833 he came to Michigan. In July, 1836, he was united in marriage to Mary A. Boynton, of Clinton, when he took up his residence in the township of Tecumseh, and worked at his trade, which was that of a carpenter and joiner until 1840. In that year he began to work in the old Tecumseh foundry, and continued in that establishment through the different changes in its management for 35 years, until April, 1875. In that month he seriously injured one leg which disabled him for several months, and he was unable to perform any manual labor after that time. He united with the Universalist church at the time of its organization in August, 1866, and was chosen Deacon at the first church election, which position he continued to occupy until the day of his death. He was a man of strong convictions and decided views on all subjects, and was remarkably well informed for a man who had so little leisure time for reading. His station in life was a humble one, but every duty devolving upon him—to himself, to his family, to society, to his church—was most faithfully performed. He was respected as an exemplar by those who knew him. A kind father, a patriotic citizen, a true christian gentleman has ceased his earthly labors and gone to meet his elder brother, who set out on the heavenly journey only three short weeks before. They were brothers on earth—in heaven they will not be separated.

[illegible]

The Art of Advertising.

The time has come when a knowledge of this art is an essential part of the education of every business man. To be successful in business they should understand how to advertise. It is only necessary, in order to illustrate the truth of this statement, to call attention to the most successful merchants and manufacturers of any large city, or small village, in the United States. They know just what to say to the public, when to say it, how to say it, and the mediums to employ in saying it. They have made the same careful study of this as of any other branch of their business. They don't insert a single [illegible] in an almanac, venture [illegible] paper, put up a sign, or even support a party organ, and then sit down to make the proprietor of the paper, sign-writer or the editor of their pronunciamento by giving a free ticket, saying that it never did them any good, but was just put in out of friendship. They are not content with an occasional advertisement that appears the first week in January, or all seasons of the year, [illegible] bargains, and the same [illegible] of goods just received on all sides of them—when their stocks have [illegible] they are always able to [illegible] a single customer, as when their shelves are filled with the most seasonable and attractive commodities. They [illegible] the public to remain in ignorance of the fact that they have a good [illegible] constant appeals in a manner that [illegible] attractive. They are always devising new and striking methods for presenting their wares to the public notice, [illegible] of printers' ink. They are always careful to advertise what they have [illegible] that they had last winter, nor what some else has now. They advertise [illegible] as well as liberally, and their [illegible] learn to believe the promises [illegible] made through the newspapers. Advertisements are studied with interest by every one who expects to become a buyer. It is as important that a [illegible] should know how to advertise as to know how to buy judiciously, or to sell at a big profit.

Practical Proverbs.

A wooden tight a-hint for de man who quotes old proverbs an adopts second-hand mottoes. began Brother Gardner, of the Detroit Limestone Club as the crunching of harvest apples suddenly ceased. "Dis am an age for every man to hold his own plow an who am content to let some one else hold it must be satisfied wid cobs in place of co'n. Ef I was so poo' an low-down dat I had to pick rags I would have my own maxims an mottoes. Instead of sayin 'Doan' put off till to-morrow what kin be done to-day,' I would have it 'Now, de man, you git right up a dust, an git my rags dis week dan any odder chap can in a month.' De odder day I met Comeback Jones. You know he am 'bout sixty y'ars old, an 'bout as hard up as a woodchuck in a bear's grip. I axed de ole man how he was keepin' up wid de purcheshun an he replied, 'Wall, ize mighty hard up, but dey say it am a long lane 'at has no turn.' Jist fink of an ole man of one No. 13 in de grave waitin' fur a turn in de lane to bring him heaps to eat an clots to wear. All drew life he has carried dat second hun sayin' wid him, an' am yet a believer in it. Why didn't he make one of his own? If he had said forty years ago: 'Doan' foller any lane, but cut across lots,' de wolf wouldn't be arter him to-day. A man who hes de will to make a motto hes de pluck to make it a success. Buckle down to bizness am a better motto dan any book kin give ye. Let me, in closin, quote some of de mottoes an maxims belongin' to members of dis club:

Isaac Walpole—'Doan' drap fifteen cents in re-shin for a dollar.'

Weydown Bebee—'When ye can't dig drew a wall climb ober it.'

Giveadam Jones—'Git dar' if it takes a leg.'

Pickles Smith—'Ye can't swim a ribber by sittin' on a bank.'

Samuel Shin—'Set yer alarm-clock fur six in de mornin.'

Peter Pullback—'If de road am up hill yer back bone a little no.'

Elias Johnson—'De man who wears his hat on his ear shows de empty side of dis head.'

Brother Jackson—'Hoe on wid yer hans and turn steadi of yer mout.'

Elder Toots—'Take a job at fust sight but doan trade hosses till ye fink it over.'

Beauty.

[illegible] man don't marry a girl because she is pretty. Will beauty [illegible] through the lifelong journey to the [illegible] of those twin [illegible] and tears? Will beauty alone cook your food, care for children and prove a sweet solace in the hours of weary toil and care—the [illegible] of every man on earth? [illegible]

[illegible]

Love fades when disappointed in the object of its adoration. Disappointed in the character and capabilities of your choice—see to it that she possesses a better conception of grasping the only [illegible] questions of the day, and that a portion of her time is spent in reading something besides fashion plates and novels. And above all be assured that she is well disciplined in those virtues without which beauty is worthless. Sweetness of temper is not incompatible with firmness or moral courage and a woman possessing these attributes will not belong to the rapid "fast" sort, but on the contrary [illegible] develop into noble wives and [illegible] faithful in friendship, and devout Christians capable of exerting both at home and in society, the best of an influence on the right and for virtue.

If to these high and independent qualities is added beauty, then your choice is indeed a gift of God. Take such a one to your home and while loving and cherishing, do not fail to prove yourself worthy to be the possessor of such a priceless gem.

Some Strong Minded Women.

Can regulate their husbands amazingly fast, should they do their duty.—Burdock Blood Bitters are a good regulator of the circulation. They are exclusively a blood tonic, and consequently strike at the root of many serious ailments.

A Boy came home from school much excited, and told his father that the teacher said all human beings were descended from apes, which made the old man so mad that he replied angrily: "That may be the case with you, but it ain't with me. I can tell you that now."

To cure any scrofulous disease or humor, try Ayer's Sarsaparilla. It cleanses the blood of all impurities.

How they Meet and Part.

A gentleman lately took down verbatim the conversation of two fashionable ladies during a morning call—viz: "How do you do, dear?" "Pretty well, thank, you." They kiss. "How have you been this age?" "Pretty well. How have you been?" "Very well, thank you." "Pleasant to-day." "Yes, very bright, but had a shower yesterday." "All your family quite well?" "Quite well, thanks. How is yours?" "Pretty very well, thank you." "Have you seen Mary B. lately?" "Oh, yes! I have seen Susan C." "You don't say so! Is she quite well?" "Yes, very well, I believe." "Dancing when you go?" "Yes, indeed; I have never sat down." "Dancing again?" "Thank you, but you don't come that game on me, dear." "Oh, you shouldn't say so, dear." "Well, they were good." "Good bye, dear, good bye, dear." "Exchange."

"Life Forces" gives the following on the above:

"I and after waiting that the gentleman discovered the strain upon his nerves, he at last had been so severe, he went off to "brace up." Just as he reached his destination, met a friend fresh out of [illegible] when the following conversation [illegible] and taken down by the writer as an example for women of men's "wit and wisdom." "Hello! old fellow, how are you?" They shake. "First rate, how are you?" "Tip-top." "When dy'e get in?" "Just now." "Have something?" (significantly). "Well—yes, don't care if I do." They step to the saloon, after cautiously looking around to make sure no outsiders are about, to see they are breaking their pledge—[illegible] they emerge innocently wiping their mouths, before putting into them their lighted cigars, and being "primed," resume: "How are ye, folks?" "All well, how are yours?" "All flourishing, now the youngest boy had diphtheria, but all right now." "Crops good up your way?" "Well, we're pretty fair." "How do politics look?" "Bad—very bad—all democrats up our way, giving democratic majority." "Take out your watch? Thunder! ten minutes to 12! I must be off—got to see a man at 12." "Can't you come up to the house and take dinner?" "No, guess not to-day—got several pressing business engagements." "Good-bye." "Good-bye." They again wring hands and then rush away from each other as if fearing they might have to shake hands another time!"

The best interests of humanity depend on the good health of our women folks, and yet those with brightest intellects seem to suffer most with ailments peculiar to female life. It is well to remember that the whole female system can be built up to a proper state of endurance, pimples, sores, swollen limbs, monthly pains, and other indications of female disease, made to disappear and robust health of mind and body take the place of illness and distress, if a timely use is made of Dr. Guysott's Yellow Dock and Sarsaparilla. It restores the blood to perfect health, it strengthens the muscular and nervous system. It gives tone to the digestive and urinary organs. It allays all irritation of the mucous membrane. In a word it is a perfect female medicine, and aids every function of female life. No other remedy equals it. Have your druggist get it. Take no substitute.

A Bird that Turns Somersaults.

There's a pretty little bird that lives in China, and is called the Fork-Tailed Parrot. He is about as big as a robin, and has a red beak, yellow legs, black tail, and red-and-yellow wings. Nearly all the colors are in his dress, you see, and he is a gay fellow. This bird has a trick known by no other birds that ever I heard of. He turns somersaults! Not only does he do this in free life on the trees, but also after he is caught and put into a cage. He throws his head far back, and over he goes, touching the bars of his cage, and alighting upon his feet on the floor or on a perch. He will do it over and over a number of times without stopping, as though he thought it great fun. All his family have the same trick, and they are called Tumblers. The people of China are fond of keeping them in cages and seeing them tumble.

A lady who suffered from weakness peculiar to her sex, in writing to a friend, said: "I tried various kidney medicines, but only found myself growing worse. A friend told me to use Dr. Guysott's Yellow Dock and Sarsaparilla. Its effect on me was soon indicated by a clear and beautiful complexion, a freedom from aches and pains, a complete removal of nervous depression, painless regularity in habits of digestion, and otherwise I can not praise the remedy too highly as a true friend to suffering womanhood and as a strengthening medicine."

A little dot of a girl coaxed two nickels from her father on Thanksgiving day, saying she would use one for candy and the other she would give to the missionaries. Before executing her expressed intentions she lost one while at play, and running to her mamma, said: "Oh, mamma, I have lost my missionary nickel."

Every one should tell his neighbor that the best remedy for curing coughs and colds, and the only sure cure for consumption is Dr. Wistar's Balsam of Wild Cherry. It is pleasant to take and very soothing and healing in its effect.

An English writer says that the middle class Englishman, as a rule, does not buy books, except a few classics and professional treatises, but waits for his chance at the book club or circulating library. There are instances where authors are asked to lend their own copies by men of ten times their income. Wine and china may be bought, but books must be hired for, says the writer, the English are educated to the point of reading, but not to paying for books.

Hatch's Universal Cough Syrup gives your kidneys and liver a jog to help relieve your lungs of a bad cough, or your child of croup. There can be no membraneous croup when Universal Cough Syrup is used in the first symptoms of the disease. No family with children can afford to be without it one day. 25 and 50 cents.

The life of a true Christian is like a beautiful river; it flows on in a steady, even course; the storms of life may ruffle its surface, but the deep undercurrent moves on undisturbed.

Good health is the greatest of fortunes; no remedy has so often restored this prize to the suffering, as Hood's Sarsaparilla. Try it.

ASHBURNHAM, Mass. Jan. 14, '80.
I have been very sick over two yrs. They all gave me up as past cure. I tried the most skillful physicians, but they did not reach the worst part.—The lungs and heart would fill up every night, and distress me, and my throat was very bad. I told my children that I should never die in peace until I had tried Hop Bitters. I have taken two bottles. They have helped me very much indeed. I am now well. There was a lot of sick folks here who have seen how they helped me, and they used them, and are cured, and feel as thankful as I do that there is so valuable a medicine made.
Mrs. Julia C. Cushing.

PAPILLON

DARRAH'S MAGNETIC OINTMENT.

The Great Healer of all Inflamed Injuries and Disorders.

It is constantly effecting the most wonderful cures, while the unparalleled testimonials with which it abounds, stamps it at once as the greatest medicine of the age for outward application.

The most threatening sores are cured, and the most skeptical are compelled to believe in the power of this great remedy.

WHAT IT CURES.

All Sores, Cuts, Bruises, Sprains, Burns, sore Throat, Lameness, Rheumatism, Piles, Inflammation of Lungs and Bowels, Bronchitis, Croup, Salt Rheum, Chilblains, Affection of the Spine, Erysipelas, Nervous Irritation, and all disorders attendant with Inflammation.

It never fails to restore the natural functions of the skin and equalize the circulation of the blood. By this means a controlling power is gained over the most malignant forms of disease. It penetrates to every portion of the human frame; every bone, muscle, vein, nerve and ligament is searched out and made sensible to its soothing and healing influence. Hence it copes readily with internal as well as external diseases.

Over 40 Years.

This Ointment has been used by the people throughout the United States, and our confidence in its qualities is such that as we have no space here to insert any of the numerous certificates of cures which we have from all parts of the country, we simply ask those readers of this notice who have ever used this Ointment, to frankly state their experience with it to inquiring friends. If but one in a hundred would do this we should be perfectly satisfied with the result. Full directions for use will be found on pamphlet around each bottle.

Price 25 and 40 cents per bottle. Sold by all dealers in medicine.

D. RANSOM, SON & CO. Prop's

COMPOUND OXYGEN NOT A DRUG

A NEW TREATMENT.

For Consumption, Asthma, Bronchitis, Dyspepsia, Catarrh, Headache, Debility, Rheumatism, Neuralgia, and all Chronic and Nervous Diseases.

A CARD.

We the undersigned, having received great and permanent benefit from the use of "COMPOUND OXYGEN," prepared and administered by Drs. STARKEY & PALEN, of Philadelphia, and being satisfied that it is a new discovery in medical science, and all that is claimed for it, consider it a duty which we owe to the many thousands who are suffering from chronic and so-called "incurable" diseases to do all that we can to make its virtues known, and to inspire the public with confidence.

We have personal knowledge of Drs. Starkey & Palen. They are educated, intelligent and conscientious physicians, who will not, we are sure, make any statement which they do not know or believe to be true, nor publish any testimonials or reports of cases which are not genuine.

WM. D. KELLEY,
Member of Congress from Philadelphia.
T. S. ARTHUR,
Editor and Publisher "Arthur's Home Magazine," Philadelphia.
V. L. CONRAD,
Editor "Lutheran Observer," Philadelphia.
PHILADELPHIA, PA., June 1, 1882.

In order to meet a natural inquiry in regard to our professional and personal standing, and give the public increased confidence in our statements, and in the genuineness of our testimonials and reports of cases, we print the above "CARD" from gentlemen well and widely known, and of the highest personal character.

Our "Treatise on Compound Oxygen," containing a history of the discovery of and mode of action of this remarkable curative agent, and a large record of surprising cures in Consumption, Catarrh, Neuralgia, Bronchitis, Asthma, etc., and a wide range of chronic diseases, will be sent free. Address,

DR. B. MINCER,
Scientific Optician!

I have devoted 25 years wholly to a study of the eye, and how to aid vision properly, and I make a specialty of fitting glasses to the eyes that have been injured by cheap, inferior glasses. I manufacture every kind of glasses, and guarantee satisfaction. Read what prominent physicians of Adrian say:

Having for some time past used glasses to improve my sight, without satisfactorily gaining my object, I called on Mr. Mincer, optician, of Detroit, who readily adapted glasses to my eyes, with which I am so well pleased, that I cheerfully speak in his favor. His method of examining and its application in selecting glasses to fit the eye can only be acquired by a knowledge of the visual organ to which must be added extensive experience. He has also adapted glasses to Mrs. Baker's eyes with which she is well pleased. I recommend him to all who need glasses adapted to their wants; poor glasses are an abomination.
V. A. BAKER, M.D.
ADRIAN, Nov. 18, 1882.

I have used spectacles bought of Mr. B. Mincer for the past three months, and find them superior to any I have ever used, and can cheerfully recommend him to anyone in need of glasses, and the benefit of his experience in the science of optics to adjust proper lenses.
DANIEL TODD, M.D.

I have investigated the work of Mr. B. Mincer, optician. I have reason to believe that he understands his profession, and adjusts excellent glasses on scientific principles.
C. RYND, M.D.

REMEMBER!

I will visit every town in the county during the month.

Ayer's Cherry Pectoral.

COLDS. "Orrville, Ohio, Sept. 10, 1882. "Having been subject to a bronchial affection, with frequent colds, for a number of years, I hereby certify that AYER'S CHERRY PECTORAL gives me prompt relief, and is the most effective remedy I have ever tried.
JAMES A. HAMILTON, Editor of *The Crescent*."

COUGHS. "Mt. Gilead, Ohio, June 26, 1882. "I have used AYER'S CHERRY PECTORAL this spring for a severe cough and lung trouble with good effect, and I am pleased to recommend it to any one similarly affected.
HARVEY BAUGHMAN, Proprietor Globe Hotel."

HERALD OFFICE.

The Youth of Our Land.

There really ought to be some law against the sale of dime novels to young boys. Instances occur almost daily where the minds of young boys have become so distorted by reading trash that they are ready to slaughter their fellow beings in large quantities. A boy who reads about some avenger of the prairie who chops and splits his cord and a half of Indians regular every day, or some pirate whose scalpers run off enough blood every minute to make a hundred dollars worth of blood sausage, gets into an abnormal condition of mind and is wholly unfit for the solid work and low wages of real, every day life.

He begins to accumulate pistols, daggers, and other old junk and longs to ram a pomard into some false Spaniard, and twist it around, while he hisses through his set teeth some drivel that he has read in a novel. Such a boy will not hoe corn. Near Peru, in Illinois, the other day, a sheriff found a cave where a number of these boys whose minds had become inflated, had established a sort of pirate's glen. The pirates were not at home, being away probably on an expedition to capture a dark-eyed Spanish beauty, or a bantam or shanghi beauty, and the sheriff entered the place and took an account of stock. All around were the sinister looking weapons of death, and the treasures and spoils of war, and among them were twelve bottles of lemon beer. This in itself ought to teach boy that there is no such thing as realizing what novels tell about. There never was a novel yet that told about the duke pacing back and forth with a clouded brow, in the elegant drawing room of his castle, and then going to the sideboard and draining a flagon of lemon beer. Not any. The duke always drains a flagon of fine old Rhenish wine, seven hundred years old, before he sets out to mutilate a couple of townships of people. A boy ought to see by this that if he is going to try and follow the duke's example he will have to use old Rhenish wine instead of lemon beer. And where would be the fun in slaughtering those two townships of people with a skin full of lemon beer or pop? It would be insipid. And not only that, but ridiculous. Suppose the duke should draw his rapier to run a person through the body, and just as he was about to say, "Die, villain," the gas from the lemon beer should come up in his nose. He would feel like a fool. A boy who reads a novel, and becomes all wrought up and excited, never thinks of this. Neither does he think who it is that writes the novel. If he could see the author of the novel—who is some poor devil in a New York garret, who has starved himself half to death for money to buy whisky, and who changes his quarters every month to save rent—he would be ashamed to be seen reading such stuff. The poor broken down scribbler who writes about the brilliant diamonds of inestimable value that flashed upon the bosom of the countess, is probably wearing a sheet of writing paper for a shirt front.—*Peck's Sun.*

Pluck vs. Luck.

In an address delivered before the students of the Spencerian business college, Washington, D. C., June 29, 1869, among other things, Gen. James A. Garfield said:

"Now, young gentlemen, let me address you touching your success in life; and I hope the very brevity of my remarks will increase the chance of their making a lodgment in your minds. Let me beg you in the outset of your career, to dismiss from your minds all ideas of succeeding by luck. There is no more silly thought among young people than the foolish one that by-and-by something will turn up by which they will suddenly achieve fame or fortune. No, young gentlemen, things don't turn up in this world unless somebody turns them up. Inertia is one of the indispensable laws of matter, and things lie flat where they are until by some intelligent spirit (for nothing but spirit makes motion in this world) they are endowed with activity and life. Do not dream that some good luck is going to happen to you and give you a fortune. Luck is an *ignis fatuus*—you may follow it to ruin, but not to success. The great Napoleon, who believed in his destiny, followed it until he saw his star go down in blackest night, when the Old Guard perished around him, and Waterloo was lost. A pound of pluck is worth a ton of luck.

Young men talk of trusting to the spur of the occasion. That trust is vain. Occasions cannot make spurs, young gentlemen. If you expect to wear spurs you must win them. If you wish to use them you must buckle them to your own heels before you go into the fight. The occasion you may achieve is not worth the having unless you fight for it. Whatever you win in life you must conquer by your own efforts, and then it is yours—a part of yourself."

A Life Saving Present.

Mr. M. E. Allison, Hutchinson, Kan.: Saved his life by a simple Trial Bottle of Dr. King's New Discovery, for Consumption, which caused him to procure a large bottle, that completely cured him, when Doctors, change of climate and everything else had failed. Asthma, Bronchitis, Hoarseness, Severe Coughs, and all Throat and Lung diseases, it is guaranteed to cure. Trial Bottles free. Large size $1.00.

Sold by C. A. Wright & Co.

POSTAGE STAMPS.—There are about six thousand different descriptions of postage stamps in existence. The museum of the Berlin Post Office alone contains between four and five thousand specimens, of which half are from Europe, and the remainder divided between Asia, Africa, America and Australia. What country carries off the palm for absurdity and grotesqueness of artistic design and inferiority of execution, we are not told, but if the collection is faithfully representative the variety of ugliness must be considerable. Some of the stamps, it appears, bear coats of arms, and other emblems, impartially borrowed from the heavens above, the earth beneath, and the waters under the earth—stars, eagles, lions, horses, serpents, railway trains, dolphins and other "fearful wildfowl." There are, moreover, the effigies of five emperors, eighteen kings, three queens, one grand duke, several inferior titled rulers, and many presidents. In so many countries and nationalities some really attractive specimens must have been elaborated.

We Know All

That water never runs up hill; that kisses taste better than they look, and the better after dark; that is better to be right than to be left; that those who take Dr. Jones' Red Clover Tonic never have dyspepsia, costiveness, bad breath, piles, pimples, ague and malaria diseases, poor appetite, low spirits, headache or diseases of Kidneys and Bladder. Price 50 cents, of Baker and Hall.

A Possible Relic of De Soto.

The Tallahassee (Fla.) *Floridan* says: A few years ago, about two miles east of Tallahassee, was found a ponderous spur, of unique and curious workmanship, the like of which has not been seen in modern times. The burr was one and a half inches in diameter, and the bar proportionately heavy. On either side of the rowel dangled small pendant bells, that gave forth a tinkling sound in response to each step of the wearer—doubtless some steel-clad and bonneted warrior of the long ago. Not many days since, while parties were plowing near the identical spot, a solid and shapeless mass was turned up, which, upon close examination, proved to be an iron stirrup of ancient pattern, as heavy and as massive as the spur spoken of first, and firmly imbedded in a thick coating of clay and rust. When this was removed, the stirrup was found to be in a remarkably good state of preservation. The sides represent two Ethiopian figures standing upon the foot-rest, leaning forward facing each other, while they support with outstretched arms what forms the top of the stirrup, or that part connected with the leather. So unlike are both these relics to anything known to the generations of this day and time, and, both being found so near the same place, it is not unreasonable to ascribe them to the same era and individual. Nor is the supposition at all improbable that one of the knightly followers of De Soto, lured on through this then unknown region and wilderness, like that dauntless son of Spain, by a thirst for the yellow heaps of gleaming gold that loomed up ahead of them in vain visions and heated fancies, here fell a victim to the tomahawk and scalping knife of the wronged and revengeful red; and no doubt some one of the "Tallahassee Tribe," of which "Tiger Tail" claimed to be a descendant, boasted, as he displayed at his belt a yet bloody scalp, that he had "killed a pale-face."

Rochester, N. Y., Nov. 16, 1882.

Gentlemen—I have taken but two bottles of your Rheumatic Syrup, but have received more benefit from it than from any and all remedies I have tried. I have improved every day since I first commenced its use, and I am confident that there is no case of rheumatism that the Rheumatic Syrup will not cure, if the patient will adhere closely to the directions for its use, and use proper care about exposing themselves. Yours truly,
Frank R. Armstrong.
With Burke, Fitz Simmons, Hone & Co.
Clyde, N. Y.

Rheumatic Syrup Co.:

Gentlemen—I have been troubled with rheumatism in my ankles and feet for over one year. Have tried several remedies, but found nothing to relieve me or stop pain. I commenced taking Rheumatic Syrup, and in less than two weeks all pain had left me, and to-day I am as well as ever. It is a sure cure for rheumatism.
Mrs. Albert Graham.

A New York man recently dreamed that he was a Texas desperado in a town threatened by Indians, and when he woke up he found that he had crawled under the bed.

"Ish this 'er postoffice?" inquired Cauliflower, slightly disfigured after nineteen rounds of sour mash. "No, this is a butcher shop," replied the sarcastic mailing clerk, licking a faded one cent stamp. "Sho! Ish that sho! Well, give me a tender line for my muzzer."

WINSTON, Forsyth Co., N. C.

Gents—I desire to express to you my thanks for your wonderful Hop Bitters. I was troubled with dyspepsia for five years previous to commencing the use of your Hop Bitters some six months ago. My cure has been wonderful. I am pastor of the First Methodist Church of this place, and my whole congregation can testify to the great virtues of your bitters.
Very respectfully,
Rev. H. Ferebee.

A hotel in Boston built of stone and brick 96 and 69 feet frontage with basement and seven stories above the sidewalk, was moved nearly 100 feet in order to make a change in the street. One side was supported by eight granite columns twelve feet high, the whole building weighing 5,000 tons beside the furniture. The occupants of the stores and the hotel were not disturbed in the removal.

Time to Stop It.

It's too bad, Sir or Madam, but don't get frightened. Your hair is falling off—that's certain. A glance in the mirror, or an investigating committee of fingers tell the dismal story. We won't discuss the possible cause. It is enough that Parker's Hair Balsam used now will prevent further destruction. Is your hair somewhat gray, too and crisp? Alas, yes. The Balsam will give back the original color, softness and gloss. Not a dye, not oily, elegantly perfumed, a perfect dressing.

Give hens constant access to lime in some form. Hens must have the raw material in order to manufacture shells; they cannot make them out of nothing.

Guinea fowls will keep all bugs and insects of every discription off garden vines. They will not scratch like other fowls, or harm the most delicate plant.

Griggs' Glycerine Salve.

The best on earth can truly be said of Griggs' Glycerine Salve, which is a sure cure for cuts, bruises, scalds, burns, wounds and all other sores. Will positively cure piles, tetter and all skin eruptions. Satisfaction guaranteed or money refunded. Only 25 cents. For sale by Baker & Hall.

A bowl of good pea soup is as satisfying as a hearty dinner on a cold day. To make a gallon of it, wash a pint of peas and soak them over night; then boil in five pints of water, gently simmering three hours or so, until thoroughly soft. With a potato-masher rub the soup through a colander or wire sieve. A pound of beef or ham bone may be boiled with the peas. The soup may be seasoned in various ways—with onions, cloves, pepper, etc.

Hood's Sarsaparilla.

Is designed to meet the wants of those who need a medicine to build them up, give them an appetite, purify their blood, and oil up the machinery of their bodies. No other article takes hold of the system and hits exactly the spot like Hood's Sarsaparilla. It works like magic, reaching every part of the human body through the blood, giving to all renewed life and energy. $1 a bottle; six for $5.

PROF. J. S. ROSENBLOOM,

OPTICIAN AND OCULIST!

Having just arrived from Germany, where he has spent 8 years in the Crown Hospital, would respectfully announce to the citizens of Tecumseh and vicinity, that he has engaged rooms at the Lilley House, where he can be consulted at all hours in regard to diseases of the eye or ear.

Cataracts and all diseases of the Eye skillfully treated. Deafness in its worst stages cured.
No Charge for Examination.

ESTATE OF WILLIAM TAYLOR.

STATE OF MICHIGAN County of Lenawee, ss.

At a session of the Probate Court, for the County of Lenawee, holden at the Probate office, in the city of Adrian on Friday, the 5th day of October, in the year one thousand eight hundred and eighty-three.

Present, Norman Geddes, Judge of Probate.

In the matter of the estate of William Taylor, an insane person.

On reading and filing the petition, of Charles C. Tefft, guardian of said insane person, praying for the allowance of his first guardian's account, now on file in this court.

Thereupon it is ordered, That Monday, the 5th day of November next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the next-of-kin of said ward and all other persons interested in said estate, are required to appear at a session of said court then to be holden at the Probate office, in the city of Adrian, and show cause if any there be, why the prayer of said petitioner should not be granted.

And it is further ordered, that said petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the TECUMSEH HERALD, a newspaper printed and circulating in said county of Lenawee, for three successive weeks previous to said day of hearing. (A True Copy.)
NORMAN GEDDES, Judge of Probate.
A. H. BRIGGS, Probate Register. oct11

COMMISSIONERS' NOTICE.

IN the matter of the estate of ANN BIDDLE, deceased.

The undersigned, having been appointed by the Judge of Probate for the county of Lenawee, Michigan, commissioners to receive, examine and adjust all claims and demands against the estate of Ann Biddle, deceased, notice is hereby given that for that purpose we will meet at the late residence of deceased in the town of Macon, in said county, on the 12th day of October, 1883, and on the 7th day of March, 1884, at 10 o'clock in the forenoon of each of said days, and that six months from the 8th day of September, 1883, have been allowed by the said court for the creditors of said estate to present their said claims for examination and allowance.
Dated Sept. 12, 1883.
LEWIS CAMBURN,
MILAN SAGE,
Commissioners.

THE "FISHING LINE."

TAKE THE
GRAND RAPIDS & INDIANA RAILROAD.
The only route to the Trout, Grayling and Black Bass Fisheries and the famous Summer Health and Game Resorts and Lakes of
Northern Michigan.

The waters of Grand Traverse Region and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

Brook Trout abound in the streams, and the famous American Grayling is found only in these waters.

The Trout Season begins May 1st, and ends September 1st. The Grayling Season opens June 1st and ends November 1st.

Black Bass, Pike, Pickerel, and Muskallonge also abound in large numbers in the many streams and lakelets of this territory. The sportsman can readily send trophies of his skill to his friends or "Club" at home, as ice for packing fish can be had at nearly all points.

Take Your Family with You. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing.

The Climate is peculiarly beneficial to those suffering with Hay Fever and Asthmatic affections.

New Hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw city, forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit, Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, Ishpeming and all points in the Upper Peninsula of Michigan.

During the season Round Trip Excursion Tickets will be sold at low rates, and attractive transit facilities offered to Tourists and Sportsmen.

Dogs, Guns, and Fishing Tackle carried free at owner's risk. It is our aim to make Sportsmen feel "At Home" on this route. For Tourists' Guide, a handsomely illustrated book of 160 pages free, Time Cards, Folders and further information address

It May Yet Be True.

When Jules Verne wrote his romance "Twenty Thousand Leagues Under the Sea," he found it necessary to construct a cigar-shaped steamer that would travel under water while her crew could breath with the same ease they could on land. If Mr. Verne had waited a few years he might, perhaps, have saved himself the trouble of inventing this submarine craft, as he might then have found it in actual operation. It is at present only proposed to apply a recent invention to a diver's helmet in the following manner: The apparatus after having been fastened over the nose and mouth of the diver, would be employed to breathe the air one of his lungs contains in the ordinary way, and it goes through the tube into the bottom of the front piece. It then filters through the chemically charged sponge in front, and passing through the tube, at the top is thrown over the diver's shoulder into the other lung to be breathed, which it filters in the same way, and then ascending into the helmet, mixes with the oxygen that has been left in the stale chamber, and is ready to be breathed again into the diver's lungs. [illegible] that if he could only [illegible] he could remain there for a [illegible] day. [illegible] it is no wicked for a quarter of a mile under the sea at Ryde, and return to Ryde on foot, he went down during [illegible] feet of water. This being the case, it is a simple matter to apply the principle to the air-tight submarine ship. The devices for sinking it or for raising it to the surface of the water have been easily arranged, so we may soon have our enterprising excursion managers offering a trip along the bottom of the lake for a single ticket 50 cents and a gentleman's ticket 75 cents.—*Detroit Free Press.*

Struggling Loves.

You, reader, who are blessed with a comfortable home—who are well fed and warmly clad and sheltered—you can hardly realize to what straits and make-shifts many a poor mortal is reduced to live honestly or even live at all. Women there are, delicate, cultured, refined, and all unused to physical labor—women nursed often in the lap of luxury but thrown suddenly and helplessly upon the world by some social or domestic volcano that engulfed home and friends and left them stranded and alone to struggle with the hard conditions of cruel and relentless poverty. We have seen them thinly and poorly clad, with pinched faces from lack of nourishing food, boarding themselves in cheerless and isolated rooms, and eking out a bare pittance honestly earned with needle or pen—patient, often, and hopeful in their sad and lonely lot. Let their more fortunate sisters, born to affluence and comfort, with every luxury within their reach, imagine themselves suddenly reduced to such extremities, and can they wonder that many a tempted one is led into a gilded life of sin? Truly, society is out of joint, and there is need for a larger measure of charity in the world. We wonder if the favored one of earth are aware that there is but [illegible] the goodness of one who [illegible] sorely tempted.

MARRIED.

COULD NOT GO TO BED.

CHERRY TREE TOWNSHIP, March 20, 1880.
Venango County, Pa.

I have been afflicted with Rheumatism more or less for the past thirty years, so much so in the leg that I would have to lie down to get ease and at one time I could not go to bed, but was compelled to set up all night. This affliction continued for five months. I was solicited to use Wilson's Lightning Remedy for Rheumatism, which made a perfect cure. I found it to act with a certainty, and giving relief immediately. I used but one bottle and have not been afflicted since.

T. P. WILSON.

Sworn and subscribed to before me this 20th day of March, A.D., 1880. J. B. D. CLARK, Justice of the Peace.

FARNAND, WILLIAMS & CO., Agents, Detroit.

HERE WE ARE AGAIN.

The steady and continual work we gave the past season to our gigantic clearance sales left our Mammoth Outfitting Establishment in proper shape for the reception of our

Fall and Winter Stock!

To say that we were successful would not half tell the story. OUR TRADE ALMOST DOUBLED, our customers were more than pleased with the bargains we gave them, and we were highly gratified with the liberal patronage bestowed upon us, and this season we intended to strive harder than ever to merit the continuance of the same.

BOYS' & CHILDREN'S CLOTHING.

We have just opened up and put in stock all the new shapes and Styles of Little Folks' Clothing, among which may be found some pretty and attractive garments. Henceforth we shall carry a larger line of these goods than ever. Our trade in this Department has met with such a large increase that we can well afford to and this increase of trade enables us to sell at

SMALLER MARGINS THAN EVER BEFORE.

With us increase of trade means a decrease of profit. Not only shall our prices be the lowest, but we will carry ten times as many goods as any other house in the city. Our Boys' and Children's department has become very popular, not only because it is fitted up with a view to accommodate our customers, but because the best makes, the prettiest styles and the most attractive assortment of this line of goods can always be found there.

Men's & Youths' Clothing!

We have selected the finest and most desirable goods for this department that were ever brought to the city; in fact the goods look so well as we open them up that we feel sure of selling them without much trouble. The reliable class of goods we handle, together with the uniformly low prices which are characteristic in our institution, are found to meet with public approbation. This department is crammed with new goods, ready for inspection and sale.

Gents' Fine Furnishings!

There is no more complete department of the kind in the state. We have just put in stock several cases of new goods, and are every day receiving fresh additions. Kidney Complaints

Give Rheumatine a fair trial. You will never regret having done so.

Testimonial from Mr. Thomas H. Day, of No. 8 23d street, Chicago, who has been for many years employed by the Wagner Sleeping Car Co. and is now conductor of one of their cars running between New York and Chicago.

J. N. SUTHERLAND,
Manager Rheumatine Mfg Co.
Niagara Falls.

CHICAGO, June 20, 1883.

Dear Sir—It gives me pleasure to inform you of the benefit your rheumatic cure "Rheumatine" has been to my daughter, who for the past few years has been a great sufferer from Rheumatism at times being quite helpless. She took three (3) bottles of your preparation, and I can bear testimony to its speedy action in affording her relief from pain and soreness. Thanks to Rheumatine her health is now quite restored.

Yours very truly,
THOS. H. DAY.

SPECIAL CORRESPONDENCE.

HOLLOWAY HICKUPS.

H. E. Wilson is improving his house.

M. Bowerman has moved his mill to Summit City, Traverse Co., Mich.

B. Kelley & Co., shipped a car load of sheep and hogs last week.

Wm. Brainard came very near having a flowing well. The water stands within two feet of the surface.

O. C. Craft and family have moved north with Mr. Bowerman.

On Monday evening Fred Kapke's brother was thrown from a horse and badly injured.

Mac Sleeper is putting a wall under his house.

MACON MUSIC.

A sociable for welcoming Rev. Kerridge and wife was held at the residence of Lester Collar last Wednesday evening. Quite a large company were present. Refreshments were served at an early hour, after which every one enjoyed a good sociable time before departing.

Oscar Stimpson, of Saline, was engaged in picking apples one day last week when he fell from a tree and was seriously injured.

The Sunday School concert was well attended. We have failed to find out the attraction that draws so many of the young people from the Center to these concerts. They should remember that they are all too well known to forget in any way their good bringing up. Our people are sufficiently cultivated to appreciate good manners at all times.

Mr. Lewis Richard, of Farwell, Clare county, is visiting relatives here.

Mr. Bradley Scudder is Macon's new postmaster and merchant.

Miss Lucy Chambers, of Northville, was the guest of Maud Howell last week.

SPRINGVILLE SNUFF.

To Mr. & Mrs. Jonathan Hand—a girl.

Mr. David Swift, having sold his place to J. Wallace for $460 will take his departure for England next Monday. His many friends wish him a pleasant journey and a kind reception across the water.

Messrs. Jessup and Shultis have returned from New York city, where they made a pleasant trip and happy surprise, Mr. Jessup's friends not having seen him in over five years.

The location of the depot is yet to be settled, and is the principle subject for conversation.

The cider season has opened and there are many more apples coming in than was anticipated.

Elvin Ayres has bought another farm one mile south of Wolf Creek, and will move there as soon as he can get possession.

All lovers of dancing to first-class music will undoubtedly be present at Ayres' hall, on Friday evening, Nov. 2. The music will be furnished by Barlow & Williams' full band, while the other features of the dance are equally as good. The weather permitting it will be well attended.

ADDISON ATOMS.

The well-known music publisher, Mr. W. A. Ogden is in town, making arrangements for a musical convention and concert.

Smith's flouring mills present an imposing appearance since donning their mantle of white.

At the last regular meeting of Addison Division S. of T. No. 183, Mr. C. G. Elmore was elected Worthy Patriarch and N. Underwood, Scribe, for the ensuing quarter.

Mrs. W. H. Terpening is now convalescing from a long and severe illness, which for a long time was thought to be of a fatal nature. She is under the efficient care of Dr. E. M. Jenkins.

The depot question is settled at last in favor of the east side, where the work of erecting the necessary buildings is well under way.

Seven cabin cars were run off of a temporary side track last Monday for the accommodation of a large gang of Italians engaged in ballasting the road. Chicken roosts and wood piles are under special guard.

Report says the Michigan Bell Telephone Co. has completed negotiations for the erection of a line from Hudson to this place. A newspaper and job printing establishment is the next thing in order.

Hatch's Universal Cough Syrup gives your kidneys and liver a jog to help relieve your lungs of a bad cough, or your child of croup. There can be no membraneous croup when Universal Cough Syrup is used in the first symtoms of the disease. No family with children can afford to be without it one day. 25 and 50 cents.

THE LAND OF FLOWERS.

SORRENTO, FLA., Oct. 17, 1883.

EDITOR HERALD:

I left you on the river, I think, with a promise to tell all about the town of Sanford, Fla. Sanford is situated on the south shore of lake Monroe, which is the head of navigation for large boats on the St. John's river, and by the crooked river is about two hundred miles from Jacksonville. We left the latter place at 3:30 P. M. and arrived in Sanford at 1 P. M., next day, and landed on a pier 30 rods from shore. The land about here is very flat. Although it has been very dry here for the past six or eight weeks, stagnant water stands in the ditches along the roads, and to-day there are 22 cases of break-bone fever at Sanford. This is a fever peculiar to low wet sections of Florida, and the inhabitants here have learned to select high rolling lands, such as exists at Sorrento, 20 miles back at the west of Sanford. While at Sanford I took in the place and surrounding country. The population of the place is about 1,000, the southern element predominating. It has four hotels and about twenty stores of various kinds. While here my home was with Mr. Wm. Stones and family, who came down with me from Lenawee, and are stoping on the 40 acre orange grove of J. B. Swan, which is a nice grove although young. Some of the trees hang full of nice oranges such as would make a northerner's mouth water.

I visited the famous Speer grove, and saw Mr. Speer himself, and collected the following facts: This grove contains 7½ acres, and the oldest trees are 35, and the youngest 8 years old. Mr. Speer estimates his crop this year at 650,000 oranges, which he has sold, on the trees, for $2,25 a box, and it will take six men from Nov. 1st to March 1st to pick the fruit, which will make 4,000 boxes; a net of $8,000. He used two tons of the Forester chemical fertilizer, which cost $90, and $100 will pay for all the labor on the grove this year. Some eight years old trees have the third crop as they commenced bearing when five years old. One lemon tree, 30 years old, has 10,000 lemons on. This grove is 1½ miles from Sanford and ¼ mile from Swan's grove. On my way to Sorrento I visited the Belair grove of 125 acres. Twenty acres of this grove is 11 years old, 40 acres of it is eight years, and is half orange and half lemon. He considers lemon raising as profitable as the orange. He is now selling lemons at $4,50 a box, and is now picking the third crop this year, 2,000 boxes. The hands go to the trees with a ring and a lemon that is as large as the ring is picked, green as grass, and the small ones are left to grow. The lemon tree, as a general thing, has blossoms on all the year, and fruit constantly maturing. Some orange trees in this grove had limbs broken down under the heavy load of fruit. Many three years old buds have from 50 to 100 oranges on this year. I have located at Sorrento, Orange county. I bought land of Frank D. Raymond; a beautiful piece, as I have found in the state. It lies seventy feet above the lake which is in sight. The country about here is rolling. Groves in Sorrento are mostly young, yet some trees hang full of nice oranges this season. This is a locality especially adapted to the pine apple. Mr. Paxon, whose land adjoins mine, has a fine patch of pines now. They yield a good profit. He told me that 5,000 could be grown on an acre.

One man sold his orange grove for $3,000 that he put out four years ago. He bought ten acres for $50, bought his trees, one half of them budded, at 50 cents, and one-half were seedlings for 20 cents, setting 60 trees on the acre. He paid $200 for fertilizers and built a house at a cost of $150, making in all about $700 besides his labor, and one man can attend to four or five groves and do all the work. Land is very cheap here at Sorrento, from $5 to $25 according to location, from one to five miles from the post office. I would advise men of means to come down on the excursion from Jackson, Mich., Nov. 1, which is very cheap, only $35 for round trip tickets, good until June 1, 1884. The way to come to Sorrento is to get your baggage checked at Jacksonville for Aster, where you take the railroad for Eustes eight miles from Sorrento. I will meet you with teams and take you to one of the best, cleanest and homelike hotels in Florida. $6 per week. The house is kept by Dr. Thomas, the walls of the rooms have hard finish plaster, and the rooms are carpeted. The house is surrounded with orange trees from ten to fifteen feet high, and every hour of the day you will hear the sweet songs of the mocking bird.

E. HAUSE.

MICHIGAN STATE ITEMS.

Pontiac is to have an electric fire alarm system.

The new and elegant catholic church at Flint is now ready for use.

Burglars are too numerous at Maple Rapids.

The apple crop is very short in Kalamazoo county.

Moses McHain, an old resident of Cass county died last week, aged 81.

Physicians who do not register by Nov. 9 have no recourse in law for the collection of fees.

Rev. Royal V. Balcom, of Norwalk, O., accepts the rectorship of St. Paul's church at Jackson.

A two years old child of Henry Gephardt, of White Rock, Huron county, was burned to death last week.

Philip Gorringe, of Three Rivers, fell from the top of his house a few days ago and was seriously injured.

Owosso has now 22 manufacturing institutions all good ones too and more coming.

The Michigan wheat crop for this year figures out to average about 12 bushels per acre.

M. Wood & Co., extensive handle factory men of Owosso, ship their timber in from Kansas.

A prohibition paper named the Vidette has been established at Richmond, Macomb county.

The Toledo, Ann Arbor & Northern railroad is being rapidly pushed and the force of graders is daily increased.

Mrs. Margaret Humphreys becomes assistant professor of clinical dentistry at the University vice Bellmyer resigned.

Diphtheria has prevailed at Niles for the past three weeks and several deaths have resulted. However it is not thought it will become epidemic.

Wm. J. Bartow, of East Saginaw, succeeds Judge Marston as president of the Northeastern agricultural society.

Louis Schmidt, a tailor formerly of Dresden, Saxony, is wanted at Dresden. He is supposed to be in Michigan.

Patrick Cavenaugh, of Muskegon, who while drunk tried to force an entrance into a private house and was shot, died of his wounds.

A young lad named LaFrance was accidentally shot and killed, near Alcona a few days ago, by a hunter who mistook him for a bear.

Genius is never suffered to go unrewarded in this state. The sweet singer of Michigan still finds sale for his songs and lyrics and 4,000 copies of them have been sold.

About 125 hunters from Indiana went into the Michigan woods via the Grand Rapids and Indiana railroad one day last week. It took three baggage cars to carry their camp equipage and munitions of slaughter.

An attempt on the part of the sophomore boys at the Agricultural college to haze some of the freshmen recently was a melancholly failure. The new comers were not so very "fresh" after all, and gave the 'sophs' more than they wanted.

A large frame barn belonging to Wesley J. Post, in township of Argentine, Genesee county, burned on the night of October 16th. It contained 300 bushels of wheat, a quantity of oats and hay, and most of the implements of the farm. It is supposed to have been fired by some tramp who had taken refuge for the night. Insured for $700.

The Muskegon national bank sues the Northwestern mutual life insurance company of Wisconsin for the recovery of $20,000 on the life policy of Edwin G. Comstock. The defense set up is habitual intemperance, though nothing is said of the fact that the company continued to take his premiums whether he was drunk or sober.

John Rogers, of Galesburg, died last week aged 97 years, five months and 13 days. He was the oldest person in Kalamazoo county and located in Galesburg in 1835. He was a pensioner for services rendered the government in the war of 1812, was an outspoken democrat, and had always been in the bloom of health until a few weeks before his death.

A burglar raided the house of L. Tichenor and the rooms occupied by Mr. and Mrs. Dreeney, of Chelsea, a few nights ago. As the rascal was taking his departure Mrs. Dreeney sprang from bed just in time to see him making off with her husband's trousers. Net gain for the burglar $3,50, but he was probably after a much larger amount Dreeny had the day before.

AN ENGLISH VIEW

Of the Relations of Mexico and the United States.

Fortnight Review

Notwithstanding the extent to which it has lately occupied the attention of our foreign office, Mexico is hardly better known to most Englishmen than Central Africa. A few government names [illegible] and a few engineering [illegible] are all the world outside to the average Briton who is occupied in commercial trade or travel. Centres, [illegible] [illegible] [illegible]

SCROFULA.

A remedy that can destroy the germs of scrofula, and when once settled has the power to root it out, must be appreciated by those afflicted. The remarkable cures of young children and the more wonderful cures of those of middle age and late in life, as illustrated by our printed testimonials, prove Hood's SARSAPARILLA to be a reliable remedy, containing remedial agents which do positively cure scrofula and eradicate it from the blood.

WARNER, N. H., Jan. 21, 1879.

MESSRS. C. I. HOOD & CO., Lowell, Mass.: Gentlemen—For ten years previous to the early part of 1877 I had been a constant sufferer from scrofulous ulcers or sores, which had finally reduced me to a helpless condition, as described in my letter to you in September of that year. The continued excellent health which enables me to keep house for my aged father and to enjoy life, keeps alive my intense personal interest in Hood's SARSAPARILLA and I cannot refrain from expressing my gratitude for the permanent cure this wonderful medicine effected in my case nearly two years ago, while living in Lowell, when all my physicians gave me up as being in an incurable condition. One thing before I close. I have recommended your Sarsaparilla to hundreds, and I think more than a thousand cases, and my faith in its invincibility in curing scrofula has become absolute by the wonderful cures it has effected aside from my own. I trust you will not be slow in making the merits of Hood's SARSAPARILLA known everywhere, for it is a duty you owe to mankind. With best wishes I remain very truly yours,

SARAH C. WHITTIER.

HOOD'S SARSAPARILLA

Is a skilfully-prepared compound, concentrated extract, *by a process peculiarly our own*, of the best remedies of the vegetable kingdom known to medical science as alteratives, blood-purifiers, diuretics, and tonics.

For Sale Cheap.

And on easy terms, A FARM OF 120 ACRES, located in the township of Norvell, Jackson Co., three miles from the village of Brooklyn and ½ mile from district school. The farm is well fenced, has good buildings and is under a high state of cultivation. A good brick house with eight rooms besides closets, and a brick bottom cellar. It has 75 acres of plow land, 10 acres of well assorted timber, 20 acres of meadow, and 15 acres of pasture. There are two wells on the place and a brook of living water that never freezes over. A good apple orchard, a young peach orchard, and lots of small fruit. The location is an excellent one and the neighborhood is first-class. For further particulars call at the

HERALD OFFICE.

The Perfumery Trade.

Some kinds of perfumery are worth their weight in gold. The export of fine perfumery is principally from Grasse, Nice, Cannes and Bremen. The business is divided into two parts. The manufacturer extracts from the flowers their essential oils. The perfumer buys these oils, pomades and extracts, and compounds them in several ways.

Only about a dozen of all the fragrant flowers in the world are used in the manufacture of perfumery, viz.: the violet, rose, orange flower, jasmine, tuberose, cassia, lavender, thyme, rosemary, geranium, jonquil and fennel. The rose and the orange are the most valuable. Of the numerous varieties of the rose, only one is used, the Province rose, single, pale pink, the most sweet smelling of roses; not hardy.

Picking for perfumery occurs in almost every month of the year. It is a paradoxical fact in the business that the bitter orange yields the best blossoms for perfumery. One ton of blossoms yields two pounds eight ounces of oil neroli. The fruit of the bitter orange yields a very fine essential oil, bigarade. It is used in many scents. The orange tree, cultivated for its oil, lasts with care over 200 years.

One ton of the distilled leaves of the scented verbena geranium yields from 24 to 30 ounces of the essential oil. The flowers of the jasmine are picked just after sunset in July, and in the morning, as soon as the dew is off, in August. The jasmine is a peculiarly delicate flower. Its essential oil is so volatile that it cannot be extracted by distillation, the heated water decomposing it is so that only a faint tinge of the perfume is left in the water that passes through the refrigerant.

Like the jasmine, the oil of the tuberose cannot be extracted by distillation. The perfume of the cassie is much used in compounds. The process of manufacturing perfumes is in itself very interesting, especially to the ladies.

A ton of roses yields only two ounces of the attar. If kept at a temperature below 60°, attar crystalizes; if kept open to the air and light, it is easily volatized. Perfumed oils are made by putting fresh quantities of flowers into the finest of virgin olive oil from 20 to 30 different times. The essential oil of flowers has a strong affinity to lard or grease. The latter, rendered as white as snow, is perfectly saturated with the flowers. The process is repeated many times. In this way we have pomade of rose, orange, cassie and violet. The affinity of the perfume of flowers for alcohol is, however, stronger than than for grease. Pomades, immersed in alcohol, are rendered into extracts, the grease leaving the perfume. It is safe to say that, among the numerous articles of toilet, the manufacture of perfumed pomades, perfumed oils and high-priced perfumery generally is as a sealed book to many persons.

Savannah, N. Y., March 3, 1883.
Rheumatic Syrup Co.:

Gents—I have been a great sufferer till within a few months, for ten yrs. with that worst of all diseases—rheumatism. At times I have been wholly unable to attend to my business, and for eight weeks was confined to my chair, my only relief from pain being while some one of my family rubbed my limbs. At the same time was covered with scrofula. I had tried every treatment and every kind of medicine recommended, to no purpose, and was completely discouraged. Having heard a friend praise Rheumatic Syrup, as a last resort, I procured a bottle, but with little hope of receiving benefit. After taking two bottles, to my surprise, and need I say delight, I experienced a decided relief. Continuing its use, after taking four bottles, I find myself perfectly cured, and to-day am as well as ever in my life. Of the sores which covered my body, only the scars remain to testify of the efficacy of the Rheumatic Syrup. As a blood purifier and a rheumatic cure it has no equal.

Dexter Hogan.

Indian Names in Wisconsin.

Our readers are aware that most of the names of places in this vicinity are derived from the Indian tongue, some of them having been altered somewhat for the sake of euphony, as, for instance, Peshtigo for Pe-shet-i-go. We interviewed our old friend Captain Powell, the other day, who is well along in years, and was born here, and is almost as familiar with the Indian language as the Indians themselves, and he gave us the following as the significations of some of the names of the places in this vicinity:

Suamico—The yellow sand.
Oconto—The place of the pickerel.
Peusaukee—The place of the brants.
Peshtigo—Snapping turtle.
Menominee—Wild rice.
Menekaune—The place where the lodges are; literally, the village.
Escanaba—A flat rock.
Manitowoc—The dwelling of the spirit.
Kewaunee—The name of a kind of duck.

Thus it will be seen that the Indians named places after some peculiarity of the location; or, as in the case of Manitowoc, after some superstition. Most of the American names are utterly meaningless, as applied to the locality, and we like the Indian plan the best.

Take for instance, Appleton, Seymour, New London, Preble, etc., which convey no idea whatever. Bellevue is better, but it is French, and is duplicated in other languages, as, for instance, Buena Vista, in Spanish. Fond du Lac is good and conveys an idea.

Oshkosh perpetuates the name of an Indian chief, and Marinette that of an Indian woman and both are very good.—*Green Bay Advocate.*

How can you remain a sufferer from dyspepsia when worse cases than yours are being cured by Hood's Sarsaparilla. Try it.

SWISS MOUNTAIN GIRLS.—In these beautiful health-giving mountains one would expect to find the most beautiful and healthy-looking of all girls. Where only pure air is to be breathed, inspiring scenes to be witnessed, women should be as fair as daughters of the gods. But not so. The women in Switzerland have a prematurely worn and aged look; if at twenty they were robust and possessed of that attraction which good health bestows—at thirty they are faded and seem to take pleasure only in going through their dull and never-ending round of duty. For they do the greater share of the work in the field and in the house, and in addition rear large families. In fact they make up in usefulness what they lack in beauty.

Renew and retain your youthful appearance by using Hall's Vegetable Sicilian Hair Renewer, the best article of its kind.

A Primitive Tribe

Dr. Hunter describes a peculiar tribe in India which has preserved an extreme primitiveness. The people are called Leaf Wearers, because they wear the costume of Adam and Eve before the fall; or, more strictly speaking, they did so until the English persuaded them to adopt cloth.

In 1871 the English officer called together the clan, and after a speech handed out strips of cotton for the women to put on. They then passed in single file to the number of 1,903 before him, made obeisance to him, and were afterward marked on the forehead with vermillion as a sign of their entering into civilized society. Finally, they gathered the bunches of leaves which had formed their sole clothing into a great heap, and solemnly set fire to it. This leaf-wearing tribe had no knowledge of the metals till quite lately, when foreigners came among them, and no word existed in their native language for iron or any other metal. But their country abounds in flint weapons, so that the Juangs form a remnant to our own day of the stone age. "Their huts," writes the officer who knows them best, "are among the smallest that human beings ever deliberately constructed as dwellings. They measure about six feet by eight feet. The head of the family and all the females huddle together in this one shell, not much larger than a dog kennel." The boys and the young men of the village live in one large building apart by themselves; and this custom of having a common abode for the whole male youth of the hamlet is found among many aboriginal tribes in distant parts of India.

son who wants to buy a bead belt?"
How much do you generally give to a person who wants to buy a bead belt?"

Charles Lamb was once called upon to say grace. "Is there no minister present?" "No," was the answer. "Then let us thank God," replied the humorist.

French merchants are more fine in their dealings than those of any other nation.—[Yonkers Gazette. Yes, but American merchants have more cents.—[Bloomington Eye.

"Once upon a time" a man met an old woman in an English town driving several asses. "Adieu, mother of asses," said he. "Adieu, my son," was the old woman's reply.

Without wishing to encourage the world in gabble, we may state the goldenness of silence is over-estimated. The mute, inglorious oyster is always getting into broils, stews and hot water.

Breaking an awkward silence—Mrs. Monkeyne Smart (suddenly, to bashful youth, who has not opened his lips since he was introduced to her a quarter of an hour ago)—"And now let us talk of something else!"

Proprietry—Light-minded young thing in a bathing suit: "Surely, Aunt Margaret, you're not going to wear your spectacles into the water?" Aunt M.: "Indeed I am. Nothing shall induce me to take off another thing."

A London tourist met a young woman going to the kirk, and, as was not unusual, she was carrying her boots in her hand, trudging along barefoot. "My girl," he said, "'tis it customary for all the people in these parts to go barefoot?" "Partly they do," and pattly they mind their own business."

A female applicant for aid, appeared at the office of the Director of the Poor, in Detroit the other day, with a sad and anxious look, and on being asked what she wanted replied, "I'd like some money." "How much?" "Well, I can't say exactly. How much do you generally give to a person who wants to buy a bead belt?"

Cured My Wife's Weakness.

From Evansville, Ind., the home of our correspondent, Mr. Jno. R. Patterson, comes the following: "Samaritan Nervine cured my wife of a case of female weakness." It's an extract from Mr. Patterson's letter. $1.50.

Observe the Birthdays.

Let the birthday of each member of the family be always remembered when it comes. Let there be something a little out of the ordinary routine in the arrangement of the table; cookies fashioned as Johnny likes them best; one of Frank's favorite plum puddings, or Julia's special liking, a loaf of ginger cake; or a wonderful lemon pie, such as only mamma can make.

Then there must be presents. Sometimes people may think they cannot be afforded; but reflect. The little one needs shoes, dresses, aprons and many other things. Purchase one or more for the birthday. It will seem just as much present to the recipients as though they were not obliged to have it.

Next come school-books and story-books, a set of furs or a pair of skates, (should the birthday occur in the winter,) a pretty little dinner-basket, or, if the parents can afford it, a little gold band for one of the white fingers, a necklace, a watch with a shining chain, or the pony that has been wished for so long.

Encourage the little ones in giving to each other, and also remember father and mother's birthday; believe me, it will be bread cast on the waters; the days will only be a few ere some returns, and there will be a never-failing supply of pleasure as long as you and your children live.

Bucklen's Arnica Salve.

The greatest medical wonder of the world. Warranted to speedily cure Burns, Bruises, Cuts, Ulcers, Salt Rheum, Fever Sores, Cancers, Piles; Chilblains, Corns, Tetter, Chapped Hands, and all skin eruptions, guaranteed to cure in every instance or money refunded. 25 cents per box. THE "FISHING LINE."

TAKE THE

GRAND RAPIDS & INDIANA RAILROAD.

The only route to the Trout, Grayling and Black Bass Fisheries and the famous Summer, Health and Game Resorts and Lakes of

Northern Michigan.

The waters of Grand Traverse Region and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

Brook Trout abound in the streams, and the famous American Grayling is found only in these waters.

The Trout Season begins May 1st, and ends September 1st. The Grayling Season opens June 1st and ends November 1st.

Black Bass, Pike, Pickerel, and Muskalonge also abound in large numbers in the many lakes and lakelets of this territory. The sportsman can readily send trophies of his skill to his friends or "Club" at home, as ice for packing fish can be had at nearly all points.

Take Your Family with You. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing.

The Climate is peculiarly beneficial to those suffering with Hay Fever and Asthmatic affections.

New Hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw city, forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit, Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns, and Fishing Tackle carried free at owner's risk. It is our aim to make Sportsmen feel "At Home" on this route. For Tourist Guide, a handsomely illustrated book of 160 pages free, Time Cards, Folders and further information address

TECUMSEH, MICH., OCT. 25, 1883.

Vennor predicts a warm winter but the beavers predict a cold one.

Political orators have a hard row to hoe this year. They talk for nothing and board themselves.

The Republican party is sadly in need of a leader. The Democracy is oppressed with too many of them.

Absence from home and a pressure of other business compel us to defer our fourth vacation letter until next week.

Ben Butler is stirring up the old Bay State clear down to the bottom. The war cry of the opposition is "Butler must go."

Dakota is putting on a good many airs for a territory. It has two capitals and seeks admission into the Union as two states.

The effort to revive the negro question on account of the Civil Rights bill decision will prove a failure. That issue is as dead as a mackerel.

Ohio is getting settled down again but there is no peace. The ladies now claim that the prohibition amendment was counted out by fraud.

How would Cleveland and Hoadly do for a presidential ticket? They are both able men, and the leaders of the political revolution in their respective states.

The majority for Gov. Sherman of Iowa has been cut down by the official returns to about 5,500 over all. Iowa was formerly good for 70,000 Republican majority.

Wm. H. Vanderbilt had a collision with another rig in the Central Park the other day and narrowly escaped serious injury. He was likely more of a bear that day than he wished to be.

The decision of the U. S. Supreme Court on the Civil Rights bill is of no practical consequence. The colored man will continue to enjoy his civil and political rights the same as he has done.

The students' lecture association of the University have engaged Senator Daniel W. Voorhees, Henry W. Watterson, Moses Coit Tyler, Emory Storrs, and Rev. T. Dewitt Talmage for lectures during the coming winter.

"Can a man marry his deceased wife's sister in any part of America?" asks "Inquirer" of a contemporary. To which the legal minded editor promptly replied: "Not unless the sister is willing, and as a general thing she isn't. She knows him too well.

In an eastern city the other day a groom of seventy led to the altar a blushing widow of fifty-two. After the ceremony some one suggested a little Sunday School music and the company sang with much enthusiasm, "What shall the harvest be?"

The complete returns from the Ohio election gives Hoadley 12,529 majority. The Prohibition amendment was defeated by 80,000 in a total poll of 721,464. Although defeated the vote in its favor was large enough to be an eye-opener, nevertheless.

The official figures from the Ohio election are as follows: Total vote cast 721,464. The total vote for President in 1880 was 724,967. Garfield's majority that year was 34,227. Hoadley's majority this year is 12,529. The Democratic majority in the legislature is 26.

John Sherman says the republican defeat in Ohio was owing to prohibitory agitation and the reduction of the tariff on wool. He believes Ohio will give a good majority for the National republican ticket next year, and a republican president will be elected.

The Delta Kappa Epsilon Fraternity held its annual convention last week with the Omicron chapter at Ann Arbor. It was largely attended and was a great success. The convention went to Detroit on the second day by special train, had a ride on the Detroit river and a banquet at the Russell house in the evening. Addresses were made by Hon. Samuel F. Hunt, of Cincinnati, and Hon. Frank H. Hurd, of Toledo.

A DETECTIVE'S EXPERIENCE.

His Successful Undertaking and Escape from an Impending Fate.

(Buffalo N. Y., News.)

One morning, several years ago, just as the dull gray light was beginning to show itself in the east, a small band of men might have been seen deployed about a house on Ferry street, in Buffalo. There was nothing special either in the dress or appearance of the men to indicate their intention, but it was plain that they had business of importance on hand. Suddenly a man appeared at one of the windows, took in the situation at a glance, and swinging himself outward with wonderful quickness, scaled the roof of the house. This man was Tom Ballard, the notorious counterfeiter; and, armed to the teeth and fully realizing his situation he defied justice and the officials below him. Some of the officers, knowing the desperate character of the man, proposed to shoot him until he was killed, but one of the number promptly protested, and declared if his brother officers would assist him to ascend he would capture the man alive. Accordingly he began the difficult and dangerous task, and succeeded in bringing his prisoner to the ground in safety.

The man who accomplished this task was Mr. Thomas Curtin, the present superintendent of city police of Buffalo, N. Y. Mr. Curtin is a man who is known by every prominent detective and policeman in America, and he stands pre-eminently in the front rank of his profession. Quiet and gentlemanly in appearance and manners, he possesses a courage combined with marked physical powers, that make him the terror of evil doers, and the pride of law abiding citizens. Few people can realize, however, the trials, exposures, and even privations, to which the members of every municipal police and fire department are exposed. Compelled to be on duty at uncertain hours, subjected to the most inclement weather, and often necessitated by the nature of their duties to protracted undertakings, they endure a nervous and physical strain that is terrible. Such was the experience of Mr. Curtin in former days; and it was not surprising that he found himself suffering from a mysterious physical trouble. In relating his experience to a representative of this paper he said:

"At times when I was on duty I would feel an unaccountable weariness and lack of energy. My appetite was also uncertain and my head seemed dull and heavy. I did not fully understand these troubles, but supposed, as most people suppose, that I was suffering from malaria. I tried to throw off the feeling, but it would not go. I thought I might overcome it, but found I was mistaken, and I finally became so badly off that it was almost impossible to attend to my duties. I have known any number of men in the police and fire departments of this country who have been afflicted as I was, and I doubt not there are to-day hundreds similarly troubled who, like myself, did not know the cause, or really what ailed them."

"Your present appearance, Mr. Curtin, does not indicate much physical debility," said the interviewer, as he looked at the 220 pounds of bone and muscle standing nearly five feet eleven inches in height before him.

"O, no; that is altogether a thing of the past, and I am happy to say that for more than a year I have enjoyed almost perfect health, although I now realize that I was on the road to certain death by Bright's disease of the kidneys, and traveling at a very rapid pace."

"How did you come to recover so completely?"

"That is just what I want to tell you, for I believe it may be of great service to many others in my profession, who may possibly hear of it. I began the use of a popular remedy at the earnest solicitations of a number of friends in this city, and found to my great gratification that I began feeling better. This feeling continued and I gained in strength and vigor until now I am perfectly well—and wholly through the instrumentality of Warner's Safe Cure which I believe to be the best medicine for policemen, firemen, railroad men or any other class of people exposed to danger or a change of weather, ever discovered. Since my recovery I have recommended it everywhere, and never knew a case where it failed either to cure or benefit. I would not be without it under any consideration, and I am positive it is a wonderfully valuable and at the same time entirely harmless remedy. Indeed, I see that Dr. Gunn, dean of the United States Medical College of New York, indorses it in the highest terms."

"So you experience little difficulty in the execution of your duties now, Mr. Curtin, do you?"

"None whatever. Our department was never in better condition than at present."

"And do you never have any fear of the desperadoes whom you have been the means of bringing to justice?"

"Not in the least. Such men do not try to retaliate, partially because they have not the courage, but oftener because they respect an officer who does his duty."

The policemen, firemen, letter carriers and other public employees in this country have a particularly trying life. When, therefore, a simple and pure remedy that can restore and sustain the health of all such men is found, it should be cause for great congratulation, especially when recommended by such a man as Superintendent Thomas Curtin of Buffalo.

Lost Faith in Physicians.

Why is it that so many persons use proprietary medicines, or patent medicines, as they are commonly called?—Is it because people lose faith in their physicians? Well, this is, no doubt, frequently the case. There are innumerable instances where cures have been effected by Scovill's Sarsaparilla or Blood and Liver Syrup for all diseases of the blood, when they had been given over by their physicians.—It is one of the best remedies ever offered to the public, and as it is prepared with the greatest care, as a specific for certain diseases, it is no wonder that it should be more effectual than hastily written and carelessly prepared prescriptions made by incompetent physicians. Take this medicine for all disorders arising from impure blood. It is endorsed by leading professional men as well as by eminent physicians and others. Try it.

HERALD OFFICE.

Gainsley & Co. present their fall announcement in this week's paper. People who are on the lookout for bargains should not miss reading it.

NORTHERN MICHIGAN.

MANCELONA, Oct., 13, 1883.

EDITOR HERALD:

Will you allow me a little space in your paper to say a few words in regard to this part of Michigan. When I left Ridgeway one year ago I promised to write and let some of them know how I liked the country. I like it. It is a good section for anyone who has not got much money. Anyone who has got enough to make a payment on 40 acres of land, and put up a small house can soon have a home of his own. There are railroad lands to be had for $9 per acre around here just as good as any land in the state and I think that Michigan is as good a state as any in the Union. I find men here who have been in Kansas and Iowa and I might say that I am acquainted with men from nine or ten different states and they all unite in saying that Michigan is the best place for a poor man who wants to make a home for himself. We can raise all kinds of fruit and grain and in fact we have as good a farming country as any that the sun shines on. We have also good markets for all that we can raise, only for wheat there is little market. Mancelona is going to be a great manufacturing town. There are several manufacturing companies here now and more coming. There is the Mancelona broom handle factory, and the Mancelona iron furnace, which is being built again after being burned down last spring. Both of these concerns make a market for the beech and maple and other woods with which the country abounds. In my next I will tell more about the village of Mancelona.
MATTHEW BOYD.

THE COUNTY PIONEER MEETING.

On the 17th inst. the Lenawee Co. Pioneer Society held their annual session in the village of Fairfield. At nine o'clock in the forenoon people began to arrive and by eleven o'clock the Christian church where the exercises were held was filled to overflowing. Good marshal music was furnished by a band of 12 instruments. The meeting was called to order by the president, F. A. Dewey, who delivered a short address of welcome.—The choir sang an appropriate selection, followed by prayer from Editor Allen, of Morenci. Reading of the by-laws followed and then music. A poem written by Mrs. R. Whitney, of Adrian, was then read. The memorial record was then read which contained the names of 151 pioneers who have left us during the past year.—Their combined ages were 10,784 yrs. being an average age of 71 years and 5 months. The oldest among them was Margaret Powell, of Seneca, aged 103 years. The company then adjourned for dinner which had been prepared by the ladies. At two o'cl'k P. M. the meeting was again called to order. The committee on nominations reported the following officers who were elected:

President—F. A. Dewey.
Vice President—Geo. W. Moore.
Secretary—E. D. Allen.
Treasurer—F. R. Stebbins.
Ex. Com.—D. D. Sinclair, W. Montgomery, Chas. Mitchell, Thomas McComb, Orson Green.

H. H. Pratt read a historical sketch of the town of Fairfield, and short addresses were made by several others. Among the relics exhibited was a two gallon jug over one hundred years old, which had passed through the revolution. In revolutionary times it was used as a rum jug but it now wears the red ribbon. The meeting throughout was a great success. At least four hundred pioneers were in attendance.

THE TECUMSEH HERALD.

TECUMSEH, MICH., OCT. 25, 1883.

LOCAL AND PERSONAL.

When does a hen become a rooster? When she retires at night.

A tramp recently sent to jail at Marshall for vagrancy, stated that he had traveled all the way from Colorado for 75 cents.

It is stated that the 50 invited guests at the Wright house opening at Alma, Gratiot county, recently, represented not less than $40,000,000 capital.

The New York Produce Exchange and the Chicago Board of Trade are taking steps in earnest to equip a new telegraph line from New York to Chicago.

Thimble-riggers have been rigging the ladies of Adrian. Two spruce looking young men go around pleading poverty and sell five cent washed thimbles at fifty cents.

Miss Cora Howlett, of Niles, and Miss Mattie Graves, of Cambridge cousins of Misses Annie and Carrie Powers, have been visiting at Mrs. Power's residence for a few days.

The ballasting gangs of Italians at work on the M. & O. road are getting to be a first-class nuisance. Lock your chicken houses and put a few blind cartridges in your wood pile.

Mattie Vickers made many friends here last Thursday evening in the leading role of 'Paste and Diamonds.' In arranging her route for another season we hope she will keep Tecumseh in mind.

Michigan Farmer: The editors of the Clinton News and the Carson City Record claim to have banqueted on ripe strawberries in the current month. It is evident that neither of them believe in a hereafter.

Saginaw is going to have a new daily paper. H. N. Mather, formerly of the Flint Democrat, will undertake the management of it at the earnest solicitation of a large number of the solid business men of the city.

John R. Clark commences an engagement this week of five nights in Rochester, N. Y. He will give his "To and Fro in London" the 240th time. He will be in this vicinity again the first week in November.

Last Tuesday while Giles Turner was driving across the railroad track at Slayton & Sons warehouse, one of his horses was struck by a hand car and broke his leg. The horse was shot soon after to end its sufferings.

Slayton & Kinney are home again, having bought one of the largest stocks of fine furniture ever brought to this county. When they get moved into the Cotton store on the corner they propose to have a grand opening.

Judge Howell officially announces the following terms of court in the First Judicial Circuit for 1884 and 1885. Lenawee county—third Tuesday in January; first Tuesday in April; first Tuesday in September; second Tuesday in November.

There will be a special communication of Tecumseh Lodge, No. 69, F. & A. M., on Friday evening, Oct. 26th, for work in the M. M. degree. A full attendance of the members is requested. By order of
P. J. FARLEY, W.M.
J. R. HIALEY, Sec.

Adrian Record: Oatmeal is said to be an excellent means of improving the skin. Do not take it internally but make a paste, daub it on the face, go to bed, allow it to dry and chip it off the next morning with a broadaxe. This is for ladies. We have it on the authority of the Morenci Observer. The editor tried it.

We find the following item in the Richmond, Ind., Palladium:

Fred. Morley, a civil engineer in the employ of the Mississippi river commission, has been the guest of Dr. E. Test for the past four days. Mr. Morley is an engineer of much promise, his work last year having received high commendation from his superior officer. The fall work on the "Father of Waters" begins to-day.

The Tecumseh Lumber Co. has just finished a large order of very fine work for two large residences which has been shipped south. The work is the finest ever gotten up in this section, all the doors being made of oak on one side and butternut on the other. The concern has also nearly finished all the depot material for the M. & O. R. R.

Justice Burridge accomplished land office business last Tuesday, and in consequence Wm. Cupples got 90 days in the Detroit house of correction, disorderly person. David Mehans 40 days in the county jail for assault during the burning of the boarding car last Friday night; and one Karns $15 and costs for kicking in Michael Wilson's door.

"Billy" Lehr started away very unceremoniously yesterday, stopped at Manchester and was married last evening to Miss Libbie Lehn, of the latter place. Billy has lived in Tecumseh for the last three or four years, is well known here and respected by every one. Miss Lehn is a sister of Mrs. Wm. Arnold and one of Manchester's fairest daughters. We wish the happy couple all success.

Anna Dickinson and her dramatic company are stranded in Detroit. The ladies of that city will give her a benefit soon.

L. F. Wheeler has returned from his first trip out with "Illuminated Rambles" which resulted successfully. He will try larger towns next time, and is now arranging for a series of his lectures in Detroit.

Mr. C. R. Henry, a whilom resident of Macon, and correspondent of the HERALD gave us a call last Thursday. He is now a resident of Au Sable, and is prosecuting attorney of Iosco Co. He and his wife started on a trip to New Orleans and other southern cities and on the way gave their old friends in Macon a call.

Chicago Inter Ocean: A very pleasant wedding was celebrated at the bride's sister's, Mrs. Lewis W. Zeliff, No. 808 Hubbard street, at noon Wednesday. The contracting parties were Mr. Chas. T. Elliott, of the Custom House, and Miss Minnie K. Spalding. The ceremony was performed by the Rev. Henry B. Ensworth, rector of St. Andrew's Episcopal Church. Only the immediate relatives of the bride were present. The happy couple at once departed for Detroit, Canada, and other eastern points for a honeymoon trip of about ten days.

A MODEL ESTABLISHMENT.

We paid a visit to the new and extensive establishment of S. W. Temple, whose main office is situated on Shawnee street a few rods west of the railroad, a few days ago, and was surprised at the extent thereof. His new brick planing mill and sash, door and blind factory, situate in the rear of his main office, is without doubt the most complete establishment in southern Michigan, without an exception. Here he has all the latest and most approved machinery for doing the business. No old style, worn out machines but those that will do the work of three or four of the old styles in a superior manner, and by saving the handling of the lumber three or four times he is enabled to do work at a less price than other establishments. He is now building a number of sheds near his mill to store lumber and his yards are now receiving a full line of lumber adapted to the wants of the people of this vicinity, and no man knows what those wants are better than S. W. Temple. In connection with his other business he also handles hard and soft coal of the best quality and sells it at the lowest possible figures. He has just put in near his office a fine pair of Howe's celebrated scales and his customers can rely on receiving 2,000 pounds for a ton every time. He has a side track of the L. S. & M. S. railroad within a few feet of his factory, lumber yard and coal bins, and thus saves the expense of handling and carting. If you have a large job of building or a small job of repairing be sure to call on Temple and get his figures before purchasing elsewhere.

THE LENAWEE COUNTY POOR.

Synopsis of the Annual Report of the Superintendent Thereof.

The Superintendents of the poor for Lenawee county have made their annual report to the board of supervisors. During the year ending with the 30th ult., 102 persons have been aided at the poor house, of which number 56 are still its inmates. During that time five deaths and two births have occurred in the house. The current expenses of the house have been as follows:

Building horse barn	$ 503 50
Repairs on house and engine	81 62
Paid county physician	195 00
Paid for labor on farm	182 73
Paid for whitewashing	25 00
Paid for farm implements	10 00
Paid for furniture	16 00
Paid keeper's salary	1200 00
Paid for supplies	1380 81
Paid for stock	29 00
Total expenditure	$3566 66

Products from county farm and all other credits, $1,111.45.

The actual amount expended at the county house, as stated in the report, less the permanent improvements, stock purchased, and credits, is $1,893.71.

During the past year there have been raised on the farm 425 bushels of wheat, 367 bushels of oats, 400 bushels of potatoes, 2000 bushels of corn (in ear), 20 tons of hay, and 10 bushels of clover seed. In addition to this the garden, poultry, and herd of ten cows produced $500. Thirty acres of wheat have been sown this fall.

There are now on the farm horses, cattle and hogs, to the value of $1,078.

The disbursements for temporary relief in the city for the year have been as follows: For supplies, $4,518.16; to supervisors, $344.75; for medical services, $199.00. The following disbursements for temporary relief in the county, have been made: For supplies, $5,174.45; to supervisors, $252.75; for medical services, $748.94.

Twenty-two insane persons have been supported for the past year at the Eastern Michigan asylum at a cost of $3,645.63. For the transportation of paupers there has been paid $130.80; the "tramp account" amounts to $206.10, and $52.83 has also been paid for office rent, fuel, etc.

The total amount expended during the year was $14,565.44, and the superintendents recommend that $14,000 be raised for the support of the poor during the ensuing year.

The Blissfield village council laid out a village drain the other day, which was to cross the property of W. A. Clark, but no arrangements for the right of way were made with Mr. Clark. When the workmen arrived at Mr. Clark's property they were not allowed to proceed, and a law suit will probably be the result.

An exchange observes that the greediest man after a newspaper is the one who is too mean to subscribe. He is always in waiting for the latest paper, and it is not two minutes on the owners premises when the non-subscriber pounces upon it, and never lets up till the last line is read and then casts it aside with the remark that he could make a better paper himself.

The annual field day of the athletic association of the University will be held Oct. 27; program as follows: Ten-mile walk, catch-as-catch-can wrestling, hop, skip and jump, throwing base ball, boxing heavy weight, standing broad jump, mile walk, half-mile bicycle race, mile run, lawn tennis, light weight boxing, three-legged race, single stick, tug of war, '86 vs. '87, 100 yards dash, collar-and-elbow wrestling, drop kick, Indian club swinging, quarter-mile run, fancy bicycling, clay pigeon shooting.

A member of the executive committee of the Detroit Art Loan who visited the Art Department of Chicago on Friday, telegraphed to General Secretary Farnsworth that he had secured $100,000 worth of paintings to be exhibited in Detroit at the Art Loan. Among them is a $25,000 Bougereau, a $10,000 Messionier, a $20,000 Fortuny, a $10,000 Van Marcke, a $10,000 Michelti, and two originals by Dore, besides twenty-four others of great merit. These will be an invaluable addition to the already grand display of artistic treasures in the Art Loan.

A MOUSE IN THE PASTE CUP.
